# Poung Pans Companion:

## Arithmetick made Easie.

Plain Directions for a Young Man to attain to Read, and Write True English, and Short Hand, or Characters. And Also.

Very Easie Rules for Measuring Land, Globes, Steeples, Walls, Timber, Stone, Board, Glass, and the like, whether Superficial or Solid, both by Arithmetick and Gunter's Line: The use of the Carpenters Rule, with Tables for the more ready Measuring by those, who have not Learned Arithmetick; With easieRules to compute the Cost of Building Houses, Walls, Oc.

The tile of Gunter's Quadrant, Dialling, Coloring-Work, either within or without Doors: Choice Monthly Observations in Gardning, Planting and Grafting, Angling, Catching of Birds, and Killing Vormine, Inditing Letters upon many necessary Occasions: Copies in Verse Alphabetically disposed, sufficient for a Writing-School: The seven Arts Explain'd, and the Wisest Saying of the Learned: A Map of England and Wales, the Ancient Inhabitants, with the many Conquerts thereof, with an Alphiberical Table of the Market-Towns, Shewing what Shire each are in, and their diftance in Miles from LONDUN, the Chief Roads thither, and how Noble the Gentry would be thought, if they would be at the Charge of Repairing them: Also many Choice and Approved Experiments in Physick, with the Making of English Wines. A Brief Discription of the Globe of the Earth: The Translation of the Holy Scriptures: The Prophelies of Christ in the Old Testament, subfiled in the New: The Messiahs Types, Titles, &c. Neatly Composed in Verse by a Minister: The Education of Children: The Duties of Families: The Mourner Comforted for the Death of Friends, together with many other things, to Encourage Young Men to the Love of Virtue, with a Table to find the Chiefest Matters herein; Written in a Plain and Fasie Stile, that a Young man (that lives in the Fear of the LORD) may Attain the same without a Tutor.

The Fifth Edition; by, William Mather.

Titus 2. 6. Exhort Young Men to be Sober-minded was Different, Study to be quiet. 1 Theff. 4. 11.

LONDON: Printed by J. Mayos, for S. Clarke, Bookfeller in George-Yard, Lombard-Street, 1609. Fens NoI A at 5

### A Loving EPIS,TLE

#### TO THE

### YOUNG MAN, my Reader, &c.

HE Kind Acceptance my two last Books have had with Young Men, has encourag'd me to comply with the Desire of the Bookseller, to compose this Fifth (or rather New) Edition, it being in a great measure new, or different from the former.

now made so Plain and Easie, that a Young Man, that can readily write the Nine Figures, may learn so much of the Rules thereof (as he may have occasion for) without a Tutor or School-master.

Excellently described by Fra Quarles, viz.

Be very circumspect (laith he) to whose Tuition thou committest thy Child: Every good Scholar is not a good Master: He must be a Man of invincible Patience, and singular Observation. He must study Children that will teach them well, and Reason must rule him that would rule wisely. He must not take advantage of an ignorant Father, nor give too much ear to an indulgent Grandmother, the Common Good must cutweigh his Private Gain He must be diligent, and sober, not too familiar, not too reserved; neither amorous, nor fantastick, sust without sierceness; merciful, without fondness. If such an one thou meet with, thou has found a Treasure, which, if thou knowest how to value, is invaluable, p. 82 herein.

II. As

II. As to the other Parts of this Book, the Contents may the soonest tell thee, in which is nothing (that I know of) that any true Christian will take offence at; nor will the Young Man take ill the mixing Verses herein, or at my plain Style; for I strive not to express my self in fine Words (the Error of most Scholars that write Books of Useful Arts) but as the Ancient in plain Words.— Good Wine needs no Bush, with my Author, Truth is so amiable of her self that she needs not curious dressing—Where there's most painting, there's the least Beauty. But

Did Learners know how Learning might advance, Then they would love it, and hate Ignorance.

Ignorance, 'tis said, was one of the Confequences of Adam's Fall, Gen. 3. 6. Because thou hast rejected Knowledge [saith God] I will reject thee, Hos. 4. 6. Their want of Knowledge, for the good of their Souls and Bodies, was because they rejected the Teachings of God's Holy Spirit, which he gave them, to instruct them, Neh. 9. 20. Act. 7. 51.

But mark. And unto man [God said,] Behold the fear of the Lord, that is wisdom; and to depart from evil, is understanding, Job. 28.

28. Prov. 8. 13.

So that a Young Man that fears the Lord in fincerity, may become as innocent as a Dove, and Wife to shun Evil, Matt. 10. 16. So may it be with the Old Man, if, by Grace, he is tound in the way of Righteousness, then his boary Head may be as a Crown of Glory to him, Prov, 16. 31.

Therefore Young Man ask Wisdom of God, Jam. 1. 5. and [he] will teach thee to prefit.

And will avoid the Company, as much as they can, of all those who regard not to live according to Christ's Divine Precepts in Holy Scriptures; rot minding to take [him] as their Example or Pattern of Patience, Meekness, Humility, &c. Mat. 5, 6, and 7 Chap. and 11. 29. Folm 13. 15. Phil. 2. 12. 1 Fob. 2. 6.

p. 234, 247. p. 59. N. 34. 47. 64. herein. IV. And Suber Young Man, who art subject or dutiful to thy loving and godly

Parents, as was the Bleffed Child Of Infants. Jesus, Luk. 2. 51. Act. 4. 27. let not wicked Persons prevail with thee to see craft Folly; for if thou once consentest, thou wilt be in danger of loofing thy first Innocency. For God condemns none before he fins, nor crowns any before he overcomes, Eccl. Hist. Epit. p. 139.

Rev. 21. 7+ Was not Abel, Seth, Enoch, Elias, Abraham, Feremiah, and John Baptist, and many others, Holy from the Womb? Gen. 5. 24. Luk, 1.

3

15. Children are an Heritage of the Lord, faith David, Psal. 22. 10. or 127, 3. Of such is the Kingdom of God, Matt. 18. 3, 4. Mark 10. 15. They cry'd Hosanna to the Son of David, Matt. 21. 15, To the Praise of God, Psal. 8, 2. A little Child shall lead into Innecency, Isa. 11: 6. VVhat! must Member learn Innecency of little Children? Yea, for they knowing no Law cannot break a Law, Ezek. 18. 20. Rom. 5. 13.

And taith a Son of the Church of England, The Devil is at a Less to deal with a Child who knows neither Good nor Evil by his Temptations.

So that

A Child, of about half a Year old, is faid to be the Map or Picture of a Man: His Soul's not yet blotted or defiled with Sin; his Body's white and pale: Whiteness is a Sign of Innocency, tho' he is one of old Adam's Branches; but as yet there is no bitter Fruit on him, few Men imitate his Innocency.

1

I

I

I

14

But when [he] comes to know Good from Evil, it's rare if [he] fall not from his first Innocency, as Adam did, by tasting, that is, by partaking of the forbidden Evils of this VVorld, which began in Satan and so to Eve, 1 30h 3. 8. he seeing his Elders in Years DO SO, agreeable to that Saying, viz. The Fathers have eaten sowre Grapes, and the Childrens

Teeth are set an edge, Jer. 31. 29, 30.

So comes [he] to lose his Innocency, wherein God created [him,] Gen. 1. 27. which will not be restored to [him] before he is baptized into Christ, by the washing of Regeneration, through Grace, Rom. 6. 3, 4. Gal. 3. 26, 27, 28. Tit. 2. 11. and 3. 5. by which

he becomes enabled to make a fincere Confeffion (with his Mouth) of his Faith in Christ Jesus, Rom. 10. 9 Thus

True faving Faith gives Victory over Evil, And overcomes the World, the Flesh, and Devil.

Then will [he] in much humility of Soul, as oft, yea, oftner than he eats Bread, or drinks any fort of Drink, remember our LORD's

Death, 1 Cor. 11. 26. and 10. 3, 31.

Thou may it be baptised, [or washed in Water,] and yet not be good, (faith Augustine;) thou may'st have knowledge, and remain vicious; thou may ft be called a Christian, and be none; but thou canst not love God, and be wicked; thou can'ft not love God, but thou must be hely and happy, 1 0. 4. 19, 20. See Sect. 21. in the Confession of Faith at Turner's Hall.

Yet the first Evil that a Mother learns her Child, is to perswade it to be proud of its

fine Apparel.

Be vigilent over thy Child (faith my Author of Education) in the April of his Understanding, lest the Frosts of May nip his Blossoms: Whilft he is a tender Twig, straiten him; whilft he is a new Veffel, season him: Such as thou makest him, such commonly thou shalt find him. Let his first L'esson be Obedience, the second shall be what thou wilt, Prov. 22. 6. 1 Tim. 3. 4.

If thou defire to fee thy Child vertuous, let him not see his Father's Vices: Thou canst not rebuke that in him, he beholds practifed by thee. Till Reason is ripe, Examples direct more than Precepts: Such as thy Behaviour is before thy Childrens Faces, such commonly is theirs behind their Backs, Eph. 6. 4.

hich he

Give him Education in good Letters, to the utmost of thy Ability, and his Capacity; season his Youth with the Fear of his Creator, and make the Fear of God the beginning of his Knowledge. If he have an active Spirit, rather rectific than curb it, but recken Idleness among his chief Faults, 1 Jim. 5. 13.

Above all things keep him from vain, lascivious, and amorous Pamphlets, as the Primers of Vice. As his Judgment ripens, observe his Inclination, and tender him a Calling that shall not cross it. Forced Marriages and Callings seldom

prosper.

If thy Fancy and Judgment (laith my Author to the Married) have agreed in the Choice of a fit Wife, be not too fond, lest she surfeit; nor too peevish, left she languish. Love so, that theu mayest be feared; Rule so, that thou mayest be: honoured. Be not too diffident [mistrustful] lest thou learn her to deceive thee. If thou feest a Fault, let thy Love bide it. Reprove her not openly, lest she grow bold. Rebuke her not tauntingly, lest She grow Spiteful. Proclaim not her Beauty, lest she grow proud. Boast not of her Wisdom, lest theu be thought foolish. Shew her not thy Imperfections, left the disdain thee, Prophane not her Ears with loofe Communication, lest thou defile the Sanctuary of her Modesty. An understanding Husband makes a discreet Wife, and she a happy Husband. P. 112. herein.

V. Again, saith a Son of the Church of England, concerning Education, Good Education would fortifie Children against Temptations, by the Help of God's Grace. The Knewledge of his Duty, and God's Grace, would make Vice look'd

look'd up in as an Enemy, and its Temptations suspected; it would supply the young Man with an Answer to the World, the Flesh, and the Devil. How can I do this Wickedness, and fin against God?

Joseph was young enough, and private enough to have play'd the Courtier; but his Heart was brimfull of Gratitude, and made him as great a Master of his own little Family within his Breast, as he was in Potiphar's House. All at his command! No Passion stir What, sin against the good Master I live upon! and the merciful God who by Miracles brought me hether! I may not, I dare not, Gen. 39. 9.

Therefore, fober young Man, remember chast Foseph, that faithful Servant, humble Master, and \* ten- \* And Joseph der-hearted Brother, who was made hast, for taught of God, by his Grace, his Bowels did to refrain from Evil Actions. yern upon his Brother, and

he fought where to weep, and he entred into his Chamber, and mept there, Gen. 43. 30.,

Do thou, O young Man, obey the Talent of Grace God gives thee, Eph. 4. 7. Tit. 2. 11. Matt. 25. 15. and it will be to thee a first seeking the Kingdom of God, Matt. 6. 33. that Satur may not prevail with thee to put off the forfaking of all thy Sins until old Age; when, alas! thou knowest not that to Morrow may be thine to repent in; for the Devil was a Lyer from the beginning, Joh. 8. 44. 1 Joh. 3. 8. For the longest time that any Man lives on Earth, is but a few Days, about 70 Years, saith Moses, Psal. 90. 10. A 5

of cans,

of ice k'd

Behold

Rehold How Short a Span Was long enough of old To measure out the Life of Man; In those well tempered Days, his Time was then

Survey'd, cast up, and found but threescore years (and ten.

The End When Scarce begun, And e're we apprehend That we begin to live, our Life is done. Man, count thy Days, and if they flee too fast For thy dull Thoughts to count, count every Day (thy last. Fra, Quarles.

Therefore, as it is a Fault in him that hath an Estate of Land, &c. to give, Wills to deferr the making of his Will, till his time to die draws so nigh, that either he can make none; or no other. than fuch, as may be question'd, after his Death, whether it was his, or no.

Much more is he in a greater Fault that deferrs the forlaking of all his Sins until the time for him to die draws nigh. Who then The as many have done, in their last Wills in writing (in an hypocritical Imitation of our bleffed I ord, and Martyrs last Words) bequeath his Soul to God; tho' [he] spent his whole. Time (almost) in the Service of the World, the Fest, and the Devil.

But, Sober young Man, Remember thy Creator now in the Days of thy Touth, Eccles. 12. 1. and, by the Help of God's Grace, fay to the

Enemy of thy Soul as the Christian Youth to an Evil Companion, viz.

The Flower of my Days don't think I will Give to the Devil, Lust for to fulfil: Shall Satan have the primest of my Days, And put off Christ with base and vile Delays, Until Old Age, and then at last present The Dregs of Time to him? I'll not consent. This is my choosing time, I have made choice, God's Grace I must obey, and bear its Voice : Besides, it's clear, my Days uncertain be, Old Aze, alas! I may not live to fee. Young Men are quickly gone; for I behold Daily as young as I are turn'd to th' Mould. It doth concern me then, with all my power, For to improve each Day; yea, every Hour I must provide me Oil of Grace in store, For e're a while I shall be here no more: For those that live in Sin, 'tis very clear, They Enemies to bleffed Jesus are. .

VI. But, young Man, whatever Promifes thou makest for leaving of Sin, thou art not able of thy self to perform them. Therefore, to be kept out of the Evils of the World, John 17. 15. thou must with all thy Heart and Soul, Deut. 11. 13. OBE Y, that is, Improve the Teachings of the

Talent, Matt. 25. 2.
Divine Wisdom, Prov. 1. 2, &c. 1 Joh. 5.
10.

Divine Word, Deut. 30. 14. Rom. 10. 6. Sure Word, 2 Pet. 1. 19. Revel. 19. 10. God's Love, Gal. 2. 20, 21.

Christe

Christ's Light, John 1. 9. and 3. 21. Act. 26.

Spirit, 1 Cor. 12. 7. God's Grace, Eph. 2. 5. 8. and 4. 7. Law, Rom. 8. 2. Anointing, 1 Joh. 2. 20, 27.

Called also Bread, Wine, Milk, Oyle, Honey, Life, Power, Rain, Dew, Water (figuratively) and other Names in the Holy Scriptures, [which are one] which is an Influence of God's Holy Spirit, that in measure, Eph. 4. 7. shineth into thy Soul, John 1. 5. from Christ Jesus, v. 17. out of [his] Fulness, he being full of Grace and Truth, v. 16. Col. 1. 9. and 2. 9. his Spirit being grieved if we sin, Ephes. 4.

Christ's Divine Grace being the Soul's Bread of Life which we ought daily to pray to God for, Matt. 6. II. and we shall receive more Grace for the sake of the Man Christ Jesus, Heb. 7. 24, So that some Instuence of the Spirit of Grace, Zech. 12. Io. Rem. 10. 29. is always ready to assist every humble Soul against the Wiles of Satan, Eph. 6. 11. and 5. 13. 1 Cor. 12. 7. Tit. 2. 11. p. 53, 72, 174, herein; also see I Pet. 2. 2. 2 Pet. 3. 18. 2 Gr. 12. 9.

And that the faithful Obeyers of the Divine

Grace [in themselves, that is,
Faith in each Soul for it self, Rom. 14.
Christ brings 12.] have by it (with the help

Salvation. of the Holy Scriptures) a saving Faith begotten in their Souls, Alls 18, 27. Heb. 5, 8, 9. a Faith in

Souls, Alts 18, 27. Heb. 5, 8, 9. a Faith in

34.

34. and 24. 19. All 2. 22. and 4. 11, 12, and 6. 14. and 10. 38. and 26. 9. Matt. 16. 16. John 1. 45. and 20. 29. 1 John 2.

The believing Soul not expecting Salvation, Justification, &c. Acts 4. 12. by its good Works, (tho' Grace helps) Rom. 3. 24. Eph. 2. 8. 9. [nor to be faved whilst it doth evil] but expects Salvation ONLY by the Obedience of Christ Jesus, Rom. 5. 19. Heb. 5. 8, 9. by what [he] did and suffered for Sinners, and what [he] now doth for them in Heaven,

Rom. 4. 25. 1 John 2. 1, 2.
Who his own felf bore our Sins in his own Bo-

dy on the Tree, that we being DEAD TO SIN, should live unto Righteousness; by whose Stripes ye were healed, Isa. 5. 4. 5. 1 Pet. 2. 24.

Rom. 5. 1, 11. 1 Cor. 1. 30. Gal. 3. 13. and 4, 5. Heb. 9. 12. and 10. 29. 1 Tim. 2. 6.

Eph. 1. 7. 1 Pct. 1. 18, 19. Tit. 2. 14. 1 John

Yea, the mighty God who ascended into Heaven, who maketh Intercession for Sinners, Isa. 7. 14. and 9. 6. John 1. 1. and 2. 1. and 3. 16. Luke 24. 6, 26. Joh. 6. 69. and 14. 3. Acts 1. 10, 11. Rom. 8. 34. Heb. 1. 1, 2. and 2. 9. and 12. 24. 1 Tim. 3. 16. 1 Pet. 3. 22.

And that He our Lord will come to Judge, the Quick, and the Dead, 1 Thef. 1. 10. & 4. 14. Matt. 25. 21, Mark 13. 33, 34. A&1.3.21. 1 Cor. 15. 12. Heb. 9. 28. Phil. 3. 21. To render to every Man, according to his Deeds, Rom. 2. 6. & 14. 12. 1 Pet. 4. 5. Rev. 22. 12. Therefore Sober Young Man, if thou committs Sin against the Checks, Reproofs and Coun-

cil of Gods Grace in thy own Conscience, thou Sins against God. Gods Grace, being a Light, Beame, or Stream, from Christ Jesus the Fountain, Zech. 13. 1. into the Souls of Mankind. that man may fee to walk in the Path of the Fust, Prov. 4. 18. [the chiefest Good that Man can know here I it shineth in the dark hearts of men, tho' Darkness [Sin] cannot comprehend it. John 1.5. But as man leaves Sinning it shines in the Soul more clearly, 170. 1.7. for it Teacheth to deny all Ungodines, Tit. 2: 11. And indeed it is the Root and Spring of all the good deeds done by Man, in the fear of the LORD, John 1.9, & 12.36. St. Paul was fent to labour to turn peoples minds, from Darkness [Sin] to Christs Light [Holiness] Acts 26. 18. Fohn 3. 19. Grace only worketh all our worthyness in us, and when God Crowneth our deserts, he Crowneth nothing elfe. than his own gifts, faith Augustine. Was it not Grace in that Great Emperour Antoninus, tho' a Heathen, that made him fay that which may put to shame feveral false Christians, that affirm, That there is nothing of God to direct Men that would lead bim out of Sin: For fays he, That there is an Effectual virtue in God, which acts in us, and operates all our good Actions, and all our good Designs, and which removes from us all oppertunities, and occasion of falling into Sin; adding, That that man is unhappy, that doth not observe bimself, and consider the state of his own Soul, Gen. 6. 3.

VII. But on the Contrary. Satan, the Old Serpent, called the Devil, or fallen Angel, who fin'd against God; that beguil'd Eve, Gen. 3. [The Original of Sin] is the Root or Spring of

ou

ht,

ın-

id,

be

an

rts

e-

or

I.

e

e

S

y\_

C

t

e

every evil thought, and evil Actions of Men: He's called also the Prince of the Power of the Air (the Ruler in Proud Ariey wanton People) or the Spirit that now worketh in the Children (Men and Women) of Disobedience, that is, Disobeyers of the Grace of God, in their own Souls, Eph. 2, 2, & 4, 27. Gen. 3, 15. Rom. 16, 20. I Pet. 5, 8, 9. Jam. 4, 5. 170. 3.10.

Eph. 5, 9. Gal. 5 16. 2 Pet. 1, 4, &c.

He also is busie in the Meetings of the Religious, on purpose to draw their thoughts into Earthly objects, that their minds may not silently wait upon God, to grow in Grace, and in the knowledge of the Man Christ Jesus, Job 1, 6. Heb. 7, 24. Yea, he moves many, who are unsound in Morals, to Preach or Declare many good Words, but wins not one Soul, to the faithful obedience to the Divine Grace, in themselves. He cares not how Religious any People seems to be; he knows he has them sure enough so long as they can commit one Sin daily, and that willfully.

Thus are many poor Souls Slaves to Satan, who will not believe that Christs Grace in them is of ability to cleanse their Souls from all Sin, as if Christs Power was not stronger than Satans, so will they not by Grace know and avoid the Depths of Satans, who too many take for an Angel of Light, Rev. 2, 24, & 12; 9. Zech. 3, 1. Alls 5, 3. For the consenting to one Sin is a giving place to Satan, Eph. 4, 27, & 6, 11. 2 Tim. 2, 26. Jam. 4, 7. 1 Pet. 5. 8.

The Devil is a slippery Serpent, saith one, whose Head, that is, his first Suggestion, if Men resist not, be Glides wholly into the very bottom of the Heart. And why God suffers Satan to try

he

the Faith of his People, see Page 53 herein.

Yet its no Sin to be Tempted by Satan, and his Servants, to partake of the Evils of the World, the Sin is in the confenting to Think, or do Evil. For our ever Bleffed Saviour, when on Earth, was Tempted [ yet without Sin ] Mat. 4, 7, & 22, 35. Heb. 2, 18.

VIII. With Grief, I am forced to observe. that Satan hath the greatest part of Mankind in subjection, and therefore need not use the fubtilest of his Wiles, Eph. 6, 11, to perswade them to evil Words and Deeds: As he doth to the Servants of Christ, Acts 5, 3, 2. 2 Tim. 2, 26.

IX. Some are lead by Satan into Adultery, Fornication, Murther, or Stealing, Lev. 20, 10. Hof. 4, 2. Matt. 15, 19. 1 Cor. 5, 9. Gal. 5, 19.

Heb. 13, 4. Fam. 4.4. Rev. 21, 8.

Some, are led by him into Covetouines, Cheating, and Over-reaching the Ignorant in Bargining and in Trading, causing them to flatter those that deal with them, with Titles, Cap, and Knee, or other felf-ended ways, Job 32,22. Fobn 5, 44. P. 6. Prov. 20, 14, P. 174, P. 56, N. 9, P. 62, N. 61. Herein which I suppose, made the Author of, the Present State of England, to write thus, Tradesmen in regard of the Doubleness of their Tongues, without which, they hardly grow Rich. Eph. 2, 25, & 5, 3. 1 Tim. 3, 8, Col. 3, 9. Heb. 13, 5. Jam. 1, 8, 2 Pet. 2, 14. Rev. 21, 8, & 19, 10.

X. Many People, Satan stireth up to Impatience, Malice, Anger or Revenge, Eph. 4, 31.

Cel, 12, 13.

It is a petty Faint, and Feeble mind, That in Revenge, doth any Pleasure find.

Going to Law for trifles, rather than end their Differences themselves, 1 Cer. 6, 1. or chuse their Neighbours and Friends, to end them for them, Deut. 1, 16, 17. Prov. 18. 13, 17. Matt. 5, 40, & 18, 17. P. 128, 174 P. 58, N. 34, & P. 61, N. 56.

In Some, the Old Serpent begets.

3, 18, 19. And Parence it causeth to Provoke their Children to Wrath, Eph. 6, 4. And Children to disobey their Parents lawful commands, v. 1. And Servants to be careless of their Masters Business, v. 5. Col. 3, 22. 1 Tim. 6, 1, 2, 1 Pet. 2, 18. And some Masters to be unjust to their Servants, Eph. 6. 9. And also to become Slothful Spend-thrifts, taking no more care of their Families, than Infidels, 1 Tim. 5, 8.

If thou wouldst have a good Servant, let thy Servant find him a good Master; let his Food,

Rest and Wages be seasonable;

let his Labour, Recreation and My Authors Attendants depend upon thy Plea- to a Master.

sure; Be not Angry with him too

long, least he think thee Malicious, nor too foon, least he think thee rash: Not too often, least he count the humorous; Be not too fierce, least he love thee not; Nor too remiss, least he fear thee not, nor too familiar, least he prize thee not.

Rebuke thy Sarvants fault in private, Publick reproof hardens his sname: If he is past a Youth, strike him not: He is not fit for thy Service that after wise reproofs will either deserve thy stroaks, or degest them. In Brief, whilst thou givest him the Liberty of a Servant, beware thou losest not the Authority of a Master. p. 113. herein,

XI.

XI. some, Satan causeth to delight in taking Gods Holy, Name in Vain (tho it brings them no profit or Gain) Exo. 20. 7. And Cursing, Swearing and Lying, yea sometimes, such Vile Wretches, will dare God to Damn them; O'! Horid Blasphemies, Hos. 4, 2. Eph. 4, 25.

Also the feeming Religious Ones (who have a form of Godline's and disobey Grace, the Power thereof suan prevails so much over that they give themselves often to Idle talking and Foolish Jesting, Eph. 5; 3. Fer. 23, 14. Mat. 12, 36: 1 Pet. 3, 10 and 4, 3, 2. Tim. 2, 19. Fam. 1, 25, and 3, 2. Rev. 21, 8, 27, p. 59. N.

9. p. 174. herein.

XII. Some, by the enticements of Satan, are moved to the vanity of Foot-Ball-Play; Or [Ringing of Bells, a Recreation used in no other Country, but England, saith a Learned Author] Or Cock fighting, Wrestling, Bowling, Cards, Dice, or other Foolish Games, Sports and Plays. Exo. 32, 6. (where many Idle words, are used, Mat. 12, 36.) on purpose to waste their precious time in vain, and some to the loss of their Estates too, 1 Tim. 5, 8.

The which ( too much Tollerated Sins) might occasion the said Author; of the Present State of England, to write thus; The English, saith he, especially the Gentry are so much given to prodigality, Sports and Pastime, that Estates are oftener spent and sold than in any other Coun-

try, &c.

Vices, which with their tempting smiles invite, Conceal their Teeth, wherewith they after Bite.

Yet on Sick-Bed, Some fuch Prodigals are made

ing

)-

made to Promise, That they will leave these Evilways, if God will be pleased to restore them to their former health, Beging of God for more time, Crying, O! the preciousness of time, &c. As may be read, of the Dying Speeches of Divers Great and Learned Men, in William Penns, [No Cross, No Crown] See P. 276. herein.

By which it appears that most People on a fick Bod are inclin'd (somewhat to the Reproofs and Counsel of God's Grace, which brings into their Remembrance the fins of their youth, Job. 20. 11. Isa. 25. 7. God's Grace leaving them without Excuse; who served Sin, that is, the Devil, all the Prime of their Days, Rom. 1. 19, 20. and 20 15, 16. p. 74, 245, 275, herein.

And I have known some such Prodigals that broke their Promises of becoming new Men after God had restored them to Health. God soon after permitted another Sickness to come upon them, and died. Yet frail Man (who regards not God's Grace) seldom takes warning

by another Man's Fall. See p. 276 herein.

But when Sickness comes upon them that fear the LORD in fincerity; see Pfal. 41.

3. Exod. 15. 26. Matt. 8. 17. P. 62. N. 68. herein.

XIII: Satan enticeth many of the Profeffors of Religion to delight in [Musick] vain
singing and Dancing. Such Folly once pleased
bloody Herod so, that John Baptist lest his
Life, Mark 6. 22, 23. Ames 6. 5. And we
read in Exod. 32. 19. that God destroyed about 3000 Dancers. And some Ancient Christians wrote, That so many paces as a Man maketh

keth in Dancing, so many paces doth he take to go to Hell. And where a Servant of Christ comes, the Musicion must be silent, or depart, Mitt. 9. 23, 24.

Dancing Maids (saith a Minister on Judges 21. 21.) are the fittest Matches for vile Miscreants. The Joy of the Hypocrite is but for

a moment, Job 20. 5.

Some Satan moves to take great delight to [Mountebanks vile Sins] hear a Mountebank (with his Fools) tell many Lyes, Pfal. 119.

37. p. 282 herein.

Mens Sins, lest thou partake of the Plagues that will certainly come upon the wilful Sinners, Jer. 9. 5. 1 Tim. 2. 16. I Pet. 4. 4. 2 Pee. 2. 14. I Thes. 5. 11. 1 John 1. 7.

XIV. In fome Satan has got such a Dominion, that he draws them to the wickedness [stage Plays] of seeing the Evil Actions in Puppit-Plays, Stage-Plays, or Comedies, (where many Lies are uttered;) and the reading improfane Play-Books, and Lying Romances, those Primers of Vice which has bewitched many Persons into Atheism, as Astrology hath done, and now doth, Eccles. 5. 2. 2 Time 2. 26 p. 172 herein.

XV. Some, by Satan and his Servants are perswaded to throw away [Wagers and Lotteries] their Money by Wagers and Lotteries, both which being of the nature of Pocket-Picking; covering to get another Persons Goods or Money for nothing, like Gaming, Covetous-ness being Idolatry, which Evils the seeming. Religious are guilty of also, Exod. 20. 17. Matt. 12. 36. Col. 3. 5. 1 Tim. 5. 6. 2 Tim. 3.

4. p. 174 herein; which shews that their Religion is vain, Psal. 39. 1. Fam. 1. 26.

sin's Pleasure's like a Flash, is quickly past, But who can tell how long the Pain may last?

XVI. Some the subtile Serpent enticeth to make a God of their Bellies, by eating and drinking [Gluttony and Drunkenness] more at Times than temperate Nature requires; by which Excess, many have brought upon themselves, Gouts, Dropsies, Consumptions, and other uncurable Diseases, and some to untimely Death, Deut. 29. 19, 20, 21. Prov. 23. 29, 30. Hab. 2. 15. Luke 21. 34. Rom. 13. 13, 14. 1 Cor. 6. 10. Gal. 5. 21. Phil. 3. 18, 19. The Woe is to them that continue at strong Drink till it inflame them, the not drunken, Isa. 5. 11.

XVI. Satan moving in the Hearts of many, which causeth them to take care how they shall more sinely cloath their Bodies, [Pride.] wiring Jezabels, or the Devil's Towers, 2 Kings 3. 90. to make them stand high before they set them on their Heads, to seem like Creatures for Sale at a Market. Some Dissenters (so called) to uphold the Devil's Kingdom of Pride in Women, have wooden Images painted in their Shops to help them to make and dress the Jezabels Towers, which they will not own to be any of the Pemps and Vanities they promised by their Baptismal Vow to forsake, Satan hath so blinded the Eyes of their Understandings.

Fools begin Fashions (saith a Clergyman) and wise Men not only follow but authorize them.

The

### the A Loving Epistle to

The Body is the Shell of the Soul, (saith my Author, Apparel is the Husk of that Shell; the Husk often tells you what the Kernel is. That is, If the Root of Pride (viz. Satan) were not in the Heart, no such vain outward Branches would appear, Isa. 1. 17. 1 Tim. 6. 17, 18. and 2. 9. 1 Pet. 1. 14. and 3. 3, 4. 1 Job. 2. 16. and 2. 8.

Also Satan so puffs up some with Pride, that they must have silver Vessels to drink out off, and have very costly Furniture in their Houses, yea, and finely paint or cloath the Walls in them, whilst the Poor wants sufficient cloathing for their Backs, not regarding to make such Feasts for the Poor, as Christ commands,

Luke 14. 12, 13.

But the Poor in Spirit are Blessed, if their wills and defires are refigned unto Gods will, and come to be made able, with the Ingenious Abraham Cowley, to say, viz.

If to no Feast abroad then lovest to goe,
Whil'st Bounteous God, doth Bread at home bestow;
If thou the Goodness of thy Cloaths, doth prize,
By thy own use, and not by others Eyes.
If only safe, form Weathers, thou canst Dwell,
In a small House, but a convenient Shell,:
If thou without a sigh, or Golden Wish,
Canst look upon thy Beechen Bowl, or Dish.
If in thy mind, such Power, and Greatness be,
The Persian King, a Slave, compar'd with thee.

Matt. 6. 28. Phil. 4. 11. 1 Tim. 6. 6, 8, Heb. 13. 5.

XVIII. Some, the subtile Serpent leads into Idolatery, to I ove and Worship, something more than Christ Jesus; Every Mans Gol, saith Jerom,

tom, is that he serve and love
best, John 14. 15. as apears
by the Unholy Lives of Hypo- and the true.
critical Worshipers: So that
all those to whom the Divine Grace is not the
Guide, Worship they know not what, John 4. 10,
20. My good Child know this, thou art not able
to walk in the Commandments of God, and to
serve him without his special Grace, which thou
must learn at all times to call for, by diligent
Prayer, ---- Grace brings a Death unto Sin, and
a new Birth unto Righteousness [The Catechism
of the Church of England]

wr Note, The least measure or degree of Gtace in the Soul (tho' but one Talent) is special Grace; to that Soul, that labours to improve it, by waring with it against the Temptations of Satan, to Sin, Psa. 27, 14, and 130, 5, 6. Isa. 40, 31, and 66, 2 Hos. 12. 6. Matt. 25, 20. 1 Cor. 12, 9.

Jam. 1, 17.

XIX. Many by Satans Wiles, Eph. 6, 11: are enticed, to joyn themselves, to such a Religious Society, as best agrees with their Gain, in Trading, tho' they Hypocrites. know that their Lives, Doctrines, and Practices, are contrary to Christs Precepts in the Holy Scriptures, Isa. 29, 13, and 58, 5. p. 174, herein; Such commonly, are for imposeing on Scriptures Practices upon the True Christians, which give offence, Mat. 18, 7. Luk. 17, 1,2. which is the cause, why the True Christians draws from their Fellowship, 2 Thef. 3, 6. Eph. 5, 11. 2 Cor. 6, 17, 18. Ifa. 5, 4, 7: Yet Love ought to continue, Heb. 12. 14. So that a small Assembly for Worship, is as acceptable to God, as a great one, if they meet

nto ore Je-

m,

in the Name of Fesus, to grow in Grace, Mat.

1, 21, and 18, 20.

But Hypocritical Worshipers who seek not Peace with all Men, Heb. 12, 14. are not fatisfied, if other Persons are not compell'd to their outward form of Worship, altho' Christ (of whom they assume the Name Christian) used no outward force to his Brethren after the Flesh to believe in him. John. 7, 5.

In respect of Religion, Persecution is Abominable and in respect of Polacy, the greatest of Extravagances. See p. 253. Vol. 8th, Monthly Mercury.

Therefore, Soler Young-Man, have thou no Religious Fellowship, with those Persons that plead for Sin during Life, Rom. 6. 2 Pet. 3, 16.

Jobn. 2. 8.

And if fuch Persons tell thee, that such, or fuch Religious Duties, or outward Observations,

thou ought to Practice, be thou still and quiet in thy Mind, 1 Theff. 4, 11.

waiting at the Thrown of Grace for Council, Is. 30, 1. Looking unto Jesus the Anthor of true Faith, Heb. 12, 2. until thou knowst thy Duty; For what is Prattifed by thee, and not

in Faith, is Sin, Rom. 14, 23.

But if it shall happen, that thou yet remains in doubt; Turn to the Apostle, who tells what pure Religion is, Jam. 1, 27. (thro' Faith in Jesus) agreeable to Mic. 6, 8. So may'ft thou by the help of Gods Grace and Holy Scriptures, bekept from bowing to Man's Imaginations, I/a. 29, 13.

Therefore Young-Man, Cumber not thy Mind. with Studying the many Scholaftick Subtilties, or Distinctions (the Learned in the Languages, make

about the Mysteries of Religion,

Subtilties.

Scholaftick Rom. 14, 1. Eph. 4, 14, 1. Tim. 1. 4.) but rather do thou stand in awe of God, and Sin not, and thou art

fate,

fafe, thro' Faith in Christ Jesus, Psa. 4, 4. and 33, 8, and 119. 161. Rom. 10, 9.

I Love not Doctrines in Divinity (faith one) which fland so very much upon Quirks, and Subtilities --- of the same mind was Erasmus, who says --- That it was never well with the Christian World since it began to be a matter of so much Subtilty, for a man to be a true Christian.

XX. And Sober Young Man, if by the help of the Divine Grace, thou hast attained to a faving Earth in our Lord Telus Christ.

Faith in our Lord Jesus Christ, a Faith that gives Victory over Satans Temptations to Such that dare not Sin: Thou wilt not fear that Read a Book of Conthou shalt be hurt, or be detroverse.

Ignorance, being the Mother of Devotion, (as among the Papists) amongst all that are either over-aw'd, or afraid to see, butthat Light, Grace, or Spiritual Knowledge God hath given them, Eph.

4. 18. p. 25, herein.

o! Traffithy own, and not anothers Eye.

But if there be an occasion of contending, (saith my Aushor) let it be done with Respect and Meekness, and in such terms as to propound your Opinion, and not Magestrically, and in a stile of Authority to Establish its But as the Romans gave their Judgment, Ita videuur; It appeareth so to me: For Men are not easily convinced of any thing, by others discoursing imperiously p. 156. Rom. 14. 1, 2. and 16, 17. 2 Tim. 2, 25. Eph. 4. 14. Col. 2: S. 1 Pet. 3, 9.

Jude. 16.

XXI. And dear Young-Man, if thy mind depart from Watching, and waiting in the Divine Grace, Mark. 13, 33. Satan will make thee to forget the Redemption our Lord Jesus of Nazareth wrought for thee in his own Person [without thee] to make thee happy, in Redeeming thee from all iniquity, 7ito 2, 11, 14. p. 11. I say, that if such good Thoughts depart out of thy Heart, Satan will soon fill thy Heart with vain, airy, wanton Thought, or else with Evil Melancoly Thoughts. which hath ruined the Bodies, and its to be feared the Souls too, of many Men.

Evil Thoughts being the Seal of Evil Thoughts he Serpent, and in them, are first Mans great Ehatched all the Wickedness that 2209214. hath been, now is, or that shall be committed in this World; And many a Poor Soul, by harbouring them in their Hearts, have been brought into Athiefm, Distraction, or Maa-

refs, [ which are one ]

Therefore by the help of the Divine Grace, (the ·Gift of God in thee, John. 4, 10. 1 Tim. 4. 14) Labour to have thy Heart fill'd with the Goal Thoughts of Christ Jesus, (as above) that there may be no room left for Satan, in thy Heart, for Evil Thoughts; For no Man now on this fide the Grave can fafely affirm, that he is at all times free from the Temptations of Satan; who when he neglects waiting to the Divine Grace, (and some butward things fall cross to his mind) he is stir'd up sometimes to the Sin of Anger, or Revenge, ph. 4. 31. Col. 3. 8. But the Christians Armour, Grace, foon relifts Satans movings to Anger, (if pply'd to) Jam. 4. 4. 1 Pet. 5. 8.

Jeremiah's Cry to Rebellious Jerusalem was Wash by Heart from Wickedness, that thou mayest be Saved: low long shall thy vain Thoughts lodge in thee? Jer. . 14. p. 55. N. 4. herein: So that Vain Thoughts

tho' put into us by Satan) become Sin in us, if we consent that they shall abide in our Hearts, ecause they are Mans great Enemy, Mat. 15, 19.

But Young-Man, if thro' thy neglect of Grace, the Star that leads to Jesus) Satan has fill'd thy Heart with Vain, Evil, Melancholy Thoughts, (yet one are Melancholy, whilft they keep the Eye of heir Souls to the Divine Grace) Oh! turn to race for help, and these Comfortable Portions if Holy Scriptures, Job. 42. 1, 2. Pfa. 10. 4. nd 94, 19. and 119, 59. and 139, 23. Prov. 2. 5. and 15. 26. Fer. 5. 22. Amos. 4. 13. Mal. . 16. Mat. 9. 4 and 10. 19. 2 Cor. 10. 5.

I

Idolatry, to plead for Sin, Oc.

Tis great pity, that their Knowledge should so pusse their minds up with Pride, in thinking their minds too high to stoop them so low as to obey, and be Taught by that which reproves or checks them in their Consciences for Sin, calling it the Ckecks of a Natural Conscience; when they say themselves, Nature is altogether Sinful; Then how can Sinful Nature Check for Sin? For it Satan cast out Satan then his Kingdom cannot stand.

But this Divine Grace that reproves for Sin in the Conscience, is the Spiritual appearance of Christ Jesus, which the Nominal Christians despite, as not sufficient to cleanse the Soul, (if obey d) from all Sin; Even as the Jews, outward despited his Person, casting contempt upon him as much as they can, calling him the Corpenter Son, Matt. 13. 55. Mark. 6 3. So that all remain in Error, that will not obey the inward and Spiritual Grace, which alone is able to make them acceptable to God.

XXIII. As to the Jews (who continually Curse the Christians) see pag. 148 herein

Jews. And that they were to be a Derifon to all Nations, as indeed they have

a long time been, and now are, for Cructfying the Lord of Life, which was Prophetied of by Esdras (as faith Institute Martyr) where he declared the Eaw of the Possiover, (in these Words) which the Jews left cut of our Bible, viz.

and Esdras said unto the People; This Passoveriour Saviour, and our Refuze, and if you think, and call to mind to restorehim, being cast off in a Sign, and then shall place your hope in him; This place shall no yet for fashen for ever, saith the Lord of Hosts; Bu

if ye shall not believe, nor hear [his] Words, Teaching, and Preaching, ye shall be a Derision to all Nations.

And in Pfa. 96. 10. The Lord Reigneth from the Tree, [or Tree of the Cross, 1 Pet. 2, 24] the

Jews left out the words [ from the Tree]

XXIV. As to the Turks, who prefer their Scriptures or Writings, called the Alcoran, before our Holy Scriptures; Their Turks.

Alcoran, being given forth in the year

of our Lord Christ, 630. from the movings of Satan in their Prophet Mahomet, who was made Captain to the Saracens, and that for the Jews unbelief of the Messiah being come in the Flesh: They Conquored Syria, Jerusalem, Persia, Asfrica, and Asa, in 30 years space.

Their Prophet Mahomet, 'tis faid, had a Monk alfo to help him in the Composing their Alcoran.

They mixing some good words amongst the Errors, the sooner to be credited by Ignorant People; The Heads in brief, are as Follows.

I. Every one is to believe, that God is a great God, and Mahomet is his Prophet: Abraham the Friend of God, Moses the Messenger of God: Christ the Breath of God, of whom the Virgin Mary grew with Child, by smelling to a Rose, and was Delivered at her Breasts.

II. That every Man Marry (as many Wives as he can maintain) to encrease the Sect of Mahomes.

III. Every Man must give of his Wealth to the Poor.

IV. Every Man should make his Prayers five times a Day.

V. That every Man keep a Lint, one Month in the Year.

Lastly, Do unto others as thou would be done unto thy self; and after this Life, thou shalt have all the Carnal Pleasures in Paradice which thy Heart can desire.

Thus the Turks, or Mahometans think to carry

proves or Sin, when Sinful; 1? For cannot

their Senfual Pleasures beyond the Grave; fo dot the false Christians Err, in thinking that after thi Life of Sentual Sinful Pleasures is ended, they that

enjoy a Bleffed Spiritual Paradise.

In Brief, the common People, belonging to the Great Turk or Emperour, must needs remain in Ig norance, (the Root of Err) while he admits from to expound the Alceran (or any part thereof fave his Muftie, Pope, or Chief Priest, together wit his not permitting Learning, Printing and Discour

fes about Religion.

XXV. As to the Papifis, I mean those of them that prefer the Books written by some of their Monks (now Deceased whom they call Saints) e qual to, or before the Holy Scriptures, of the Praphets, Christ and his Apostles, which they hide from the Vulgar, leaving out, 'tis faid, out of their Catechisms the Second Commandement, Exo. 20. be cause it forbids bowing to Images.

The Priest confest her Sins.

One of their Saints they call St Terela; Whenever the Lord ( faith to whom the (be) - commanded me anything, if my Confessor told me another, I turned to the Lord, and told him, that I mul obey my Confessor, afterward his Ma

jesty returned to him, to the end he might enjoin it me. The Lord oftentimes manifested to the Vene-

rable Mother of St. Joseph Saith Molinos [ a Nun \* ] That she should rather obey her Spiritual Father the Spanish Priest. than himself. [History of her

Life, Sect. 24]

To the Venerable Sifter, Catherine Paulucci, the Lord also said one day to her - You ought to go to your Spiritual Father, with pure and sincere Truth, as if you came to Me, and not to enquire whether he be, or be not observant; but you ought to think, that he is Governed by the Holy Choft, and that he is in My flead -- adding -- when Souls shall observe this, I will

nit permit, that any be deceived by him. [Her Life,

2 Ch. 16.

O! Divine Words (faith Molinos) worthy to be imprinted in the Hearts of all those Souls who desire to advance to Perfection; see p. 67, 87. in Molinos's Book, called Spiritual Guide, Printed in English. Anno, 1688.

It's to be Admir'd that Molinos, and his Ecok, should convince so many Unmarried Priests, or Confessors (so called) of the Church of Rome, and they to periwade so many Nums to affest a State of inward Quietness, with Heart-Prayer (and therefore were called Quietests) which is the true worship of God, that is, in Spirit, and in Truth, John. 4, 23. And so come to be made able, as David, to Pray, saying - As the Heart panteth after the Water Brooks, so panteth my Soul after thee O God, Pio. 42.

1. and 40. 31. and 30. 7. and 66. 2. Gen. 24, 45. 1 Sam. 1. 13. Sol. Song. 2. 3. Lam. 2. 18. and 3. 28. Jer. 10. 25. Hos. 12.6. Mat. 18. 2. Phil. 3. 3. and others.

Note, That the Nuns (above-mentioned) were certain Virgins, who by the Subtilty of the Priests were

cci, the bt to go Truth, ether he that he

in My , I will

Quietist. been) If they had in Truth stay'd their minds in Quiteness, I Thess. 4.11 waiting in Grace (the feet of Jesus) their minds kept out of vain Though's (by the help of Gods Grace) as the Righteous in all Ages did; Medicating of Gods unspeakable Love to Mankind, in given his Son to Die, to make them Capable, how that by his Grace they may become Happy, by being redeemed from iniquity, and by Faith witness their Souls washed from all Sin, in his Blood, I Jo. 1.7. I say, if here they had fixt, the Gates of Hell could not have prevail'd over them as it now doth.

But Molinos, and his great Admirers, was got but a very little way out of Idolatry; For he Vindicated the Mad Enthusiams of the said Popish Saints, that is, such as was for making People believe, they could talk with God when they

would, even as one Man talks with another.

Also his Gross Belief, that the said Nuns ought to obey the Priest or Confessor rather then God.

Likewise, his owning that the Bread and Wine (they use as a Sacrament) are changed into the Natural Flesh and Blood of Jesus of Nazareth, as soon as the Priest had spoken some words over it.

Which Gross Error, 'tis said, Barrs the Deor, both from the Jews, and the Turks, from turning Christians: The Turks thinking the Papists worse than Canibals, that is, a People that formerly

eat Men for eating their God.

Lastly, So that it is impossible, that the Priests, Confessors, and the Preachers, of the divers sort the Religious Societies, should Unite, in the true Love of God, and to each other, before they obey the Divine Grace and Christs Precepts in the Holy Scriptures; And as any of them come to do, such will take no Earthly Gain for directing People to the same sure Guide, and Teacher; Except for their Extraordinary Necessities, 2 Thess. 3, 8. But will freely call to the People, Saying - Come

ye, and let us go up to the Mountain of the Lord, to the House of the God of Jacob [Grace] and he will teach us of his ways, and we will walk in his paths --Is. 2. 3.

XXVI. Therefore Sober Young-Men, and Young-Women, Phil. 4. 3. Let Grace and the Holy Scriptures be thy Rule of Faith, and Life, Gods Grace being a Teach-Preachers or er, that no Man can deprive thee Teachers off, 1sa. 30, 20. yet thou may st through disobedience wholly deprive thy Soul of the Teachings thereof; And be affured, it is a sufficient desence against all the Snares of Satan, gives Faith in Christ Jesus, proved by St. Paul, and the Righteous in all Ages, 2 Cor. 12, 9. Eph. 2

5. 8. 170. 3. 9.

Gods Grace being a furer Guide and Leader than

any Man Preacher or Teacher in this Age.

For an Old Preucher of Note, a Presbiterian, faith to his Hearers thus -- I am afraid the Sermons you

hear -- Son, in p. 166. herein.

Again, saith he --- I hardly ever heard of a Man that was Converted by Generals; it is the Particular Application that Works upon the Heart. Nathan, as long as he told David of his Sinin a Parabolical way, David was not wrought upon, he was fain at last to tell him; Thou art the Man, 2 Sam. 12. 7. Then David confession his Sin. You shall seldom hear of a General Sermon do good.

Observe, Christian Reader, How the old Preacher camplains of his Lean, Hungur-starv'd Hearers, who are so full-fed with Sermons, yet remain Lean in Knowledge, and Lean in GRACE: yea, tho' some of them sometimes hear four or five Ser-

mons on a Sabbath day.

Answer, Its no wonder at all (to any true Chrisfian) for Lean and Ignorant they certainly remain, as to the chief concerns of their Souls, until they believe in Christ Jesus, by faithfully a 5 obey-

ts of true y o-

obeying his inward and Spiritual Grace (mentioned in the Catechism of the Church of England, as the substance of Religion, Tit. 2.11. tho' they should hear four or five Sermons (of Mens making) every day as long as they live in this World. —But,

if Preachers obey d Grace, with Heart and Mind, Their Poor Hearers would not long be Blind.

The Instruction of Words is not so Powerful as the Exhortation of Works for if they Teach well, and neglect to do well, they shall hardly profit their Hearers, Eccl. Hist. Epit. P. 137.

Let us declare and profess what we will, Men will judge of us after all by our Works, saith a Clergy man, and so will God too, and so will [he] whom he has appointed to be Judge of the Quick and Dead; Christ Jesus, who in the last day will return this Killing Answer to all formal Hypocritical Professors, that shall then begin boldly to take acquaintance with him, upon the Account of some outward Priviledges; I tell you, I know not whence ye are, Depart from me all ye workers of Iniquity, Mat. 7. 23. p. 169 herein.

So that it is a Dishonour to God, a Scandal to Religion, and a cause why many become Athiests; that men are permitted to Preach and Teach the People, who are unsound in Morals, yea, guilty

of some of the Evil above-mentioned.

Therefore if none were permitted to bear the Pafels of the Santhuary, but duch as were Holy and without blemis; then furely, they must be Holy in all manner of Conversation, that can profitably dispence Gods Jewels [Holy Scriptures] to the People.

But to return to the said Old Preacher, who (after his many years Practice in Preaching) was in the right at last, that is, Generals, or Publick

Sermons, or Speeches, rarely converted any Man; but particular Application may as in the Example

of Nathan to David, as above.

So that it may be supposed that when [he] gave that excellent Advice, He might Remember the Valient Bishop Latimer, who knowing that K. H. VIII. was an Adulterer, &: Sent him a Writting (so did Elijah to K. Jehoram, 2 Chro. 21.12.) that is, a New Testament, with its Inscription on the Covers; Fornicatores, & Adulteror, Judicabit Dominus: Whoremongers and Adulterers God will Judge, Heb. 13, 4. So plain was he in reproving the King.

And shall the Preachers or Teachers Now fee Gods Laws broken, His Holy Name Blasshem'd, and they affraid to be on Gods side, to all for him, and continue so Slavish as not feek (to the utmost of their Abilities) to have Vice punished (without respect of Persons) on their Guilty

Hearers .

God fays to the careles Watch man, Eze. 33. 8. that if any Soul Perish by his negligence, That Soul shall be required at his Hands [ Author of the whole Duty of Man] Lev. 19. 17. 1 Tim.

The Sins of Ministers who serve at Gods Altar, and watch over the Souls of Men, whose Blood will be required at their Hands, if any of them? Perish through their Fault and Neglect; See Dz.

Tillotson's Work, p. 461.

Therefore it is the Duty of every publick Preacher, Teacher, and Elder, in every Church, who ought to be good Examples, Phil. 3. 17. and that are to give an account, at the last day, of their Flocks. 2 Th. fl. 3. 9. 1 Per. 5. 3. Ought in Daty to God, and in pitty to Erring Souls, make dilagent Inquiry into the Lives and Conversations of their Harrers and Juch of them as they know

ful as.

who was blick

Guilty of Wooredom, Drunkenness, Swearing, Gaming, Pride and Family Discords, or other Sins against the Liws of God, and the wholsome Laws of Man, 1 Tim. 5. 15. I say the Preachers or Elders should go to their Houses, and Admonish them again and again; and if after all private means, he, she, or they refuse to turn their minds from the evil of their ways, which they may easily do if they apply their minds to the Divine Grace, in themselves, which shines into their Souls, John 1.5. from Christ Jesus, the good Samaritan, who soon would heal their Sinful Souls if they would turn to it, Tit. 2. 11. Luke 9. 23. and 10. 33. 2 Chro. 7. 14. See part the VI. before, and p. 174 herein.

But if the Guilty Person or Persons continue in their Sins or Evil Courses, without any true sign of sincere Repentance, then the Preacher or Elder, if he is Gods servant, will use means to get such obstinate sinners before the Christian Magistrate, who are a Terror to Evil-deers, Rom. 13. 3. 4. that they may be punished according to the Heinousness of the Offence, which if timely done, may be a means to prevent his or theirs going into the same Evil again, or other Gross sins for the time to come, especially in Young Men; But it is great Ignorance in Elderly Men, not to know the Laws of God and Man, against San, Deu, 1. 16, 17. Pro. 16. 31. 1 Tim. 3. 3, 4.

And yet, How many are there whose place and duty it is to correct Vices and Immortalities of cathers, who are far from being Examples of Viresue theraselves, and therefore it is no wonder that there is so lame and unequal a distribution of Justice in the Nation; and that the Magistrates are so cold and stack in discountenancing of Vice, and Impiety, and putting the good and wholesome Laws made against them in Execution. See page in the said Dr. Tilletsons Works.

If

Toung Man, my Reader.

If being a Magistrate thou connivist at Vice, thou nourishest it; if thou sparest it, thou committest it, what is not by thee Punish'd in others, is made Punishable in thee; He that savours present Evil entails them upon his Posterity: He that excuses the Guilty Condemns the Innocent [Fra. Quarles] Vice is nourished, and gets life by covering it, saith a Heathen Writer,

Oh! What great need there is, that the Magifrates (every where) should arise in the Love of God, in the Power of his Divine Grace, and stand up for Gods Kingdom of Righteousness, that S.s. tan that Grand Enemy of Mankind, might no longer Rule as Lord and King in the Souls of People.

That this Sinful Nation, might no longer provoke God to bring his Judgments upon it, Ifa. 30. 1. And turn a Fruitful Land into a Barren Wilderness, for the Wickedness of them that dwell therein, Psa. 107. that he bring not such a Coldness upon the Earth, that the Corn, cannot Ripen in the Ear, as of late has been in some Countries.

But the Merciful God, for the sake of his Dear Son, our Lord Jesus Christ of Nazareth, and those that truly and sincerely believe, and obey his Grace; doth yet spare this sinful Nation, whose sins are as Sodom and Gomorrha, which God destroyed with Fire and Brimstone from Heaven, because of their sins of Whoredome, Drunkness and Pride, &c. making them an Example to those that after should live Ungodly, and delivered just Lot, vexed with the filthy Conversation of the wicked, 2 Pet. 2. 6, 7. p. 245. herein.

To Conclude, O! Sober Young Man, my foul takes care of thine Immortal Soul, by intreating thee, as above, to choose the Divine Grace, the Gospel of our Lord Jesus Christ, Eph. 3. 2. hath enlighted thy Soulwith, for thy chief Guide

## A Loving Epistle to the

and Teacher; it will Teach thre nothing contrary to Christs Divine Precepts in the Holy Scriptures, but to live consonant thereto.

Oh! therefore do thou own it to be the Voice of the Son of God, John 5. 25. which shines in thee, to help thee to relift all the Temptations of Satan to Evil, Neb. 9. 20. it cauleth trouble in thy Heart after thou hast told a Lye, or done any wrong to any, tho' it be but for a Farthing; If thou faithfully obeys the gift of Grace with all thy Heart and Soul, Dev. 4. 2). Acts 26. 18. God will accept thee, for Christs fake, Gen. 4. 7. and receive more Grace, more of the Power of Godlinels, to relift Satan, from Christ Jesus the Fountain, whence all Mercies and good Gifts come Mat. 6. 11, Zeeb. 13. 1. So may ft thou Live in happy Content and Peace with Melodious Prailes in thy Heart to the Lord whilft thou remainest here, Pfal. 25. 12, 13. & 26.3. & 121. 8. & 119. 165. Phil. 4. 4. Heb. 13. 5. And hereafter shall sie down with Abraham, Ifaze and Jacob. in the Kingdom of God, Luke 13. 29. Pfal. 145. 13. Mat. 8, 11. and 13, 41. and 25, 3, 4. p. 17, 4. herein.

To Jefus Christ, be Praise and Glory given, Wiose inward Teachings leads us unto Heaven.

The above Christian Advice, in the fear of the Lord, I give the: O Sober Young-man, knowing the Content and Happiness of a Righteon's Life and Conversation, and being stired up thereunto by the Love of God, who gave me this unexpected oppertunity, to him be the praise.

And be affired, that the Soul, wherein the Divine Grace, is the Guide, that soul very much defires, and prays to God for the General good of All People, Gods Creation, John. 14, 15, 170, 3, 18

and 4. 7.

Young Man, my Reader.

st. Paul, in his Epistles, committed all to whom he wrote, To the Grace of God, as that which was sufficient if obey'd tokeep them from Sin, and to give them a Sincere Faith, in our Lord Jesus Christ, Eph. 6. 24. Grace be with all them that love our Lord Jesus Christ, in sincerity.

# Postscript.

AND, Sober young Man, if thro' Grace (God's Love) thou com'ft to witness any Profit to thy Soul, whilst thou art reading in this Book, give God the Praise, and communicate thy Zeal against all finful ways to other young Men; and if thou winst one Soul to the Obedience of God's Grace, thou art Happy, Dan. 12. 3. Luke 15. 7. Jam. 5.19, 20.

Meditate frequently in God's Book, the Holy Scriptures, (which Timothy knew from a Child, 2 Tim. 3. 15. 2 Pet. 1. 20, 21.) using a Cencordance thereof with it; and if in the Fear of the Lord thou studies to be quiet, 1 Thes. 4. 11. thy Prositing will appear, 1 Tim. 4. 15. so may'st thou in Truth come to say, as Elijah did, viz. I thy Servant fear the Lord from my Youth, 1 Kings 18. 12.

Thus, by the Help of the Divine Grace, thou wilt become of a meek, humble, patient frame of spirit, whatever outward Crosses thou meeteth with in this World; and be made able to say, as St. Paul, I have learned,

faith

conloly

oice s in ions le in any ; If h all God and

faith he, in whatsoever state I am, therewith to be content, Phil. 4. 11. Resigning thy Will to God's Will, praying to God in thy Heart,

to this Effect, I sam. I. 13. viz.

O! Merciful God! thy Wildem is infinit to chuse. and thy Love forward to dispense Good things to us; O let me always fully, and intirely refign. my felf to thy disposals, have no defire of my own, but a perfect fatisfaction in thy choice for me, that in whattoever estate I am, I may therein be content. Lord, Grant I may never look with murmuring on my own Condition, nor with envy on other Mens; And to that end, I befeec's thee purge my Heart of all Covetous Affections. O Let me never yield up any corner of my Soul to Mammon, but give me fuch contempt of these Fading Riches, that whether they increase or decrease, I may never set my Heart upon them, but that all my care may be, to be Richtowards God, to lay up Treasure in Heaven, that when Christ Jesus, who is my Life shall appear, I may appear with him in Glory: Grant this, O God, for the Merits of Christ Jesus, Amen.

Lord teach us to pray, as John also taught his Disciples --- And He said unto them, when ye pray say, Our Father which art in Heaven, &c. Luk.

Testimonial for a Fire 152 Turks 51 Thoughts 55. N. 3 Temperance 244, 60. N. 49 Titles to money'd Men 194

Note, That London Tradefinen, to flatter their poor Country Chapman, do seequently, on the infide their Letters, give the Title of Sir, [which fame interpret Lord] and Mr. or Master on the out-fide. I ought not to call any Man Master, who is not really my Master, according to

Christ's Doctrine, Matt. 23. 10.

Bit at this Day, Men are so puff'd up with Pride, in flattering one onother with Titles, that their Names of Baptism (so called) is almost lost; that they may be flatter'd. 50b durst not give flattering Titles, Chap. 32 22. and Christ reckoned such as sought Honour one of another to be out of the Faith, John 5. 44. Jam. 2. 1, 2, 3. Some conclude their Letter, Your Servant to command; when it may be he may hate the Person, and has no real Service for him.

Some again writes on the Superscription of a Letter, To my Lord, &c. which agrees with the Faith of the unbelieving Gentiles, where were Lords many, Matt. 20. 25, 26. Mark 10. 42, 43 Luke 22 25, 25. But to the true Christian there is but one Lord, even the Lord Jesus Christ, 1 Cor. 3. 6 whom alone to worship, Rev. 19. 10.

But a Letter may mifcarry, if you write not Lord on the outlide; then I may write, To the Lord, &c.

Christ Jesus his servants never regarded or fought any such Titles, tho' some might give

them Titles without their Consents.

Yet its needful to add somewhat to those in outward Authority over us, viz. To the King, &c. To the Bishop of, &c. To the Judge, &c. or To R. S. Justice of Peace, &c.

# Poung Pans Companion:

ARITHMETICK and Other ARTS
Made Easie.

The Fifth Edition, by W. M.

There is nothing more prevalent to incline Men to Sanctification [that is, to become Hely by the Help of God's Grace than to make known to them a God that loves Men to that degree, as to give them his Only Begotten Son; a God that abbors and detests Sin to that degree, that he rather chose to expose to Death his Only Son, in whom he is well pleased, than to leave Sin unpunished; a God that takes upon him Humane Nature, and under that Nature suffers a most cruel Death, to make an Attenement for the Sin of Men, and to satisfic Divine Vengeance just provoked against him: Lastly, A God that penetrates into the most fecret Folds and Concealments of the Heart; who is to raise the Dead, and bring them to appear before his Throne, to give an Account of all their Actions. It behaves us therefore to Believe, if you will Live well; and to Live well, and Believe, if we intend to be faved. See p. 128. in an Antidote, done out of French, by A. Horneck, D. D. Rem. 5. 11. and 10. 9. am. 2. 14.

Prov. 16. 31. The heavy Head is a Crown of Glory, if it be found in the way of Righte-cufness. (And in Truth say) I thy Servant fear the Lord from my youth, 1 Kings 18.12.

# Verses for Children to Read every Morning.

When in the Morning thou dost rise,
Lift up to God thy Hands and Eyes,
And praise his Name, who did all night
Keep thee, in safety, to the Light
Of the Morning and safe pray

Of the Morning; also pray,

That God would keep thee all the day, From those great dangers which befal,

Oftimes on Young, on Great and Smal; And pray to God more Grace to give,

In his true fear, all day to live; And not to Sin, and him Offend,

Who doth to thee all Bleffings fend; Then wash thy Hands, and thy Head comb, Keep clean thy Cloaths, abroad and home.

When at the Table thy Parents fit, What they command, fee thou do it:

Whether to fit, or otherwife

To wait at Table, till they rife. Let not thy Tongue at Table walk,

A Child's unwife to chat and talk;

Wouldft thou be virtuous, whilft thou'rt young, Then learn to bridle well thy Tongue,

Learn to Read, O Child with care,

For what with Learning can compare? 'Twil' comfort yield, and chearful make, When Parents die; and Friends forfake;

It is more rare than Chains of Gold, The worth of it cannot be told.

All words learn thou rightly to Spell, And strive to read true English well;

And also learn, now in thy Youth, To know and fear the God of Truth:

Learn

ding,

nb,

ie.

cung,

Learn to relift the Poylonous evil. That flows from Sin, the Flesh, and Devil: Learn thou (Dear Child) a virtuous Mind, Unto good ways, be thou inclin'd. O cry for Faith, on God depend, And thou wilt be happy in the end; O learn by Prayer on God to call, Obey his Grace, and thou hast all: Then waste not time, like foolish Boys, In Games and Sports and filly Toys, Time, that is past, none can recal, Time to come's uncertain all; Thy present time, redeem, therefore,

For time e're long will be no mote, To thee in this World.

Do Traders use, O! how they over rate
What they would fell; but if they be to buy,
They under value each Commodity.

Prov. 20. 14.

# Of continual Prayer in the Heart.

Rayer in the Heart, at all times it holds An intercourse, with Grace, which beholds The Fathers Glory, and to Christ does mount, Is made by many, but of small account: 'Tis that which carries, our defires to God, And comes down Laiden, with a Bleffed Load: Therefore by Grace, you'l know its very meet, To thank God always, as well as at Meat. Some Pray in Form, and others Pray by Art, And some think, it mends the badness of their They Sin i'th day, and Pray when it is night, They Sin again, think Prayer mends it quite. 'Tis on their Prayers, they rest, and do depend, Which like a broken Staff, will fail i'th end: Who e're Prays, and not with faving Grace, His Prayers are Sin, God hides his Face. A Saint in Prayer, no rest, nor ease can find. Unless Christ Blood thereby, he doth obtain; Thro' Grace his Corrupt will, to mortifie, For Grace as well as Pardon, he doth cry,

Dyer, e-Cutnaker, right,

e buy,

ds
eholds
ount,
ed,
Load;
meet,
at.
Art,
f their
heart.
night,
quite.
epend,
end:

But contrarywise, it is with most men, They Cry for Pardon, but do also then, In their vile Hearts, regard iniquity,

And for that cause, Christ doth their suit deny;

Their Prayers are to him, Abomination, Whilst they do hide, and cover his Trans-

greffion.

# A Prayer of a Charch of England Man.

Merciful God, who hath made of one Blood, and redeemed by one Ransom all Nations of Men: Let me never harden my Bowels against any that partake of the same Nature and Redemption with me: — Give us Author of the that continual supply of thy whole Duty Grace, which may Sustain and of Man. Nourish our Souls unto Eternal Life: — Enable us by thy Grace chearfully to suffer Thy will in all Assistance. Establish Thy Throne, and rule for ever in our Souls, and by the power of thy Grace subdue all those Rebellious Corruptions, that exalt themselves against thee; they are those enemies of Thine, which

In Conscience theres, a secret Grace within, Which doth distinguish Truth, from every Sin;

would not thou shouldest Reign over them: O

let them be brought forth and flain before thee;

and make us faithful Subjects of this Thy Kingdom

of Grace, that we may be capable of thy Kingdom

of Glory: - Grant this Merciful Lord, we be-

feech thee, for Jesus Christs sake, - Ames.

This-

But

nd. btain; This is of God, which Judges works of Evil,
And thoughts of Men, mov'd of the tempting
Devil;

For Grace the Rock: Temptations doth defeat.

## THE

# LORDS PRAYER.

To be Read with, or without the Verses, which may be Printed or fairly written upon one side of a Sheet of Paper to hang in the House, to encourage Youth to get it by Heart.

Thou to thy Mercies Seat our Souls dest gather,
To do our Duty unto the,
To whom all Praise, all Honour should be given,
For thou art the great God, --Which art in Heaven.

Thou by thy Wisdom rul'st the Worlds whole Frame,
For ever therefore, — Hollowed be thy Name,

Let never more Delay, divide us from

Thy Glorious Grace, but let -- Thy Kingdom come.

Let thy Commands opposed be by none,

But thy good Pleasure; and -Thy Will be done, And let our Promptness to obey be even,

The very same, — In Earth, as it is in Heaven.

Then for our Souls, O Lord, we also pray,

Thou would'st be pleased to — Give us this Day.

The Food of Life, wherewith our Souls are fed,

Contented Rayment, and - Our daily Bread.

Evil, mpting Devil; ns that (beat, defeat.

Bread.

With

With everysneedful thing do thou relieve us. And of thy Mercy, pity - And forgive us, All our mis-deeds in him, whom thou didst please To take an Offering for - Our Trespasses, And fora much, O Lord, as we believe That theu wilt pardon us, - As we forgive Let that Love teach us, wher with thou acquaints us, To pardon all - Them that trespass against us, And though sometimes thou find'st we have forgot, This Love, or thee; yet help, --- And lead us not Through Soul or Bodies want, to Desparation. Nor let Earths Gain, drive us -- Into Temptation, Let not the Soul of any true believer Fall in the time of Tryal, -- But deliver Yea, fave them from the Malite of the Devil, And both in Life and Death; keep -Us from Evil. Thus pray we Lord, for that of thee, from whom Can this be had, - For thine is the Kingdom, The World is of thy Works, the wonderous fory, To thee belongs, - The Power and the Glory, And of thy wondorous works, bath, ending never, But will remain, - For ever and for ever, This we poor Creatures must confess agen,

## The Ten Commandments.

Till me shall say, Eternally, --- A M E N.

S mai's, Two Tables, Faithful Moses brought,
Down from the Mount, that Israel might be
(taught;
The Great Jehova, sending Precepts Ten,
That shews thy Dury unto God and Man.

1. Have thou no other God but me,

2. Unto no Image, bow thy Knee.

3. Take not the Name of God in vain,

4. Do not the Sabath Day Prophane.

. Honour thy Father and Mother too,

6. And see that thou, no Murder do.

7. From vile Adultery keep thee clean,

8. And Steal not, tho, thy state be mean.

9. Bear no false Witness, shun the blot, 10, What is thy Neighbours, covet not.

# Articles of Belief.

Believe in God the Father Almighty Maker of Heaven and Earth, and in Jesus Christ his only Son our Lord, who was Conceived by the Holy Ghost, Born of the Virgin Mary, suffered under Pontius Pilate, was Crucified, Dead

and Buried, He defended into Hell,
The third day he rose again from
the Dead, He ascended into Heaven,

And fitteth at the Right Hand of God the Father Almighty, From thence he shall come to Judge both the Quick and the Dead, I believe in the Holy Ghost, The Holy Catholick Church. The Communion of Saints, The forgivness of Sins, The Resurrection of the Body, And the Life Everlasting, Amen.

To hold good Opinions in Religion availeth nothing to thee whilft thou Lives an Unrighteous Life; And faith a Son of the Church of England, When we have used all the Arguments and the best Vindication of our selves, and of our Church, it is Haliness of Life, is the best and most prevalent Applogy.

"But whilst the Death of Christ does so much "engage and encourage us to for sake our Sins (faith the Author \*) it gives not "the least encouragement to our \* The Christi-

"continuance in them; Let an Moniter." us not think that Christ died

" for our Sins, that we might have Liberty to Live in them, and yet be faved at last; No,

"But he came to fave us from our Sins, not in

" them.

"He makes us Bleffed by turning us from our "Iniquities; He Dyed to Redeem us from a vain

"and evil Conversation, to Purisie our Hearts
and reform our Lives — Mat. 1. 21. Ast.

3. 26. Tit. 2. 11. 14. 1 Pet. 1. 18.

The Manner of the Israelites Stoning to Death.
Rebelious Sons, Deur. 21. 18.

THE Offender was led to a Place (without the Town) two Cubits high, His hands being bound, From whence one of the Witnefest umbled him, by a Strok upon the Loyns, if that kill him not, the Witnesses lift up a Stone, being the weight of two men (which chiefly the other Witnesses casteth upon him) if that kill him not, all Israel through Stones upon him, The Hands of the Witnesses shall be first upon him, to put him to Death, and afterwards, the Hands of the People, Deu. 17.

Therefore such Parents, that have headstrong Rebellious Sons, whom they cannot restrain from evil Courses, ought in Duty to seek to the Magestrates as the Israelites did that they may become a terror to them, for God gave his Laws for the Punishment of Evil Doers. Ram. 12

for the Punishment of Evil Doers, Rom. 13.

" Bu

Parents provoke not your Children to wrath Eph. 6. 1. to 4. Col. 3. 19, 20, 21.

A Child untutor'd (a meer lump of Sin)
May often Curfe, it's cause, of having been.
Such as instruct, do doubly them beget,
By timely Lessons Labo'ring to defeat.
Their growth in Ill; such mold their better part

By wife prevention, of a Cankered Heart.

O! Thens the time, to give 'em Form and Mold
For Trees admit no bending, that are old.

But,

How oft do Parents, Ill Example draw,
Their tender Children, to infringe the Law;
And Commandments, of the Blessed God,
Do they not Spoyl them, when they spare the rod

Againe,
To strick Extremes, some parents do adhere,
Check not at all, or else are too severe.

On Back and Belly, they'l bestow much cost,
But care not, if their precious Souls be lost.

Are they not quilty of Prodigious Folly

Are they not guilty, of Prodigious Folly,
That teach them Courtship, and neglect whats
O! Young Man Remember, That,

## T. Tryon, to Parents

Therefore (faith he) of what Spirit, Father Mother, Tutor, &c. would have their Children to be, let them take care to Sow the Seeds thereof betimes in the Childs Soul.

Would you have your Children, to Love and Fear God; you may easily do it, to what degree you please, provided he does not hear, nor see

contrary Examples.

Would you have him Temperate, in Meats and Drinks, then accustom him to propper quantities, and agreeable quantities in his Dier.

Would you have him Hardy-strong, and Healthful, then use mean Foods, and give them in Order, and with constant Exercise proportionable to the strength of the Child.—Parents, again (faith he) must and are obliged to make Retaliation of their neglects, and Ill manage-

ment of their Children.

All the great Wickedness, Viollence and Pollutions, that are frequently committed in our Parts, owe their Original to Mistakes in this Point: And shall there not be a Reckoning, for certain there must be an account given: And tho' Men forget themselves, yet in Gods Providence, and his Law in Nature, there is no forgetfulness, tho' Justice and Punishment come slowly oftentimes, yet they surely come, And man shall then, when it is to late, bewail their neglect of that Duty, which now they might with greater ease and satisfaction perform.

# What a Dipthong is.

A Dipthong is the founding of any two or more Vowels together, without any Confonant between them; they be commonly used in words of one Syllable; there are nine Dipthong, as,

si, or sy, as in Maid, May, Faith, su, or sw, as Laud, Law, Eunuch. ea, as Earth, Heard, Real. ee. as Seed, Sweet.
ei, as Heir, Either, Heifer.
eu, or ew, as Feud, Grew.
ei, or ey, as Cor, Boy, Joy, Join.
eo, as Good, Book.
eu, or em, as Loud, Low, Soul.

A Consonan is a Letter, that makes a Sound with a Venel.

A Syllable is a perfect Sound, made sometimes of Vowels only, and sometimes of Vowels and Consonants, no Syllable hath above eight Letters in it, as Strength; neither hath any word above seven Syllables in the English Tongue, as Reconciliation.

Observe how many Vowels there are in a word, so many Syllables it hath in it, as in Recon-ci-li-a-ti-on, except the word end in e, or es, as in have and James; or if there be a Dipthong in it, as in may or your.

After q, always follows u, with another Vow-

ell, as in quick, Question, &c.

Of Letters that ought to be Written in Words, and yet are not sounded.

NE of the a's is nor founded, in Isaac,

au Sounds like o in Author, Authority.

a Dipthong is founded like e.

e or k is not founded in black. check, sick, nor after s in Conscience, Disciple.

c Hath the found of k before a, e, oo, u, land r;

as Cooper, Com.

e Before e and i hath the found of s, as Cafar, Cyder, City; and c is not founded in Indistment.

ch Hath the found of k in Achan, Character, Lachis, &c. and is founded like chee in Charity, Rachel, &c.

d Is not sounded in Wednesday.

e Is not sounded in George, &c. yet is sounded in several short words, and at the end of Jesse, Jubilee.

e Is not founded at the end of hope, Love, &c.

and is omitted in hoping, loving, &c,

ea Sounds e drawn long, as appease, break, &c.

ei Sounds like e long in forfeit, either. &c. ey Is written at the end of Abbey, Barley, &c.

g Is not founded in Sign, Reign, Affign, &c.

h Is not founded in Christ, Thomas, nor at the end of long words in the Bible.

gh Is founded like f in Cough, enough, laugh.

i Is not founded in Fruit, adieu, Juice.

ie Sounds ce in believe, relieve.

k Is used before e, i and u, as key, keep.

I Is not founded in Balm, Holborn,

"Is used in well, full, but one I in welcome, fulness, &c.

n. Is not founded in folemn, Hymn, condemn.

or Is not founded in People, Teoman; righteous.

on Is founded like u in good, Hood, &c.

ea Sounds

Sound

wo or Confo-

fed in

Dip-

etimes els and Letters above

Recon-

in Re-

Vow-

on Sounds o long in hearse, boat, &c. on Sounds like o in vapour, honour, &c.

p Is not founded in tempt, Pfalm, &c.

ph Is founded like f in Philip, and others, when not divided, as Shep-herd.

9 Has always u written after it, as Question.

ti Is founded like si after a Vowel, as Patience, Persecution, Nation, except signes before ti, as Question, Bestial, &c.

s Is not founded in Island; Is founded like z in lose, abuse, use; write not this long sat the end

of any word, as fulness.

v Conforant is to be written when a Vowel follows.

ugh May be omitted in though, although, through, w Written after o, is not founded, as grow, flow.

y Is not sounded in Monkey, Chimney, &c. yet is to be used in all words that end in i, as deny, marry-ing, thy, &c.

1, mm, tt, and cc In the middle of words, divid: them in spelling, as accord, wil-ling, at-

tind, &c.

es Is founded at the end of Aloes, Jubiles, Epitomes, and in all proper Names, as Moses, Phares, Macchabees, except James. Note, That Syllables are so to be divided in Spelling, as they are in speaking. And also if you cannot write a whole word at the end of a line, break it off at the end of a Syllable, as for Example, ful-ness, not fuln-ess.

# How some words are Written, and how they are to be Read.

| Thus Written. | Thus Read.  |  |
|---------------|-------------|--|
| Achan         | Akan        |  |
| Architect     | Arkiteck    |  |
| Archangel     | Arkangel    |  |
| Apothecary    | Potecary    |  |
| Apurtenances  | Purtenances |  |
| Apprentice    | Prentice    |  |
| Baruch        | Baruck      |  |
| Character     | Karacter    |  |
| Chirurgeon    | Surgeon     |  |
| Chederlaomer  | Kederlaomer |  |
| Espuire       | Squire      |  |
| Eunuch        | Efnuck      |  |
| Medicine      | Medcine     |  |
| Premunire     | Premineer   |  |
| Phantalie     | Fancy       |  |
| Scene         | Sene        |  |
| Sceptre       | Septer      |  |
| Schedule      | Sedule      |  |
| Sceleton      | Skeleton    |  |
| Scheme        | Skeme       |  |
| Viscount      | Vicount     |  |
| Victuals      | Victels     |  |

Note, That Strangers may very well Quarrel with our English Tongue, because of our putting more Letters in some words, than are needful, and are not sounded.

For when a Stranger, meets with the words Treasure, measure, reader, people, &c. He pronounceth, tre-asure, me-asure, re-ader, &c.

When he meets with Witness, Sickness, pittie,&c. He pronounceth witnesse, Sicknesse, pitti-e, &c.

How

s, when

ke z in

Vowel

through,
ow, flow.
yet is
as deny,

rds, diing, at-

les, Epi-Phares, yllables are in a whole the end

fuln-es.

estion. Patience, as QueWhereas, if we would write them, as we pronounce them, as trefure, mefure, reder, peeple, mitnes, Sicknes, pitty, &c. Strangers would not find lish Tongue, beside it would be much better, for the generality, of our English people, as, Children who by rot, or use, Learn to read English well, but being put to write, a Bill or a Letter to a Friend cannot Spell but sew words well, because of the Supershuous Letters in words,

As for the Tongue in the Mouth, might be writen Toung: for Labour, Labor; for would, wold; for Great, gret; for favour, favor; com, come, and for been, bin, &c. But it may be truly faid, The

English-man, Speaks not, as he writes.

Note also, that whereas there are Free-scholls in Corporations (some of 201. a Year, more or less) where Poor Freemen have the Prevllage to send their Sons to learn 2 or 3 Years before they go to be Apprentices, and there they learn to read Lattin, which proves of little or no service to the Boys, as to their writting true English, except they stay'd their Years to learn all the Lattin Rules.

So that it would be much better for fuch Boys to be instructed in the Rules of the English-tongue, that they may write the better English, when

they come to Trade, &c.

But this thing will not be amended, unless our Superiors make a Law to enjoyn the Schooli-mafter to do so.

English well, is to well observe, how they are spelt, as thou reads Printed words.

enty of er, but were were forc'd to fend Miles the Foot-man down to the Mills, which were two miles off for a Mess of Potrage, well feason'd with Mace; but insteed of it, he brought a Mash for a Horse.

This Landlord of mine, in my mind, is notable in any good manner to manure half the Land, belonging to this Manour, and therefore fent me a message to take one Message or Tenement off his Hands.

No wonder our Maid Mary is so merry, it seems, Martin, the Butler of Merton-College is to marry her, and she fancies Marriage to be a merry Age; but I wish she be not marred, by being married too soon.

Hang up the wet Mantle on the Mantil-tree to dry.

My Man cannot reach to my Horses Main.

'Tis but meet that a Glutton's Meat should be mete out to him.

The Spaniard that had been cast away, and forc'd to feed on Maste, or Acorns in a Wood, vow'd if ever he got home to here Mass, he would offer to St. Nicholas a Taper, as big as the Mast of his Ship; but when he was returned, and had a good Mess of Meat at his Table, swore, a Candle of 15 to the Pound at most should serve turn.

For whom do you Mourn this Morning?

He is a Minister, and belongs to the Minster, but

the other is a Minstrel, or Fidler.

The poor Widows Mite was more acceptable to God than all their Offerings, who might well spare it.

What made the Mason sling his Hod of Morter,

into the Apothecaries Mortar?

Mr. Moore, and one more, rid over the Moor in meer kindness to visit me; but just as he came to the Moat, that goes about our House, a Mote, (or small particle of Dust) got into his Eye, and we perceiv'd his Cloaths (which were of good Cloath) Moth-eaten.

There's Life in a Mussel, (or little shell-fish) and 'tis a pretty good morsel of Meat; but I think you cannot find one Muscle in its body, yet I will not offer to muzzel, or stop your Mouth, if you say you can.

### N.

The Figs were so naught, that they were good for nought.

He did needless work with his Needles.

He is a Knave, stark naught, and good for wought; for he stole the Nave of a Cart Wheel, and if he had been able, would have stabb d his Man into the Navel.

Nay, Neice, be not so Nice; for if you are afraid, when you stand so nigh, to hear my Horse Neigh, the People call you silly Cockney.

He neither wanted the Bleffings of the upper,

nor the neather Springs.

### 0.

Gold Ore, the Water-man's Our, the Ower of a Debt.

Neither Ours nor Yours will be well done in

three Hours.

I will speak of it before I cut it off.

We went o're the River in a pair of Oars, or Boat, laden with good store of Silver Ore, and came before the Justices of Oyer and Terminer.

'Twould vex ones Heart to lose at once an Ounce

of Gold.

Every Hour should be well spent, because our

Life is so short.

The King may put forth an Ordinance, (or Law) that none may make great Ordnance (or Guns) but fuch as he appoints.

He took great Pains to mend the Panes of Glass that were broken. He laid a Plot to take away a Plat, or Parcel of

Ground.

There is no Profit may be received from a falle Prophet.

How Pale did poor Pall (a nick name for mary)

look, when she had broke her Milk Pail, as the went over the Pales, by staring at Poll the Parrot, which her Couzen Paul had brought her?

He did put pare on Catherin Pear for a Peer of the Realm, and he gave him a pair of Gloves.

To gratifie her Palate, she would part with a Palace, and pawn her very Pallet-Bed.

If the Parson of your Parish be a civil Person, I hope you will not let him Perish.

They had need of Patience that are Dr. Saffold's Patients, if his Pills are no better than his Bills.

Since I took this Boy's part, he is grown very pert.

Do you think I will Petition, or ask you leave to make a Partition or Wall between your Land and mine?

I gave him a Bushel of Pease, and a piece of Cloth, and fo made my Peace, and got a Difcharge, which was writ with one of those Pens, that cost Two Pence.

Master Pierce, if you will Pearce your Teirce of Claret, you shall hear a Boy Construe and Parfe Latin.

I received an Epistle (or Letter) that invited me to come, and eat part of a Peftle of Pork; fo I took a Pistol in my Hand, and a French Pistole in my Pocket, which an Apothecaries Boy would have taken from me, and endeavoured to knock me down with an huge Pestil, which he took out of

What

the Mortar; which tho' it did somewhat puzzel me, yet I soundly paid him off with a Bulls-pizzel.

Never did Fisherman catch Place in this place.
Men of Pomer and Richesthould town forth their

Men of Power and Richesshould pour forth their Alms into the Laps of the Poor, but most are so covetous, that they love altogether to pore on Money, and that they prey more upon the Needy, than they pray to God.

The Lord President cited a very good Precedent for his Opinion, but the Principal of our Colledge

went upon a different Principle.

A true Prophet feeks not Temporal Profit or Gain.

Q

'Tis a Querie how the Quarrel began: some say about breaking a Quary of Glass, others about a Quarry of Stones.

For all she is dress'd like a Queen, she is but a

Quean.

R.

He gave a Reason why a Fig is better than a Rayson.

A Rite, or Ceremony, Right or wrong. He rapt him on the Head, and wrapt it up.

He rung the Mortar, and she wrung her Tiffanie Ruff, and then put on her rough Garment.

A Barbers Raisour, a Raiser of Sedition.

He would not reft, till he did wrest my words. The Enemy will take and Rase (or demolish) the City, if you do not Rasse the Siege; for he comes of a cruel Race, or Lineage.

When a good King Reigns, he distributes Bleffings like refreshing Rains in the Spring, and reim in the wicked, as with Bit and Bridle, but God

alone fearcheth the Reins.

Why do you thus Rake and scrape? That very Cloth which you now Rask and stretch on the ten-

I have read of a certain Reed, that grows in the

Sea, of a Red colour.

The Wheel-Wright did write to me for Timber. As I did Roam towards Rome (the Pope's City) lying in a damp Room, a Rheum fell into my Eyes, which was encreased, by coming down the River Rhyne in a Boat, made of the Rinde, or Bark of a Tree.

S.

A Sum of Money was paid to some of them. He shoots three Arrows; he has three Sutes of Apparel, and three Suits in Law.

Sithes to mow with; Sighs and Groans,

It is a vainthing to wear our Shooes to see Shews: The Ship is under Sail, and I hope for a good Sale of Ware.

Our Lord and Saviour Christ is of a most evcellent sweet Savour, to all that truly believe in him.

The Scars of the Captains Wounds can now feares be feen; for I fent him a Balfom of a delicate feent that closed them.

I shall crack your Skull if you will not go to school, and make you a Skuller, if you will not be a Scholar.

They fay they can fee the Sea from hence.

As I was Sealing my Letter, down dropt a piece of Ceiling.

There are of either Sex, which fit down among

I will not carry my Sheep beyond Sea in a Ship, but shear them all in Bedford-shire; that is, cut

but shear them all in Bedford-shire; that is, cut their Wool sheer off, wherefore I hope to make for my own share 20 l.

When they began to Shoot Bullets, they made

C 5

a great shout, but we shut the Door, and one of the soldiers was wounded between the Shoulders.

If you do not sing me a Song, when I give you the Sign, I will singe your Beard with the Candle.

Their Vessel did sink in one of the Cinque Ports. It is a sign that he is guilty of much sin, that is often seen in bad Company.

The Soul has power over the Sole of the Foot, but not over the Sole of a Shooe, nor a Soal Fish.

My Son got up Soon after the Sun arose.

We were firaight into great Streights, and at the found of the Cannons the Women fell into a Swoon.

### T.

I got a Duck and a couple of Teal, (but one had no Tail) from a Tall Fellow, for a merry Tale.

Forbear your Tears and your Lamentations for these Divisions in the Church, and let the Tares grow with the Wheat until Harvest.

A Teeming Woman was carry'd by a Team of

Horses over the River I hames.

Time and Tyde is ty'd to no Man. Then was I no richer than before.

Here is too much Tow, which these two Men brought to make a Rope to Towe the Boat, and therefore I will lay some of it to my Sore Toe.

Here is a Treatife concerning the late Treating

for Peace.

A Tax or Tribute; Iron Tacks.
The Herb Thyme, or the Time of the Day.
He was thrown from his Throne.
It was through help he came thorow.
There was tome of their own Kindred.
Fire Shovel and Tongs; Neats-Tongues.

'Tis vain to let Blood in a wrong Vein, nor need a Lady put on her Veil to buy a joint of Veal.

He would give a Vial (or more properly Phial) of Agua Vita, to hear one play on the Viol.

When I came into the Vale, I did vail my Bonnet; for a Valley is of more value than the Hills about it.

He was Humble when he had got the Umbles of a Deer. For want of Vistuals the Vitals will faint.

### W.

His Son Walter going by Water, looks pale end wan, now in the wane of the Moon; yet with a Wand in his Hand he waits for the City Waites, to fee who has false Weights.

I wear such ware as I can buy, but if I were

careful, it would last longer,

A Wax-Candle Wisk, tho' it be but weak, may last burning a Week.

He did wring her by the Hand, and stole her Ring, When Men wooe, they are of-times full of Woe. Since you did wrest, or sprain my Wrist, I have had but little Rest.

What I got by rote, as I wrought in the day, I wrote down at night.

To weigh a Wey of Cheese in the High-way. Thou wast unwise to make so much waste.

I wist or knew not that he was there, tho' I is wish that he might be there.

### Y.

Year, ye say yes, yet I think your Test is naught.
You know it is not good for an Eme (or Female Sheep) to brouze on a Yew-Tree.

Your Man, to keep his Hand in ure, has stolen

a Bason and Emer.

She did carn her Bread with spinning Yarn.

C6 The

The often writing over the words above is the way to write true English; and so by use which is the Mother of Learning or Language, one may come to be perfect enough, in writing all English words of most use, which is verified of Country Scriveners (who have not the Latin Tongue) do nevertheless write good English, by the use of writing Deeds, Indentures, Bonds, Bills, &c.

After true Spelling, these Seven Points, are to be observed in Reading, for keeping the Sense.

Note, That every Stop, or Point Ishall inclose, with a crooked lines.

(,) The little dash within, is called a Comma, to give a little stop, or breathing, when thou finds it in thy reading, as, Behold O Lord,

(;) A Semi-colon, is a longer Stop, or Breathing

as, for I am in Distress;

(:) A Colon, is commonly put in the middle of a Sentence, as, my Bowels are troubled: my Heart is turned within me, for I have grievously Rebelled.

(.) A Period, or dot, is a full stop, and is put after a full Sentence, as, Abroad the Sword berea-

veth, at home there is a dearth.

() A Prenthesis, is when some words may be left out, and yet the Sentence perfect, as, For I know that in me (that is in my Flesh) dwellesh no good thing.

(?) An Interrogation, is put always after a Question asked; as, Is Christ divided? was Paul Grucified for you? or were you Baptised in the Name of

Paul?

etying out; as, O the Depth of the Riches both of the Wisdom and Knowledg of God! &c.

Note, The, &c. fignifies there were more words to come after.

This Index points to fomething worthy to

be observed.

(I) fet before, takes away so much as it felf is from the greater; but being set after, adds so much to it, as IV makes four, but VI six; IX

nine, but XI eleven.

Likewise the LettersD or ID 500, five hundred; either because half the old Roman M seeming to be somewhat of that form, was in process of time, by ignorant Transcribers (saith H. C.) taken for a D; or perhaps, because as 1000 is a perfect Number, and a Circle the most perfect Figure, this Letter seeming to be made by an half Circle, and perpendicular Line, might be thought fit to signific half a thousand.

The old Roman M was fomewhat of this form, DIC, for 1000. Note, that the feven Numeral Letters make the Number 1666, MDCLXVI;

neither more, nor less.

# Of the Scriptures.

IT is very Expedient, that a Young-man, do read one Chapter on more every day, which will the more fix in his Memory, The Great Examples, of Gods Providences in Ages past, and Miraculous Deliverances of good Men, such as Job, Moses, Joseph, Hezechiah, Daniel, and

the three Children in the Firey Furnice.

Or for Punishment of Notorious Sins, As Sodom and Gomerah that was destroyed with Fire and Brimstone from Heaven; Of the Rebellion of Corah, Oppression of Ahab, Pride of Nebuchadnezar, Cruelty of Hamon the Informer, Lying of Ananias and Saphera, &c. The Pleasure of such kind of Reading, will make a Child mind the Sense, and parhaps may (thro Grace) render the Remembrance very Instructive.

Or, the Young-Man, that Lives in the fear of God, which is a fluning all evil Company, may Read these several Sacred Hystories by Parts,

thus,

Of the Wonderful Mercies of God in preserving the Holy Scrip ure: so uncorrupt, tho' they have been often Translated; by me Collected from aivers Authors.

First, Moses, by the help of the Spirit of God wrote the Book of Genesis, about 800 Years after Noahs Flood, of many things that were done 2414 Years before he was Born, he also wrote Exodus, Levisicus and Deuteronomy.

Those Books (anciently called the Bible) lying in Jerusalem in the Hands of the Jews (so called from Judah, one of the 12 Patriarchs) writen in the first Language, called the Hebrew

Tongue.

Ptolemus Philadelphus King of Egypt knowing that the Jews, would not Fight to defend themfelves on their Sabbath Day, he about the Year of the World 3646. took the City, and carried the Jews Captive into Egypt, the King taking the Bible with him, and because he did not understand the Hebrew Tongue, he sent for 70. of the Learned Jews to Translate it into the Greek Tongue, which they did, the they were not Inspired by Gods Spirit so to do.

For they altered divers things, for fear of displeasing the King and Queen, as Levit. 9. 6, 3. We shall not eate of a Hare, they Translated it Rough , foot because the Queens Name was Hare, in their Language; they altered divers other things for

the cause aforesaid.

Yet this Translation of the Seventy, was burn't in the Library of the King in the Year 3880. when Pompey conquered Egypt to the Romans, some fragments of Copies was left and disperst so that Justinian the Emperour, Caused the Translation

of the 70. to be read at Worship, &c. Note, That the now Marginal Notes were put in by Translators.

The Second Translation was made by Aquili; a Gentile, after a Christian, and lastly an Apostate Jew.

The Third Translation by Theodosion, who from

a Christian, became a Jew.

The Fourth Translation was by Symmachus, who

became a Jew

The Fifth was found inclosed in a Barrel at Jericho; The 6th found at Nicomedia, in the year of Christ 230, Origen, put those Translations into one Volumne.

Here the Providence of God, is to be feen as the Lord made the Mazorites the Instruments to keep the Reading uncorrupt: So he made Origen the Instrument to preserve the best Translation.

The Scripture must be Interpreted by the same Spirit, by which it was inspired said J. Weemse in the Christian Synogogue, see J. Gregories, Obser-

vations.

The New Testament was writen in the Greek Language (some fay Matthew was writ in Hebrew) which was then the Language of the Jews, tho' not common to all the Jews, from which two Languages the Bible hath been Translated into other Languages and from the Latin it was Translated into English in the Reign of King Henry the VIII. (but the Ghapters were not divided into Verses, as now.

The Translation thereof into English, &c. gave a great shak to the Romish Superstitions, as appears by what the English Cardinal Woolsey, write to the Pope, part thereof was as follows, "That his Holiness could not be Ignorant, what divers effects the New Invention of Printing had produced, for as it had brought in and restored Looks and Learning, so together it hath been

See the Lord Herberts History of H. VIII.

Have the Leaders, or Teachers of the People in most Ages of the World, been the cause of Peoples erring, or straving from the Truth. preferring their own Inventions in Worship, be-

in Latin.

fore the Testimonys of the Scriptures.

The Answer is easie, they have neglected the gift of Grace, which God put into their Souls, to Lead them in the path of Righteousness, Tit. 2. 11. And because they know the Truth, like not to walk in it, therefore why God the Creator of all things suffereth these things, to be (faith Paul) It is for this cause, because they received not the Love of the Truth, that they might be faved, therefore God shall send them the working of Erfor, that they may believe a Lye, that they all may be judged, that have not believed the Truth but consented to Iniquity 2 Thes. 2.

The

The Jews as well as the Gentiles, have and do by setting up their own Inventions in Worship, above the Teaching of the Spirit of Grace, Err'd and do Err.

A S to the Jews, they were the Seed of Abrahamafter the flesh, a People Chosen of God, but they often disobeyed; That they might return to obey his inward and Spiritual Grace in themselves, to learn to do well, God tryed them by

Afflictions and Prosperity.

1. Bondage in Egypt, 2. In the Wilderness, 3. In a state of Plenty in Canaan, 4. In Captives often, 5. In return to their Land with Peace, where they seared the Lord, but the following Generation quickly corrupted themselves, Jud. 2. 7, &c. Then God followed upon them Judgments for Sin, and rejected them by the Mouths of his Prophets and foretold a Massiah to come in the slesh, as appears by the Scriptures that follows, which Massiah they did then Crucisie Spiritually by their Transgressions, Psal. 22, 16. and that the Massiah should be betrayed by one of his own Table, ch. 22, 18 and 69, 21, 22.

And when the Massiah came, they said, His Blood be on us, and on our Children, Matt. 27, 25. and Crucified the Lord of Life (through the hardness of their Hearts) For which Gods Judg-

P

ments quickly overtook them

For Titus a Roman General Beseiged Jorusalem, whereby, by Fire, Famine, Sword, Civil discord and Forcign Force, Eleven Hundred Thousand Dyed, it being the time of their Passover, the Jews from all parts being at Jerusalem, besides Titus carried Captive 97000. Jews. And that those who had fold our Saviour for 30. pieces of Silver (each piece

piece being 30 d. in English Money) were themfelves fold 30. for one piece of Silver.

Thus the Jews, for dispising the Riches of the Grace of God, by Loving Sin, better than Righteousness, are become a scorn and reproach to all Nations (the no better than themselves) even

to this Day, Dan: 9. 27.

Pla. 22. 8.

And it is strange to many, that they will not yet believe that it was the Messiah, whom their fore Fathers slew, and Hanged on a Tree, whom their Prophets Prophesed to come, recorded in the Old Testament which they often read; Fulfilled in the New Testament, as appears by comparing the Scriptures that follow.

But to return, it was through the great Love and Mercy of God, that the Church of Rome was fuffered to make so little alterations in the Holy Scriptures (we receiving the Bible thro' their hands, the true Religion being at Rome in the Apostles days.)

Lastly, King James the first caused the Bible to be Translated, very agreeable to our English Tongue, being the best reading and nearest the Latin, of any Translation before it. Glory to God.

Note, The Word Bible, comes from the Greek, or a Volumn containing feveral Books; our English Bible, in Books and Epitles are in Number, 65.

The

The Sacr'd Scriptures, of the God of Truth,
Bids mind your Creator, in the days of Youth.
Old wives prophane, and foolish fables shun,

Even from a Child, the Holy Scriptures con. Then read the Scriptures, with a fingle Eye, Praying for Grace, to understand them by; Cause Holy Scriptures, is a Book thats Seal'd,

From Carnal man, till by Gods Grace reveal'd. Pray then to Christ, our Saviour and friend,

That He, more of his Grace, than gifts do lend; He that would walk, by Scripture Rule and line, Must unto Grace, his Heart and minde encline

The Scriptures, being given forth by Grace,
As helps for Man, to prove the Godly race.

Unto Eternal Bless, O' therefore try,

Your ways thereby, least you to Errour fly.

Therefore O! Young Man, dost not thou feel the inward and spiritual Grace of God in thee. (mentioned in the Church of Englands Catechism) that sometimes shews thee the folly of thy ways, and troubles thee after thou hast been wilde and wanton or told a lye, and used vain and idle words, and also hast read in the Scriptures that for every idle word, an account must be given at the Day of Judgment Matt. 12. 36. This Grace or gift of God in thee, strives with thee that thou mayest chey it, and Live Soberly and in the fear of God all thy Life long, that thou mayest Live happily here, and enjoy an everlasting happiness in Heaven with God for ever and for ever more.

But on the contrary, there is the grand Enemy of thy Soul lyes near, the Seed of the Serpent; the Seed of Sin, the same that Tempted Adam whilst he was in Innocence; which beguiled him, and now beguils all that give confent to its enticements, O! how this evil Seed (in thee) will make thee to Love Vanity, to draw thee into Evil Company, if thou dost not

watch continually in Grace to be preserved, yet the Temptations thereof is no sin to thee, fo as thou consents not to any of them; And as Israel of old, or the few outward had outward Enemies to War against, that they might seek to God to be delivered from them, so the inward Jew the true Christian has an inward Ememie, the faid Seed of Sin, that he may always watch (by the help of the Grace of God) to be delivered from all its Temptations to Evil. The all wife God saw it needful, least his People should boast in their own Corrupt strength, which would fail them, in the most needful time of Tryals, and so become as Proud as Lucifer, like the fallen Angels; Therefore

Christ has bestow'd on all, his precious Grace, Whereby man may bekept, from giving place, To Satan, who to Evils doth intice,

But Grace preserves the Soul, from every vice. If always thou dost on it's strength rely, (fly.

The Devil, with his Snares, with speed must Light it will be in Darkness, joy in grief,

And when in Trouble, it will bring relief. Never on Grace, did any Soul depend,

But it obtain'd, Deliverance in the end.

When all things fail, Grace will thy wants supply No Soul needs doubt, of it's sufficience.

Grace helps the Soul, thro' all its Christian strif, And brings it safe, to Everlasting Life.

# POST SCRIPT.

In which I recite, the sayings, of two Later Jews.

"A Holy and pious man is not the rigid man "fore very Ceremonial punctilio, but he "who, where he dwells with a prudent and impartial hand gives every one their right, who loves Justice, Oppresses none, Defrauds none, nor bribes any to be his slaves, or tools upon occasion. Again, Because the Eyes of the Lord run to and fro through the whole Earth, therefore the Holy man, neither does, nor speaks, nor thinks any thing, but he believes, the all-see ing Eye of God to be upon him, ready not only to reward for what's well, but what's ill done too, and to visit for every perverse and wicked word or action, &c. Written by Rab-"bi Isaac Sangar, Cosri pars 3 p. 157. 168.

# The other Learned Jew, Saith ..

"That every precept of God, whether it be affirmative or negative, aims at these things. "First, That it may take away all violence from among men and beget good manners, necessary for the conservation of political Societies: and Secondly, That it may instill true principles of faith, such as are in their own Nature necessary to be known, for the expelling of Wicker edness and encouraging Honesty and Virtue, of the work of the edness and encouraging Honesty and Virtue, the work of the work of the edness and encouraging Honesty and Virtue, the work of the work of the work of the edness and encouraging Honesty and Virtue, the work of the work of the work of the edness and encouraging Honesty and Virtue, the work of the

Upon these Good saying, a Son of the Church of — Coments thus.

"Now if these sober and necessary virtues, which are of no value, if not sincere, be the ultimate intention of all God's Laws; it follows that those virtues, are more accounted of with God, which are inward, and effect the Soul, than all outward performances how Pompous soever, as much as the end of a thing is more excellent, than the means conducing to it, See p. 118. of the Mysteries in Religion, &c. written by Luke Milbourn; a Presbyter of the Church of England,

The fayings above, I thought needfull to add that none (who read these Lines) may deceive themselves by believing they can be the Servants of God, while Sin, hath dominion in them (and not expell'd by Grace) that is, while their minds take delight in any manner of vanity, read Row.

Chap: 6.

# 72 Good Sayings of the Learned.

I. THE most necessary learning for Man's Life, is to unlearn that which is naught and

2. Study to live a Holy Life. Holiness is the most prevailing Interest in the World; for God is on that side.

3. The best way to keep our wicked Thoughts is always to be employed in good ones, let your Thoughts be such to your self, as you need not be ashamed to have God know them, and words,

Upon

ater

man

ut he

Wick-

irtue,

fuch as you need not be ashamed Man should hear them.

4. Consider the shortness of your Life, and certainty of Judgment; the great reward of the Good, and severe Punishment of the Bad; therefore make even with Heaven by Repentance at the end of every day, and so you shall have but one day to repent of before your Death.

5. He that dares fometimes be wicked for his Advantage, will be always fo, if his Interest re-

quire it.

6. Religion lies not so much in the Understanding as in the Practice, it's to no purpose to talk like Christians, and live like Insidels: This was it, that made a famous Heathen Philosopher to say, That there was nothing more Glorious than a Christian in his Discourse, nothing more miserable in his Actions.

7. Hear no ill of a Friend, nor speak any of an Enemy; believe not all you hear, nor speak all

you believe.

8. Catch not too foon at an Offence, nor give too easie way to Anger; the one shews a weak Judgment, and the other a perverse Nature.

9. Avoid in Conversation, idle Jests, and vain Complements, the one being Cracking Wit, the other nothing but Verbal Idolatry; virtue like a rich Stone, is ever best, when plain set.

10. If you meet with a Person subject to Insirmities, never deride them in him, but thank God that you have no occasion to grieve for them

in your felf.

11. You may see your own Mortality in other Mens Death, and your own frailty in their Sins.

12. 'Tis a fair Step towards Happiness to delight in the Conversation of wise and good Men, where that cannot be had, the next point is to keep no Company.

13. Never argue against the Truth, but covet

to

W

ed

ed,

of

but

he

to be her Champion, at the least to hold her Cc-lours. He that argues against the Truth, takes pains to be overcome; or if a Conqueror, he gains but vain Glory, by the Conquest.

14. Silence is the highest Wisdom of a Fool, and Speech the greatest Trial of a wise Man.

15. A Man without Secrecy, is an open Letter for every one to read.

16. A Man seldom repents him of too little

Speech, but often of too much.

17. A wise Man draws the Curtain of Prudence before him (which is Silence) to make him walk unseen, yet many a silent Man is like a shut Book: which, if you open, and read it, you may find good Matter in it,

18. Credit cannot be preserved with too great Care, nor expended but with the greatest Loss; there is no such Inselicity, as to survive ones Reputation, nor so great a folly as to put it in hazard. It's more difficult to repair a Credit once empaired, than to keep that in a flourishing Greenness, which has never blasted.

19. When I have done a kindness, or good Office to any, I never love to boost of it, for that of a doubtful Friend, is to make a certain Enemy.

20. A man must know many things first, before he be able truly to judg of another, or of his Actions.

21. If at any time my Judgment incline meto Cenfure, I always have a care not to publish it.

whom thou judgest; it is a more dexterous Error to speak well of an evil Man, than ill of a good.

23. When I am told that any man hath reproached me, or speak ill of me, I am not much concerned, but behave my felf according to the Maxims of Prudence and Charity, and consider I have this but at second hand, I can hardly believe it, or if he did say it, some body hath abused him, I am

econfident he hath no ill meaning in it; nay, it may be he faid it on purpose, that I should hear of it again, and be the better for it.

24. I never speak ill of any, if of a good Man it was Impiety; If of a bad one, I always pray

for him.

25. Zeno, being demanded how he behaved himself when he was reviled, he said, As an Anabassador dismissed without Answer.

26. Whofoever is vexed at a Reproach, would

be proud if he were commended.

27. If any Person shall speak ill of you. I advise you not to disquiet your self, but endeavour to live so virtuously as the World shall not believe that to be true which is reported of you, and you must understand, that many speak ill, because they never learned to speak well.

•8. He that doth fubdue his Passions with God's Gift in his Heart, shall obtain a more Glorious Victory, than if he placed his Standard in the farthest Confines of Asia and Africa, and his Triumph is more renowned, than if he had over-

thrown the Medes and Persians.

29. I shall never gratifie my Enemies to shew

my felf concerned in any Passion.

30. Have not to do with any Man in his Paffion, for Men contrary to Iron are worst to be

wrought upon when they are hot.

31. If your Passions were duly considered, you should need no other Cure than the Consideration of them; let the first Fervor abate, and the Mitt which darkens the Mind, will be either leffen'd, or dispelled.

32. Pardon is a glorious kind of Revenge; I shink my felf sufficiently revenged of my Ene-

my, if I pardon him.

33. He that doth an Injury to another, doth it to himself, and it's many times repaid with full Interest.

Hath

34. Hath any wounded you with Injuries, meet him with Patience, hasty words rankle the Wound, soft Language dresses it, Forgiveness cures it, and Forgetfulness takes away the Scar.

35. The Wages of Sin is Death; it's poor Wages, that will not make Men live; as Virtue is is own reward, so Sin is its own Executioner.

36. A vertuous Man can never be miserable,

or a wicked Man happy.

37. Vertuous Persons are by all good Men openly loved, and even filently by Bad, so much do the Beams of Vertue dazzle, even unwilling Eyes.

38. He that you mark out for your Friend, let him be a vertuous Person; for an ill Man can

neither long love, nor be long loved.

39. Where there is a difference in Religion, there is rarely a Confort in Affection; but if I meet with an honest just Man, let his perswasions as to Religion what they will, I can put him in my Bosom, forgetting the story of the Snake.

40. Never purchase Friends by Gift; for if you

leave to give, they will leave to love.

41. Be flow to choose a Friend, and flower to change him; courteous to all, intimate with few; scorn no Man for Poverty, nor humour any for their Wealth.

42. To be content, is to be rich, and this Riches any Man that will may give himself: to be rich, is not to encrease your Estate, but to retrench your Desires, you are not rich or poor by what you possess, but by what you desire; for he is not rich that hath much, but he that hath enough, nor he poor that hath but a little, but he that wants more: He to whom a little seemeth not enough, a great deal will seem but little.

43. I desire no Honour, nor Preferment, for that would declare, that I prefer more what others can bestow, than what I possessmy self: Nothing can make me greater being Version.

44. The Ambitious Man, to mount to Honour. cringes to all People; but fo foon as he is mounted, it's usual with him to take his Revenge, by huffing every Body below him; his Imployment requires that he should be free to all Men, but his Pride and ill Humour makes him acceptable to no Man.

4r. So order your felf, that you cutoff all vain Defires, and contract your felf within the Boundaries of Nature, which are necessaries; they are fo few and small, as hardly any Fortune can fnatch them from you, they that covet things useless and superfluous, enjoy not even those that are necessary, every place yields enough for Necessaries, and no Kingdoms is sufficient for Superfluities, it's the Mind that makes us happy in a Defart.

46. A vertuous Man, in what condition foever he is, will be still happy; for he subjects all things to himself, because he submits himself to right reason, and governs himself by Wisdom in

God's Fear, nor Passion.

47. The fear of loling any thing is almost as bad as the loss it felf, Miseries are endless, if we stand in fear of all posibilities. When Zeno was told that all his Goods were drowned, then fays he, Fortune hath a mind to make me a Philosopher.

48. They who least shrink at the Storms of Fortune are always most vertuous, and victorious

in the end.

49. Temperance augments things that are pleafant, and ordinary fare, is made equal in fweetness to the greatest Dainties.

50. By Temperance Men shur up their days like a Lamp, only by a pure Confumption of the

radical moisture, without Grief or Pain.

51. If you defire a constant vigorous Health, a perpetual Spring of Youth, use Temperance.

92. There are two principal Diseases of the Mind, Mind, Desire and Fear, Temperance is my Buckler against Desire, Fortitude against Fear: the one supports the Mind, when it desires, the other exalts it, when it fears.

53. Sobriety is that which will fecure you against all Distempers, and make your Life pleasant, for the Harvest of Diseases doth arise from

the Seeds of Intemperance.

54. Abstinence, and moderate exercise of Body, plucks up the cause of all Diseases by the roots, in the inward veins; it takes away the Bulemia, which is caused by the ill Disposition of the Stomach, and that Melancholick Humour which is seated in the Tunicles thereof, turning variety of Food into ill Humours.

55. The Seminalities of all our Difeases, and Abbreviation of Life, is from the excessive eat-

ing of Flesh, and other Sweet-Meats.

56. To go to Law, is like a Lottery, or playing at Dice; where, if the Game be obstinately pursued, the Box-keeper is commonly the greatest Gainer.

57. It was a good Advice of Christ, If any Man will sue thee at the Law, and take away thy Coat, let him have thy Cloakasso; the reason saith my Author is evident, lest the Lawyer should come between, and strip you naked, even of your Shirt.

58. Breaking your promise, may gain you Riches, but never get you Glory, for he that breaks his Promise, forfeits his Faith (which was the security) and so is become an Insidel unto him to whom he promised.

59. Rigor in matter of Religionseldom makes ill Christians better, but many times makes them

fubtle and referved Hypocrites.

60. Let all your Observations and most memorable Passages you hear or meet with of Physick or, be committed to writing every Night before you sleep, and so in a short time you will

days of the

ealth, ince. of the Mind, have a Dictionary of Prudence and Experience of

Your own making.

61. To deceive one, who is not obliged to believe you, is ill; but to cheat one whom your fair pretences have induced to believe you, is much worse; for this is to murder one whom you

have perswaded to lay aside his Arms.

62. If you have gained unto your felf a Reputation of being Vertuous, to preserve it, eschew Envy, make a fair Retreat, there is nothing better than a Life retired from daily Conversation, especially of the Multitude that delight in Folly,

63. Give me a retired Life, a Peaceful Conscience, honest Thoughts, and vertuous Actions,

and I can pity Cafar.

64. Tho' you lofe all, yet you may still posfess your Soul in patience; this is your last Referve, and that firong Hold, whereunto he who is beaten out of the Field, may always retire, and cannot be forced out of it, but by furrendering it.

65. Doth any Man by falle Oaths rob you of your Goods, consider that God, by that Man, takes back what he hath only lent you; the thing you forefaw is come to pass; and, what amazes you! that which hath happen'dout, it is but that which you have often feen and known.

66. If you confider you are a Man, your Miffortune will not feem new unto you, if you reflect on the Infelicities, which happen to others,

your own will feem but light to you.

67. To be without an Estate, and not to want; to want, and not to defire; to take the changes of the World, without any change in a Man's

felf, are excellent Qualifications.

68. All Afflictions and Calamities are to me welcome; for I never feel more the Divine Affistance and Comforts, than in my greatest Extremities; and because I am under the Protection of the Almighty, I take but little care of my felf.

69. I would not have you disordered within you, when there are so many things out of order, without you.

70. To fear God, and keep his Commandments, is the only Wildom, and will at last be found to be the best Preferment, and highest

Happiness.

71. The good Moral Man is a Christian by the furer side, that is, Speculations may fail: Notions be mistaken, Forms wither; but Truth and Righteousness will stand the Test; the Man

loves them, will not be moved.

72. By MORALITY I understand vertuous Living, Purity of Manners, that Justice, Temperance, Truth, Charity, and Blamelesness in Conversation, which may well denominate the Man that lives, that Life a Man just; in short, one that does unto all Men, as he would have all Men do unto him, therefore the Vertuous Man is the Gracious Man; for 'tis the Nature and End of true Grace, to make Men Vertuous.

If our Historians now adays would employ their Lamps and Oyl in the delivery of a profitable History, such as might rather tend to the cherishing of the unripened Blossoms of Vertue, than the nipping of them in Youth, how pappy

might this Land be?

Which may agree very well with that Doctrine (it's faid) Socrates Taught his Scholars, That they should not think to be Honoured so much for being Philosophers, asto Honour Philosophe by their Virtuous Lives.

The Bleffed Bethlemite, the Fountain of Life, or Christ Jesus his Excellency, Containing a Description of the Bleffed Messiah, in his Types, Titles and Attributes, &c. Written by a Minister.

E's fecond Adam, who repairs What Adam did destroy, He's Advocate to plead for me, That Sin may not annoy; Christ's Alpha and Omega Bleft, Beginning, and the End, That Golden Alter, whereupon, Our Prayers may Ascend; Amen the truth of Promises, The Antient of days, The Angel, of the Covenant, Annointed, us to raife : Of our Profession, He's the Great Apostle, above all Delicious Apple-tree, that yeilds, The Fruit most Cordial, An Ark, wherein, the richest store. Of Treasures, may be found, Ark, for my Soul, that is by Sin, And wrath may not be drown'd: Attonement, He's to make my peace, And expiate my Siu, Author, and Finisher, of my Faith, That Favour I may win. he

The Brightness of the Fathers Glory, In whom the Deity shines,

He's Ocean full of faving Grace,

More Cordial then best Wines; Then I'le begin to Banish Sin,

Contemning Earthly Toys,

With Wings I'le Flye, and foar on high, Seeking for Heavenly Joys:

The Captain of Salvation flout, of Thousands Ten the Chief,

A Child, yet Champion Foes to Rout,

And bring my Sould relief. A Cluster of the sweet Camphire,

Full of Soul-Saving Grace,

A kind Commander, me to cheer, And bring my Soul to Peace.

Ifrael's Consolation,

The Corner-Stone is He,

Both Jew, and Gentile, for to joyn,

In one Church curiously;

He's given for a Covenant, Which God and Man hath ty'd

A Covert from God's flormy wrath,

My Counfeller and Guide: David, according to God's Heart,

Goliah, for to Slay,
To kill Ten Thousand of my Foes,
And drive them all away.

Day-

Day-Star to bring the Morning Light, Deliverer, him I'le call,

The Holy Fasher's chief delight,

Defire of Nations all:

A Divine Detter, who hath wit. Thrice infinite in store,

A Door, whereby we access get, Into Calestial Glore.

The Eagle on his foaring Wings, His Blood doth bear away.

His Blood doth bear away, Far from all danger, so my Soul, By Christ is kept alway.

My Elder Brother for my Good,

The Elect One of Might, An Ensign lifted up on high.

My Enemies to fright.

End of the Law, for it's a guide, And Schoolmaster to show,

That my Soul Sins, without his Aid,

Will quite me over-throw. The End also of Ceremonies,

For Shadows they do fly, When Christ the substance on the Cross;

It's Finished did cry.

As Enoch most Religious, Did ever walk with God,

And after caught to Heav'n, where he, Eternal hath abode:

He's Everlasting Father too;

For Essence is but one, In Blessed Three, yet Personaly;

He's the Father's Son. He's fairer then the Sons of Men;

A faithful Steward he, Faithful in Witness, and in Word,

He's first and last to me.

With Fire of Grace, he'll me Baptize,
To Purge away my Sin,
And if nood he officion's Fire

And if need be, affliction's Fire Shall mortifie my Sin.

Firft.

First, Ftuits of Resurrection, He's the Foundation sure,

The Fountain whence the living Sreams,

Do flow, my Soul to cure; As forerunner, he's gon before,

Those Mansions to prepare,

Where Bleffed Saints in perfect Glore,

And Elect Angels are,

The Godly Gift of God bestow'd,

On Adam's wretched race,

The Glory of his Israel,

And true God folace.

He's my great Governour and guide,

My Foes he will deface,

Head of the Church, He's Heir of all,

He is my hiding place.

The High and Lofty one fo great;

High Priest for Sacrifice,

The Holy One of Ifrael,

And Israel's hope he is.

The Horn of my Salvation strong,

To push my Foes away

He is Husband to my Soul,

My Grief for to allay.

He's Jesus, or that Josus great,

To keep my Soul from Hell,

The Land of Promise will me give, Gracious Imanuel.

Imanuel, that is God with us;

Oh! Wonder and Admire,

That God and Man in Person One,

Concur and come fo near,

As Jonah cast into the deep,

Yet he's restord again,

After three days; a Joseph fold, By Brethren with disdain,

Betrayed and Sold, for little Gold,

Yet for his Brethrens good, For they had Famisht, had he not.

Provided them with Food.

As

As Isaa on the Altar laid, And that most willingly,

His Soul for Sin an Offering made,

Hence my Felicity,

My Joy my Intercessor dear, A Judge that will not sway,

The King of Kings, for Opening heart,

Of David, hath the Key.

A Ladder leading up to Heaven, The meekest Lamb of God,

A Law-giver to frame and fend,

His Statutes all abroad: A Leader, Life and Glorious Light,

A Lilly white and fair,

Of Judah's Tribe the Lyon stout, A Living Stone and rare.

A Lord of Lords, for other Lords,

Have fmall Supremacy, Thou art altogerher Lovely Lord,

Therefore I'll follow thee. The Man Restoring Man to Life,

Sweet Manna for my Food,

My Master to instruct my Soul, And teach me what is good;

The Mediator for my Sin,

The Father to appeale, Melchisedeck the Righteous King,

To give me rest, and ease. Messiah the Anointed one,

To be Priest, Prophet, King, Messenger of the Covenant,

Glad Tidings for to bring.

The Mercy Seat, he Mercy gives, When Metit, I have none,

Most mighty, and his Minister, Of Circumcission.

Of Myrrh a bundle to revive, A Cordial for the Faint,

Tho' we were Dead, he'll makes us Live, For this his Blood was spent,

A

A new and Living way to bring,

To Canaan above;

A Nazarite Seperate from Sin, Most Worthy of our Love.

As Noah did an Ark prepare;

A remnant for to fave,

When all the World was drown'd, So Christ, Life to the World gave.

By Wo and Wrath, Sin Shame and Death,

Which make a Fatal end;

We all had perisht, but his Blood;

For ransome he did send,

An Olive, with the fape of Grace;

For ever fresh and green,

An Ointment poured, forth and full, To eafe my Heart of Pain.

The Paffover for me was flain;

The Paschal Lamb for food,

Our Hearts by Faith bedew'd must be:

And Sprinkled with his Blood.

That the destroying Angel may;

Pass by and do not kill,

He is our Peace and Pearl of price;

With riches us to fill.

A Choice Physician for my Soul;

A Plant of great Renown,

A Polifat shaft the Power of God;

To pull my Enemies down.

Priest Offering and his Altar too; He is my Prince of Peace,

A Portion good, and true for me;

A Prophet full of Grace:

A Quickning Spirit to revive;

A Soul in Sin that's Dead, Rabbi to teach a Ransom for;

A Soul thats Captive led.

Even my Redeemer with his Blocd;

He's Righteoniness to save, The Redurrection from the Dead, Triumphing o're the Grave;

The Bleffed Bethlemite: Of age's Rock impregnable, The Root of Jeffes strong; The Rose of Sharon beautiful: He's Ruler us among, A Sacrifice for all our Sins: A sanctuary secure, The true Samaritan, my Soul; That's Wounded for to Cure. A Samplen, Thousands to destroy; Of Philistines prophane, The Gates of Gaza bear away, Deaths Gates for all his Train. And in his Death, O! Wonderful; The greatest Victory, He gets o're Sin, Grave, Sathan, Hell; And routs them totally. A Saviour my poor Soul to fave, The Scape Goat for to bear, My woful Sin, his Scepter brave, Doth free my Soul from fear. A Servant for our Souls he was, Shileh, fent for our good, The Son Eternal, heir of all; A Shepherd us to feed, A Standard to the World display'd; The Star of Jacob bright, A Stone most precious, who' refus'd; A Sun thats full of Light. A Sun of Righteousness I say; To quicken and direct, From him's my comfort, light and Life; He's furety for my Debt. A Tabernaele where our Suits; Have answers most Divine, A Temple where the Deity dwells; He's Truth to clear my mind. The Tree of Life, far from all strife, With meat and Medicine, Shall me supply, and satisfie, When Paradice I win-His

H

The

His Soul refreshing Cordial-Grace,
Like Waters flow amain,
That way conducting to the place,
Where Souls are free of pain.
Vine-Tree to cherish me, and give,
The sape of saving Grace,

The Fathers Wisdom, I believe,

A Witness for Release; The word of God essential; The subject scope and end.

Of written word, and wonderful, Salvation to fend.

Yesterday and to day the same; Even to Eternity,

His Wisdom, Power and goodness great; Are comming forth to me,

so Zealous for the House of God;
That nothing could restrain,

Him from the Shedding of his Blood;
To Ranfom them again.

An shall the Angels when the News they bring, Of Bless to Man, an Heavenly Antem Sing: And Man be silent, for whose only Sake, Our Blessed Lord, did Humane Nature take,

Luke 2. 14. Glory to God in the Highest, Earth, Peace, good will towards Man.

Saviour of Mankind, Man Emanual,
Who Sinless died, for Sin, who vanquisht Hell;
The first Fruits of the Grave, whose Life did give,
Light to our Darkness, in whose Death we Live.

Over the Whole Man, on Titus 2. 11, 12. Writen by an Independant (so called.)

E Xalted Jesus, Thy free Grace,
Comfort's the Soul, in every case;
The Conscience purges, from all Sin,
And purifies, the Soul within.

Unto the Bones, restoreth Health,
The Life it purges, from all filth:
It gives a Conversation meet,
By cleansing both, the Heart and Feet.

This Mighty Power, doth undress,

Believers of ungodliness.

And shews, How Jesus, to put on,

Whence they'r made brighter, than the Sun:

This Great Instructor, shows them how, To Zion's Potent King to bow; To before his Sacred Rules and Law, To stand in Obedential Awe.

And what Grace Teaches, it constrains,
Most easiely, gently, without pains;
The Yoak of Christ, is very free:
His Service, perfest Liberty.

Since Lord, thy Glorious Grace, doth flow,
To make us Bleft, and Holy too:
To adore thy felf, we do defire,
And always, thy Rich Grace admire.

The Professor call a Hymn, which they Sing in their Meettings (with others) that they may be thought more Holy, than they that Sing David's Psalms; Yet we read not in Holy Scripture that David, Sung, praises to God in Verse, as People

Lon

Oh

The

do now, Nor that any One of the Saints read a Line in Meeter at a time, for the whole Meeting to Sing aloud, as in this Age.

For none then could Sing to the Praise and Glory of God, but such as had (by the help of Gods Grace in themselves) overcome Sin, the

Souls Enemie.

Yet the Teachers, Compose Verses, to be Sung in their Congregations, by such, as they know have not overcome, the World, the Flesh and the Devil.

In Brief here follows some of what some, of the Professors Sing aloud, at the receiving Bread and Wine, called the Lords Super, and if such of them Sing, they Sin wilfully, they sing Lyes in Hypocresie.

Ow to His Table, all his Guests, He wel-comes, with great Love, Saying, I am the Bread of Life, That came down from above.

Eat, Oh! My friends and Drink amain, Of my Eternal Grace, That so you may be strengthened, To Hold out in your Race.

Would we have Grace, wou'd we have Peace, Wou'd we have Glory too, Behold all this, by Jefus Christ, Is purchased, for you.

Lord let the Riches, of thy Grace, Constrain us, to abide, Under the shaddow; of thy Wings, And never more Back-slide.

y be

vid's

that ople

do

Oh! then lets Live, not to our selves, But unto Christ indeed; That Lov'd us, at so high a rate, As for our Sins, to Bleed.

E

How Holy should, we be in Heart, How Holy, in our Life; In Holiness, for to Excell, Should be our only Strife.

Let's know what 'tis, to die with Christ; Unto the World of Sin, Let's know the way, of Life, and Peace, And let us walk therein.

With comfort then, we may expect,
To be for ever Bleft,
And with the Saints above, be plac'd,
In Everlasting Rest.

A few Words of Comfort, to the worst of Sinners.

A Rt thou Bound over, to the great Asize,
For Harkning to the Devil, and his Lyes.
Art thou assiraid, to go and shew thy Head,
Thinking thou may'st, be sent unto the Dead:
Come then to Grace, for there is Room and place,
For such as willingly, would Live by Grece
For Grace, the Fathers House, in former Days,
A Refuge for Repenting, Run-a-ways.
He that like to the Ox, Backsiden, is,
Forsieted hath for Sin, his share of Bless:
May yet come hither, Here is Room and Rest,
Of Old, such have come hither, and been Blest.
Had this been false, then Wo, had been to David,
Nor Peter, nor had Magdalen, been faved,

Nor Jonah, nor Monnesses, nor the rest,
No Run-a-way from God, could have been Blest.
For true Repentance, is, abhore thy ways,
And live in Holiness, all thy short Days;

He that's in Debt, that has not where with all, To quit his cores, by Grace may be freed from

thrall

H

H

T

Or, if thou fears, the Bayliff, or the Jayl,
May find, that Grace, will become thy Bail;
O! Grace, Oh! Bleffed Grace, that shews the way
From which Blind-Man, hath solong gone astray.
Where's Wisdom's Palice, God streightway said,
It is my Grace, draw near, be not affraid:
Make tryal of its Power, and 'twill appear,

That Wisdom (which thou seeks for) dwelleth

here

Whose Glory ('tis so great) Tongue can't express
When thou hast obey'd it, thou wilt say no less
It's most Clarious, with Falight and Free

It's most Glorious, with Enlightned Eyes,

Do fee fuch Beauty, which they, highly prize; It Teacheth, how to manage, every State,

In which thou falls, 'twill teach to moderate;

Prosperity, 'twill make afflections Bright,

of

Tis a Cloud by day, and Flame, by night.
'Twill shew thee Secrit joys, true content, And
E'relasting Pleasures, ev'n at Gods Right-Hand
For joy without Gods Grace, is grief encreasing,

And Wealth is Poverty, without Gods Bleffing

Grace in the Innocent's, a feven fold Sheild,

No Dart can pierce, nor Sword can make it yeild. His Bosom dar's, the threatning Sword Mans Arm In Grace made free, His Courage fears no harm

He cannot fall, that on this Rock doth bide, He may be shaken, but he cannot slide.

The just, and constant mind, that perseveres,

Unblemish't with vain Pleasures, never fears, The Angrey Threatnings, of a Tyrants wrath Death neither can disturb, nor change his Faith

## A Testimony against the Sins of this Age

England, this, by Grace, enlightn'd spot, How vast an Interest, hath Satan got, What Sin, more hateful, in Johovah's Eye, Then that of Whoredome, and Adultery; High-Heads, and Naked-Breasts, a Harlots dress, Are strong Temptations, unto Wickedness, How many, that in Gaudy Garments walk, Of High-Professions, and like Angels talk. Will God devest, and openly proclaim, Their Secret Guilt, to their Eternal shame: Gay clothing, which Mens carnal hearts doth prize, Renders not Lovely, in Johowahs Eyes. Tho' deckt with Jewels, Rings, and Base attire, The Glorious King, their folly don't admire: Saints Hearts, not taken with't, but contrary wife, The Beauty of vain Ones, they do not prize. Tho' very fair; yet, if defil'd with Sin, They like unto, Sepulchares, are within; Loathsome, and vile ith fight of God, are they, And foon their feeming Beauty, will decay; The Powder'd Locks; yea, and the Painted Face, God ere long, will bring into dilgrace. Because of Oath's, and Drunkards, the Land mourn For which my Soul, much inward grief hath born. Think you the God of Purity, does like, Such ways, because he yet forbears to strik. How can th' abused Earth, but gape again, To swallow quick, vile wretches so prophan. Let Magistrates, arise, and take delight, In dealing Justice, and maintaining right. By Grace Kings Raign, and Princes may decree, By its advice, Justice and Equity. And give to every faithfull Subject Right, Which fee's Poor Men, be not opprest by might

And doth by Law in Peaceful wife keep,

What Lawlessly, others would, from them sweep Who steer's their course, by Grac's sage Advice, There's the true honour, theres, the pearl of price

Directions to Parents for the Happy Education of their Children, &c.

Father. Having heard you speak something touching Education of Children, I am destrous you would be more large in that thing.

Teacher. If you are serious and sincere in your desires, (not out of Curiosity to hear me Talk) but intending, in the fear of God, to follow so much of my Advice as appears good to you, I am ready to instruct you, as well as I can, touching that great Duty. Heb. 6.1. Col. 3. 20.

Father. I am truly desirons to be inform'd.

Teacher. Then your first care must be to begin as early as you can, to instil into them such Principles of Virtue and Goodness, as their tender Age is capable of: shewing them the ill that commonly attends the contrary, endeavouring to root out those sullen and peevish Humours that commonly take place soon in your Children; the removal of which will be of greater consequence than you are aware of: And as you would do by your Garden, pull up Weeds at their first appearance, and not suffer them to spread, or take too deep Root, and which will endanger the choaking of those better Seeds you have sown.

Father. But by what means may this best be done.

Teacher. By not suffering them too much to have their Wills, in those things they desire, and which you see will be hurtful (a fault too com-

E 3

mon amongst Indulgent Mothers) but rather let them have such things as are convenient, and at fuch times when they do not cry for them, or with too earnest a desire covet them: And tho' perhaps your Child may Cry, yet the only way to make it quiet, will be to keep it from those things it Cries for; and having once overcome its Humour, you will foon perceive the good effects of it; the Child not finding its crying and peevish Humours gain any thing may leave them; whereas on the contrary, the Child perceiving that it gets whatfoever it thus defires, there will be nothing it fees, but you must expect it must have (tho' never fo hurtful to you or to the Child) or elfe you must have him sullen, froward and peevish: And which Humours commonly grow up with Children, and for ought I know, may beget such uneasteand froward Tempers that may never leave them, but with their Lives.

lather. This is reasonable, tho' contrary to the

Custom of many Mothers.

Teacher. I must in the next place remind you, that so soon as they can speak, and there begins to be some appearance of Reason in your Child, you must not only teach it to Read, but to know that there is a God, a Lover of Good, and a Hater of Evil; and instruct the Child, whilst very Young, to Pray unto God, to Read the Scriptures often, especially those parts of them which Children are most capable to understand; as several parts of the New-Testament, which teach Christian Virtues and Duties which are Moral, causing them often to frequent places of God's Worship: Not bringing them up in Pride and Idleness: Not fuffering them to value their Cloaths, as they are fine, but as they are clean and fervice-Not fuffering any Lie or vain Speech to pass unreprov'd, knowing that small Matters in the beginning may prove hurtful Evils in the end, if not timely prevented.

wit.

But often Instruct them in their Duties, telling them, That God (their Creator) loves all such Children that love him, that obey their Parents; and that live soberly in his Fear, which is to depart from every evil Thought, Word, and Deed.

Father. This is good, but when if all my Enden-

yours and Advice should do no good.

Teacher. However, you must not cease to proceed in giving them good Instructions, and using such Correction in Meekness and Love, as you think may best work upon your Children; but above all things be your self a good Example to them (for that teaches more than Words) in the ways of Virtue, Sobriety, and Temperance; not knowing but God may, by his Grace, be pleased to awaken their Understandings, and make them attentive unto their Duties. You must always labour with hope, and hope without despair.

Father. I too often find that my Infructions do no

good, without Correction.

Teacher. It may be so; yet notwithstanding you must not by any means forbear still to Instruct them.

Father. Give me your Advice, as to Correction.

Teacher. Having often repeated your Instructions, & not finding them to avail, you must correct your Child with the Rod; but by no means in Passion or Anger; for that rather does harm, but in Meekness and Love, & sometime after the Fault Committed, as suppose the fault done in the Day time, you may shew your great dislike, telling him, That such Faults must be Corrected and Amended; then if a sensible Sorrow is not caus'd by your Reproofs, you may the next Morning take your Child, whilst in Bed, and by shewing him the greatness of his Fault, labour to bring him into a tender Frame, and then, as you see cause, correct him with the Rod; not in Anger, but in Grief and E 4

Tenderness; and not leave him till you have made him confess his Fault, and be forry for it; which done, you may shew the like outward kindness as usually before; but be fure you let him not think his Crying, or the like, caused you to remit his Punishment, but his being forry for his Fault.

Father. But when my Child cries pitifully, I cannot, instead of Correction, but flatter it, to cause is to

be quiet again.

This is the most dangerous thing you can use towards your Child; this foolish pity causes it often to think you in the fault for Correcting it; and by this unfeafonable Fondness in Parents, especially in Mothers, many a Child hath been spoil'd, by getting a Mastery and power over his Parents; Solomon fays, He that Spareth the Rod, hateth his Son, Prov. 13. 24. And let not thy Soul spare for his Crying, Ch. 19. 18.

Father. But when I intend to correct my Child, the pitiful Complaints and Beggings he wes, causeth such Tenderness that I cannot but pity him, and so forbear

promising to do so no more.

Teacher. Such Promises you know are seldom kept, so long as your Son remains your Master. This foolish pity may in time prove your, and Child's, Sorrow, which you may perhaps fee too late, when he is grown to that height of Stubbornness, as to disobey your Commands, and tell you (as many do) they will not do fuch or fuch things as you Command; and some that are grown up, sometimes will say, I will not do it if you kill me, which is a fad state your Child is brought to, by your too much Fondness in withholding Correction whilft he was young; not minding Solomon's Rule, With-hold not Correction from thy Child, for if thou beatest him with the Rod he shall not die, Prov. 23. 13. (that is) his Soul shall not die, nor depart from the fear of God. Fa.

Teacher. True; but if you Correct him in the fear of God, in Meekness (not in Passion or Revenge) you cannot err in doing it, but on the contrary your Correction will be well tim'd, and fuited to the occasion, that your Child, by the Bleffing of God, and your Endeavours, may be. brought to fuch a Temper and Frame, that when grown up, he may bless God for giving him such careful Parents; and this you may have good reason to hope for, if your Instructions, good Example, and due Correction, has brought your Child into Humility and Obedience to your lawful Commands; but on the other hand, if you suffer your Child to grow up in Rebellion against you, and in stubborn and evil Practices, you will know Sorrow by them, fooner or later: As David did, who had not displeas'd his Son Adonijah at any time, and who faid, I will be King, tho' his Father was yet alive, I Kings 1. 6. but fee his End, 2 Chron. 2. 5. And as to his Son Absalon, 2 Sam. 140 33. fee his End, 2 Sam. 18. 9. Thus ; David, tho' a good Man, and a good King, yet ; shewed himself too Indulgent a Father (in too much favouring his Children) as too many do now. For Rebellion in Children, was Death by Gods Law.

Another sad Example we have in Ely, who in humouring his Sons, dishonoured God, his Sons committing Whoredom with the Women that Assembled at the Door of the Tabernacle, he only reproving them with a Why do ye such things? when he ought to have restrained them by Correction; for which, what came upon him, ye may read, 1 Sam. 2. 23, 32, 34.

Father. You have given me satisfaction sufficient, that the great cause of Childrens Disoledience, is from the too much Indulgence and Polly of Parents, which I

Es

bope

hope by Gods help to avoid: Now I desire you to instruct me, what Studies and Exercises is most fit for Children.

The first two Years you know is Teacher. fpent in stirring up and down, sometimes in Play but as foon as they can fpeak plain, you must teach them to know Letters, and to Read, which, when they can do, let them be conversant in reading good Books, especially the Holy Scriptures; and in the first place, such parts or portions of them, as is most suitable to their Years and Capacities, not neglecting to give them fuch Instructions in the Principles of Christian Religion, so far and so much as is fitting and suitable to their Age, that they may be initiated and grounded in the Principles and Practice of that Religion, which the present Grace and Mercy of God hath plainly taught us; of which the prejudice by Education, and ill grounded Notions have wrapt many into strange Confusions, as is very evident from too many Instances that may be given.

Next, Let them learn to Write very well, which, by the help of a good Master or Teacher they may soon do; with the most useful Rules of Arithmetick. It will be no impertinent digression (being partly my Profession) to give you some Notes as to the Methods of their Learning

thefe Arts.)

First, Let them carefully imitate the Copies of a good Master in Writing, he putting Figures in order of Pounds, Shillings, Pence, at the end of each Copy; and having writ up a Copy with the Figures, then to cast up the Sum at the bottom.

Also let them have good Paper Books, in which to Write the Examples of each Rule of Arithmetick they learn, (of which they cannot learn too much) it being a necessary and delightful Knowledge; let their Books be carefully preserved, to-

recruitand refrsh their Memories, if they chance thro' Business to forget; but if they are designed for ordinary Trades, two or three of the first Rules will be fufficient, not having time to learn more, nor their Parents perhaps are not of Ability to keep them long at School.

As for the Languages, and other Learning, tho' they be good, and very useful to many Men, (if Sanctified by God's Grace) yet are not of great necessity to ordinary Persons or Tradesmen. "being a vulgar Error (faith an ancient and able Schoolmaster) "to think that to learn over the "Grammar, and some few Latin Books, before a "Boy goes to a Trade, fuch a fmattering of La-"rin being generally useless, and the time spent "in it so much as might have been better imployed, in the Rules and Practice of the English.

"Tongue, Writing and Arithmetick.

But however, those whole Station and Abilities render them capable of giving Learning to their Children, I shall not blame for so doing ;: but let it be under a good Master, who is fitted at the same time to instruct them in the Grounds. and Principals of true Religion, Vertue, and Morality; to Educate them Vertuously and Soberly, as well as to Teach them Learnedly; always praying for a Bleffing upon the means they use, so it may be of great help to make them Serviceable to God and their Country....

Father. What Trades think you best for Boys?

Teacher. That is a good Trade which affords wherewith the Body may be maintained with Necessaries, without Superfluities, and the Soul grow in Holiness; the latter being never known in those that make hast to be Rich in this World's Goods.

Father. I hope Riches are hurtful to none.

True; if the Rich use their Riches Teacher as good Stewards, which must give an account, that

that is, by living Temperately, and in relieving the Poor, turning the overplus to some good and publick Use, in imploying poor People; but it is rare to find (in this Age) a Man who has got fo much Riches as to think he has enough, but is still as defirous, and eager in pursuit of them as ever; tho' his Possessions of this World's Riches is ne'er fo great, which is quite contrary to the Apostle James's Religion, To visit the Fatherless and Widow in their Affliction, and to keep them ebues unspotted from the World. James. 1. 27. And contrary to their Baptismal Vow, made by their Surtyes, That they should Renounce the Devil and all his Works, the vain Pomp and Glory of the World, with all covetuous desires of the same, &c. And that they sould keep Gods Holy Will and Commandments as long as they live.

Father. What further Advice do you give?

Teacher. It is your duty to pray (in Soul) always both for your own Soul, and also for the Souls of your Children, that God would be pleas'd to give you and yours, more of that inward and spiritual Grace, which was purchased by the Death of his Son, our Bleffed Saviour, God for ever, (a Talent thereof God gives into every Soul to improve, 1 Cor, 12. 7,) and which enables all that are obedient to it, To do Justly, love Mercy, and to walk humbly with God. Mic. 6. 8. It begets an humble Spirit, and a tender and broken Heart, which God accepts more than all outward Religious Ceremonies and Observations; And that God would give your Children neither Poverty nor Riches, that they fall not into Snares; for what Profit hath a Man if he gain great Honour from Men, and gain the Riches, Pomps, and Vanities of this World, and lose his own Soul.

Father. I must confess that Heavenly Riches are neach more Durable, therefore more desirable than the fading fadir kind that

do, till t

(thr fuffi pity hav then who Con Year

you as an go De

the

Ret

Ma

Cr M Go to So to

S

6

fading Riches of this World; yet the generality of Mankind are so transported with the splendor of the latter, that they quite neglect the former.

But to return to our Discourse, what shall that Man do, who has folong neglected his Duty to his Children, till they are grown past Reproof, and hardened in their

Sin? I Sam. 6. 6.

gd

t

n S

Teacher. Pray to God for Mercy continually (through Jesus Christ). to pardon your Sin, in fuffering your Children (through your foolish pity) to become fo much your Master, that (you having lost your Authority over them) they neither fear God, nor regard any good Advice; and which might be through your neglect of due Correction and Government in their younger Years.

But, if after having tryed all means to work a Reformation upon your Son (being grown to Man's Estate) cannot you do as Abraham did, who turned out of his House his Son Ishmael, so may your Son (after having suffered Hardship) return as did the Prodigal Son to his Duty. I heard of an honest Man in London, who not being able to govern his Son, caused him to be Arrested for Debt, and cast into Prison, whereby he might do the less Mischief.

Yet some Parents will suffer much, rather than expose their Children to Punishment; tho' if his Crimes were punished in time, it might be a means to prevent his Ruine, and your Sorrow. God having plac'd the Civil Magistrates over us, to be a Terror to Evil-Doers: And while your Son is under your Tuition, if you cause him not to be Punished for his Misdeeds, without Repentance, I doubt you must Answer for his Faults at God's Tribunal.

Father: I have a short Memory, therefore pray Summ up what you have delivered, in short, for my

better help.

Teacher. So I will in Two and Twenty Particulars, which follow; and I pray God incline you to hearken to his Grace (in your own Soul) which will enable you to perform your Duty to your Children (as you are obedient to the Teaching thereof) beyond any Instructions that I, or any Man can give you.

I. Endeavour, by a timely Care, to crofs (tho' by gentle means) those early Humours and Peevishness you see appear in your Children; which, if well done, (with God's assistance, and a continual future care) your Work is in a great measure performed. The first Temper that is grounded in a Child being of greater consequence, in relation to his future Manners, than many think.

II. Let him learn to Read with such Masters or Teachers, as are of Meek, Quiet, and Virtuous Lives; and who are as careful to teach Chil-

dren good Manners, as their Books.

III. Let him learn your Children some short Prayers by Heart, especially the Lord's Prayer, the Creed, the Ten Commandments; together with some short and good Catechism, whereby they may be entred in the sirst Principles of the Christian Religion; for Solomon saith, Train up a Child in the way he should walk, and when he is old he

will not depart from it, Prov. 22. 6.

IV. When he can read the Bible pretty well, let him sometimes read some good and delightful Books, as some Declarations of the Piety and Virtues of young People, with the Sufferings of the People of God in all Ages, with the like, which make great impression of Piety in Children: But above all things, be careful to keep them from such Books as may vitiate their Manners, or beget ill Principles in them.

V. Above all other Sermons, learn them to understand Christ's Sermon on the Mount, Matt. 5, 6, 7, Chap. VI.

VI. That while they continue in any wilful Sin, and repent not of the same, tell them, They have no benefit by Christs Death, Mat. 1. 21. nor must go to Heavenly Joys.

VII. Teach them to know and believe, that God their Maker fees all their Actions, good and bad, tho' done never so fecretly, Prov. 15. 3.

VIII. Put them often in mind of the certainty of Death, and that they must give an Account to God (for every vain and idle word, Mat. 12. 36.) of what Deeds they do here, at the Day of Judgment; and that everlasting Joys shall be to the Good, and Misery to the Bad, and that for evermore.

IX. Take them frequently with you, to hear the Prayers and Sermons of God's Ministers, (whose Lives agree with their Doctrine) and suffer them not to Play, or go from place to place, while there; but behave themselves reverently and soberly, as in God's Worship.

X. Let their Faults be reproved and corrected (in the fear of God) with Meekness, not Passion.

XI. Do not speak Evil, or mock any Person or Religious Society, in their hearing; but be a good Example to them in all things, and give them not occasion, when you reprove them, to retort; If I have done Ill, I learnt it of you, which would be sad.

XII. Let your Discourse, at spare hours with your Children, be of good and virtuous Children and of good Husbandry, praising good People in their hearing, and condemning all that is ill; those which abuse themselves in any Excesses, either in Meat, Drink, or Apparel; shewing them the great mischief, and Sins that those things have brought upon Men, and what they are like to do upon others.

XIII. When your Son does any Exercise, either for his Health or Learning, which you Com-

mand,

mand, Praise and shew great Love and Kindness to him; as also when he is willing to refrain the Company of ill Boys; yet keep him not too long at a time at his Book, but let him walk abroad, or use some stirring Exercise for his Healths sake.

XIV. Suffer your Children not to Mock any Religious Men, or any Deformity in any Person, remembring how the Two Bears tore Two and Forty Children for that Fault, 2 Kings. 2, 34.

XV. Teach them to be of a Courteous Behaviour to all forts of People, Poor as well as Rich, to despise none, not knowing what they may be, and not to revenge an Injury, but bear it pati-

ently.

XVI. Let their Work and Play be moderate, not violent, but often by turns, suffering them not to drink too often when Hot, nor at all till Cool, many Diseases being by that means procured; nor to Eat but at set Hours, and then moderately.

XVII. If you love one Child better than another, keep it private, knowing the ill confe-

quence of the contrary.

XIII. Advise them, that they trust not to the fair Words, Promises of Strangers, without your

Knowledge.

XIX. Affure them, that God, nor good Men, love Children that Swear, Lie, take God's Name in vain; Foolish-Talkers, Drunkards, Gamesters, Jesters, and them that love the Company of ill People, but that they will be turned into Hell.

XX. But above all things, teach them to remember their Creator. now in the Days of their Youth, and while they have time, and not deferr it till they are Old; for it they serve Sin in Youth, and think to serve God in Age, they may be deceived, for they know not that they shall live till they are Old; nor know they, that God will ac-

all th

them mark them and of Souls

Esta Virt Rich enco cept their Service then, having ferved the Devil

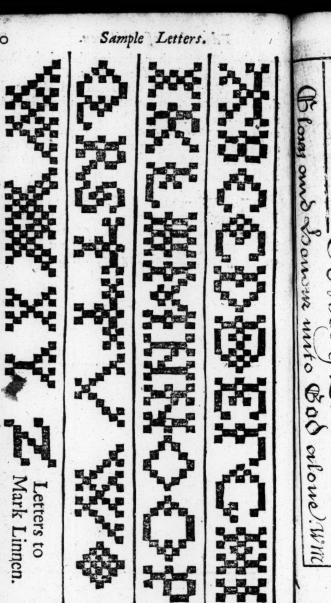

all the prime of their Years, Rom. 6.

e so

XXI. When they can Read and Write, let them practice it, in writing down in a Book remarkable Providences and Mercies of God towards them, that they may be always mindful of God, and of his great and manifold Mercies to their Souls and Bodies, he being alone worthy to have all the Praise, Power, and Glory for ever.

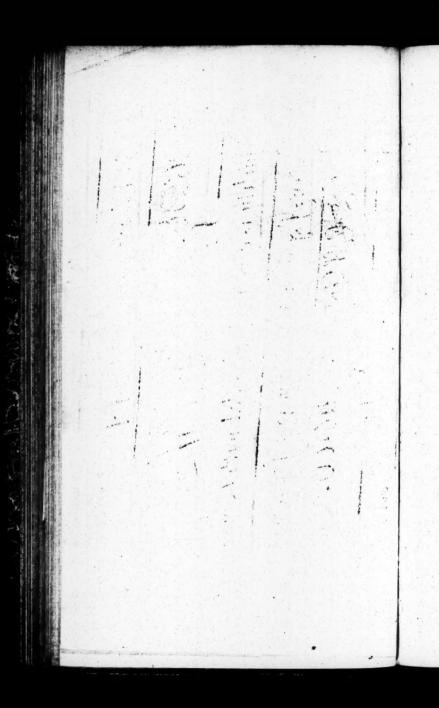

Lastly, When your Son is come to Marriage Estate, cross him not, provided him a Choice and Virtuous Woman, tho' little of this World's Riches; be against him in nothing but Vice, and encourage him in nothing but Virtue.

Easie Copies to Write by.

First, Let the young Learner to Write, provide Pen, Ink and Paper, a Round Ruler, and a piece of Lead to Rule Lines to Write on, to lye together in one place of the House, ready upon occasion.

Second, Let him get a Friend to shew him how to begin each small Letter, and to be very perfect in Writing the little Letters, before he goes into Joyning Hand, and to Write Joyning Hand very well before he Writes Great Letters.

Third, Knowing where to begin a Letter, let him with a dry Pen trace over the faid Letters in the Printed Copy (before) many times.

Fourth, To make the Paper bear Ink well, and the Pen to run the smother, rub the Paper with the sine Powder of Gumsandrick, tyed in a Rag.

Fifth, Set all the small Letters of one height, and all the Letters a little leaning toward the

Right Hand.

Keep a choice Pen, free Ink, and steedy Hand,
And that's the way, fair Writing to command;
Great Gain flows daily, to Ingenious Men,
From that Admired Instrument the Pen.
Make much of every moment of thy time,
In Wisdoms School, this Lesson is the Prime.

Sixth, Put Ink into an Inkhorn often, but pour into the Ink Glass again, what will run out, least

the Inkhorn fall on the writing.

Seventh, Always before you fet Pen' to Paper, fee there be no hairs in the Pen, and if there be too much Ink in the Pen, cast it not away (as many do) but dip the Pen into the Inkhorn again.

In Brief, Let not thy Brest touch the Table, or Desk, on which thou Writes, for the cruching the Brest hard against the edge of the Table hath brought many young Men into a Con-

fumption.

Guide fo thy Pen, that no harsh roughness lie In any Part, which may offend the Eye. her

Therefore, hold thy Pen not too flooping. but pritty upright, leaning but lightly on it; And if thou didst not learn to make, and also to mend thy Pen, when thou learnst to Write (thy Credit will be but fmall) the' thou canst Write pretty well, to go a beging to others to mend thy Pen-

How to make a Pen, and harden soft Quils, which may be of service to such Persons as ean mend a Pen, but very Indifferently.

IF the Goose Quil, of which you are about to make a Pen off be hard and thick, hold the head of the Quil on a Table, and with the Back edge of the Penknif (or edge of another knif,) scrape it to a right thickness, then with Spittle wet the barrel of the Quil, and roll it in the Scrapings, and so they sticking to it, rub it very bright with a woolen Cloath (tho' most do it with the Skirt of their Coats.)

But, if the Quil is very foft, put the Barrel of it into hot Ashes, always stirring it till it is as foft, as the foftest Quil, as ever you felt, and as foon as it is cold, you may make a Pen, of it, observing that the weaker or sof ter the Quil is, the shorter the slit must be.

But, if you have some hundreds of Quils to harden (which is necessary for all Quils to make them flit the clearer) put Water and Allum to boyl, and while it is boyling put in a handful of the Barrels of the Quils into the water, and hold them therein a Minute, and lay them by, and do fo with all you have.

Quil, they will be the sooner hardned in the

Boyling Liquor.

And because some are for Colouring them at the same time, to colour the Barrels of the Quils red, (the heads being cut off) Take Allum in powder half an ounce, virmilion and the sine raspings of Brasil-Wood, of each an Ounce boyl them in a pint of Vinegar until the Liquor is thickish, then strayn it, and put the Liquor into a narrow dep Skellet, and when it boyls hold the Barrels of the Quils in the Liquor (being tyed in bundles) until they Change Colour, and they will be hardened also, so may you Colour many Quils at the same time, But for a yellow colour; instead of the Virmilion and Brasil, use 3 penyworth of Sasfron and an ounce of Turmeriack both in powder.

Then to make a Pen, Hold the feather end of the Quil from you, and cut off the Head of the Quil floping (in length about a quarter of an inch) entring the edge of the Pen-knif, first against the back of the Quil, and Next turn it, and cut off so much of the other side, that the end so cut seemes to be forked. Note, That the Back of the Quil between the Rathers, has no Gutter in it, as that cal-

led the Belly of the Quil hath.

Then against the Back in the half round where you first cut off the head of the Quil, cut a little slit upwards, and above which, hold your lest Thumb nayl very hard, near half an inch above the said half round, Then put the peg of your Penknif under the slit, and with a sudden twich force open a new slit, which will rend it up just so far as you held your lest Thumb nayle, for the slit first made with the edge of the Penknif, is rough, and so will not do, which must be all cut away. Next, cut away some of the Belly of the Quil opposite to the slit, so will you have conve

a point by an a Point you con wheth other hard which with

nient roome, to cut away, each fide the flit, to a point. And if you have a good new Pen (made by an Artist, it will be a help) having made it to a Point, that the flit will close of it felf that you cannot fee through it, it is well, but to try whether one fide of the flit be stronger than the other, hold the slit on the side of your Penknif hard that the slit may open, then you may see which side thereof is the strongest, which amend with your Knif.

Next, Hold the Pen between your first and second Finger on the left hand, and the inside of the Nib even upon your Thumb Naile, and with the edge of the Pen-knif cut a little off the point of the Nib half through sloping, the back of the Penknif leaning toward the back of the Pen, the Knif so remayning having cut half thro', then nimbly (your Knif being very sharp) cut it quite off, the edge being almost down right; The Nip being about the breath of the little Letter i, or according to the Hand you write.

Note, That when the flit looks not clear enough, and that the Quil their feems too thick and strong, scrape it to your mind, with the point edge of your Penknif.

Some gaine comes daily, to ingenious Men, From that admired Instrument, the Pen.

#### How to make Black-Ink.

BEat 12 Ounces of the weightiest Galls to Powder, and let them soak in 5 Quarts of Rain water 2 Weeks, press out the Liquor, and put it in a Pot, to which put Gum Arabick that is in small pieces white and shining 6 Ounces, Coperas that is of a Blew colour + Ounces, Roach Allum 1 Ounce (and if you will) to make the Ink shine the more, put in 2 or 3 Ounces of Loaf Sugar, stir it with a stick every day.

Verses to a Young Man that intends to keep a School.

HE that a School, will take in hand, The Boys, must keep in awe, And make them all in Fear to stand, Or elfe, not worth a straw; For if thatonce, they get a head, They'l Play when, they do please; And Sleep as though they were in Bed, Their Settish Brains to ease. And when their Learning they should mind, Then they are Lull'd a fleep, And for to Learn they 're quite unfit, More fit for to keep Sheep; Then if you'd master them you cannot, It is not in your Power, They will not then be ruled, Though you beat them every hour.

### The first Alphabet of Copies.

A N Ingenious Youth, gains Comendation.

Be industrous in Youth, and Improve thy time.

Commendation accompanies, the diligent.

Delay no time, but improve every moment.

Euil Company, provokes Youth to vain words.

From the company of foolish boys refraine.

Govern thy Actions, by Gods Law in thy Heart.

Hope in God, and trust in his tender Mercies.

Innumerable are the troubles that fall on Rude Boys.

Knowledge, and true Wisdome, cometh from God.

Love the best learning, and strive to attain the same.

Make no Drunkard, or Swearer, thy companion.

No enjoyment, like the Peace of God in thy Soul.

O Por Profession Reme Search The Wain With eXpek

Zions

the figurat the shilli which write and j

Governous Delig Even Fear Good Honor Its a Know Lear Malin No tr

Plea

Quie

O Youth spend all thy time, in the fear of God-Prosperity gains Friends, Powerty trys them. Quickly lay hold, on times swift minute. Remember how empty, Earthly enjoyments are. Search the Scriptures, in the fear of God. The way to prevent dangers, is wifely to consider. Vain and fading, are all worldly pleasures. With care proceed, in Virtues path. expell all wicked thoughts, with Gods Grace in thee. Youth fear not Death, if thou Lives Virtuously. Zions Children, fear to Sin against God, 5-12-4

the full breadth of the Book, its needfull to fet Figures in order of Pounds, Shillings and Pence (as at the end of the line Z, above) is 5 Pound, 12 Shilling, 4 Pence, to be write down with the Copie, which will very much perfect the Boy, both in writing Figures, and the Suming the whole up, and place the Total at the bottom of the Copy.

#### The Second Alphabit.

Fault once excused, is twice committed. A Banishment is there, where no place is for Virtue, Covetous Men are Poor, for want of Content. Delight, to obey Gods Grace in thy own Heare. Even do as thou, wouldst be done by. Fear God, so wilt thou depart from Iniquity. Good Infruction oft begets Virtue in Youth. Honour, Love, and Obey, thy Loving Parents. Its a bad Life, not Death, that diffroys the Soul. Knowledge often puffs up, Grace humbleth. Learning well imploy'd, is gainefull. Malice and Envy, are as Cankers to the Soul. No trouble comparable, to a Quilty Conscience. Out of rudeness, comes distruction on many. Pleasures while they flatter, Wound the Soul, Quietness of minde, with Godliness, is great gain.

Remember always, that thou must die, Sloth, and wain pleasures, are enemiet to Learning. Tis happy tarrying, that stayeth from evil doing. Vicious Men, are accompanied with reproach. Wonderous and Numerous, are Gods Mercies. eXcess in strong drink, Wounds, both Soul and Body. Tield not to Vice, but shun the occasion of it. Zeno, was a Man, famous for Learning.

### The Third Alphabit.

LL is but Lip-wisdom, that wants Experience. Better it is to endure injuries, than to do any. Condemn no Man for Powerty, be Charitable. Defer not Repentance, for that is dangerous. Envious Men are to menters, of themselves. Give thy minde, so follow Virtuous ways. Humility is a most commendable Virtue. Intemperance destroys more People than War's. Keep lafe good counsell, four ill advice. Love the Company, of Virtuous People. Move not thy longue in Anger, at any time. Omit no time, to be Idle, if in Health. Powerty, is no hinderance, to understanding. Quench not thy defires, to good Actions. Religious Opinions, without a good Life profits not. Strive to get Knowledge, in profitable Arts. The beauty of the Soul, is Humility and Patience. Virtuous People, will not tell Lyes for gain. Wife Men confider well, before they speak or Act. eXasperate not the angrey, rather use Silence. Youth, Gods Gace in thee, enclines to good Werks. Zions Glory Grace, is obey'd by gracious Souls.

### The Fourth Alphabit.

A Adam and Eve, by Sin did fall, But that office, undid us all.

Chrift.

Goa

Ing

Christ by obeying, did restore, Doubly the good, we lest before. Each Child of Adam, learn to know, Fathers offence, was Childrens wo. God rich in Mercy, did contrive;

How Sin might dye, and the Sinner Live,

Inquire wisely who was he,

Kept us from Hell and Mifery : Learn also Sinner what was it,

Made him a Mediator fit: None can deny but that was He.

Opened the Door to our Liberty, Prepared Christ to do us good,

Quenching Hell Fire with his own Blood.

Read bumble Sinner and admire, Sin is removed that made the Fire ;

Therefore let Adams Sinful Race,

Venter their Souls upon his Grace. We that are Born to Sin and Death,

Xpepest new Hearts from Christs new Breath. Young Men and Old both learn to be,

Zealous to hold your Liberty.

### The Fifth Alphabit.

Ct nothing, but what thou may fafely own, And what thou need not blush at, being known, By fad experience this is known to some,

Who hate Instruction, to Distruction some.

Contend not with a Man, of Greater Power, By Land and Sea, the Great the Less Devour.

Despise not Mortals, of a mean Estate,

Since Ignorant thou art of thine own fate. Estates to gain Men toyle, and break their Reft,

But Competency, with Content is best.

Far better were it, to be Ignorant,

Then to be Learned, and Gods Grace te want.

Gods Register, the Conscience, Notes domn all, Our Actions, just, or unjust, great and small.

Haft

Copies for a Writing School. 100 Hast thou wrong'd any Man, make satisfaction, And do not stoop, to an unworthy Action. Ill gotten Goods, oft quickly waste away, And bring the Owner, to a deep decay. Know thy felf first, and then begin to scan, The Imperfections, of another Man. Let me be just to all, tho' I sustain, Some Loss thereby, that loss will turn to Gain. Men who in eurious words do least abound, Are always found, to be the most Profound. Notional Knowledge, is of Stender use, That's best, which we do Practice, can reduce. Of bad Examples, Satans baits beware, And Shun them as a Pestilental Air. Praife, or applause, which from without we win, Signifies nothing, If not Grace within. Questions doubtful, and Dark opinions tend,. Do Exercise Mens Brains, but to no end. Rather then be quite broke, wifely submit and bend, 'Tis mighty folly, with the mighty to contend, Small Friendship, les reality, is found, Where fauning, faigning complements abound. Tis not how many Arts, or curious we have, But how well we improve, the Talentthat God gave. Valiant he does approve himself, and Wife Who with a Meck demean, flights Injuries: When to the World, you others faults make known. Ingeniously reflect, upon your own. eXamine at Night, thy Actions of the Day, With Grace, that down in peace thy head may lay. Youth what e're shou doft, by day or night. Think with thy felf, thow't always in Gods fight, Zeal for a Publick Good, with Men is rare, But felf-Interest, is their chiefest care. The Sixth Alphabit. AT Sudden death of ill Men, be not glad,

Thy happy dye, whose Life was never bad.

Brabble

Brabble not with him, whom thou dost not know, The greatest strif doth oft from least words grow.

Credit not always, them that things relate,

Small heed is given, to them that often Prate.

Defer not till to Morrow, to Esfay,

What worthy Arts, you can perform to day.

Endeavour so to Live, and so to Dye.

As to enjoy a Blest Eternity.

Fools even at School, Squander their time away,

As if they went, only to learn to Play.

Give at once asking, what you fafely can,

It's part of gains to belp an Honest Man. His ripe Discretion, always is in Season,

Who can his Passion Ballance with Right Reason.

If thine Estate be not as 'twas before,

Yet see thou live content, with present store.

Keep what thou hast already got by pains,

Want will increase, where labour makes no gains.

Look after things of Profit, and Eschew,

Those apt to errors, whence no good ensue.

Mock not Old Folkes, if thou haft any Brain, For he thats Old, grows Childish once again.

Natures Supplies, will no time fail to thee,
If theu with needful things, contented be.

Observe with silence, what each Man doth say, Speech doth mens manners hide, and them bewray.

Praise sparingly, whom thou dost commend,

One day will shew, how much he is thy Friend. .

Quit this Worlds Stage, you must when your parts Get carnest timely, for a better lay'd. (plaid,

Rich men are Poor, in Covetous Conditions,

Poor men, are Rich, in Envious Dispositions.

Search quickly, what it is that thou suspectest,

Things oft do harm, which thou at first neglectest.

The early Chirping Sparrows may reprove, Such lazy Schollars, that their Beds do love.

How do you think he will forgive your Sin, When you'd not ope, to let the reproven in, In your objeured Hearts, Search and you'll fee, That if obey'd, from Sin will fet you free. Keep close thereto, and don't from it reseed, And 'twill to you be help, in time of need. Learn thou of Grace, good things from ill to know, Thy Duty then, to God and Man 'twill show. Man's Heart always, to evil doth encline, When Grace not minded, the Power Divine. No Man is hardned, to Destruction till, To Divine Grace he has opposed his will. Our Neighbours Love, we ought to held, For dearer than the pureft Gold. Practice you should, and fludy still, Though in an Art, you have gain'd Skill. Quietly learn all Croffes to endure, Repining deth more Mifery procure. Refrain much talk, I never heard of any, Undone by hearing, but by speaking many. Settle thy mind, on thingt that are above, Exact on no Man, but thy Neighbour Love. Teach thy Tongue Truth, and tell no Lye, What e'ers fo gain'd, is double lofs thereby. Virtue it self, and Nobleness of Birth, Are, without Wealth, esteemed little worth. What Rock thy Friends, by Will have left to thee, Keep and encrease, lest thou a by word be. 'Xamine, try, and prove thy felf, to know, Whether Christ Jesus in thy Heart or no. Youth, if thou woul'st happy be, Riches despise, Which all that much dote upon, live Begger wife.

Zealously keep, and follow Virtues ways, So shalt thou Blossed be with happy days.

I am conftrained, as an humble acknowledge-I ment of my Gratitude, often to trouble you with my Epistles, as being the only requital I am as yet capable of rendering you, for the many Benenefits and Advantages I have received at your Hands: But above all for your Prudent forelight, in bringing me to the knowledge of those things, which have feafoned my Young years with the fear of God, and Variety of Underflandings, and will past all, peradventure, render me acceptable on fundry occasions, with Gods Bleffing: Wherefore I must applaud that compelling goodness in you, by which you even obliged me to persevere in Learning what I had begun, tho' then indeed, not difcerning what I should afterwards reap thereby, I imputed it to you as Harshneis, and Severity.

Therefore let mistaken Youth consider, that in their tender Age, they (not knowing what is good and commendable) ought to submit to the mature Judgments of their Parents, who always with Bowels of Love and Compassion, are Studying their Welfare, tho' they perceive it not, and in this cause what shall I say more, than returning all possible thanks to you, who next the Love and Mercies of God, are the Authors of my being and well being, and ought to acknow-

ledge my felf,

Your most Dutiful and Obedient Daughter,

May, 9. 1999.

Mercy Hew.

#### A Letter from a Scholar to his Friends.

Dear Father and Mother,

Fter my most humble Duty to you, and my true Love to my Brothers and Sifters, and to my Uncle and Aunt, and Coufins; hoping you are all in good health, as I and my Mafter, and the rest of his Familie, are at this prefent time (thanks be to God) These are to let you know, that I received your Letter, dated the 5th of this Instant June, together with the Books and Papers you fent me, for which, and also, for the many Testemonies of your Love, I return you thanks, and hope that happy Progress I have already made in my Learning, may in the end answer your careful Expectations. and in some Measure requit all your care and tenderness towards me; I beg your Prayers to God for his Bleffing on my weak Endeavours, that you at length may reap the Harvest of your Expectation, with joy, and God have the Glory, to whose Protection I commit you, and remain,

> Your Dutiful Son, Richard How.

June 20, 1699.

### Post Script.

Is only a Copie, of my best Hand Writing.

Next unto God, Dear Parents I Address,
My self to you, in Humble Thankfullness.
For all your care and Charge, on me bestow'd.
The means of Learning, unto me allow'd.
Go on I pray, and let me still pursue,
Those Golden Arts, the Vulgar never knew.

A Letter from an Elder Brother, to a Younger, exhorting him to good Behaviour, and seemely Carriage.

Dear Brother,

I thought fit, seeing you are arrived at sufficient years of discretion, to put you in mind, that your Childish affairs ought now to be laid aside, and instead of them more serious thoughts and matters take place, that so you may add to the Reputation of our Familie, and gain to your felf the good esteem of being Vertuous, which is of great value, and ought to be prized at no common rate, as being the chiefest adornment of Youth and Age.

Nor would I have you take this Admonition a miss, or altogether out of humor, and consequently term it out of season, but as the true Sence and Cordial desire of him that Loves you and wishes your advancement and welfare equal with his own, coveting nothing more than to see you thrive both in Wealth and Reputation; and so hoping this advice will not betaken amiss, nor create any wronge understanding between us, I

take my leave and am,

Your very Loving Brother.

W. Philips.

Ju. 28, 1699.

A Letter of Counsell from an Aunt to her Neece.

Dear Coufin,

I cannot but express the joy I conceive to hear that you take your Learning so well, and are

fo diligent thereins the which that you would perfevere in, would yet add more to my comfort especially when I consider, that thereby, you will not only be free'd from evil Company, and evil Imaginations, too frequently the attendants of Idleness (in all those whom the Divine Grace Rules not) but that; Dear Child, you will be enabled to obtain, when you come to years of more maturity, both Credit and Advantage, when those that have squandred away their Youth in Idleness, must be content to come short of either; Wherefore that you may accomplish, what you have begun, be circumspect and diligent therein, as you expect to continue in my favour,

d

Your Loving Aunt,

#### Ann How.

And Dear Cousin, by way of Post-script, take the Following Character, of a Virtuous Virgin,

A Virtuous Virgin, may properly be called the Treasure of Chasticy and Innocency: Meekness and Humility are her constant attendants, and Pride knows not her Dwelling.

Her words are few, and those delivered with Deliberation, because she thinks twice before she speaks, that she give no occasion to others by speaking vain words.

Amongst Strangers, she rarely speaks, unless she be asked a Question, or otherwise Business of importance requires it.

She delights not in much talk, and flys from Vanity, The found of vain words renders her restless and uneasie, till she has found a retirment to the Grace of God (in her own Soul) to be free'd from the Temptations of vain Persons.

At the repetition of any wanten discourse, she blushes.

blushes, and turns away: for the future, shunding those that give themselves up to such vanity.

The spare time she hath (when her daily Labour is over) is spent in Meditating in the Holy Scripture, of Gods Mercies in delivering those that trusted in his Name, out of the Hands of their Enemies, and of Gods sore Judgments upon those Rebellious Sinners that dispited his Loving Kindnesses.

Lastly, Her Obedience to her Parents (or Tutor) is wonderful, and respects to her Superious

and Equals, and Inferiours no lefs.

If such a Virtuous Virgin, as is before discribed Marry to a Virtuous Young-Man, He will say with the Wise-Man. "Portion is a Worldlings "object, Beauty the Amorous scols darling, "Whereas Virtue be she never so Poor, nor to "the outward Eye never so mean retains in her, "what may truly inrich those that shall have her, "and express that Beauty in Age, which far surpasses all others in their Prime (the Author witnesseth this, his Wise and he being each above so years of Age; Divine Grace Ruling)

She will be as a Crown unto him in all Earthly respects, where God joyns in undefilled Love; where this is witnessed (in a Couple thro' Grace Ruling in each) theres nothing in the World, can Equallize the happiness, that attends that

Estate.

A real community of Bodies, and union in Souls (the of Different opinion in some lesser matters of Religion), that they two seem changed into One.

And if the Communication of our Secrets to our Friend is a pleasure, how much is the delight we receive from the oppin-ing of our Heart to that Dear, she who is Linked to us by such Obligations of Love and Duty, who is as our self, and to whom I discover the most intimate secrets of my Heart.

See the Mourner Comforted for the loss of a good Wife.

# A Letter from one lately gone from School, to his late School-fellows.

Loving School-fellows ,

I Return you hearty thanks for all the Kindness, which you formerly shewed me, when I was with you, and do now let you know, tho' too late, that while I had the oppertunity, which you now enjoy, I had made a better Improvement of those precious Moments, which I then too much slighted, and neglected: Therefore I advise you as a Friend, to beware of that harm, which I am now too sencible of, and know that the greatest time you can spend in Learning,

will be too little to gain perfection in those most Exquisite Arts, which you are now Labouring after (in the Fear of God I hope) the Friends of those of you that dwell near me, are in good Health, who desires their Love may be Remembred unto you; pray let me now and then have two or three Lines from you, and you will very much oblige,

Your Loving, but late School fellow,

Joseph Samm.

A Letter from a Youth at the Writing School, to his Father at London.

Dear and Loving Father,

Y Humble Duty to you and to my Mother, and I return you Hearty thanks for all your Kindnesses shewed to me, I make bold to send you this Letter of my own Writing, being the first Fruits of my Endeavours in this kind, and hope you will please to Pardon the Impersections herein, and I doubt not but in a short time, to be so well accomplished, as to give you a better Account of the Expence of your Monies, and my own time, wherefore at present, let me crave your acceptance of this, from

Your Dutiful Son, Thomas Randall.

July, 9. 1699.

That a Letter of one sheet or less, sent by the Post 40. or 50. Miles, cost 2d. Carriage, But if your inclose one piece of paper, in another it is 4d. So that every single Letter inclosed in one, are so many two pences, if the Post-Man knows the number.

Relying upon the long familiarity, that has pulled between us, and your large protestations of Sencerety in friendship, urged by necessity, and the hast that my occasions require, I have made bold to let you know, that I stand in need of —— with which, if you can possibly furnish me, without any prejudice or hinderance to your own affairs, I shall take it as an Extraordinary kindness, and if it stand with your conveniency, Pray send it by the Bearer, or by some other speedy Hand, and in so doing you will very much oblige, him, who is,

Your Friend to Serve you, in what I can,

Sept. 21. 1699.

A. G.

### An Answer to the last Letser.

Dear Friend,

I was not a little glad, upon the perusal of your Letter, of the 9th Instant, that you would be so kind at last, as to put it into my power, to do you any manner of service, whereby, I might more immediately signalize some marke of true Friendship, nor indeed could you have required it at a more seasonable time; Wherefore not to give you any delay, I have sent by your Bearer, what you desired, and shall salways, be glade to oblige you in this kind, as far as my Abilities will extend: And so with my hearty good will tow-

towars you, and good wishes for the prosperity of your Affairs, I remain,

Your unfergned Friend,

Sept, 27. 1699.

William Mellinger.

Post Script.

True Friend,

B Ecause, we may have occasion to write often to each other, I shall delire, that you put in the Post-script, of all your Letters, somewhat of News or other Secret's; writen in one of these two ways of writing, which follow.

First, Put a penyworth of the Spirit of Vitriel in a Thumb-bottle, to which put half so much Spring water and write with it, and when I hold it to the Fire, Letters will appear black, the no

writing before can be feen.

Or write in Transhand, which is but the Changing of 5 or 6 Letter of the Alphabit, as for 0. u. I. m. Read e. a. r. n. and the contrary, and for m. write an. But I shall give you one Example, as

Model palchuso Fliomds by Gifts; fel if yea rovate gian, they agire rovate reac.

Read Thus,

Never purchase Friends by Gifts, for if you leave to give, they will leave to Love.

Robert Philips.

Note, That if you write, to a Father, or Master, or other Relations, Direct the Letter (I mean the Superscription) as if it came from a Stranger, for Reasons that might be given.

A Letter to a Friend, to desire him to endeavour Peace and Love, between two Persons at Difference, and about to go to Law.

Loving Friend,

This is to acquaint you, that two of your Friends, which are my Friends also, are at varience, for which I am very much troubled; I pray (if you think you cannot reconcil them) you will give me your Advice, what I had best do in the matter, and I shall be very much ingaged to you for the same, and remain,

Your Friend,

A B.

### The Answer, with Advice.

Loving Friend,

am forry to hear, that any called Christians I should be for going to the Law, viz. To fee the Lawyers to be revenged upon one another. that is, by casting away their Money, to get a Jury of Men (it may be strangers or worse) to end it, for them, when they may chose such Men (their Neighbours and Friends) to end it for them, which is much better, because less charge and trouble.

Therefore let me advise you to endeavour to perswade them to Christian Love, and to either end it themselves, or chose 2 Friends to do it for them, for the Apostle blames such as was for going to Law; But if one party is for the Law, and the other not, then, he that Loves Peace, rather than the Law, is not to be blamed to use the Law of the Nation to defend himself, nor indeed can he avade it, if his opposer seeks revenge, by

putting him to trouble and charge.

To conclude, do you feek peace, for the Peace makers work is a bleffed work, and if you win them a little into Christianity, and find them willing to refer their case to you, Then desire each party to put into your hand or some other Friend 40s. a piece, or according to the damage let the Sum be double, and both parties confenting (before witness) that the Money shall be dispofed, as you fee good, this done, get the parties to release each other, by fetting their hands and Seals, to a general Releases, in short, according to the following forme, or larger if you please, Thus having quited each other, that is, forgiving one anothers Trespasses as they would have their Father which is in Heaven forgive their Trefpaffes;

Mote, That the party who figns and Seals his Will, is to do it in the presence of three witnesses who are to set their Hands, (not under chree) and it is not much matter whether the witnesses hear the Will read or no, so as they hear the party say he acknowledgeth that writing to be his Will, to which he sets his Hand and Seal, for it they did hear it read it cannot be supposed that they can Remember the Contents thereof, A Man above 14 years of Age may make a Will of his Gods, and a Woman above 12, but neither can will their Lands until 21 years.

If a man Dies without a Will, and leaves both free Land, and Goods, his Wife will have the third part of the profits of the Land during her Life, and one Third part of the Goods for ever; and the next akin to the Husband the other two third parts. But he that makes a Will, and leaves his Wife a certain Sum to be paid her yearly during her Life by his Executor, should also give her some of his moveable Goods.

If a Man Dies without a Will Sign'd and Sealed leaving many Children, the Eldest Son claims all the Land, but if he leaves Daughters only,

they will be Co-heirs to all free Land.

Coppy-hold Land is not given by Will, but

past by Surrender in Court.

#### Of Women, Children, and Servants.

#### First of Women.

The Woman at Marriage, becomes wholly the Man's, together with all her moveable Goods, and if Goods be given to a Married Woman, they all immediately, become her Husbands, she cannot Let, Set, Sell, Give away, or Alienate any thing without her Husbands Confent, nor her very Apparel, and at her Husbands Decease go to the Executor or Administrator of her Husband (execpting her Necessary Apparel, which with the consent of her Husband, She may give by Will, not otherwise, by our English Laws.

The Wife, after her Husbands Death, having no Joynture settled before Marriage, may Challenge the Third part of his yearly Rents of free Lands for her Life, and also the Thirds of the Rents of such free Lands as he Sold in his Life time, if she did not consent to a Fine; But if her Husband Died without a Will in writing (leaving no Child) She will claim the Thirds as above, and the Third parts of the Goods for Ever, and the other two Thirds goes to the next of his Kindred.

But if she be the Wife of a Free Man of the City of London (he Dying without Will, leaving no Child as before) She will Challenge by Law, Three parts of four of her Husbands Goods and Chattels, and one Third of the profits of his Free Lands, for Life, the Goods for Ever.

The Husband must Answer for his Wive's Fault, if She wrong another by her Tongue, or by Trespais, he must make Satisfaction, and pay the Debts that she causeth, except he did before give notice, that they should not Trust her,

A Woman that Kills her Husband, is to be

Burnt alive.

If a Wife bring forth a Child, begotton by another before Marriage, but Bornafter Marriage, the Husband must own the Child, as Heir at Law.

A Wife cannot be a wirness for or against her

Husband, they Two being so much One.

If a Wife bring forth a Child, during her Husbands long Absence, tho' it be some years, yet if he Lived all the time within this Island, he must Father that Child, and if that Child be her first born Son, he shall Inherit the Husbands Estate, if Intailed, or left without Will.

A Woman, that doth not here of her Husband for Seven years together may Marry ano-

ther Man.

If a Woman have no Son, but Daughters, the Lands, as well as Goods are Equally divided amongst the Daughters, who are Co-heirs.

Man and Wife are so fast joyned by our Law, that they may not be wholly parted by any A-greement between themselves, but only by Sentence of a Judge, for Adultery, &c.

#### Of Children,

A Father may give all his Estate (not intail'd) to any one Child, the Consideration whereof keeps some Children in great Awe.

A Son at the Age of 14, may Choose his Guardian, be an Executor, may consent to Marriage (if not an Apprentice) may by Will give his Goods and Chattels, and become bound in Bonds or Covenants, for Necessaries, as Food Rayment Schooling, &c.

At the Age of 15, he may be Sworn to his

Allegiance to the King.

At 21. He is faid to be of full Age, may fell Land (which in other Countries, is not till 25) when the heat of Youth, is fomewhat abated, and they begin to be stayed in Mind, as well as in Growth, viz. Such as Live in the Fear of God, Job. 28, 28.

A Daughter at 7 years, may confent to Marry, tho she may afterwards diffent: At 9 she

may confent to a Joynture.

be

at

er

er

s,

10

At 12, She is able to confirm her former confent to Marriage, and if at that Age, she dissent not, she is bound, she may at that Age make a Will of her Goods, and become bound for Necessaries, &c. At 14, She may receive her Lands into her own Hands, that's given, or falls to her At 21, She may Let, Sell or Will her Lands.

The Eldest Son Inherits all his Fathers Lands (if the Father Died without a Will) and to the Younger Children are disposed Goods and Chattels, and commonly the Eldest Son's Wive's Portion; and besides, some are careful to Educate

them in some Profession, or Trade.

A Man Marrying a Wife having Free Land, and she dyeth, leaving a Child that's heard to cry and dyeth, the Man shall have the Lands for his Life, this is called the Curresse of England.

#### Of Servants.

Rdinary Servants are Hired commonly for a Year (whereby they become Inhabitants of that Parish) at the end thereof they may be free (giving 3 Months warning before) and may place themselves with other Masters, only it is accounted Discourteous and unfriendly, to take another Man's Servant, before leave given by his Master, and Indiscreet to Hire a Servant without a Certificate of his Diligence and Faithfulness in the Service of his last Master, somewhat to this effect.

Memoradum. That I A. B. do Certifie, that C. D. the Bearer hereof hath been a Trufty Servant um me, witness my Hand this 3d day of May, 1699.

A. B.

Servants and Apprentices, are accounted Slaves during the time of their Service, and are put to

the worst of Drudgery for the most part.

But such Masters and Mistresses that live in the Fear of God (which Teacheth to do, as we would be done by, Mat. 7. 12.) will not make Slaves of any Servant, but will faithfully Instruct them in such Arts, Skill, or Trade, in Meekness as they promised by Indenture or otherwise.

Formerly Servants were Bought and Sold in the Markets, in England (as it is at this day in some Countries) but now, if a Foreigner Slave is brought into England, he is free from Slavery,

but not from Ordinary Service.

## A Certificate to remove,

To the Church Wardens and Overseers of the Poor of the Parish of Elstow, in the County of B.

These are to Certisse you, and others whom it may concern. That we the Church Wardens and Overseers of the Poor for the Parish of St. Peter in the Town of Bedford in the County of Bedford do own and acknowledge R. B. to be an Inhabitant Legally Settled in our said parish of St. Peter's and shall receive him, his Wise and Children, when he or they shall become a Charge to your said Parish, In witness whereof we have hereunto set our Hands and Seals the 22, Day of May, in the year of our Lord Christ, 1698.

Note, That the Church Wardens and Overfeers being 4 Persons of the Parish of St. Peters, are to set their Hands and Seals (as the Bond above) and after that two Justices set their Hands, approving the same.

Now the Man having removed himself by Procuring the Certificat, and there refuseth to do the Common Duties of an Inhabitant, this seems not

to be equal.

5:

e simo .

the

ordained, constituted, and in my stead and place, put, and deputed, and by these Presents do make. ordain, constitute, and in my stead and place, put, and deputed C. D. of, &c. Husbandman, my true and lawful Attorney, irrevocable (if you will) for me, and in my Name, and to my Use, (and to my Use, may be left out, if the contrary) do ask, demand, fue for, recover and receive of J. E. of, &c. Gent. all fuch Sum and Sums of Money, Debts and Demands what foever. which now are due, and belonging unto me the faid A. B. by and from the faid 7. E. and to have use, and take all lawful ways and means in my Name, or otherwise for the recovery thereof, by Attachment, Distress, Re-entry, or otherwise to compound and agree for the same; and Acquittances or other fufficient Discharges for the fame, (for me, If you will) and in my Name, to make, feal, and deliver, and do all otheracts and things whatfoever, concerning the Premisses, as fully in every respect, as Imy self might or could do, if I were personally present; and Attorneys: one or more under him for the purpose aforesaid, to make, and again at his pleafure to revoke. And the faid A. B. do hereby ratifie and confirm whatfoever my faid Attorney shall lawfully do or cause to be done in my Name, or otherwise by force of these Presents. In witness, &c. endeth with Hand and Seal as a Bond.

Shewing, How those called Christians that hate one another, because of some different Religious Opinions, are no true Christians.

! This Division That unhappy word. Has done more Mischief, than a Papist Sword. Could ever do, if that Sweet Communion, (At least of Love) did but compleat our Union. Why should Licentious Heats, Christians Hurry, To those Extreams, must they each other worry. For trivial things, do they not all agree. In Fundamentals, of Divinity. Is there no room for Love, and must Gods Grace, Among the People, have no proper place. Why must one Man, be angrey, with his Brother, If not so tall as he; or with another. Because his Face, is not so White as his, Or that his Habit, not fo Gaudy is .. Alas no Folly, can be more obsur'd, Nor more reproved, in Gods Holy word. Why cannot Christians, with each other Bear, Among Apostles, some dissentions were. And did not therefore, Perfecute each other, With froward conflicts, Brother against Brother. If he be Guilty tell him of his Sin, Be mild and Secret, and you may him win. Admonish gently, let your whole discourse, Be full of Grace, Love and Scripture force This is the way to bring him to a Sence, And Gods prescribed Method, to convince. But if you fail, then leave him unto God, Who can reform or Punish with the Rod. Twill Glad my Heart, to hear Men call each other, By that Sweet Title of a Christian Brother. Judge not your Brethren, at a diftance; neither, Give case Credit, to the Tayls of either.

Hot-Headed Scriblers, or Licentious Tongues,
Do Often Load, the Innocent with wrongs.
You may be certain, his cause is very bad,
Whose chief Support from railing, must be had.
Believe not therefore, distant imputation,
No censure give, before Examination.
In all Debates, be sure to lay aside,
All prejudice, and let the Scriptures Guide.
Who Lose Error, truly gaines the Field,
And he is Victor, that to Grace doth yield.
Where 're you find Truth, tho' in mean array,
Subscribe to it, the Glory of the Day.
Away with Contention, let the Truth take place,
And then the Spring of Everlasting Grace,

Will drop down Blessings, Unity encrease, Among all People, as the Fruits of Peace,

The

# The Mourner Comforted for the Loss of fuch a Virtuous Wife as before discribed, according to Hugo Grotius (Parenthesis Excepted.)

When the first Storm of Sorrow is past, and that Pleasure (if Imay so speak) of Grieving is abaited, when the mind now we ared with it's Disease, begins to be willing to admit of Remedies, and to suffer the touch of some helping Hand.

Let us (faith he, to one that had lost a good Wife) if it please you mingle together, the causes of our Grief.

The Advices which are given in General words, as spoken unto all (as Preachers give against Sin in Publick Preachings, when Private Reprost reaches to the Heart) are wont to pass by with less Observation.

But when they are applied, to our particular case, having no other make to hit, they pierce and have a

more Grange effect.

That Sorrow may be overcome, Nature it self teacheth us: For if by no means, it is at last consumed by time, consider now, whether every one be not able (by the belp of Gods Grace) to cure himself, and hasten his own enjoyment, of so great a Good.

Most of us, not only Suffer, but create our Sorrow, whilf we yield our selves, to sudden Cogitations in Mourning (for the Death of a Friend) especially where

the vexation Flatters us, under a shew.

Those sad thoughts we cherish carefully, and to our own hurt. Patronize, doing like them that seeking for Looking-Glasses, which present Bodies greater then they are.

Surely, the will of Man, that hath such Force to hurt himself, might do somewhat, if it pleased, for his own ease.

That Serrow (for any thing except Sin) is an Enemy to us, we cannot deny.

And it is no more then Ordinary Common Sense, which the Greek Poet, hath Adorn'd with Elegant Expessions, to this effect.

If Ills were Cured, by our weeping Eyes,
And Tears could wash away our Miseries.
Thy Tears were worth Gold, which I now must

For weep, or not weep, Evils are the fame,

I know that, said Solon, and I weep the more because I can do no good by weeping, this very Foolish saying, of so Wise a Man, may be an Example to us, how much Sorrow darkeneth the Judgment, that made Solon himself to speak so unwisely.

For in those things wherein Care and Industry is of any force (among which things Sorrow [for loss of a Friend] is one as we have said) we must observe, not whence the Passion comes, but whether it goes, 'tis the

Office of Reason to look forward, not ba kward.

Wherefore, he that doth any thing, ought often to put the Question to himself, Why do I do thus; What do I hope tor: What do I desire, Thus, if one ask himself, who cherisheth his Grief, and endeavoureth not to correct it, he shall see, nothing can be answered.

It is the most Universal Law, which condemns every thing, that is Born to die; And it were great Ignorance to think one Person can be exempt from the com-

mon Ruin.

Saith Antiphanes (which you may more admire) a Heathen Poet, speaking words of this Sense.

Lament your Friends, with coderate,
They are not lost, but gon before, where Fate.

Disposeth all, and we in order must,

One after one be turn'd, to the same Dust. And meet at the same Inn, by several ways, And in another world, shall see new days,

The Apostle Paul, called by a voice from Heaven, checks the immoderate Sorrow, Saying I would not have you Ignorant Brethren, concerning them that are asseep, that ye Sorrow not even as others, which have no hope, for if we believe that Jesus Died, and rose again, even so, them that are asseep will God bring with him.

Friends whom Nature hath made of the same kind with us, and the word of God hath new made, and raised to the same GRACE; your——Gesture speak you to be much and long Grieved in mind, if any of your dearest Relatives, be taken out of your

fight.

Nor is it any Maswil for this did your Fathers, and this do the People with whom you Live intermixed.

But ye have Learned - that Life remains, in the

-Soul, and shall be restored to the Body.

For Jesus Christ, the Author of our Faith, was Crucified and Buried, whose Soul was restored, to his Body by the same Argument, it is evinced, that this shall be done, for all his followers.

He will make us partakers of his Glory, and bring us into those places, where dwells an undisturbed Peace; where shall be Life, without Fear of Death, and Joy

without mixture of Sorrow.

Some taste of this Supper, have the Souls already, that are departed hence, in the Faith of Christ, in most Sweet Tranquillity, waiting for the Consumations of their Felicity, together with their Bodies.

He that heartily, believes these things, must neede be so far from Lamenting, that he will Congratulate their fore F

ty to

dean rila tune and that fall

by f trainthey

just ted mad ted

the felt exce

gree

their happy condition, whom (God) hath fent away before him, to the enjoyment, of our Common hopes.

For in a true Judgment, they are not dead; but freed now at lust, from their Mortality. It is a great Felicity to be quickly Happy; How many Evils parely certain, party uncertain, doth he escape, who is called hence betimes.

How many are the Examples of Men, that have paid dear, for the Lengthning of their life, I might here relate the Torments of Diseases, and the affronts of Fortune, never more to be Feared, then when she Flattereth and the Incommodities of Old Age; Which every Man that Lives long, shall be sure of — yet, All things fill out for the best to those that purely Worship Gd: Nor may we wonder, if God keeps them not delicately, but under Discipline.

February Eight and Twenty all alone,
And all the rest have Thirty One;
Unless that Leap-Year, doth Combine,
And give to February Twenty Nine.

#### Of Holy Days, so called,

S IX Days shalt thou Labour, and do all thy Work, saith God, Exo. 20. 19.

Man faith, We apoint divers days in the year Holy Days, wherein you ought not to Work.

We Read not in the Scripture that Christ or his Apostles enjoyned, that such and such days should be kept as Holy Days (the Ceremonie of the Observation of Days ceased upon Christ offering up himself. Cal. 2. 16.

Some that were for the Observation of particular Days, Paul feared he had bestowed his La-

bour in vain upon them, Gal. 4. 10, 11.

But after the Apostles Decease the departing from the true Faith entred more and more; so that those that were not for keeping every day Holy

Holy unto the Lord, were for observing some particular days in the Year, when every day ought to be kept Holy, by cealing from Sin, Rom. 14. 5.

Next, The Papists, to increase their Religion,

ordained many Holy Days;

As the 25th of March, they suppose was the time when the Virgin Mary Conceived of the Holy Ghost, of being with Child of our Saviour Christ.

The 25th of December, his Birth day, called Christmas, because on that day (or another day instead thereof yearly) they say Mass their Pray-

er so called.

Easter, To keep in Remembrance Christs Death and Resurrection, begun to be observed a few Hundred years after Christ; the difference about the manner of the Services done then, the Christians (so called) accounted one another as Heriticks.

Lent, The Papist ordain'd to be 40 days from Easter, because Christ was Tempted, and Fasted

40 days.

Palm Sunday, The Sunday before Easter, observed in Remembrance of Peoples meeting our Saviour with Palms and Olive Branches in their hands, when he Rode into Jerusalem.

It would make a Volume as big as this Book to Write at large of the divers forts of Holy Days

Invented by the Papifts and others.

Which if People observed them truly unto the Lord in Holiness of Life (by ceasing from sin) none would Judge them, for keeping in Remembrance the Miraculous Conception, &c of our Blessed Lord and saviour Jesus Christ, for the Sake of all Mankind, to Redeem and save all them (that are willing to mind his Grace in themselves) out of Evil; which will keep in mind the Love of Christ to Man, better than the Holy Days.

But instead of being Holy on those Days, People more Generally are rophane in Feasting and Drinking, Games and Sports then on other Days, after their Prayers are ended, which they must needs know (by Gods Grace in them Tit. 2. 11.) the Lord regards not, while they regard Iniquity in their Hearts, Pfal. 66. 18. and not until their Prayers are over, that they may go to their Feafting and Sports.

But all Mankind, do think that one Day in 7. is very needful and necessary for Publick Worship, to hear the Holy Scriptures Read, to wait upon God in his Fear, and for rest from Bodily Labour both for Men, and Cattel, not that the Day is more Holy, then the other Days, which all are to be kept Holy unto the Lord, by ceasing from Sin as aforefaid.

How came Nineveh to know that God delighted in their Repentance in Sack-Cloath (it was Grace in them that discovered it) How can People think now they can Repent, or appear in Publick, to Worship God, in Gaudy Attire, or can, in Truth Worship God in such Dresses, Grace in them will tell them, they do not Worship God in Spirit and in Truth, with fuch Attire on them, no more than if they were in a Play-House.

Laftly, The Papon Saxons, who came out of Germany, became Rulers in England, gave the Names to the Days of the Week, as we now call

them.

# How we came by the Names we give the 12 Months.

THE Idolatrious Romans, called the Months elther from the Names of some of their Heathen Emperours, or their Idol Gods, too tedious here

to Name, in perticular.

May, the Month so called, was some write, from Flora a Strumpt in Rome, that used on the First day of this Month, set up a May-Pole, before her Door, to entice her Whore Masters or Lovers (so called) from whence came the vain and foolish Custom of Peoples set Bushes of white Thorn at their Doors, and May-Poles, in divers Heathenish Towns.

Which puts me in mind of a Clergy-Man of England (who was not one with divers of them) defired me to write his verses in Parchment that follows, which I did, and he both Nayl'd it to the new set up May-Pole, in Aspley in Bedfordshin, and there Preached a Sermon against the first rice

and vanity thereof.

What is there no good Man, in all this Town,
Will help to pull, the Devils Sign-post down.
This is a sad and Lamentable case,
That Men should show themselves, thus void of Grace.

Oh that all the rest of the Clergy would stand up against all manner of Folly, and other Evils, and sear the Face neither of Great nor Small, in reproving of Sin, to their Faces for saith a great Preacher, another Clergy Man, I am afraid (saith he) the Sermons you hear on the Sabbath Day go throw you, you hear them, and hear them, and that is all you do; but you never seek by Meditation, to Row them in your Hearts, and that is the reason why you and

fo lean in Grace, tho' you are so full fed with Sermons,
—— and I am confident the great reason why we have
so many Lean Hunger-Starved-Christians, that arelean
in Knowledge, and lean in Grace, though they hear
Sermon upon Sermon (it may be on the Sabbath day
they will hear four or five Sermons) is because they eannot digest Nothing.

#### The English Computation of Time.

WHo do not begin the Year till the 25th of March, being the day of Christ Incarnation, wherein they agree with Spain.

This is the Rule both in Church
and State, according to which they
Dite all their Publick Writings.
Though according to the Circle of
England.

the Sun and Moon, they allow the Year to begin only upon the Frst of January;

which therefore is by them called, as by most Christians in Europe, the New Years Day.

And to distinguish that Mongral Time from the First of January to the 25th of March following, 'tis usual with many, in the Dates of their Letters, during that Interval, to set down both the years thus, as for the First of January, 1698,

to the 25 of March 1698

As for the Natural Day of 24 hours, the English begin (as most part of Europe do) at Midnight, counting 12 hours to Noon the next day, and 12 hours more to next Midnight, according to the Custom of the Egyptions, and Ancient Remans.

Whereas in some other Countries, as Italy, Poland, and Bohemia, they reckon 24 hours together, from Sun-set to Sun-set, which must needs be very troublesome to tell after the Clock.

In Moscovy, and some Places in Germany (as Nu-

rem.

hs eiathen here

vrite, n the , beers or evain

white livers

The Old Style is otherwise called the Julian Account, from Julius Casar, who 43 years before our Saviours Birth, ordained the year to consist of 365 Days, and 6 Hours. And, as these 6 Hours, at 4 years end, make up 24 hours, therefore a Day is then added to the Month of February; and that year is called Leap-Year, or Bessextile.

The New Style, is otherwise termed the Gregerian Account, from Pope Gregory XIII. who about 100. years agoe, undertook to correct the Calender, by the advice of Antonius, Lilius, &c. For the the Julian Account for many Ages feemed to have no fensible Errour, yet it was at last discovered to be not altogether agreeable with the Natural Motion of the Sun.

In fhort, it was made out, that the Julian year, exceeded the Solar year by 10 Minutes, and 48 Seconds; whereby the Equinoxes and Solaffices yearly changed their places, and flew back to many Minutes and Seconds.

Therefore Fine Gregory ordered the year to confish of 365 Day 6 Hours, 49 Minutes, and 12 Seconds; And that the Vernal Equinos (which then was on the 11th of March) might be reduced to the 21st, as it was at the time of the first Nicon Council, he Commanded 10 days in October to be left out, by calling the fifth day thereof, the fifteenth.

#### Of the Seven Arts.

THE Seven Arts or Sciences ( so called ) are, 1. Grammer. 2. Rhetorick. 3 Logick. 4. Astronomy. 5. Geometry. 6. Musick. 7. Arithmetick. These the Learned, in them, Extol as the Fountain of Wisdom, saying,

Seven Sciences, Supreamly Excellent, Are the Chief Stars in Wisdoms Firmament.

When the Truth is, the Learning of them, becomes the Fountain of all Vice, in such, as mind not the Grace of God in themselves as the thief Fountain of true Wisdom; not the Wisdom of the Fleshly Spirit, that deserneth not the Wisdom of the Spirit and John Gods aw.

Far better it is, to be Ignorant,
Than to be Learned, and true Grace to want.
Poor Fisher-Men, do find the way to Heaven,
When Schollars go astray, who Arts have Seven.

So that those Schollars, that hold those Arts the chief Stars in Wildoms Firmament (and not the Grace of God stake little, of no care, for their finding the way to Heaven for themselves, its enough if they are the Heaven of their Semans believe that by the knowledge of these are they to direct them the right way to Heaven the they do direct them the right way to Heaven the they do direct them the right way to Heaven the start they do direct them the right way to Heaven the start they do direct them the right way to Heaven the start they do direct them the right way to Heaven the start they do direct them the right way to Heaven the start they do direct them the right way to Heaven the start they do direct them the right way to Heaven the start they do direct them the right way to Heaven the start that the start that the start the star

And faith Dr. Tayior, "What availeth know"ledge, without the Fear of God; an humble

Third, Logick, Or a word that fignifies to speak, reason and dispute well; Called also by Authors, The Art of Contention and Darknofe, whereby all other Sciences are made more obscure, and more hard to be Its much in use among Men, who write large of their Arts, in Obscure Words, that the World may know they are Learned, tho' they do not unfold their Art to mean Capacities, yer pretend they do.

When the Religious makes use of this 4st of Contention, to defend their Opinions, they weet the Scriptures, and depart from Grace the Ballance of Equity, and are ledders of the Blind, for they mulk needs be Blind, that think his Cause must needs be the best (anly) because his

Book is great.

Fourth, Astronomy, Signifies the Law, or Diffribution of the Stars (that is) to know their course, and to Calculate the same into a Table in a Book, which is natural, as are the Ecclipsis, for when (by a certain Course) the Sun comes to be just oppofite to the Moon, the Center of this Earth being between them, which hinders the Sun from giving full Light to the Moon (the having no Light but what the receives from the Sun.)

and when this dark Bodied Moon, is between out light and the Sun, we fay the Sun is Ecclipsed,

tho the Sun is far distant from the Moon.

And by these Esclipses, &c. the Astrologers pretend to tell the Actions and Events of things; This Astrology is a base Art (I do not mean Astronomy having Bewitched many Young Men into Athtesm, &c. I. Carleton Bishop of Chichester, faith, The first Invention of Astrology, is by many Learned Men Atributed to the Devil. And St. Augustin faith,

It is a great Madness and Felly to go about to tell by the Stars, the Manners, Actions, and Events of Men. --Which true Christian Piety Expelleth and Condemneth-

And because God said to Job, Canst thou refram the sweet influence of the Pleiades, Job, 38.31. (or seven Stars.) The Astrologers say, Why should not they understand their sweet Insluences; But Jobs Answer was, Behold I am Vile, &c. Yet our Astrologers will have the Stars to Govern the Herbs, when as the Herbs were Created before the Stars. Gen. 1.

But fay they, How can future times, be understood,

but by Astrology.

Answer. No Man knoweth what shall be, or who can tell, when it shall be, Eccle. 8. 6.

And say they, The Stars in their course Fought a-

gainst Silera, Jud. 5. 20.

Answer. So Sung Deborah and Barak, and the River Kishon swept them away, God can use what Instruments he pleaseth to Plague the Enemies of his People.

Again, fay they, The Children of Machar, as Prophets could tell by outward things, what Mirael should

do, &c. Chr. 12. 32.

Answer. They knew by Gods Spirit that God was about to turn the Kingdom of Saul to David.

Thus they wrest the Holy Scriptures for their Egyptian Arts; And likewise for to tell Mens Fortune by the Lines in their Hands, as this, 506, 37.
7. He Sealeth up the Hand of every Man, that all Men may know his Workes.

But the Old English Translation is, With the force of the Rein he shutteth Men up, and all Men may

know his Workes.

Thus in Brief, for want of room.

Fifthly, Geometry, Signifies Measuring the Earth, a useful Art.

A

Di fa Sixth, Musick, Signifies the Muses Art, or Authors of Songs, or Poetry, which as now mostly used, is to stir People up to Vanity; yet the Poetry that savours to True Godliness, no Christian will dispise.

Seventh, Arithmetick, Comes of a word that fignifies Number, or the Art of Numbring, useful

for all Men.

Thus have I given some hints of the seven Liberal Arts; or Sciences (so called) which the Worldly minded Man accounts as Stars in Wisdoms Firms most, (but not the Wisdom from above) But with Grace obeyed in the Heart, they are of great use, but these minded, and not the Soul seasoned with Grace, they do much hurt, become more wise to deceive others; yet the Colledge Doctors (its said) have for their Arms (or Sea!) a Bok with Seven Seals, as the these Arts acquired by Natural Search, and Study, could open the Book, the Holy Scriptures to truly Interpret them: Alas, how dark is Man, that will not see by the Light, of the Spirit of Grace in himself, whilst he hath a day; was it not Grace (not humane Arts) which endued Poter and Papel with their Excellent Knowledge.

Grace, not Nature, is Mistris, in Christs School, Grace counts him wife, who for Christ seems a Eool, For Humane knowledge, and Philosophy, 'Gant bring the Soul, unto sweet Vnity: With Gods Grace, that Shines from Gods Son, In whom Young Men, is happiness alone.

Oh! How the Conditions of People would be bettered, if Preachers did but well mind the Advice of J. Weemse \* gives to young Divines (to called) --- It is requisite, \* See the saith he, that you Study to be Holy; for Christian as the Ornaments which Aaron the High Synagogne.

### The Art of Angling.

Or, The Contemplative Mans Recreation.

DRovide a light one-handed Angle, that will not easily bend, the top indifferent stiff, the whole about three Yards long, the Line of three or four Hairs, as long, with a Staple bent Hook, the compass of it to inclose a Barly-Corn, or less; a Duck leaden Shot, flit half through, to fasten near a Foot from the Hook, that the top of the Float may stand upright in the Water: Thus made, Take two foft Goofe-Quills, not fit to hake Pens; cut the Heads off each about an Inch and a half, shut them together like a Needle-case, fastned with melted Shooe-maker's Wax, a Pill of the same Wax put within the ends, to keep out Water, with two Caps or Rings, made of a Quill to flip on each end of the Float, for the Line to go between: But if you use a fine small Silk Line, of a Penny the Yard (which is most fure) one Link or Strand of Hair to tie your Hook to, or fine Hard-arfe Silk, then put your Leaden Shot about the middle of the hair Link, (being Silk Lines are apt to tangle) the Link of Strane of Hair, made of two ftrong Hairs is best next the Hook. Also provide a Plummet of Lead to try the depth of the Water, and a Peck, or half fo much Malt Grains in a Bag. A Fir Angle rub'd with Aquafortis, gives ita rare Chesnut colour.

Your Tackling being ready, go to the River, and find a place (if you can) that is between two

ious God,

my,

he

or three Yards in depth, near the Banck of the River, that hath a Gravelly or indifferent smooth bottom, where the stream moves not too swift. yet better move fwift, than not move at all. then about a Yard above the place, you fit down to Ang'e in, cast in half your Grains by Handfuls, having first dipt the Bag in the River, to wet them, that they may fink to the bottom the fooner, if you do not wait an Hour before you go to Angle, till the Fish has found them, except the place was baited a day or two before, by your Fishing there, you will do little good until the Hour is expired, then hang your Plummet on the Hook, and find the depth of the Water; if not done at first, which is best of all, and slip the Float, fo as it may fwim with the Stream while the Hook reaches within two or three Inches off the bottom of the River. Your Bait all Summer, except April and May, their Spawning time, when they are not very good, should be the largest fort of Whear, ordered as for Frumenty, or backed, that the White appear, which you may keep two or three Weeks in Beer or Water, putting in fresh, as the Skin grows upon it, if you keep it in Water; when you put any in a Box for prefent Angling, put Ale or Wort, or at least Beer to it, for a while.

Having baited your Hook with a Corn, the Point covered with the Skin kind, that you may fee the White of one fide, cast in the Hook above the Stream near the fide, the Float standing upright, swimming down the Stream, let but a little of your Line above the Float lie in the Water, and as soon as you see the Float sink a little, or lie slat on the Water, strike up the top of the Rod pretty quick, according to the strength of your Line; if you have one too great for your Line to lift out of the Water, hold your Rod, so the top may be bent, otherwise, if the An-

gle

gle and Lines drawn into a streight Line, your Line or Hook breaks, having held him under the top of the Water till the Fish is weary, you may easily take him out with your Hands, or with a Landing Net; after every two or three you catch cast in a handful of Grains, now and then lifting up the Float above Water: So may you catch the largest fort of Dace and Shallows, as well as Roches.

If you fansie an Angle of five or six Yardslong, the sine Line somewhat longer, without a Float, with a Shot near the Hook, cast it from you as far as you can into the River, so as the Hook (ba ted with Wheat, a Gentle or Fly, &c.) sometimes letting it sink, and sometimes drawing it up again, (in hot weather) you may catch the afore-named Fish, and Trout, if any in the River, now and then casting in a handful of Grains or raw Malt, as far as you can into the River.

But for the aforefaid Ground Angling, use it only Morning or Evening in hot Sun shiny weather, or other time of the day, if the Sun shines not on the River.

But for Winter Angling chuse the middle of the Day, and in such a place where the Sun shines warm on your Face, useing a bigger Hook; (if you will) and baiting with the little white tail'd red Worm, that you may find in old rotten Thatch that has laid on the Ground a considerable time. When you go out to Angle, after ashower endeavour to have the Wind on your Back, coming from the South or West, the Sun on your Face.

But it's in vain to Angle when the Earth is hot and dry, or the River out of its bounds, or when hasty Sommer showers, has made the Water, of the Colour of Lee of Wood Ashes, that Women use to wash Linnen in, or the Wind blows strongly from the East or North, and with all cold;

thele

Dish of Fish in an hour or two sometimes, if you want not Patience, the Chief Vertue of an honest

Angler, and indeed of all Men.

Now when you happen to catch more Dace, Shallows and Roches, than you can fpend while they are fweet, you may give the rest to the Poor, taking Zabulon, for your example; who faith, (according as I find it written in the Teftament of the twelve Patriarchs) I Fished for my Fathers Houshold, till we came into Egypt; and for pity Sake I gave of my Fishing to every Stranger that I met with; if there were any Foreigner born, or any fick Body, or any Aged Person, I boiled my Fish and dressed it well, according to every Mans need, and carried it to them comforting them, and having Compassion. And therefore God made me to catch much Fish. Therefore to dress them that you may give to several poor People fome, on feveral Days out of one Dish, (especially to those that are Sick) do thus, having cast away the Scales, Guts and Heads, wash the insides from blood and dirt, then just cover the bottom of a Pot with the Fish, and fprinkle on them Pepper and Salt, and shread Bay leaves, Thime, and Savory, over that more Fish, and sprinkle them as before, till you have put in all your Fish. Lastly, lay on some Butter, and tie a Paper over the top of the Pot and bake it five or fix hours with Town Bread, and the Bones are dissolved, while it is hot press it hard into another Pot, (fit to ferve to the Table) and lay some Butter on the top; when it is cold cut it out by flices; the fauce is Venegar, it will keep a confiderable time (for a ffanding Dish) if the weather is not to hot.

Thus have I shewed (in part) how the honest Young Man may now and then Recreate himself, (without partaking of the Evil that is in the World, it being our dear Saviours Prayer to his

Then, If you have a Grant from him who faith the Pikes are his (tho' they stray'd thither in a Flood) Lay a Line of Two and Twenty Yards long, stakt to the Bank, put on your Wire Hook a small Roach, having a large Cork Float drawn up a Yard above the Hook, to swim near the Bank, the rest of the Line lying on the Bank.

Then go to some other place to Angle for Roaches, if you had baited the place when you came

hist to the River, the better.

When

When you have done Angling go see if a Pike hath swallow'd the Roach, the Baite, and if you perceive he is not a little one, draw him very gently towards you, and when he sees you, away he sies, let go, and give him all the Line you can, then draw him gently again, to tyr' him, when he is weary, you may easily draw him to the Bank side, never hold the Line too straight, least the Hook come out of his Mouth, If the Water is not above the Bank, take him up, either with a Net, or a Landing Hook, thus I catche a Pike, a Yard and five Inches long, in February.

Note, That our Bedford River Ouse, begins in the South borders of Northamptonshire, and Runs through Bucks, Bedford, Huntington, Cambridge and Norfolk, and there at Lyn, runeth into the Sea.

## Fishing for Pearl, taken-from Oysters (so called.)

IN the East India's, it's said, that in March and April, is the time, At the depth of about 30 Yards in the Sea, they let down a Man, first stopping his Ears and Nose with Wool dipt in Oyl, and Spunge, dipt in Oyl, in his Mouth, and a Basket fastned to his left Arm, or about his Neck, he then gets aftride upon the Stone or Weight, and with it finks to the bottom, his Companions hold one end of the Rope, by which when he has filled his Basket they draw him up, he giving them notice when todo it, by puling the Rope, and when he is come up, another is ready to go down. The Sun having made the Oysters gape, they search for the Pearl, some asying none in them.

#### Fishing for Whales.

Ur Merchants, its faid, set Saile in May, and in June arive in Green-Land, a place too Cold for Man to Inhabit in one Winter, and rest in Green Harbour there, whence they send Menin a Boat, and where they see the Sea to swell, they know that a Whale is there, there they cast their Hasping Irons fastned to a Rope, and the Whale sinding himself Wounded plunges to the bottom, the Men in the Boat giving him Rope enough, and also notice that the Ships keep out of the way of his rising for fear of being overturned, then the Whale hastens to the Shore; of his slesh boyled they get Oyl, and of his sins Whale-bone, its said that one Whale has yielded 3 Cart Loads of Oyl, and half a Load of Whale-bone.

#### Post script to Angling:

BUT now, that Innocent, and Healthful Recreation of Angling (in Rivers,) is almost Spoil'd by Mens using of Nets (many times) not an Inch broad in the Mesh, which greatly deftroys the young frie of Fish, which is caused by fuch Gentlemen (it may be Lawmakers) who for a little Money yearly, Lett their Waters (which they fay are theirs) to Poor Men; Not regarding the care our Ancient Law-makers was at, to preferve the young frie of Fish, who made Divers Laws, that neither themselves, nor any other Person should use a Net, whose Meshes were not two Inches and a half broad, and if at any time they happened to catch a Pike not above Ten Inches long, to put him into the River again, A Salmon not 16. Inches long, or a Trost not Eight Inches long; and that those who thould break

the

the Law, was to be fin'd in a great some of Mo-

ney.

But worse than this, there is, that distroys the young Frie of Fish (in some places) where Rogues cast in a passe into the River to make the Fish Drunk, they fay, when, alas! it does themfelves more mischief in the loss of time, then the Fish they get this way, does them good, The Mischief it does, it kills the very Little Fish; and catches no Great ones; but those that are about the bigness of a Mans Finger (that tafte of the paste) will in time swim on the top of the Water, but with that fwiftness, its very hard to catch one; The last year Soldiers Quartering in this Town, I often went to the River, and faw little Fishes swim quick on the top of the Water, some Soldiers one time being on the other fide the River, who made haft away, knew not their Names; I am told it is Fellony to fo Poylon Fish; See the Statutes of Hen, VII. and Q. Fle

A Brief Relation of the first Inhabitants of England, Collected from Divers Authors.

Istorians report that Gomer the eldest Son of Japheth, the Son of Noah, gave Name to the Gomerians, who filled almost this part of the World; leading (as Vilichius saith) in the 10th year of Nimred, a Colony out of Armenia into Italy, which of Gomer were called Combri, and afterwards Cimbri; whence such as departed from Italy went into the North parts, and gave it the Name of Gimbrica, or Chersonerus, from whence the Britains or English proceeded; who came over at first from the Continent of Erance. Englandwas anciently called Cumbri: These Britains, as I may call them, were then as wild in many things as the Indians in America are now, as in cutting, marking and painting their Flesh, and going Naked.

Their Married Women were known by having on their Shoulder, Elbows, and Knees, the Pictures of the Heads of Lions, Gryphons, and the like; on their Bellies the Sun with its Beams,

and on their Paps the Moon and Stars.

The Virgins had on the shapes of divers Flowers, made on them while young, by raising the Skin, and colouring it with the juice of Herbs, which remained on them some years.

The Men were very horrible to look on, having on their Fly h the Pictures of ugly Beafts, as

Serpents and the like.

t

r-

r,

Their Idols to whom they Sacrificed Mens Flesh, were almost in number to the Idols of the Egyptians. The

The Men and Women were swift of Foot, warring with their Enemies in Woggons and Chariots Armed at the end of the Axel-Trees with Hooks and Scythes of Iron, which, with the rattling of their Chariot Wheels, Amazed their Enemies; Refusing all manner of Dainties, Fed upon Roots of Herbs, and Barks of Trees; not Tilling any Ground, nor Sowing Corn, otherwisethen Scattering it on the untilled Earth, and Harrowing it over with Bushes, Cattle, Fowl and Fish they had, but Eat none of them.

Their Trading, for the most part, was among themselves, and that but mean; their Chief Riches consisting (as Strabo saith) in Ivory-Boxes, Sheers, Bitts, Bridles, Chains of Iron, Wreaths, Glass coloured and the like, which they usually delivered to each other as currant Coyn, for what their Necessity required, Living in Huts, and going Naked, and Sayling in Leather Boats, until the Romans taught them to Build both.

Ships and Houses, &c.

This Land has been Conquered 5 several times,

The first Conquest of the Britains by the Romans, who were here 483 years; who enjoyed a yearly tribute of 3000le

First by the Romans under Julius Casar, who made the first attempt upon it 51 years before the birth of our Saviour Christ. He subjected it to the Roman Yoke, and caused them to become tributary to the Romans, who

often defended them from the Picts and Scots, who came out of Scotland, and robbed and spoiled the Country; to prevent which Severus one of the Roman Emperours caused a Wall to be made from Sea to Sea between England and Scotland, that is from Eden to Tine.

Divers of the Emperours were here in Person, as Alexander and Severus, who is reported to be buryed at York, Anno 236. Here also was Constan-

\$1.45.

To relieve them from the Cruelty and Oppression of these Scots and Picts, the Saxons were (in the third place) by some of the Land called in, who sinding the sweetness of the Soil, and the weakness of the Inhabitants, did repair hither by

tants, did repair hither by great Troops, and so feated themselves here, that there were at one time seven several Kingdoms of them, in the compass of England, commonly called the Heptarchy.

These Saxons did bear themselves with much more Moderation, towards those few of the Country that remained, than the Pitts had done: But they growing to Contention, one King with another, partly concerning the bounds of their Territories or Dominions, and

The Britains ruined Anno 473. being 28 years after the Romans left them, though they had built them a flone Wall 8 Foot thick, 12 Foot high, and 100 miles long.

partly concerning other Quarrels; they had many Battels each with the other. Their

Their Kingdoms were these, first, the Kingdom of Kent, under the successi-The 7 Kingdome of on of 17 Kings, began by Hengist, Anno 455, and endthe Saxons. ed in Baldred Anno 827

2. The Kingdom of South Saxons, containing Suffex and Surrey; under the fuccession of 5 Kings begun by Ella, Anno 488, and ended in Authum, Anno 601.

t

P

W

3. The Kingdom of the West Saxons, containing Cornwell, Devenshire, Dorfetshire, Somersetshire, Wiltsbire, Hantsbire, and Barksbire; under the fuccession of 17 Kings, begun by Chardike, Anno 519, and ended by Egbert, Anno 818.

4. The Kingdom of East Saxons, containing Essex and Middlesex; under the succession of 16 Kings, begun by Erchenwin, Anno 527, and end-

ed in Sutbred, Anno 827.

5. The Kingdom of Northumberland, containnig Torkshire, Durham, Lancashire, Westmoreland, Cumberland, and Northumberland; under the fucceision of 2; Kings, begun by Ella and Ida, Anno

547, and ended in Ofred, Anno 926.

6. The Kingdom of Mercia, containing Huntington, Rutland, Lincolne, Northampton, Leicester, Darbyshire, Nottinghamshire, Oxfordshire, Chefeshire, Shropshire, Glocestershire, Worcestershire, Staffordshire, Warwicksbire, Buckinghamsbire, Bedfordsbire, and Hartfordshire; under the succession of 20 Kings, begun by Creda, Anno 582, and ended in Burdred, Anno 885.

7. The Kingdom of the East Angles, containing Suffolk, Norfolk, Cambride foire and Ely Island; under the fuccession of 15 Kings, begun by Usfa Anno 575, and ended in Edmund, Anno 914.

But in process of time, Egbert the 17th King of the West Saxons aforesaid, became sole Monarch of England, about the year of Christ 830.

And then the fourth and most grievous Conquest and Scourge of this Nation was by the Danes, who made a violent Irruption, under the Reign of King Ethelred the Saxon; and fo far prevailed that he was contented to pay them yearly 10000 l. which they at last enhanced to 48000 l. This Tyranny Ethelred not able to endure, privately commanded his Subjects to Maffacre the Danes; which was Executed on the 12th of November at Night: Upon which Swoin, King of Denmark, came with a Navy of 350 Ships into England, drove Ethelred into Normandy, and Tyrannized over the English with a very high hand, every English House maintaining one Dane, whom they called Lord, who livedidly, by the labour of the English.

Who basely, when some of the English were Drinking, either to Stab them or Cut their Threats; Therefore to avoid which Villany, the party then Drinking, requested some of the: next to him to be his Surety or Pledge, for his Life; From whence come the Expression used to this day of Pledging one another, when the Party drunk to take his turn, and drinks next after him.

Now the cause being (thro' Gods Mercy) taken away, theres no need of continuing the Custom of tempting any to drink more than good Nature repuires; But as it is now amongst the more Sober English at Meals, who, tho' they drink to one another, defire no Pledges, but let the Party (that wants drink) call for it.

After the Reign of three Kings, the English threw off the Danish Yoke, and the Saxons were re-enthron'd.

Note, That it is faid of King Edgar that he built above four several Mona-Kings Superstition. steries, and someother Kings were, in their Ignorance, fo devoted to the Popish superstition, that they re-

promise of Adoption, or some other conveyance from King Harold, did with his Numans, Anno 1066, in 896 Ships arrive at Penjey in Sussie, and obtained a great Victory Other the 14th. in which were slain Harold with 66000 of the English. William took upon him the Kingdom by Conquest, and did indeed behave himself like a Conqueror, for heseized all into his hands, gave out Barons, Lordships, and Mannors from himself; reversed the former Laws and Customs, and instituted here the manners and orders of his own Country, which have proceeded on; and been by little and little bettered to this Day.

Thus you may fee, the English Blood, at this Day is a mixture chiefly of Normans and Saxons, not without a tincture of Danish, Romish and Bri-

tish Blood. As faith an Author.

# A Brief Description of this Map of England.

ON the top of the Map, where is Writen North England, is parted from Scotland by the River Solway and Twend, the British Sea or Channel next France on the South, the Sea next Holland on the East, and the Irish Sea, and part of Ireland West.

The Principality of Wales, is included in England, lying on that fide next Ireland, containing 12 Shires on Counties, as Montgomery, Radnor, Denbigh, Pembrook, Cardigan, Flint, Carmarthen, Brecknock, Merioneth, Clamorgan, Carnarvan-shire, and Anglesey.

England is in length from North to South, as from Barwick to Portsmouth, about 320. Miles, and in breadth from East to West, as from Dover to the Lands end in Cornwal, 270. Miles, Its said not to exceed in bigness one third part of France, yet is reconed 30 Millions of Acres.

England is Situate between the Degrees 16 and 21 Longitude, equal with Scotland, Normandy and Bretaine in France.

And between 50 and 52 Degrees of the Northren Latitude, equal with Ireland, Flanders, Holland, Zealand, Lower-Saxony; and Denmark.

A TABLE of the Shires, Hundreds, Parishes, Shire Towns, and Market Towns in England, and Latitude of each.

| Shires.          | Ho. | Par. | Sh. Towns.  | M.T. | D.   | M.  |

#### The use of this TABLE.

VI.

ord-

THe first Column gives the Names of the Forty Shires or Counties in England.

Second, The Numbers of Hundreds. Next, The Parishes. Next, The County Towns. Next, The Market Towns. And Lastly, The Latitude of the Pole of each Shire Town.

The Number of Shires in England and Wales are 53; Parliament Men 510; Market Towns 713; Parifices 9241; Bishopricks 26; Castles once 186; Rivers 555; Chases 13; Forests 68; Parks once 781; Cities 25; Bridges 956; Universities 2.

Note, That instead of Hundreds, Durham is divided into Wakes, Cumberland and Wostmorland into Wards.

Also, some Counties are more Generally divided than into Hundreds, as Yorkshire into 3 Ridings; Kent into 5 Laths; Sussex into 6 Rapes; Lincolnshire into these Parts, as Lindsey, Kestever, and Holland.

Upon the Garter of the Kings Atms is Writen this Motto, Honi Soit qui ma ly Pense, in English thus, Shame be to him that wil thereof thinketh:

Spoken

Spoken by King Edward III. after he had taken up a Garter (its faid) of the Queen, or the Countifs of Salisbury, fliping off in Dancing, his Lords there present Smilling; This King made several Knights of the Garter (so called.)

And the Motto at the bottom of the Arms is. Writen, Dieu & Mon Droit, thus in English, God and my Right; first spoken by King R. I. after he had gained a great Victory, saying, Not me have

gained this Victory, but God and our Right.

England with Scotland, being an Island is called Great Brittain; the small Islands about it are, Sheppy, Thanet, Wight, Anglesey, Jersey, Garnsey, Alderney, and Sark.

In Brief, its so well known the Extent of the English Empire, on each side the Globe of the Earth, I need not name the places in particular.

The Names of the Counties the Judges go to the Assizes twice in the Year, to Try Criminals.

First. THe Home Circuit, Is Essex, Hartsord, Sussex, Surrey and Kent.

Second. The Norfolk Circuit, Bucks, or Buckinghamshire, Bedford, Huntington, Cambridge, Norfolk and Suffolk.

Third. The Midland Creivit, Warnick, Leicester, Darby, Nottingham, Lincoln, Rutiand, and Nor-

than poon. 1

Fourth. The Oxford Circuit, Berks, Oxon or Oxfordshire, Glocester, Monmouth, Hereford, Salop, or Skrepshire, Stafford, and Worcester.

Fifth. The Western Gircuit, Southampton, Wilts,

Dorfet, Somerfet, Cornmal, and Devenshire.

Sixth. The Northern Circuit, York, Durham, Northumberland, Cumberland, Westmorland and Lancaster.

Besides Two Circuits for Wales.

of

#### Of our English Parliament.

THE House of Lords, otherwise called the House of Peers, or the Upper House, consists of 189 Members (that is) 163 Temporal Lords, whereof 14 Dukes, 3 Marquesses, 72 Earls, 9 Viscounts, 65 Barons, and 26 Spiritual Lords, whereof two Arch-Bishops, and 24 Bishops; but the King by wirtue of his Prerogative, may increase the number of the Peers to Sit and Vote in their House,

as Barons, by fending his Writs, &c.

The House of Commons, otherwise called the Lower House, is by much the greater Body of the Two: For, as England confifts of 40 Counties, in which there are 25 Cities (known by the different Character in Print, in the Table which next follows) 8 Cinque-Ports, 2 Vniverfities, and 168 Borough Towns, all which are priviledged to fend Members to Parliament; if we reckon two Members from each, the whole amounts to 486 Members, to which adding 24 from Wales, the whole is 510. So that if there be 300 met together, its counted a prety full House, and if they be but 40 Members in all (Sickness being the cause of their absence) they make a House to make Acts of Parliament, and are in Force, when the King is pleased to Sign, Confent to them.

Wote, That the Cinque-Ports are Havens, or Harbours for Ships, as Hastings, Hith, Dover, Rum-

ney, Sandwich, Winchester, Rye, and Seaford,

The Title Defender of the Faith, was by Pope Leo X. given to K. H. VIII. of England, for a Book Writen by him against Luther, in defence of some Points of the Romish Religion. The King of France is called Most Christian (which is a wonder) and the King of Spain, Most Catheliek.

When

When the Parliament makes any Act for a Pole Tax, to which a Duke pays 50 l. a Marquess 40l. an Earl 30 l. a Viscount 25 l. a Baron 20 l.

Their Eldest Sons pay 30, 25, 20, 17, 151. Their Youngest Sons, 25, 20, 15, 13, 121. 2c.

cording to the degrees above.

Tyberius the Emperour (its faid) would not fuffer himself to be called Lord, nor yet his sacred Majesty, but said he, They are Divine Titles, and belong not to Man.

But the Chief in Authority in a Kingdom is called King, his Wife a Queen, a Prince the Eldest Son of a King, whose Wife is called a Princes.

The Wife of a Duke a Dutchess, a Marquess his Wife a Marchioness; the Wife of an Earl a Counters; a Viscount (this Title is founded without the letters.) his Wife a Vi-countess; the Wife of a Baron is called a Baroness.

There are also the Titles to Men, Baronets, Knights of the Garter, Knight of the Bath, Knight Banneret, Dostor of Divinity, Dostor of the Civil Law. Esquires, Batchelors of Arts, Masters of Arts, Priest,

Parson, Vicar, Gentleman.

A Man of 20 l. a Year is writen Yeoman; and the Wife of a Deceased Gentleman, Widdow; and Dame for those of higher Titles; for a Maid in

a Bond, write Spinfter.

Its faid that in England, that there are about 1400 Men, that are called Knights, and more then 6000 that are called Esquires, which Titles are too apt to puff up Mens minds in Pride.

]

An Alphabetical Table of the Market Towns in England and Wales, and in what Shire each is in.

#### The Use,

First, The Name of the Market Town, Secondly, The first Three or Four Letters of the Counties Names.

Thirdly. The Figures at the end of the Line, the Towns distance in Miles from London.

Lastly. The Markent Towns in Capital Letters are called Cities, there being one (its said) in each Bishoprick.

knowledge of the Names of all the Counties, he may look upon the Table before, together with the names of the Shires in Wales, comes after the Table.

The

The Highways, or Roads, from London, to the Several Shire Towns in England.

THe Figures between each Town shews their distance in Miles,

Luton, 5 Barton-Clay, 7 Bedford, N. W.

Thus you may know, that from London to. Bedford, are 40 Miles, (if you Sum up the Figures) And that the NW. after Bedford, shews that Bedford bears North West, from London. Observe the same, in the Roads which follows.

London, 6 Acton, 9 Uxbridg, 9 Amer-Sham, 6 Wendover, 4 Ailesbury, 10 Buck-

ingham, NW, by W.

ny Miles between Buckingham and London, (or any other Great Town, look for its Name at the end of each Sentance) or in the Table of Market Towns.

### Of Preserving and Repairing the Road,

To the Surveyors of the High-ways in Bedford.

Fift. You should, a little before Christmas, provide a sufficient quantity of Black Thorn Bushes, and to have them made into Fagots, of about two Foot long, and lay them

up for ule.

secondly. You, or one of you, should once a Month at the leaft, the rutts being wet, go to view the Field Roads, on a Friday in the Forenoon, for then commonly come Waggons Loaden with Wheat for the Market the next day, and where you see the Wheels of the Waggons cut too deep into the rutts, there fet Boughs, or little Sticks, then having some of the faid Fagots ready, lay them overthwart those deep roots, suffering the Loaden Waggon wheels to crush them close, this well obferved, before the rutts are worn too deep, it may hold for one year very well, tho' it be much Carted; Besides, using these Fagots while the rutts are wet and dirty, prevents fome from fealing them to Burn; Fagots in Clay rutts are the Cheapest, where Stones are plentiful, done with little charge in Win-

ter.

land

&c.

ter, so that there will be very tittle to do in Repairs in Sommer, and the yearly charge in

Repairs may abait two thirds.

Lastly. If there happen a deep hole to be in the rutt and pad-way, or Quick-Sand, or the like, lay overthwart long and strong Bushesvery close (not crossing them with the same) and if need be lay some Timber under them, they being troden down close near a Foot in thickness, cover them with such Stones as you gathered off Fallow Lands in the Spring of the year, about a Foot in thickness, and on them Gravel of the same thickness.

Note, That after every great Rain, trenchithe water out of the rutts, for water standing long in them, does them much harm, but swift running water over or along a Road mends it. Poor Men are injoyn'd by the divers Laws for the Repair of the High-ways, to do as much duty yearly, as many Men worth 2, 3 or 400 l. a year, keeping no Team of Horses. Therefore the Roads would be mended yearly at a much cheaper rate, if they were done by a Tax; Tho' the the poorer fort did nothing towards it, but what they were paid for. So as Honest Men have the managing of the Money thats Collected for the same.

See Directions for the Repairs of the Highways in my 3d Book fold by S. Clark. Since which was Printed, the Parliament hath Inacted, that 50 l. a year of Pasture and Woodland, as Arable, shall be accounted a Plow land,

T,

Note, That the Young-Man, who delights to shun Evil Company; May, after he hath Studied Arithmetick an Hour in the Morning, Recreate himself in Gardening; For what Pleasure, is it to have a Garden, and not Work in it ones felf for Health: And in the Afternoon, if occasion will permit, may go out to Angle, as before is Taught, therefore as to Gardening, take the following Brief.

## Monthly Observations.

TANUARY. Theres little to be done in Gardens this Month, but you may gather Sheeps Dung to mix with Earth to ly rotting a Twelve Month, to layer Flowers with; and you may cut off the down right roots (if any) of fuch Trees as yearly bloom, and bear no Fruit, burying a dead Dog or Cat under the Tree; and lay dung in undug'd Orchards once in 4 years, letting neither Dung, nor Weeds (at any time) touch the Bark of any; also gather Cions; see Grafting Fruit Trees.

FEBRUARY. If the Frost, hath kill'd the Cabage Plant you fet in September, fow the Seeds now in a Hot-bed thus made; Dig a Grave, of what length and breadth you please (where the Sun shines most and sheltered from the North and East Winds) about 2 Foot deep, tread it full of Horse Litter, with the Dung, and cover the Dung near half a Foot thick with fat Earth fifted, set up staks about it, covering it with Pease straw or Matts, only in Cold Nights, the Seeds alfoof Musk-mellons, Cauly-flowers, Cucumber, Purflyn and Lettice may be fowed therein, you

may now Plant the Suckers of Currans and Goofeberies, tho' October is the best time, sow Garden Peafe, and for the Beans fet them about one Foot afunder ; See Pruning Fruit Trees,

MARCH. Sow Parsley, Carrot and Turnip-Seeds, and Parsnips; And set Carrots and Turnips to raise Seed and also Onions; Set small Onions and Leeks to put among Pot-herbs; Prun the Apricock late, and to preserve the Blooms, hang Matts or Blankets over them in Frosty Nights Take the Litter from off the Afparagus Bed, dig it with a Fork a little and fift some good Earth thereon; If you make a new Bed, do it as the Het-bed, last Month, and lay the same roots you may buy of a Gardener, on it, and cover them by fifting Earth on them, and let them run to Seed 2 years, before you cut the Budds to eat; Dig the Weeds and tops of the Artichock into the Bed, laying the Earth level, leaving but one or two of the strongest to each root, casting away the Suckers; Plant the shortest stalked Cabage Plants near a yard afunder, fetting them pritty deep, on the edges of your Carrot Ground; Sow Clove Gilly-flower Seed.

When you fee the Tulip Leaves begin to peep out of the Earth, spred your Flower Garden all over with Fat Sifted Earth, mentioned in January, or Wood Pile Earth, or the Earth that Moulds work up in a Rich Pasture, and when you fee a very great Hill (lately cast up) dig to the bottom to find her Nest; Now you may dig in rotten Horse Dung into your Garden; Set

more Beans and Pesse, and Graft.

APRIL. In this Month, chose the Evening of a Rainey Day, to fet the Cuttings of Time, Hylop, Marjorum, Savory, Peny Royal, Balm, Mint, &c. For winter green Hedge, to be Clipt iquare after Rain, often leting tuch Herbs grow out

#### How to make Wine of Herbs.

IF the Herbs be dry, put them into Pot, and power Scalding water to them and cover it. and two hours end, boil one pound of Sugar in two Quart of the Liquor; If the Herbs be Green. or Roots, or Seeds boil them well and strain them, and the Liquor boil with Sugar a little. when its cold pour the clearest into Bottles.

Knowing the Virtue of the Herb, proper for your Distemper, drink two or three Spoonfuls of the Wine in a draught of Beer, upon an

empty Stomach often, as

The Wine of Agrimony, for the Liver and Dropfie. Balm and Mints, a Cordial for Fainting.

Butterburroots and Woodforrel, for Feavers.

Black Curran Leaves, for a Sore Throat. Bears Foot or Peach Leaves, to Kill Worms.

Barberries and Cenomon Binding.

Bay Leaves and Peny Royal, for Wind in the Stomach.

Broom and Doggrafs, for the Dropsie, Camomile and Saxifridge, for the Stone.

Cow-

Cowslips with Corn Poppies, to procure Sleep. Comfry with the Roots, for Inward Bruises. Damask Roses, to gently Purge.

Elderberries and the Leaves, for the Dropfie and

the Kings Evil.

Fumetary, for Boyls, Itch, and Surfiets,
Grunsell, to Cool and Purge the Stomach.
Ground Ivie, Cleanseth the Blood.
Hysop, for a Tickling Rhume in the Throat.
Knotgrass, for Rickets, and Inward Bruises.
Lilly of the Valley, for all Illness of the Stomach.
Motherwort, for Mother Fits.
Mulberries and Plantain, for Spitting Blood.
Mouseare and Ivie, for the Chin-Cough.
Plantin and Clary, for the Whites.
Piony Roots, for Comunison Fits.
Quinces, to stay Vomiting and Fluxes.
Rue, drunk in the Morning, in Plage time and Pox.
Red Roses, ftop Fluxes.

Rosemary and Mustard Seed, for Itch, Surfeit,

and Dropfie.

Stinking Arrach, for the Green Sickness.
Scurvy-Grass and Calendine, for the Scurvy.
Sotheringwood, to cause Spitting in Feavers.
Tormentil Roots and Cinnomon, to Stop Flunch.
Tamaris Twigs, for hardness of the Spleen.
Winter Cherries and Rubarb, for Runing Gout.
Wormwood, or Centory, to help Digestion.

TULY. Gather the Seeds of Clove-Gillislowers, and keep it in the husk till you Sow it in March; and by the middle of this Month sinish the Layring them; Having gathered your Strawberries, cut off all their Leaves after Rain, except the Bed of white Strawberries, which you may thin and weed at the latter end of March and soon after that make a new Bed, by setting the smallest Roots, pressing the Earth very hard to them that the Worms force them not out; Re-

mem-

Ro

membring that they will want Water often, likewise Cauly-flowers Cucumbers, &c.

# The best way to make the Cordial Syrup of Clove Gilly-Flowers.

The Ake of the best Clove-Gilly-flowers, cut off from their white strings, one Pound, put them into a large Pewter Flagon, or new Earthen Pipkin, glaz'd within and first soakt in Water (to try if it will crack) then pour upon them a quart of scalding hot Water, thrust the Flowers down, and cover the Pipkin with its cover very close, and set it all night in a Celler, then strayn and press it out, put the Liquor into the Pipkin again and put to it three Pound and a half of single refined Sugar in Powder, set the Pipkin on a clear Charcoal Fire, and make the Liquor warm string it all the while, that the Sugar may dissolve, and that is enough, Dr. Hareman.

AUGUST. Sow the first ripe Cabage Seed, also Coleworts, Turnips, Marigolds, Box, Poppies, Spinage and Lettice; Sow the Seed of Aureculas, or Bears-Ears, in a Pot of good Earth, let it stand abrode, the next Sommer Plant out the strongest,

If the Earth is well foakt with Rain, this is rather a better time than April, to take up all the Herbs and Flowers, and to dig Horse Dung therein, thats very rotten; Now Layer Bays Lawrel, Rose Rosemary, &c. As is shewed of Clove Gillislowers, only instead of cutting that place of them that is to ly under the Earth, run a blunt Awl 3 or 4 times through the place; in March following you may remove them (if taken Root) or stay till this Month.

cuting off all the young Shoots within an Inch off of each knot, so will your Pruning work be

little yearly.

But when you have a young long Branch that begins near the Root, you may nayle that to the Wall, and cut off an old Arm, by this means in time you may cause you Vine to look young again; yet the sewer Brenches any Fruit Tree hath, the larger will the Fruit be; Lay Beasts Blood, and Sheeps Dung to the Roots; I have not room to add what I designed of these things, done Monthly.

#### GENERAL OBSERVATIONS.

#### 1. Your Work in Hot and Dry Weather.

First. Water no Seeds newly Sown, but being come up pritty strong, you may give them Water in the Evenings.

2. What Herbs you Water, wet not their Leaves, if Well water, let it stand half a day First in the Sun, or stir Sheeps! Dung in it.

3. If you have a Root given you, and are to carry it far, wrap the Root about with wet Clay, then put it in a wet Linnen Cloth, when you fet it, Water the place very well, and therein fet it, shading it from the Afternoon Sun.

4. Cut as few Herbs as you can, except fuch

as you are to dry for Winter.

Lastly, with a Hough, cut Weeds a litte within the Earth, (in the Carrot ground) and they dye; Grass will cast its Seed often in Paths, if not taken up by the Roots in time. f

11

H. Your Work, in an Evening, in Sommer, after much Rain.

First. You may remove Herbs, or Flowers, taking some Earth with the Roots.

2. Draw Weeds up by the Roots.

3. Clip Herb-Hedges, and gather Snayles.

4. If Snayles, or the like ear the Stock-Gilliflowers, tye a Paper or Rag round the Stark, and rub the Paper over with Tar. Observe the same of young Fruit Trees.

5. Rub Mols off of Fruit Trees, with a Hair

Cloath.

thin

dye;

tak-

6. With a Hough, draw the Earth a little to the Roots of Peafe, Beans, Cabadge, &c. that they may feem to grow on the Redge of a Land, or Hill,

7. Get up Twich-grafs clean up by the Roots

8. The next dry Morning, Roll or Beat Gravel

and Grass Paths.

Lastly, If you see a Large House Snayle, lye flat on the Earth, dig the Earth under her, and spoyle her Eggs, like small Pease, shining like Pearls

III. Your Work in November, the Frost coming.

First. Cover your Cucumber at nights only.

2. Lay good store of very rotten Peasestraw about the Roots of Rosemary, and other
choise Flowers, some approve of laying Street
Dirt pretty thick to the Roots of Rosemary.

3. After very great Frost, crush down the

Earth close to the Roots of the Flowers.

II.

Lastly. If you are to water any Herb in Winter, let it be with Blood warm Water; and if the Snow covers any Herbs, remove it not: And if you want a Raw Sallet, chop a fmall Cabage, very small, and eat it.

#### IV. Of Planting Fruit Trees.

F you buy any to Plant that has been Grafted three or four Years, take none that has either a Bruise, or Cankered place in any part of the Bark, or Boughs.

First, Cut off the down right Root (if any) except the Roots of Peaches and Nectarines) take the Roots of the Peartree up carefully because of

their Brickleness.

Secondly, Cut offall the Roots that are broken, and that are two long, and the ends of all other roots; then cut the Boughs off, that the Head may not be much bigger then the Root: Remembring that in June following you cut the

ends again floping, close by a Bud.

Thirdly, Make a hole in the Earth, like unto the hollowness of a Bushel, and in the middle thereof, raise a Hill of good Earth, on which set the Tree, seting the same side Eastward, if you can, as it stood before, which sometimes you may know by the ends of the Twigs on the top of the Trees, bending Eastwards, because the Wind for almost three part of four in the year blows from the Westward, with us in England, which commonly is the strongest in March and September, the Sun in both Months being in the Equinoctial Line, causing many twigs to stand bent, Eastward. The Tree being set on the faid Little Hill, spread the Koots about it, covering them with good Earth by little and little, drawing out the small Roots at length with your Fin-

gers,

31

Ch

For

Bark foon

Twi

Twi

breal

alfo c

behin

ing i

No thon gers, that they may grow fied-ways, and not cross each other (except good store of earth be between them) then put in more earth, Treding it down to the roots, leaving a hollowness about the Tree, not setting the Tree deeper in the earth than it stod before, which you need not mind to those Grafted on a Quince stock; lay Hay or Litter by it to water in Sommer: Ostober, being the best time to plant Trees in, agreeing with this old Rhime,

If you a Thriving Tree would have, Carry him with his Green Leaf, to his Graves

Trees for Walls are set a foot from the Wall, at 12 foot distance, the old Earth carried away, and set in fresh earth.

#### V. Pruning old Standard Appletrees

When you have gathered the Fruit, you may cut off those dead Twigs you see, and Chop off superfluous under Boughs, within a Foot of the Body, see Offeber.

#### VI. Pruning Wall Fruit Trees.

The chief Boughs being Nailed to the Wall with strong Leathers (but not to bind the Bark so as to gaul it) and in March, or a little sooner (if the Spring is early) cut off all dead Twigs to the quick, and those strong young Twigs that will be nailed to the Wall without breaking, observing the Directions in June.

Mote, That every Twig you naile to the Wall should be cut off at the ends from a bud floping; also cut off all the Twigs that grow before and behind the Tree (except Fruit Buds) Late Pruning is the best.

gers,

#### VII. Of Grafting Fruit Trees.

First, gather Cions or Grafts in January, for early Pears, Cherries and Plums, from such Boughs as yearly bear Fruit, next the East or South, or those near the top of the Tree (each Twig about a Foot long) that is fullest of Fruit Buds; bind them in little bundles (each fort by themselves) and put them half way into the Earth, where the Sun shines not much till you use them (Viz.) about the beginning of March, or later.

Note, That a Cion below the first Knot is best sometimes. If you carry Cions far, slick the ends in moist Clay, and wrap them in Straw. And the latter end of January cut Cions for Apples, and Winter Pears, or latter Fruit.

n

01

in

of ter Ha it,

The Pea

two

dee

take

ther

floc

The

G

Good Husbands Labour for Posterity, To after Ages, Saints must have an Eye.

#### VIII. The manner of Grafting in the Cleft.

First, saw of the Head off the Crab-tree-stock that has stood two years; where you would have it grow, and smooth it with a Knife, (being cut off about a Poot from the Ground) but lower for Wall Fruit. For old Trees, it is better to Graft on the several Arms, than on the Body. I or standard Cherry-Trees, about four or sive Least from the Root, then cleave the Head a literal

tle besides the Pith, and put therein the end of a long Wedg of Wood, or Iron (made for the purpose) to keep the Cleft open, having cut the Graft on both fides from a Bud or Knot, in form of a Wedge, in length about an Inch and a half.

r five

l'alirtle

which place in the Cleft, so as the Bark of both, may exactly joyn on one fide of the flock, leaving on the Cion (when the end is cut off) three or four Buds; if you do not fet another Cion in the other fide the Cleft, cut off the Cleft flop-

ing close to the Cion.

Lastly, lay a piece of green Bark on the top of the Cleft, to keep out dirt, and cover the head of the Stock round like a Ball, with Clay well tempered with Horse dung, and a little chopt Hay or Wooll, and stick the Feathers of Birds on

it, or scatter Ashes on it.

Graft Pears on Pear fucers; if on the White Thorn, then very near the Root. But for wall Pears, Graft on a Quince Sucker that has stood two years in your Nursery, which if you set deeper in the Earth than other Trees, it will take no harm; as the Apple Tees and most other Trees.

Graft Cherry Standards on Black-Chery-stonestocks or sucers. The Medlar on the Pear-stock.

The Apples on Crab-tree-stocks, Oc.

The largest forts of Trees are Grafted in the Grown, (so called) when you find it not convenient to Graft the Arms, the manner thereof follows.

When you do Graft, or Bud, therein may see ... How Grace, and Souls, should so united be.

#### 1X. Of Grafting in the Crown.

Aving faw'd off the Head of the Tree, or an Arm, one, two or three Foot of the Body, and smooth it with a Knife or Chizel, then take one of your Apple Cions out of the Earth, (the wind blowing from the South or

or West ) and cut it on one fide beginning against a Bud or knot (if you can) almost to the Pith , and cut a little of the Bark on the other fide, then put in a fmall flat Iron Wedg fomewhat bigger than the end of the Cion, between the Wood and Bark

of the Stock, and fet the Cion in its place, Rind to Rind, and Wood to Wood, to the full depth, that it is sharpened, as suppose an Inch and a half, reserving three or four Buds above the Stock. You may place more Grafts in the same Head or Stock, (according as it is in bigness) so as you rend not the Bark. Lastly, bind it up as is before shewed of Clest Grafting.

#### X. Whip Grafting.

TO be performed in March, seek amongst your little bundles of Grafts you set in the Earth, to prevent the Buds of them to shoot too far, as are in substance, (at the great ends) to part of the Stock, where it is to be placed, some-

what bigger than a large Swans Quill,

Then choose a smooth place in the Stock, and cut it sloping about an Inch and an half, or two Inches long, and cut the Graft with the same slop cut (as if you were to tye together

the joynt of a Whip or Angle) fomewhat like the Figure of this Tree.

Make them joyn together (by several Cuttings with a sharp Knife) that Bark may Answer Bark exactly: then bind it up close with speed, with dry Flags, hase or thin willow Bark, and clay it round, as is before shewed of Clest Grafting, remembering to cut off the tops of all Cions at a Bud slopping, the length of the Graft the same with others.

Bark Rind

epth,

and a

the

And

And in June following unbind them, and tye them flightly for a time: Some Gardiners Graft the Cions the same day they cut them from the Tree, but it's not so well,

#### XI. Of Inoculating.

THE Peach, Apricock or Nectarine may be Inoculated on a young Plant, raised from their Stones, but rather from the Suckers, or o-

ther White or Black Large Plumb. Some Inoculate the Peach and Nectarine on a Common young Apri-

young Apricock Tree, that was Innoculated near the Ground on an ordinary Plumb-fucker.

Chuse a fair day between

the middle of June, and the middle of July, go to a Stock that is about as thick as a Mans Finger, then about four Inches above the Root (next the South or West) a little below a Bud (if you can) cut an overthwart Cut about an Inch long, and from the middle of that Cut in the Bark, cut a downright Cut about an Inch and an half long, that it may appear like to this great Letter T. as may be seen in the Body of the Figure of the Tree above.

Take heed that you cut not into the Wood of the Stock, because it sometimes causes Gum to

arise to spoil the Bud, when fixt therein.

This done, from the branch of an Apricock-Tree, fet in the Earth as other Cions, one of the fame years growth (if you can, or the last years growth) choose a Bud that is not too young and tender, whether it hath a Leaf by it or no, (is not much matter)

Then about a quarter of an Inch almost above the Bud, cut an overthwart cut quite round the Bark, and then cut the Bark on each side the Bud, or Sprig downright, to end in a Peak, somewhat like a Boy's taper Top, as the Figure above with the Leaf, which should be even at

the top.

Then with a Knife, that hath a smooth Back, nimbly drive off the Bark with the Bud on it, (and Leaf, if any;) but if you see a little Hole on the inside of the Bark next the Bud, then hath the Bud left behind it the little Root (so called) cast it away, and prepare another Bud that hath a Root: Some People slip it, or cut it off with a slit Goose Quille.

Now, having the Bark with the Bud ready, place the Bark thereof within the cut of the Stock fo that the edge of the Bark that is above the Bud joyn exactly to the upper edge of the Bark, first

cut in the Stock.

Then close the Bark of the Stock over the Bark of the Bud, and bind it close with Base, or dry Flags, that you see nothing thereof but the Bud.

Note, That if the Bud has a Leaf, and it falls off at about two Weeks end, it is a fign the Bud takes.

About three Weeks after this, unbind it, and

tye it a little flacker for a time.

You may place two or three Buds in the fame Stock, if you will, preferving only one at last;

the

the Spring following cut the Head of the Stock off about half a Foot above the Bud, only leaving a small Branch or two to be cut off, as soon as you see the Bud grown out of danger, and often cutting off all other Buds and Suckers that may hinder the growth of the true Bud, and in June cut the Stump of the Stock sloping, ending at the Bud very smooth, and rub it with Dirt, and in twe years the Wound will be grown over with Bark, if the Tree thrives well.

Thus you may Bud Roses, Filberts, Gooseber-

ries, Wallnuts Currans, &c.

#### XII. To Layer Clove Gillistowers-

THE best time to Layer them is about the middle of June, the sooner the better, if the Layers be strong and well grown; if you stay till the latter end of July, they will not be so fit to remove till the latter end of August, which time is the only time for them to Root well before Winter. Those you Layer in September, remove them not till March following. The way is thus

Chuse such Slips or Layers as are the strongest, three or four, or more of a Root (according as you have need of an encrease) with a Penknise cut off each Leaf about the middle, which is called Pruning them; and near, or at a Joynt, about four Inches below the top of the Layer, cut the stalk upwards sloping, into the Pith, having first made a wide hole in the Earth with a narrow Trowel, as far off the Root as the slip will reach, end bind it down therein, with a small hoocked stick (about a Fingers Length) to keep it from rising, then turn up the Head of the Layer, that the slip may open (or bind it down, when open over the slit) in which Posture earth it up with Earth that Moulds

work up in rich Pasture, or other good Earth, pressing the Earth pretty hard about the Layer; all that you Layer in a day Water at night. Lastly, Prune all the other Layers, or Slips; in in wet weather.

Those you Layer in Inne or July, cut them up, with some Earth about each Root at the latter end of August,, and set them about a Foot afunder in Beds; but if you set any in Pots, let them have holes in the bottom, if they are not

crack'd, Triming them a little.

h

Or thus, about the latter end of August, take up all your Layers, then Trim all the old Roots, and pluck them up, and set them prety deep, about half a Foot a sunder in some by place, (or give them away; (then order a Bed of Flowers (the ground being wet) thus, round the edge of your Bed set Tulip Roots pretty thick, near half a Foot within set Aureculus, or, Bears Ear, and in the middle set your Layers, near a Foot asunder, and if you do this yearly, your Gillishowers will be the larger; so may you see Flowers in your Garden all the Spring and Summer, and sometimes all Winter.

liflowers in March or April, that lye flat on the Ground, by reason of the Winter Snow; Layer the whole Branch to set them upright, so will they Flourish much, nor will it hinder your laying the single Layers at the righ time aforesaid.

Some Gardeners encrease their Gillistowers only by slips, setting them in the Spring (as also Rose-Mary slips then) shading them from the Sun, till Rooted; the Flowers being gathered, cut off the Stalks, and Trim the Layers.

Breaviate of my Monthly Observatious (too large to place here) Gardening being both a Healthful and Proffitable Recreation, was the delight of the Antients, and now is the delight of Rich Aged Merchants and Traders, because their Feable Bodies have not strength to Labour for more Gold as formerly, and they are apt to think they are in a retired state when they are within the compass of the high Walls of their Gardens, when they delight in their Baggs of Gold, while the Poor want Clothing.

No No, They are truely retired whose minds love Grace, more then Gold, and that by Grace, lay up Treasure in Heaven, and so come to wittness true Solitude, Excellently

discribed by a Worthy Author. Thus

Ob. Fields! O Woods! only in you, I find what constant is and true, The Works of our God, to admire, And blow into a Flame, the Fire : Of Love Divine; this, this is Joy, Can never fail, or ever cloy, Wit, or knowledge, Hearts combin'd, Never thus could fill the Mind: Active Ambition, yet would fay, Life thus, were Idley, Dream'd away, Your Censures then, we shall allow; Which merit, only pitty now. Where is the Man, that's happy known, But only he that is alone. Till Man his Paradise regain'd, This Paradox, may be maintain'd. Gods Grace, is a Paradise to the Obedient

Soul, Tit. 2, 11.

Improve-

it

## Improvement of Children by Spining Schools.

A Sin Holland, Flanders, &c. Where, faith an Author, is no Begger. In all Towns (faith he) there are Schools for Little Girls, from Six Years Old and upwards, to Spin, and so bring their Tender Fingers by degrees to Spin very fine. Their Wheells, going by the Foot, to Work with ease.

First, There is a large Room, and in the middle

thereof, a little Box, like a Pulpit,

00

he

ght

be-

to

acy

ien

alls

reir

ng.

nds

by

fo

ntly

lient

-0V6-

Secondly, There are Berchesbuilt round Spining about the Room as they are in Play-Houses, Shools. upon the Benches sit about 200 Children Spin-

ing, and in the Box in the middle of the Room, sits the grand Mistriss, with a long white Wand in her hand; If she observes any of them Idle, she Reaches them a Tap; But if that will not do she Rings a Bell, which by a little Cord, is fixt to the Box, and out comes a Woman, she then points to the Offender, and she is taken away into another Room and Chastised; And all this is done without one word Speaking,

And I believe, this way of Ordering the young Women in Germany, is one great cause, that the German Women have so little of the Twit, Twat, and I am sure it would be well were it so in England.

In a little Room by the School there is a Woman that is preparing, and puting the Flax on the Distass, and upon Ringing of the Bell, and pointing the Rod at the Maid that hath Spun off her Flax, she hath another Distass given her, and her Spool of Thread taken from her and put into a Box unto others of the same size, to make Cloth. —— Of Flax, there it must be Beaten and Drest (saith he) twice a Year; if you keep it 10 years, the longer you keep it, the since; and it may become as fine as the Hair of ones head: It is true there, what the old saying is here. That Wooll may be kept to Dirt, and Flax to Silk, provided in sets no Moysture.

How to catch small-Birds, that spoyle Fruit-Buds and Seeds newly Sown.

Take a quarter of a Pound of Bird-lime, and half an Ounce of Fresh Hogs-fat, let them melt together in a Pot string them well; Then take 40 or 50 Wheat-Ears, that are not to well. Thresht, with the Straw on them near a Foot long; with a Feather Lime the Straws only, and stick them slightly where the Birds hant; who will catch the Ears, and slying away their Wings take the Lime, and then fall.

To Catch biger Birds than Sparrows; Take one Pound of the strongest Bird-lime, work it in Water untill it's as plyable as Wax, when it's dry, melt it in a Pot, with 2 Spoonfuls of Vinegar and a little Sallet Oyl, and Turpentine; with which Lime Twigs of Willows, and stick them slightly over Chaff, so as the Birds may tread on

them.

#### To make Bird lime.

Take the Bark of the Holly-bush, and put it into a Ditch in Boggy Ground, covering it with Boughs of Trees, and in about 10 days it will putrisse; then beat it in a Mortar to the thickness of Lime, after wash it often, putting to it a little Sallet Oyl, keep it in Earthen pots, It Cures outward Pains, but taken inwardly is Mortal saith, Dr. Salmon, his nimbers that the clammy suich of the bory of the clammy suich of the clammy suich and suich a

To kill Mice, that Eat the new Sown Peafe.

Take about half an Ounce of the Glass of Antimony, price a peny, it hath neither tafte nor smell (as I know off ) beat into fine Powder and put it into a Glass-bottle to twice the quantity of fair Water, when it hath stood 2 or 3 days pour a Spoonful, or 2 into an Oyster-shell of the clearest, or peice of a pot, and dissolve a little Sugar in it, then put to it as much of the Crumbs of Wheaten-bread, as will just Suck in the Water, fet this on the Bed of Peafe, covering it with a pot, and a great Stone on the pot; Lastly, with your Finger make 2 or 3 holes in the Earth under the edge of the pot, for the Mice to go in.

Likewise to Kill Rats. Take fine Powder of New Lime, mix it with Treacle, and lay it on many small pieces of Paper, about the bigness of a Groat, laying them where the Rates pass, to tread on, which they Licking off their Feet, burns their Guts. & nother the make holds ne Order Rooms, flop from with mortar miset orthorneth boaton Glaff, or

## Of Making English Wines.

#### To make Cyder.

Gather your Apples in October in a dry day, and having stampt them, press out the Juice and put it into a Barrel, to which put 5 or 6 bruised Pearmains, or Pippins, which will forward the working, stop it up, but not too close, and at 6 Weeks end draw the clearest into a Tub that is clean and dry, then dissolve one ounce of Isinglass in a dish full of the Cyder, and a Glass of White-wine beaten with the white of a Hens-Egg, and put it to the Cyder when it's in the Barrel, and to every Four and Tweenty Gallons of Cyder, put eight Pound of Raisons bruised, more or tess according as the Cyder is sweet or sower; Lastly, sill the Barrel and stop it almost close.

To make Cyder Royal, to be as Strong, Pleafant and wholesome, as Canary. Dr. Hartman. ic

fto

EV.

tle

Con

ter,

alfo

Take the Juice of Pippins and Pearmains, Red-streaks, Golded Runnets or Golden Pippins, and to every Gallon of the Juice, put two pounds of the best Raisons of the Sun shred, str them well fogether, then cover the Fatt, and let them stand two or three days, then draw off the Liquor by the Tap and Tap-hose.

press

press out the Raisons, and put both Liquors into a Cask, that it may ferment, and cast out it's foulness, and after a Fortnight, rack it off into another clean dry Cask, not filling it quite full, but leave some vacancy, (or emptiness) for it will yet ferment (or work) but stop it close, only leaving a Fosset, or Peg-hole open, or loosly stopt; when you perceive it hath done working, fill up your Vessel, with the same Liquor, that has been also fermented in another Vessel, then stop it up close, and keep the Vessel full; or Bottle it.

# To peasume a Barrel, always before you put any Liquer in it.

DIP a large Linnen Rag into melted Brime frone, and before its cold, roll it in Offiander Seed, and by a wire let it into the Barrel it being on Fire, stop the Bung-hole, and as soon as the Flame is out, put the Liquor in.

To Sweeten a Musty Barrel, Boil pepper in water and put it scalding hot into the Barrel, stop it close, at 3 days end take it out.

To Season a New Barrel; Fill it full of water to stand 3 or 4 days, puting in fresh water every day.

To Season Soure Bottles; Put them into a Kettle of cold water and boil them, with the old Corks, but take not the Bottles out of the water, till the water is cold. And for new Bottles put them in water, before you use them, and also new Corks.

#### To make Wine of Elder Berries.

TO every Gallon of the Juice of Apples put 2 pounds of fired Malago Raisons into an open Vessel, with a Tap-Hose, let them stand 3 or 4 days, stiring them 3 or 4 times a day, then draw of the Liquor by the Tap, and press out the rest strongly, and put both the Liquors together, and to every Gallon of it put a Pint of the Juice of Elder-berries, put them together into a clean dry Cask, well Perfumed. (as before directed) keep open the Bung-hole, that it may work, let it stand a Fortnight, then draw it off, the Gross Lees into another clean dry Cask, well Perfum'd, let it not be full by a Gallon, stopit close, leaving only a Peg-hole open, or loofe ftopt: when you perceive it hath done working, and that it hath left Hurring, and is quiet, fill it up, and stop it very close, and in 2 or 3 Months time, it will be fit to Note, that Dr, Hartman, Adviseth, first to press out the Juice of the Berries, and keep it a part, and the Husks to put among the Juice of Apples and Raisons, for in them confifts the most Cordial part of the Berries which is pitty to Lose; good against the Kings Evil, Surfiet, Gout, Dropfie, Consumption, &c.

The

P

g

th

of

#### How to make Goofeberry Wine.

Ather Mellow Goose-berries, and put them-into a Tub of fair water, and with a Seive get them clean from the Leaves, then stamp them as you do Apples for Cyder, to every 3 Pail fulls of the stampings, put 2 of cold Water into a Tub, that hath a Tap and Tap-hofe, at a Weeks end draw the Liquor into a Barrel, adding to every Gallon of the Liquor 2 Pound of ordinary Sugar and stir it till the Sugar is almost dissolv'd, and when it will run clear, draw it into Bottles, putting into each Bottle fome white Sugar, the more Sugar you put in the stronger the Wine will be, and may be kept good some years in a cool place, this Wine I have made often.

#### To Make Royal Wine of Gooseberries, or Currans, Dr. Hartman.

TO every Gallon of the Juice, prest out of ripe Goose-berries, or Currans, put two Pound of shred Malago Raisons, stir it well to gether, and let it stand four and twenty Hours, then press it out, and strain it, and put the Liquor into a Cask (Perfumed as above) and after a Fortnight Rack it off (that is) draw it off from the Gross Lee into another clean dry Cask, stop it close, leaving only a little Peg, or Fosset hole open, or the Peg loosly in it, till you perceive it hath left Huzzing and is quiet, then fill up your Cask with the same Liquor,

and so keep it till you Bottle it: You may also put your Raisons, being shred, amongst your Currans, or Goose-berries broken to pieces and Liquor, and in four and twenty Hours after, press it out, and thus you make but one pressing.

## A Malago Wine.

PUT 4 Pound of Malago Raisons shred, into a Vessel that hath a Tap and Tap-hose, and pour to them a Gallon of fair Water scalding hot, cover it with Woollen Cloaths, at a Fortnights end, draw the clearest into Bottles, putting a little white Sugar into each Bottle.

# An Artificial Malago Wine.

TO every three Gallons of fair Water, put fix Pound of three Raisons, and upon 20 Gallons strew a handful of new Lime, then cover it warm with Cloaths and let it stand 4 or 5 Weeks, beating down the Raisons every day, and if it taste not like Wine, let it stand a little longer, and drawit into a Barrel, (Perfumed as above) and to every Gallon, put half a Pint of Aqua-vitæ, a new laid Egg, and a Pint of Alligant beaten together, set it in a Cellar, till it will run clear.

## Of Brewing Ael or Beer.

V

De

AS foon as the Water begins to Boil, put it into a Tup, and when the Firey heat is a little over, put to much to the Malt as will but

just wet it all; by stirring, and at half an hours end, put to it as much of the same Water as you design for the sirst Runing, to stand an hour then draw it off, letting a little dry Wormwood (and Bay Leaves soak in the Wort) which are better than Hops, put no boil any Worth and it will keep long enough so as you put not the Worts together hotter than Blood warm.

When you have neer drawn out a Barrel, and the Beer begins to decay, draw it into Bortles, putting a Spoonful of the Wine of any Herb into each Bottle, and it will revive the

Beer, or at least a little Sugar, or Treacle:

But for those that have no Beer to Drink, may boil Treacle and Water together, and work it with Yest, or stir a little Treacle into every draught of fair Water; which is very wholesome and Pleasant; and taken often upon an empty Stoniach, Cures Coughs and Shortness of Breath; See the Wine of Herbs before,

Reader, The Wines I write of are intended for Weak and Aged whose Stomachs are grown faint, but to use them sparingly, or they will do them no good

or they will do them no good.

The Healthful Strong Body they do more harm to them than good; But the Excess in Eating and Drinking in this Age, is (faith one) the Nurse of Impiety, The Original of most Vices, The Bane of Health, The Seed Plot of Diseases, The Subversion of the Senses, The Canker of the understanding, The Corruption of Manners, The Shame of Life, The hastener of Death, The Harbinger of Hell, The Grave of

# Physical Receipts for the Poor in Spirit

THE following Medicines are approved ones, fome of them I have known by experience, the rest by Persons whom I take to be honest in these things; And (Reader) if thou art one of those that truly sear God, thou wilt not dispise them, tho I do not flatter thee into a good Opinion, in many words of the many Cures done by them (through the Mercy of God) and one reason is, I have not room to

write at lage of the divers Cures.

They are of things easie to be had; therefore be not too nice in the exactness of the Preparation of any of them, seeing they are no dangerous Medicines; and I often wonder that People will take Physick from the hands of a Stranger, it may be a Drunkard, or Athiest (What's the difference?) and withal knows not the Nature of the Medicine they swallow; But those that dispose innocent Medicines, and cheap, may go to the greedy-mony Doctors, if

they have good store of Mony.

Therefore you may eafily see that most of the Doctors love Mony too well (which is Idolatry) the too much Love of it, is seen in them that take ten Shillings for that which is not worth ten Pence, and keep the People in ignorance; But most People are so idle (tho they have Herbs in their Garden proper for their Distemper) will not study to improve the Knowledge which God hath given, to make a Medicine for themselves, but presently send to the Doctors (because they know he has Medicines

cines ready) to cure their Bodies, as some do to a Man-Preacher for their Souls; their Consciencies being wounded by Sin, so neglecting God's Grece in themselves, the Chief Preserver and Healer of both Soul and Body, where its Advice is followed.

We live in a darker Age, then when the King of Affria reigned (mentioned in the Scripture;) for they were so wise, we read, to have no Physicians, saying, They being sach who cannot save any Man by their Profession, till they have lest some by their Practice, wherefore they made a Law, That the Sick should be had to a convenient Lodging by the Market-place, and that no Passenger should pass before they first enquired of what Distemper the Sick there were afflicted with, and were there to give their Counsel, if they ever experienced any thing that cured them, or any other of the like Diseases, &c. Her. in Cl. str. S. 16.

Some say, That every Man of Thirty years of Age is either a Fool or a Physician, that is, I suppose, He that has not Learning to know what is best for the Health of his Soul and Body, before he is thirty years of Age, is not so wile as the Beasts of the Field, nor Fowls of the

Air, verified in these Verses:

The Head-strong Hart, being wounded, streight doth sty,

By meer instinct, for Cure to Ditany; So will the Bear, if he feels any grief, Fly to the Herb Acanthus, for relief.

Bawm, Mints delights the Bee, to which amain,

She makes recourse, to ease her of her pain.
Right well her Calendine, the Swallow knows

Whereto, if ought distemper her she goes: And shall these Creatures, which have only Sense,

Challenge above us, a Pre-eminence;

No, we have Herb of Grace, whose Sacred Stem, Affords such Native Virtue unto Men, As where it is obeyed, they need not fear, That any foul Infection can come there; There the Sweet Oyl of Grace, shines in the Breast, The Soul therewith, all Vices do resist.

To which the Author adds,

Tho Vices, like Diseases, run i'th' Blood,
A Gracious Soul doth always cleave to good,
May, amonst vicious Persons, purely live;
For, in his Soul, has a Preservative,
'Gainst all Infection, he resists all Vice
With Grace, so hath God still, before his
Eyes.

Family to have in the house, Dr. Culpepper's English Physician, that the young People may learn to know Herbs, with their Vertues: Price of the Book 2 s.

Note also, That the Receipts which follow are ser somewhat in an Alphabetical order, for the more ready finding those you need, but the Table is the best to find any thing: And also where I have set W. M. at the end of a Receipt, it is to make known, that Dr. Mouse sent me them for the Poot.

Ague, Boil 3 Drams of Allum in 2 Quarts of Milk, drink 2 good Draught of the Whey, before the Fit comes.

Ague in the Breast, Fry Cammomil, or Hemlock, with Butter, apply it hot twice a day; Note, That Hony mixt with Wheat-flower, breaks a Sore, and heals.

Burns,

B

di Ba

th

fry

afc

me

bath the place with a rag, then lay on the Stampings; and lastly, to heal it, beat Sallet Oyl, with Water, till it's white: W. M.

Blood Cleansed, Tun into four Gallons of new Ale, 8 Handfuls of Agrimony: Good for Drop-sie also, drinking no other Drink.

Bruises Inward, Boil half a Pound of Juniper Berries, bruised in two Quarts of fair Water, with a Spoonful of Oat-meal, until a Pint is wasted, then grate into it Gentian and round Birthwort Roots, of each, the quantity of a Nutmeg; and let it boyl a little more, then strain it, and stir into the Liquor, a Penny worth of Mithridate, and a little brown Sugar-candy, or Hony (the more heasing) and when it's cold, put it into a Bottle; drink a quarter of a pint of it Blood warm, in the Morning sustained as much at four of the Clock in the Afternoon, till it's spent.

Inward Bruises, Drink Posset-drink, wherein Comfry Roots is boyled; Or heat Sack, with Sassron and Treacle, over the fire, and Sweat in Bed; ear Hony somtimes, mixt with Butter and Nutmeg.

Back-weak, Fry Clary-leaves, when you have dipt them in beaten Eggs, and lay to the Back, a Plaister of red fost Sealing-wax, or the Red-Lead Plaister.

Biting of a Mad Dog, Eat some of his Liver fryed (if you can) or Sweat in Bed, by taking a penny worth of Mithridate, and as much Diascordium, and cure the Sore with the Ointment of Tobacco: If your Dog is bitten by M 5

omans o, that n went

ood in er the Belly Consumption, Put Sugar-candy into a dish, to seven tops of Mint, and milk a pint of the stroakings of a Cow of one colour, drink it, (or eat it with white Bread) in the Morning, do so divers mornings: W. M, Sanacle tun'd into your drink, or beat Sanacle, with its weight in Sugar, 3 hours, eat some fasting: Smoak Rosemary in a Pipe, going to Bed: Or this Gilly to drink often, chop the fore Leg of a Beef, the Bones, and all to pieces, boyl it with three Ounces of Harts-horn, in water 6 hours, strain it, drink it warm; and your other drink, let it be warm also, when you need it.

Cramp, Dry Eeel-skins, and wrap about the Thighs and Legs.

Chilblains, The white Starch made ready for Linnen spread on Cap-paper, apply it, let it wear-off of it self; but if it is become a Sore or Kibe, sow the hair side of the Skin of a Mouse in your Stocking against the place, wear the Stocking day and night: W. M.

Chops on the Lips, Rub them with roafted Raifons; the same for the Nipples, which, for the last, the Powder of Gum Arabeck on them. Chops on the Hands, soake them in your warm Urin, and dry them by the fire; on the work Chop, lay on the Mellisot Plaister.

Coms on the Tees, Wet them often with Fathing-spittle, or lay on bruised Housleek tender them, then may you cut or scratch them out, then fill the holes with burnt Coperas, and apply a Plaister; the Nail in the Toes, that grows into the Flesh, do make you lame; either scrape the Nails very thin, or tender them. them with Plaisters, and cut not the sides of the Nail, but if too long, nip them off, or cut them with Pincers.

Dropsie, Boil a great handful of Agrimony in two quarts of Ale, till half is wasted, drink half a pint in the morning, and as much at night, W. M. this is very good for the Liver also: Bui to prove Urin very much, tun into your Drink, when working, Agrimony, Pelletary of the Wall, Dog-grass Roots, and the inner peeling of the Bows of Ash and Elder; Or drink one spoonful of Mustard in a draught of Ale every Morning.

If Note, That for the Cure of the Dropsie, and all other Swellings in any part of the Body; yea, and is one of the most universal Medicines for all Distempers is this, viz. Chewing the Leaf of Tobacco in the Mouth, not Swalling the Spittle.

Distraction, Let Blood in the Arm, and let the party have one in Bed with him, in a room quite darkened, his Food nothing but Watergrewel; If more sensible, give light into the room by degrees, and go somtimes to a Religious Meeting; let not people tell Stories in the parties hearing, except of God's Mercies; some, when taken a Cold, and sensible thereof, soon come to their Senses.

Deafness, The most common cause thereof, is from a stoppage of wax and dirt fastened to the drum of the Ear, known by the natural yellow wax, not working out of the Ear (as it doth in those that hear well) thereof, to get this dirt out of the Ear, let some body drop into the Ear every day for a week together, a little Oyl of bitter Almonds, to moisten the dirt in the

them.

the Ear, that at going to Bed, get some Body to syrenge the Ear with warm Beer, so long until all the dirt is out; by this way, I have

helpt fcores of people.

Observe, That you need not syrenge an Ear. where wax work out moisture, and if the party hear not as foon as you have done fyrenging the Ear, there's but small hopes of a Cure; how. ever, you may fafely use the following, in hopes good yellow Wax may work out of the Ear: for none hears well where Wax works not out: Take an Eel or two, called a Silver Eels, being skin'd and gutted, cut them in pieces, and between two Pewter Dishes, on a Chafing-dish of Coals, let them stew, and now and then, with a spoon take of the Oyl or Fat for use, dropping a little into the Ear at going to fleep; then feafon the Eels, and eat them: Some has been helpt in their hearing, by fnuffing into the Nostrils, at going to Bed, the Juice of Gill run by the Ground, thro' a puill; it purges the Head. Note, That fomtimes thickness of hearing is caused by taking Cold; if so, do nothing to the Ears before the Cold is gone, and the hearing may come again. And remember, that it's best not to syrenge an Ear (as above (but in a warm evening, a little before going to Bed, not to go out of the house that evening, for fear of taking cold, and that the edge of a pewter platter held close to the neck of the party a little below the Ear, will receive the Beer and dirt that runs out of the Ear when you fyrenge it, as above: Take heed of picking the Ear, except it be done very carefully with the Ear-picker, at the end of a filver Botkin; but for those that have their Ears often stuft with wax, syrenging is the best, using Eels Fat after.

Di-

Digestion Weak, Boil Centory in Ale, drink fome in the morning, and a little before Meals: Or before Meals, eat a little of the Marmalade of Quinces; Thus made, bake half a peck of Quices (being pared and cored) with half a pound of Sugar, then mash them together, and boil them with near its weight in Sugar, till it's thickish. Or eat a little of the Jelly of Currans; Thus made To a quart of the Juice of English Currans, put a pound of Sugar, boil it, and strain it, then put in a little of the Gum of Plum-tree or Cherry-tree, boyl it till the Gum is dissolved, and skim, so make the Jelly of the other Berries.

Ears Mattery, Mix Turpentine, Honey and Sallet Oyl together, drop some into the Ear: W. M.

Eyes dim, Wet your Eye-lids often with your own warm Urin: or take Corn flowers called Blew-bottles, with their cups, and foak them 24 hours in Snow-water, and diffil them, wet the Eyes with it often, being warmed.

Falling Sickness, Drink so much of the Powder of Messelto, as will lye on a broad shilling in Betony-water, in the morning fasting, do so in mornings together: W. M. scatter Assachada on Coals, and smell on the sume.

Fatness, Eat baked Wheat buttered only, drink the Decoction of Ash-tree leaves boil'd in water. See Dropsie.

Flux, Boil half an Ounce of bearen Cinnamon, in a pint of water very well, to which, add half an Ounce of Loaf Sugar, and half a pint of Claret-wine, strain, and drink some often, this has stayed Vomiting also: But if the Loosness

has been of long continuance, rouft the kidney end of a Loyn of Mutton 3 hours, baff it with its own dripping only, drink some of it blood warm: W. M. See Jaundice.

Those that are often subject to Loosness, should eat a handful of the kernels of very old

Hasle-nuts, about an hour before Supper.

Fundament fallen, Put it up with a warm wet dish-clout, and having a roasted Onion ready flatten it, and bind it on the place: W.M.

Fever, Boil Cardus in Ale posset-dtink, add Treacle, drink the Liquor in Bed, and sweat well; take no Purge till you are well recovered, but if bound in the Body, you may take some of the Liquor following. Take ten Prunes, Licorice, Currans, Aniseeds and Fennel-seeds, of each half an Ounce, Sena a dram, boyl them, being bruised in a quart of water, till a third part is wasted, strain; drink it at three times; Note, that you may put in the Sena when it's almost boyl'd.

Fainting, Boyl Bawn and Mints in Ale, sweeten it, good for beating of the Heart also, But more chiefly this Cordial, Boyl 2 quarts of Honey in 2 gallons of water, and skim it well, then take it from the fire, and put to it 2 handfuls of dryed Clovegillyslowers (or other Gillyslowers and Stockgillyslowers, tho' of divers colours) and cover it close, at 48 hours end strain it and barrel it up, and when it will run clear, you may bottle it, or spend it without bottling. Thus you may do with Cowslips, to procure sleep, and Elder-berry, for the King's Evil, Dropsie, Scurvy, Surfeits, putting some into every draught of the Beer you drink.

0

fe

Feet Gall'd with Walking, Every Morning before you put on your Stockings, anoint your Feet with common Barrel Soap, and you may travel well; if gall'd by riding on horse back, fasting spittle will cure it, but sooner, if you mix it with barnt Allum.

Giddinels, Take three Ounces of black Pepper grofly beaten, divide it into ten parts, one of these parts sup up with a Hens Egg, heat Blood warm in the morning, do so every morning until the Pepper is all spent: W. M.

Gums sore, Take Rue, red Sage, Hyssop and Woodbine-leaves, of each a handful, Allum the bigness of a Crows Egg, boyl them in a quart of Spring water, till half is wasted, strain, and add Whitewine Vinegar, wash the Gums: W. M.

Green Sickness, Take one pound of new fourpenny Nails, let them lay 24 hours in a quart of Whitewine in a Glass Bottle, drink a quarter of a pint of the Winc every morning, and work hard, or walk after it: W. M. Or take of the Filings of Steel and Cream of Tartar, of each 4 Ounces, boyl them with a quart of fair Water in an earthen Vessel to dryness, then make it into fine powder, and put it into three pints of Whitewine in a Glass bottle, let it stand 3 or 4 weeks, shaking it every day; take 3 or 4 spoonfuls at a time in a draught of Whitewine, Ale, or Elder-berry Wine, at going to Bed, for the above, or in frequent Giddiness, Vertigo, also passions of the Heart, fainting of the Spirit, with a Fear and Dread, as it Were, of prefent Death, Mother-fits or Melancholly: Dr. Willis.

cure

Evil,

into

Griping without Loofness, Boyl one Ounce of whole black Pepper, in a pint of Milk, till a third part is wasted; drink all the Milk hot: W. M. Or set a quartern of Brandy on the fire, slame it, and put it out, then boil in it a small grated Nutmeg, and having beaten the Yolk of a Hens Egg with Water and Loaf Sugar, put it to the Brandy, and stir it, till it's thickish, over the fire, drink it all at going to Bed; it cures Loofness and Vomiting, gives ease and sleep in SicAness.

Gout, or Rhumetism, Apply to the pained place Opium, or Poppy leaves, beaten to a plaisfer, with Raisons, and every 6 Weeks take a dram of Rhubarb, as a Purge, or that of Jaundice, of Rhubarb.

Head-ach, Boyl Sage in water, drink fome every morning, and smoke Sage in a Pipe: Or take the Juice of Tree-Ivy, and Oyl of Roses, of each alike quantity, beat them together, dip a rag therein, and wet the Forehead, Temples and Nostrils twice a day: W. M. Or take Conferve of Roses one Ounce, Cinnamon, Cloves, Aniseeds and Ginger, of each a dram, with the Syrup of Clovegillyslowers, make it of the thickness of Hony, take the quantity of a Nutmeg thereof morning and night.

Heat-burning, Put into your Mouth a spoonful of Chalk, and wash it down with a draught of skim Milk, or boyl Rosemary in Milk, drink

the Milk at night.

Jaundice, Beat one Ounce of the fine powder of the best Reubarb, with half a pound of the Currans, ina stone Mortar 6 or 7 hours, swallow the quantity of a Nutmeg thereof morning and night: It's said to cure all forts of

aun.

k hot: ne fire, finall olk of our it over

of the fwalmornrts of aunJaundice, purifies the Blood, strengthens the Liver, cures Fluxes, and if continued, carries away all the offending humours out of the Body, except in those Captivated ones, who swallow Brandy, and other strong drink, more then Nature hath real need of.

Itch, Drink Brimstone and Milk 7 or 8 mornings together, to drive it into the Skin, being well come out, wet the most Itching places with this. In the morning fasting, chew Tobacco leaf in the mouth, or smoke Tobacco, and save the Spittle in a pot for use: Good also for all private Itchings, rash Risings and Swellings, if continued. See the Water, curing Sores, &c.

King's Evil, Put one pound of new Lime in a pot, to which, put a gallon of scalding water, stir it together, at 24 hours end, bottle up the clearest: To three quarts of this water, put the Bark of Sassafrass half an Ounce, Licorice one Ounce, Raisons of the Sun slit, fix Ounces, Nutmegs 6 Drams, in powder; after 2 days foaking by the fire, strain, and bottle it, drink 3 or 4 spoonfuls 3 times a day: Its faid to be good also against a Consumption of the Lungs, shortness of Breath, sweetens the Blood, stops Fluxes, cures the running Gont, and the piffing Evil Or this, for the Evil, take Licorice, Fennel-seeds and Aniseeds, of each 2 Ounces, in powder, white Nettles, and the whitest of their Roots, of each one handful, boyl them in a gallon of Running water, till half is wasted, strain it, and when it is sertled, pour the clearest, and add to it Hony of Roses 2 Ounces, Syrup of Violets, and brown Sugarcandy, of each I Ounce, beaten small, stir them well together, and bottle it; when you use it,

shake it well. Let the Patient drink frequently thereof, except at or near his Meals, for three Months or more.

But for a Child of two or three, or four years of Age, give three or four spoonfuls fafting, and as much at four in the afternoon, not eating till an hour after.

Kings Evil Sores, Stamp the Snails of the Garden with Parfly, apply it fresh every 24 hours; W. M. Or wie the white Lead Plaister. A Friend of mine having a fwell'd Finger for a long time, the Doctor said, It was the Kings Evil; but fearing to trust such Doctors, as do ( as the faying is ) pick 5 l. out of a little Sore, I therefore went to the Wood, and gathered the hard knotty Roots of Fig-wort ( which refembles the Knots of this Evil ) and beat them them to mash with Hogs Suet, and so to lye a week, then boyl'd them well, and stain'd out an Oyntment, with this the Finger was often anointed, and a leaf of Fig-wort applyed fresh often, it broke the Finger, out of which came fomthing out like a piece of a rufty Bone; the Finger foon after heal'd up, and has been found near 30 years, and continues so, through God's Mercy.

Pluresse, Scoup out the Core of a large sweet Apple, and put in 7 or 8 pieces of Gum Olibanum, and roast the Apple till the Gum is disfolved, eat it all: W. M. Or take three of the biggest round balls of fresh Stone horse dung, and boyl them in a quart of Whitewine, to near a pint, sweeten it with Sugar, strain it, and drink it all if you can, being hot in Bed: This also cures pains in the Stomach, and stitches in the Side; but for a sudden pain, heat a piece

of

of a Tyle, wrapt in paper, and apply it. Be not let Blood, except just at the beginning of the pain.

Palsie, Take of the Ointment called Nervinum, compound 3 Ounces, Spirit of Lavender, and Spirit of Garden Cresses, of each an Ounce and half, mix, and with it anoint the part pained, as the Back-bone, &c. every morning and evening: Dr. Sydenham.

Piles, Stir Barrow-hogs fat, and the powder of Frankinsence together, over the Fire, adding a little Verdigrease, anoint with it: W. M. Or take Brimstone, three times as much fine Sugar, and with Gum Tragant disolved in red Rose-water, make little Cakes, eat some of them 4 or 5 times a day, are opening: Take nothing that hath Aloes in it, nor no strong Purge.

Plaister for Sores, Melt Bees-wax, Turpin: tine and fresh Butter together, for a Salve If a Sore is hollow, dip a Tent of Linnen in it, when melted in a spoon, and roll the Tent in burnt Allum, making the Tent less and less, as the hollowness decreaseth, and over that a Plaister of the same, twice a day, if the Sore be in the Leg, or greatly swell'd, spread Nutritum on thin paper, to-drive back most humors: Thus made, Take Litharge of Gold, half a pound, price 2 d. Ceruis, or white Lead 5 Ounces, Oyl of Role a Pound, Wine-vinegar 4 Ounces, working them in a Morter till it's whitish, ipread it on paper, and apply it to Burns, Titters, Ring-worms, Shingles, Shingles, Scabs, Chaps, Bruises, Strains, or other breakings out of humors; if it be new made, you may buy it of the Apothecarries.

Pox-Small, Take 6 pennyworth of Saffron, being made into powder, put it into a pint of mull'd Sack, and drink it warm, to bring out the Pox kindly: And to keep them up, mix flower of Brimstone with Treacle, and eat some: W. M. Many dye that are let Blood at the beginning of the Pox, mistaking it for heat of Blood: But when you are recovered of the Pox, or other Distempers, take a Diet-drink, lest a worse Distemper follows.

Pain in the Stomach, Put 30 White Pepper corns in your Mouth, and drive them down with Beer. W. M.

Poyson newly taken, Mix Sallet Oyl, and Cream of Tartar, and drink it, and with a feather, strive to vomit it, by putting the feather in your Throat.

Purge, Put a Dram of Jalap in Powder, in a Draught of Posset-drink, drink it in the morning, keeping house, and taken Posset-drink often; for a Child, 2 Drams of the whitest Manna, dissolved in warm Milk, and strain'd. Note, that it's best to purge 3 mornings together, when the humors are stirr'd by taking the first.

Another excellent Purge, Take Rubarb, Sena, and Licorice, of each a Dram, Jalap a Scruple, and a little of the Cream of Tartar,

Anifeeds and Ginger, all in Powder; let them foke in a Pot, covered by the fire, in a draught of Wine or Beer all night, strain, and drink it in the morning; the above, for a Man, less for a Child.

Plaister of red Lead, Take fine sifted red Lead two Ounces and a quarter, Oyl of Rofes four Ounces, Wine-vinegar two spoonfuls, boyl them in a deep penny black pot, fuch as is used in 'Ale-houses, for three or four hours or more, always stirring it with a stick, when it's cold, warm the fides of the pot, and a roll of Salve comes out, which wrap in a paper, and mark it : Good for Sprains, Bruifes. and all cold pains, and divers other things. The VVbite-Lead Plaister, for the Kings Evil. and to dry up Sores, is made as the other using white instead of red Lead.

Quinfey, Take Penny-royal and Camomil chopt small, Allum, the bigness of a Crows Egg, boyl them half an hour in a pint of new Milk: Lay some of the Herbs to the Forehead and Temples, and the rest of the Herbs and Curd spread on Linnen, to reach under the Throat from Ear to Ear, first laying upon the Curd, when spread, the Powder of white Dogs Turd mixt with Hony; renew it once in 24 hours. VV. M. You may drink the Milk wherein black Curran Leaves or Twigs is boyl'd.

Running of the Reins, Take fine Bole fealed, Jalap a Earth and Dragons Blocd, of each a Dram, Conserve of Roses 3 Ounces, mix them together gether, fwallow the quantity of a Nutmeg thereof first and last.

Rickets, Boyl a handful of Sanacle in a quart of new Milk till half is wasted; let the Child drink some every morning, and fast an hour after; and last at night to drink Milk wherein red Mints is boyled, as that above. To anoint the Childs Limbs and Back-bone, boyl the same Herbs chopt and boyl'd in fresh Butter, strain it.

Rupture, Boyl Knot-grass and a little Fennel Seeds in Beer, and strain it; let the Child drink of it fasting, and the boyl'd Herb put it into a thin Linnen bag hot, and truss it to the place fresh and warm twice a day.

Scabs on the Face, Wet them often with the water wherein Roman Vitrol is diffolved. Scabs on the Head, Boil the green Leaves of Fox glover in fresh Butter to anoint.

Scal'd Head, Melt Rozin half a pound, Ship pitch 2 Ounces, and Hogs grease 1 Ounce, spread it on Lockrum that was never washed in Soap; the Hair being clipt off, lay on sresh Plaisters one a week; if in two or three weeks the Plaisters does not take off all the Hair, pick some off with the point of a Knife, when the Head looks white; (not red) it is a Cure which somtimes is not done in sour Months.

Swellings Sudden, Bath it often with warm Wine Vinegar, and apply Nutritum on parts

Vomiting too much, Hold a Hot Toast of Bread to the Nose, and break a Hens Egg into a quartran of Brandy and drink it up; Or Eate some Marmalade of Quinces: But for a Child troubled with Vomiting and Looseness, breeding Teeth, boil the top Crust of a Peny white Loas, and a Penyworth of Harts Horn, in 3 quarts of Water, till half is wasted, and Sweeten it with Loas Sugar, let the Child Eate of it; It's a good Diet for the Consumptive, if Sweetened with Sugar Candy,

Olcer in the Bladder, Take Comfry Roots in Powder, and Gum Arabeck, of each one Ounce, Sugar of Penides, two Ounces, mix them, take a Spoonful Morning and Night in Water wherein Honey is dissolved.

Wind in the Stomach, or Bowels, Soak half an Ounce of beaten Holly-berries in half a Pint of Ale all Night, in the Morning stain it, and drink the Ale, do so 3 Mornings; But the most certain Cure, is (throw Gods Mercy) Take the Hips of wild Roses gathered a little before Christmas and dryed in an Oven, and hung in a bag in the Chimney for use, the gross Powder of them, with half so much Nutmeggs taken in all your Drink and Broath, exceeds all the Doctors Medicines, if continued.

Wintle, Wrap a Live Dew-worm round the end of the Finger and over it lay a Dock-leaf, W. M.

Worms, Boil the Leaves of one stalk of Bear. foot in a quarter of a Pint of Ale, drink the

N 3

Ale

Ale fasting W. M. Or Boil 4 Ounces of bruised Raisons and half an Ounce of Wormseed in a quart of Ale till one third is wasted, strain it, and Drink it fasting, its also good for Pain in the Stomach; Or boil one Ounce of Quick-Silver, being put in a Gally-pot and set in a Kettle to 3 quarts of Water, an hour, drink a draught of the Water fasting, not Warming it, and sear no danger, from the Quick-Silver, for I have given it scores of times to People; But for,

Broad Worms in the Fundament, Use the above, and if it Kills them not (as no doubt but it will) you may mix Alors, Allum and Howev into a Paste, in the shape of a Childs. Little Finger, and put it into the Fundament.

Webb or Pearl in the Eye, Some people at the beginning beat Hemlock and Salt together, and bind it to the Wrests and are cured; But if the Pearl, or Webb increaseth, then put the Yolk only out of the Henns Egg, and in its place put the Juice of Houseleek, and set the Shell on Hot Coals to simmer half an hour, and power out the clear water into a Bottle, to drop some into the Eye twice a day; But if the Webb hath quite darkened the fight (if you cannot abide an Artists taking off the Webb with an Instrument) then temper Honey and Salt together, and wrap it in white paper, and put it into the Fire, and when it hath done huffing, make it into fine powder, and with a Quill blow a little upon the Webb every night, VV. M. and foon after wash the Fyes either with white Rose water, wherein a little white CopeCoperace was disolved, or your own warm Urin.

VVarts, Mix the Juice of the green leaves of Marigolds, fasting Spittle and Salt together, with which keep the VVarts wet all day.

Wens, In the beginning, observe the same as of VVarts, and beat a piece of Lead very thin, and rub it well with Quickfilver, and wer it often as before, adding to the water some of the Juice, of the Green Husks of VVallnuts.

Fles, Buggs and Gnats to Kill, Set a Chaffing-dish of Live Coals in the Room at going to Bed, and cast thereon a little handful of Guiney Pepper, then shut the Room close and go not into the Room before the Evening of the next day, It is such a strong Pepper that it almost Stiffles a Man that beats it to sine Powder in a Morter, Dr. Salmon saith, It is an Enemy to the Liver, and scarce safe to be taken inwardly --- yet some put it into Ginger-bread, because they say; That one Ounce of it, will heat the Bread, as much as a Pound of Ginger,

# POSTSCRIPT, Or an Addition to the Receipts.

IN the time of the Plague, Small-pox, &c eat Rue, or Herb of Grace, with Bread and Butter every morning.

A Water which hath done wonderful Cures, in all manner of Swellings, Ulcers, Cancers, Titters, Ringworms, Fistola's, Scabs, Itch, &c.

Ake white Vitriol 4 Ounces, Camphor 1 Ounce; boyl them in a pot to dryness, being made into fine Powder, mingle with it Bole Armoniack in Powder, 4 Ounces, and keep them in a Bladder; then take a gallon of Smiths Forge water, and being boiling hot, put it into a por to one pound of new Lime, and stir it well rogether, and when it's settled, pour the clear into a Glass. bottle. Into a quart of this water put two fpoonfuls of this Powder into another bottle, and shake it twice a day for two weeks. If you would have it stronger, put to it one Ounce of Allum in Powder; use it as hot as may be, wetting double linnen Cloths therein, and bath with it; you may use a Syrenge, it need be. Dr. Hartman. See his Family Phyfitian,

sitian, Vol. 1st, price 3 s. He writes more honestly then most of the other Doctors.

The faid Water for the Itch, being fomwhat long in preparing, and if you cannot flay for it, then for three or four mornings drink Brimstone and Milk; and when you find that the Itch is come into the Skin by breakings, then use the Oyntment following; Beat two penyworth of Quick-filver, and the white of an Egg, with a wooden spoon, in an earthen poringer very well, three times a day, until you cannot see the Quick-silver; then beat the roots of Docks, and a little green roots of Elecampany, if you can get it; and in fresh Burter boyl them very well, then ftrain it, and ftir into the prepared Quick. filver, till the Oyntment begins to cool. Or mix the pulp of four roafted Apples, with 2 pennyworth of Quick-filver very well to anoint with.

# Another Medicine for a Cough.

SLit open three Figs, and put into each a Thimble full of whole Mustard-seed, and eat them at going to Bed, do so several nights, and being in Bed, take a little often of the sollowing. Boyl Rue, Rosemary and Hysfop in Hony, dip the fazed end of a Licorice Stick therein, to suck often, Use Spanish. Juice.

A Diet-Drink for Cancers, Kings Evil, or other dangerous Fifula's, and all other fulness of Humours, which (with the Blessing of God) hath done great Cures, where great Doctors (so accounted) have failed, in London, &c.

Ake sweet Fennel-seed, yellow Dockroots, Hermodactyls and Sena, of each three Ounces, Sarfaparilla and Polypody, of each four Ounces, Agrimony and Scabious, both dry, of each one Pound, Nutmegs, Maceand Cinamon, of each an Ounce; let the Spices be beaten fmall, and put into a little thin bag, and put the bag into a larger thin Canvas bag, with the other things bruised, with a Pebble also; and put the bag into 4 or 5 gallons of new Ale, into a Barrel before it has done working; having flood fo a week, drink a good draught in the morning fasting, and another at four a Clock in the afternoon, until it is spent. It's best to be taken in April or September, and bottled when it's decaying.

To conclude, Reader, What shall we say of poor frail Man, who, when in Health, seldon thinks of Sickness, or that he deserves the Assistance of Sickness, for being so vain

and tool in when he is in Health.

But when Sichness comes upon him, which machly comes, through Excess, then, poor Man, thinks of God, because he thinks God can give him ease, tho' he little thought of God when in Health; and will then defire

that

that God would restore him to his former Health, with a promise, that if God restores him, he will spend the remainder of his days better then those past and gone; and when God hath raised him to his former Health, doth not he soon forget his promise of becoming a new Man, yea, and also to forget God's great Mercy in restoring him to Health again, nor prising Health at such a rate as he did in Sickness.

But, Reader, If thou art one of those that lives in the sear of God, thou wants not Temperance, and if thou art such an one, thou wilt have little or no need of the Physical Re-

ceipts above.

Now, where the Seed of the Serpent is obeyed in any Soul, so not resisted by the help of the Grace of God, that Soul the Devil leads into temperance, either into excess in Eating or Drinking; or some vain or foolish work, to hasten either some incurable Disease, or Death. The Devil draws some to drink Brandy, or other strong Liquor, until their Bowels is, as it were, a Flame for heat, And, saith Solomen, Wine is a Mocker, Strong Drink is Raging; and whosever is deceived thereby, is not Wise, Prov. 20. 1. Wise he cannot be that lets the Serpent deceive him with Wine, as he did Eve with an Apple.

But now and then when we hear of a Man or Woman found dead on the Ground, by drinking strong Drink to excess, the Carnal Professor of Religion will say, His or her time was come, it was ordained as their fortune, their

days was set,

Alass, How blind are all those that Obey not the Grace of God in themselves, Tit. 2. 11. which teacheth to forsake all Ungedliness, as God would have all Men and Women to do, which if they did, none of their days would be shortned, by the means of drinking or eating. Nor had the Man at Bedford come to Life again in his Grave, if he had not drunk away his Senses by drinking Brandy to excess, people thinking he was dead. Nor had the Woman been choaked to Death with the slame of Brandy when she vomitted Brandy into the fire, if she had not drank to excess.

How sad's the case of frail and mortal Man.
Whose time is short, its length seems but a
span.

In Youth he's proud, Ambition then so reigns, That he God's Grace, so Godlines's disdains,

Virtue is then contemned, 'tis Vice which he

Doth make his Choice, but yet does hope to

With Grace, therefore, fearch into all the printed Books of the Preachers in this Age, and thou wilt find, that their Works do favour of Grace, except those Texts they have picked out of the Holy Scriptures, tho' they have been, and some are famous and learned Preachers. O! therefore, Now cease from Man, and on God's Grace depend.

This Grace is the Divine Preacher, in thee it will shew thee thy whole Duty, both to God and Man, I have not room to give thee Instances out of all the Famous Preachers Works, but shall end with this one, Of the Famous Thomas Brooks, a Presbyterian Preacher, in pag. 540. of his Book of Well-grounded Affurances of Salvation, faith, Those that were once the Worthies of this World, and are now Triumphing in that other World, among the Princes of Glery, have lost that sweet Assurance, and Sense of Divine Love and Favour that once they enjoy'd.

'Twill be a sure Guid to your Lives end.

Tis true, they write many Truths, but spoil them again by following Words.

end.

God's ainly failable

Robert .

### Robert Hill's Choice Receipts.

RObert Hill of Yorkshire, aged Seventy Years, very much defireth, that all that fear the Lord, might have the Knowledge of the long Experienc'd Vertues, of his many Years approved Purge and Plaister, which, (by the Blessing of God) has cured Surfeits, Scurvies, and other Breakings out of the Body, as Itch, and like unto Leprosie, and many other Distempers.

He, being at my House (in Bedford) on the 25th day of October, 1693, had occasion to make the said Purge and Phisser, for a poor Dropsical Woman here (being the Daughter of a Yorkshire Man, once of his Acquaintance, deceased) who hath had one of her Arms swell'd nigh as big again as the

other Arm for 14 years past.

He defired nie to go to the Apothecaries with him, and we had them of a Widow, and paid for the Drugs, as follows,

His Purge to Cleanse the Blood, fit for both Old and Young, very safe.

Take Cream of Tartar two Ounces 8 d. Jalap in fine Powder half an Ounce 3 d. Powder of Brimftone half an Ounce 1 d. mix them together in the Mortar.

'Then he put a quarter of a pound of Hony into a Gally-pot, (or you may use Treacle)

and.

Robert Hill's Choice Receipts. 2-

and mix the Powder with it very well. Swallow as much of this Purge early in the morning, as the substance of a Nutmeg, or as much as gives 2 or 3 Stools a day, and you need not keep house: But it must be continued until the Distemper is abated, which is most effectual, at the Spring or Fall (as other Purges are) He saith also, that it carries away all

offending Humours out of the back-door.

Note, That if you take this Purge, chiefly for Head-ach, Deafness, &c. mix with it at first one Dram of grated white Briony roots; the same for his Pills, that follows: Likewile, if you take the Purge, or Pills, for Rhume in the Eyes, or Pearls therein, you must also wet your Eyes often with the Juice, or Sap of Hesse; Thus to be had, cut a small Wand from the Root of a Hesse-tree. I et a Man hold the great end fast in a Pot or Glass; and let another begin at the top, and twist it strongly, by little and little, as for a Faggot-band.

#### His Excellent Salve, or Plaister.

Take Gum Galbanum i Ounce 4 d. Camphire 2 Drams 3 d Mastick half an Ounce, 5 d. Deers suet two Ounces, 2 d. Virgins. Wax 2 Ounces 6 d. (but common Bees-wax may serve.) Frankincense two Ounces 3 d. Rozin one Pound 6 d. Venice Turpentine put in white paper (or in a Bladder, if you carry it some miles.) 2 Ounces 6 d.

Note, That the Galbanum and Mastick must be beaten to Powder, Then he put all those Drugs into a Skeller (except the Cam-

phire

enty

that e of nany nich, feits,

Bonany

or a the Ac-

the ries ow,

both

8 d. 3 d. mix

ony le) and

#### 280 Robert Hill's Choice Receipts:

phire and Turpentine ) and let them boil gently on a flow Fire about a quarter of an hour, ftirring most of the time with a stick: and when he had it from the Fire, he fliced the Camphire, and put it in the Skellet, and with a Knife scrap'd the Turpentine of the Paper in also, stirring them together, until they were well mixt together, and then emptied the Skellet into a large pan of cold water: and having anointed his hands with Hogs Seam (not having Sallet Oyl) and work'd it a little in the water, and then took out a good handful, and drew it out in length to word it, until it became of one colour (as Shoemakers make their wax ) Then he made it into five round Balls, and those Balls he rub'd between his hands, until they became long rolls to be wrapt in feveral papers, when cold: Thus you may eafily make half, or a quarter of that quantity.

# Some of the Vertues of the Salve, or Plaister.

For fore swell'd Leggs, caus'd from Surfeits, Seurvy, or Dropsie, &c. He spreads the same thinly upon thin Sheeps skin, propt full of holes, with the point of the Cizars, and apply it to the Pain, or Swelling; and when it will easily come off, take it off, and wipe it well, and a little renew it with Salve; but if the Leather becomes too stiff, make a new Plaister, if you are not cur'd. Observe the same, for Pains, Strains, Gout, Sciatica, &c. (using the Purge or Pills also.)

Robert Hill's Choice Receipts. 281

But for a Rupture, let the Leather plaister be round, and 5 or 6 Inches over, a notch or piece cut out below, for the Members place, on which, fix a Truss, taking inwardly often the powder of Clivers, and Plantine in Beer or Broth.

But for slight Pains, Stiches, Kibes, Cuts, Boils, &c. you may spread it on Paper, or Linnen.

His Pils for Kings Evil Surfeits. Scur'vy, &c.

Take Aloes and Jalop, of each one Ounce, Myrrh and Mastick, of each one Dram, Soffron one Scruple, being in Powder, work them into a stiff Past in a Morear, with the Pestle, with a little Syrup of Buck-thorn Berries.

Take three or four Pills, about the bigness of field Pease, every night, or so much as will give 2 or 3 Stools the next day, so you

need not keep house.

But if you take them for the Kings Evil or other dangerous Ulcers, use the following, as your constant Drink.

#### His Drink for the Kings Evil, &c.

PUT four Gallons of Spring-water into a Kettle, then put into the water as much of the leaves and stalks of Butter-burr, as you can well thrust in (in Winter use the roots, its Leaf is several times bigger than Colts-soot Leaf, and grows in Bogs near a River) also a quarter of a pound of Licorice sliced, boyl the Liquor half away, and take it off the fire, and put to it two or three, or more, of Woodlice bruised, ty'd in a Linnen cloth, at 12 hours end strain, and bottle up the Liquor.

Scald Heads, Are cured by bathing the Scabs with

with warm Cows pifs, until they are tendered to scrape off, and then anoint them with Hony, well mixt with Cream of Tartar, and Roman Vitrol, using the Purge or Pills also

Wind in the Stomach, Eat Nutmeg, Ginger, and Sugar dry.

Griping of the Guts, He faith, a Man hath had some Cuineas for the Cure, giving only as much of the powder of old stinking smoky Tobacco-pipes, as would lye on a Shilling, in Beer.

But for such as was Grip'd with Chollick pains, and Costive too, He mixt the Powder with the Syrup of Buck-thorn Berries.

Now, Young Man, if thou lives in the fear of God, and art studious, thou mayst, by the Receipts in this Book, become thy own Doctor, to know the Nature of the Medicine thou may need, better than to send to a Doctor, for things to swallow thou knows not what it's made of. So thy Soul will not be prevail'd with, to partake of a Mountebank's Sins, by hearing him tell a 1000 Lyes, to perfwade thee to buy his Drugs, &c.

## ARITHMETICK

Made Easie,

OR,

# Casting ACCOUNT.

Oung Man, When thou Learned to Read the Bible, I hope also thou Learned to Know the Verses; for the last Verse of the CXIX Psalm, is 176 that is, One Hundred Seventy Six.

Now, to shew thee how to set down a Taylor's or Butcher's Bill; If one desires to have one written; as first, for a Breast of Mutton 15 d. it must be set down, one shilling, thre pence, as

| 1.       | s.  | d.    |
|----------|-----|-------|
|          | -1- | -3    |
|          | -1- | -8    |
| <u> </u> | 3 - | 0     |
|          |     |       |
|          |     |       |
|          | -0- | 0     |
|          | 13- | 4     |
|          |     | l. s: |

In all 3—8----3

Observe that when the Letter I. is set over Figures, it shews they are Pound in Mony, a for Shillings, and the Letter d. over pence, this Bill is in all'3 Pounds 8 Shillings, and 3 Pence.

Write the Bill on Paper, and cast it up thus. faying 4 d. and 8 d. is 12. d. and 4 is 16. and 8 is 24. and 3 at the top makes 27 pence, that is 2 s. and 3 d. the odd 3 d. being under 12. I fet between the Lines, and carry the 2 s. to the place of Shillings.

Saying 2 s. that I carry, and 13 is 15, and 6 and 3, and 3, and 1, makes 28 Shillings, that is I Pound 8 Shillings, the odd 8 s. I fet between the Lines below, and carry the one

Pound to the place of Pounds.

Saying I that I carry, and I and I makes ? Pounds, which 3 I fet between the Lines alfo.

Young Man, This is a Question in Substraction of Mony, for thy Encouragement, and that if thou wilt be studious, thou mayst Learn the Profitable Rules of Arithmetick, which' follow, without a Tutor provided, thou art perfect in one Question, before thou proceeds further, Learning them in order, as I have herein fet them down.

If one Man lent another Mon one Hundred Pounds, viz. 100l. Of which he hath lately paid of it 39 Pound 17 Shillings and 9 pence, what remains still in his band? fet them down in Figures thus,

t over ony, s. e, this Pence. thus, and 8 that is I fet o the

and 6 lings, s. I fet ne one

makes Lines

biframent, mayst which u art

here-

Pound in his

Lent

| (10) (20) (12·)<br>L. L. d.  | Observe that<br>the inclosed fi-                      |
|------------------------------|---|
| Lent 100 00 00 Paid 39 17 09 | gures are only<br>fet on the top, to<br>remember what |
| Unpaid500203                 | to borrow when need is, &c.                           |

Now to take or Substract 39 17 09 out of one hundred Pounds, I do thus, saying

Take 9 d. out of oo d. that I cannot do, but I will borrow the Inclosed (12) then I take 9d

out of 12, rests 3 d, which I set below.

Next, Because I borrowed 12, at the place of pence, I pay it at the Shilling as one, saying 1 that I borrowed and 17 shillings makes 18 shillings, take 18 from 09, or nothing I cannot, but I borrow the inclosed (20) then I take 18 from 20, rests 2 Shillings to be set between the Lines.

Next one that I borrowed at the place of Shillings, I pay at the Pounds, saying I that I borrowed and 9 is 10, Take 10 from 0 I cannot, so borrowthe inclosed (10) and say 10 from 10 rests 0 to be below.

Lastly 1 that I borrowed at the Figure 9, and 3 makes 4. Take 4 from the 10 above, rests 6 to be set between the Lines. And there is unpaid of the 100 1. just sixty pounds, 2 shillings, and 3 pence.

For proof, Add the Sum paid, and that unpaid together, and it will make just the 100

pound first Lent.

But more of this in order follows.

#### The Poet faith,

None to true Honour, or Preferment mounts, Without the Art of Writing and Accounts.

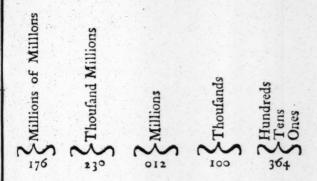

#### How to write the Nine Figures.

| one | two | three | four | five | хij | feven | eight | nine | Cypheř |
|-----|-----|-------|------|------|-----|-------|-------|------|--------|
| 1.  | 2.  | 3-    | 4.   | 5.   | 6.  | 7.    | 8.    | 9.   | 0.     |
|     |     |       |      |      |     |       |       | c    |        |

The Figure five, finish the top last; being at the bottom to make the Figure 6. and begin the 8. and 9. as you do a little a or c.

# How to read, or know the Value of Fifteen Figures set together, or under Fifteen.

IF you know the Verses in the Bible (as aforesaid) then you can read three Figures, and if so, you may read Fisteen (or under) by this Table.

By the Table above, you may perceive, that the Figures are read by threes, Only giving to each three, the Sirname, as is above them written.

Thus Read, 176 Millions of Millions, 230 Thosand Millions, 12 Millions, 100 Thousand, 3 Hundred Sixty Four.

100. is one hundred.
100. 000 and hundred thousand.
1. 000. 000. is one million.
A million is 10 hundred thousand, or 3
one thousand thousand.

eing at

begin

ifteen

le (as

igures, inder)

#### I. Suppose there is in an Orchard.

| Apple Trees Pear Trees   | <del></del> 136 |
|--------------------------|-----------------|
| Cherry Trees—Plum Trees— | 207<br>036      |
| In all                   | 455             |

Note, That if the four Numbers, had been Pounds in Mony, or Droves of Sheep, or other thing, to be Sum'd up, Thus

First, I begin at the bottom, on the Right

Hand,

Saying 6 and 7 is 13, and 6 is 19, and the 6 at the top, makes 25. The odd 5 I fet between the Lines; and the 20 I carry as two, (because

it's two tens ) to the middle row,

Saying, two that I carry, and 3 is 5, and 7 is 12, and the 3 at the top makes 15. the odd 5 (of the 15) I fet between the Lines, and carry the ten (of the 15) as one to the Left Hand row, Saying, I that I carry and 2 is 3, and the I at the top, makes 4, which 4 I also fet between the Lines, And the number of the Trees are in all 4 hundred fifty five.

II. Suppose a Man owes me 16 another 20 11 07 a third Man 23 13 09 the 4 Man 73 17 10 What doth these four Sums Mony come to in all.

The

to

in

10

the

The Answer will be 136---04---03.

Note, That the Cypher o on the left Hand any Figure fignifies nothing.

## ADDITION.

Ifet the four Sums of Mony one under the other, thus,

| (10) | (20) | ( 12 ) |
|------|------|--------|
| 1.   | s.   | d.     |
| 17   | 16   | 10     |
| 20   | 11   | •7     |
| 23   | 1.8  | 09     |
| 73   | 17   | 10     |
| 136  | 04   | 03     |
|      | -    |        |

Note, That when a fingle 1 is fet over any Figures, it shews they are Pounds in Mony (as above). Then s for Shil-

and d for Pence.

Note also, That when it is over Figures, they are Pound weight of Goods, &c.

Likewise, the 12, set over Pence, shews that for every twelve I find in the Pence row, I am to carry one Shilling to the place of Shillings.

And the 20, over the Shillings, shews that I am to carry so many 201. as I find (in the Shillings row) to the place of Pounds, as aforesaid.

But for the easiest way of casting up this Sum (for the young learner) is by using dots, Thus,

Begining at the Pence; I say, 10 d. and 9 d. is 19 d. where against the 9. I set a dot for 12 d (or you may make your dots on wast Paper) and the 7 above the 12, I carry to the 7 (above 9)

been

Right

the 6 rween cause

and 7

odd 5 carry Hand d the tween are in

d.
I
c9
r Sums

The

and it makes 14, where I set a dot also for 12, and carry the odd 2, to the one on the top makes 3, which 3 d. I set between the lines, as above

you fee.

Next, I look how many dots, and I find two, which I carry to the row of Shillings, faying, a that I carry, and 17s. is 19 and 8 is 27 (and the 1 of the 18) makes 37, where against the 18, I fet a dot for 20s. or 1 l. and carry the odd 17d. upwards. Saying, 17 I carry, and 1 is 18. and (the 10 of the 11) makes 28, where I set a dot against the 11. for another 20s. and carry the odd 8, to the 16 on the top. Saying, 8 I carry and 16, makes 24s. where I set a dot for 20s. and set between the lines the odd 4s. as you may see.

from the place of Pence, and 70 is 9. and 8 is 17, and 1 is 18, and 6 is 24, and 10 is 34, and 10 is 44, and 10 is 54, and 10 is 645. that is 3145. then the 4 s. being fet between the Lines, the 3 l. is to be carried to the place of Pounds.

Lastly the 3 dors, for the 3 l. found in the place of Shillings, I carry to the Pounds, (done up as the Example of Apple-trees) Saying 3 that I carry and 3 is 6, and 3 is 9, and 7 on the top makes 16, the odd 6 I set between the Lines, and I carry the 10 as one to the last 10w, saying, I that I carry 7 is 8, and 2 is 16, and 2 is 12, and I is 13, which set between the Lines, and the whole Sum comes to 136 l. c4 s. 3 d. Answer,

of leveral small Parcels, begin it in order of pounds, shillings and pence, thus o 3 9 and when you are bidden to set down 16 d. set down 1 s 4 d. Or set down 23 s. you anust set it 3 o, yet if a single thing, and not a Bill (as in a Letter) you may write 45 s. or 17 d.

tic,

Ihen

He that is so bad a Husband as to spend in Ale 3 d every day, it comes to by the year, three Pounds, three half Pounds, three Groats, and three Pence, that is, 4 II 3, by the year; If 4 d the day, say 4 l four half Pound, &c.

Do fo for any other number of pence, fpenc

a Bill der of 9 and d. fet of fet it not 2 or 17 d.

d.

III. If one Pound of any thing cost 7 d 1, that is 7 d half penny, what will 280 l weight cost, after that rate, performed by Addition thus,

| 200 Sixpences makes 100 s, or | .5  | S  | a |
|-------------------------------|-----|----|---|
| 80 Sixpences make,            | 2   | 0  | 0 |
| 200 pence is                  | . 0 | 16 | 8 |
| 80 pence is a Noble, or       | 0   | 6  | 8 |
| 200 Halfpennys is             | 0   | 8  | 4 |
| 80 Halfpennys make 10 Groats, | oro | 3  | 4 |
| price of the Goods            | 8   | 15 | 0 |

Note, That to work fuch Questions as this by Addition, it's necessary to have by heart the following Table.

| 20  | is | 1   | 8 Get this Table by heart                |
|-----|----|-----|--|
| 30  | is | 2   | 6 thus, 30 d is half a Crown             |
| 40  | is | 3   | 4 then 60 d.is 58 again 40d is           |
| 50  | is | 4   | 2 3 s 4 d, then 80d is a Nob.            |
| 60  | is | 5 . | o or 6 s 8 d again, so d is 4 s          |
| 70  | is | 5   | 10 2 d, then 100d is 854d, &c.           |
| 80  | is | 6   | 8 100 1 of Chefe, at 3 d. the            |
| 90  | is | 7   | 6 9 lb.comes to three times              |
| 100 | is | 8   | 4 8 8 4 d, or 25 faggots 120             |
| 110 | is | 9   | 2 to the hundred, at 1 d the             |
| 120 | is | 10  | o piece, comes to 10 s, as in the Table. |
|     |    |     | -  |

Then for every Crown that a hundred of Fag. gots cost, reckon an Halfpenny; If a Faggot cost me three Halfpence, I C. will cost 15 s, because there is 3 Crowns in it.

Note, That Boys may improve themselves very much in reckoning up divers things, after they have by heart the Table of pence aforesaid, and learned this Rule of Addition.

As, 800 yards of Tape at one penny the

vard.

The Table tells you it comes to 8 s. 4 d. An hundred yards of Galloom at one penny halfpenny the yard.

In the Table 100 d is Add half that Sum, is

Answer

Note, That if it had been one penny three farthings the yard, for the farthing add half 4 s 2 d, to 12 s. 6 d.

Or 80 lb. of Sugar, or Cheefe, at three pence half

yenny the pound.

In the Table 80 d is 6 s 8 d. 80 is is 6

half 80 is

Answer

At 4 pence farthing the Pound Currans, what one hundred Weight coft, that is, 112 pound weight,

In the Table 110d is add 2 for 112 for the 4 pence a f of 9 s. 4 d for the farthing 2-Answer 1-19-

IV If a Man owed me the three Sums of Mony that follows, What comes it to in the whole,

1 Note, That the 7 d 1 is 202 17 feven pence halfpenny; and 703 10 906 the I da is one penny far-IO thing, and in the Total Sum 1812 09 between the Lines, 5 d 3 is five pence, three farthings.

To cast up the three Sums I do thus, The 1 which is an halfpenny, and the 4 the farthing makes 4 or three farthings, which is fet between the Lines, Next 1 d and 9 d is 10, and 7 is 17 d, where against the 7, I set a dot for 12 d, and fet the odd 5 d between the Lines.

Next, I that I carry from the place of pence, and 10s is 11, and 1 is 12, and 17 s is 29 s, I fer down the odd 9 s between the Lines, and the 20 s makes 1 l, I carry to the place of

Pounds.

aggot be-

lves fter aid,

the

עתח

ree

half

balf

In

Saying, I That I carry, and 6 is 7, and 3 is 10, and 2 is 12, where I set a dot for 10, and set the odd 2 between the Lines.

Next, I carry the dot for 10, as one to the middle row (being all Cyphers) it's but one still, so I set the 1 under the row of Cyphers, and proceed to the last row.

Saying 9 and 7 is 16, and two at the top is 18 which I fet between the Lines, and the whole Sum comes to, 1812 19 s. 5 d three farthings.

to Note, That I have been the more large upon the left Example, with the II before, because the diligent Scholar (who useth his Pen in doing them, as well as reading) may be enabled to cast up all the Sums, soliwing in Addition, minding to dot, going up every row, according to the Figures placed on the top of each row; as in the next Sum you must dot at 16. because 16. Ounces is a pound, 28 lb. a quarter of a hundred, quarters one hundred, 20 hundred one Tun (or Cartetad) and so of the rest.

#### V. Averdupois Weight.

| Tuns. | ( 20 )<br>C. | (4)<br>Quarters | (28)<br>15. | (16) |
|-------|--------------|-----------------|-------------|------|
| 763   | 17           | 2               | 19          | 12   |
| 359   | 10           | 3               | 16          | 10   |
| 763   | 14           | 2               | 14          | 10   |
| 1882  | 03           | 0               | 22          | 07   |

These Weights are used by Grocers, &c. and to weigh Currents, Flesh, Butter, Cheese &c. Wool also 28 lb. is called a Tod.

But because Grocers send for smaller Parcels, weekly by the Carrier, they commonly write their Bills of Carriage thus,

16. A Parcel down 14 Boxesupto Lond. o 19

Note that the first Line, shews that the Parcel that comes down by the Carrier, weighed s hundred, 3 quarters, and 14 pound; and the 3s. 7 d. for Carriage, &c.

Note, That fo many Farthings, as one Pound of Sugar cost, reckon so many seven Groats, to know what one hundred weight will cost; an hundred weight being 112 pound. Ses a Table of this in Reduction.

#### VI. Troy Weight.

| 16.   | [12] | [02]<br>d. w. | [24]<br>gr. |  |
|-------|------|---------------|-------------|--|
| 763-  | 6    |               | 17          |  |
| 515-  |      | -14-          | 19          |  |
| 459   | 7    | 13-           | 15          |  |
| 1769- | 0-   | 01            | -03         |  |

Note that this Mark is for an Ounce 3 For a Penny Weight this d. w.

For a Grain, write gr. Therefore 24 Grains is a Penny Weight, 20 d. w. is an 3.

This Troy Weight, is used to weigh Bread-Corn, Bread, Flower, Gold, Silver, Amber, Jewels, Liquors, and of late Sals, &c.

The beginning of these Weights, was thus, 32 gr. of good plump and dry Wheat-Corns, may ferve to weigh three pence of our English Silver Coin.

Then

3 is and. the

one iers,

5 18 hole 5. n the

ignit well ums, very

each cause dred,

Jart-

(6)

. and ede.

rcels. write

A

Then 64 grains weighs 6 d. And 10 times 64 gr. may ferve to weigh 5 s. in Silver Coin, or an Ounce Troy; 12 of those 3 a pint of Wheat, or 60 s' the 15 in Coin.

But now the faid 32 gr. of Wheat are reduced into 24 Artificial grains, called a penny weight.

20 penny weights an 3, and 12 a 1b.

Note, That 14 \$ 12 d. w. Troy, is equal to one pound of the Grocers weight called Averdupois.

The 3 Troy is bigger then the 3 Averdupois, yet the 16 bigger, because Troy 16 hath but 12

3, Averdupois 163.

A pound of pure Silver is worth 3 1.4 5. but mixt with Copper (which it's faid makes it harder ) is worth but 31. or 60 s.

It staid, that Guinea's are coin'd at 11 Ounces fine Gold, with an 3 of Alloy of Copper, to

the th.

2. E. called in all base Mony, and caused weighty hammer'd Shillings to be Coin'd, which of late years, hath been much clipt, and the Clipt counterfeited until King William called in all the clipt Mony to be coined into mill'd Mony: The Taxes paid to the King in clipt Mony, at 5 s. 8 d. the Ounce for some time, and paid from Man to Man at 5 s. 2 d. to ptevent Clipping; for some pieces past in payment for Shillings, as was not broader then a mill'd Threepence, that many Men cather then take much of fuch base Mony, would take Guinea's at 30s. and sometimes 32 s. the piece, until the Parliament in the Year 1695. funk them to 225. a piece, under the Penalty of 201. to fuch as paid, or received them above that rate: So that the fall of Guineas, together with the clipt Mony, became a very great loss to many Men. See more of Troy Weight in Reduction.

Note

in

21

in

Note, That all our English Mony of Gold and Silver, is coyn'd in the Tower of London, the place where it's coyn'd is called the Mint.

The Mint Officers are so many, that they were made a Corporation by King Edward the III. and so exempted from all publick Offices, and their Estates free from all Taxes, and Parish Duties.

The Fees of all of them come to by the year (it's faid) about 20000 l.

The Chief Officer is called Warden, or Keeper of the Mint, who receives from the Merchants, and Goldimiths, the Bullion, or uncoyn'd Gold and Silver, to be coyn'd, who receive it coyn'd of the Warden.

Besides the Silver Coyn, the number of brass Halfpennys, are much increased, which, if they were good Brass, or Copper, people would not be so shy of taking them, yet the number are so very much increased of base Mettle, that people think many of them are Counterfeit.

So that there will never be a general Satisfaction in people, as to Coyn, until they are call'd in, and Silver Halfpennys and Farthings coyn d in their room, which will be light Carriage, and may be fafely kept by people in little Boxes, in Paper in their Pockets.

#### VII. Apochecaries Weights and Marks.

| 15  | (12) | (8) | (3) | (20)<br>gr |

Note that 60 minuts is an hour, 24 hours a day and night, &c.

#### Proof of Addition.

After you have cast up a Sum, and set down the total on wast Paper, begin at the top, and cast it downwards, and if it agrees with total, it's right, otherwise not: This I have often proved to be the rightest and quickest way.

And now, if Young Men, will not study a little, on spare hours, to learn by the Book, but are so idle, as will learn nothing, for their good, but what a Master tells them at School, they are to blame, and deserves the Rod. However, I have written the several Sums, ready cast up, as above; and they may be of some Service to the young Industrious School-master, in the Country. I endeavour the good of all.

rce, utt, Gal-

## SUBSTRACTION.

Subfraction, taketh a lesser number out of a greater, and leaveth the difference under the Line.

I. If you have 847 Sheep in a Field, and are to take one 533 of them to have to a Fair or Market,

how many will be left in the Field?

Always fet the biggest Number overmost thus,

Sheep in the Field 847 Sheep to be taken out 533.

Now to substract 533 out of 847, begin on

the right hand thus,

Saying, Take three out of feven, rest 4 to be fer under the Line. Next Take 3 from 4, rests 1 to fer under the Line, Lassly, Take 5 from 8, rests 3, to be fer under the Line so, that there remains in the Field Just 314 Sheep, Which you may prove, by adding 314, to 533, and the Sum will be 847.

II. If King Hen. 8. was born in the Year of our Lord Christ 1491. How many Years is it since?

The Present Year of our Lord is, 1698. The Year of King Hen. 8. Birth 1491.

This you may fubstract, as the Last Question, Or take 1 from 8, rests 7, to be set between the Lines,

Lines, &c. So that the Figures under the Line above, are 207, the Years fince King Hen. 8. Birth.

know how many Years are past since some of our Kings and Queens of England was born: As Queen Mary 1515. Queen Eliz. 1533. K. Jam. 1566. K. Ch. 1. 1600. K. Ch. 2. 1630. K. Jam. 2. 1633. Q. M. 2. 1662. and K. W. 3. (whom God grant long to Reign) in the Year 1650.

on.

III. If 5643 l. be owing to a Merchant, and the Debtor pays thereof, at one time 4754 l. How much of the Said Sum of 5643 l. remains unpaid.

Take Pen and Paper, and 3 5643 Set the two Sums thus \_\_\_\_\_\_ 4754

Beginning at the Right Hand (as before) I fay, Take 4 out of 3, I cannot, Therefore I borrow 10, and add to it the 3, and it makes 13, Then I fay, Take the faid 4 from 13, rests 9, which 9 I set under the Line.

Next, Because I borrowed 10, to add to the Figure 3, yet I call that 10 but 1, Saying 1 that I borrowed, and 5 makes 6, Take 6 from the 4, above it, I cannot, Therefore (as before) I borrow 10 again, and add to it the 4, makes 14, Then I say take 6 from 14, rests 8, to set below the Line,

Next, The 1 that borrowed at 4, and the 7 makes 8, Take 8 from the 6 above it I cannot, Therefore, I borrow 10, and add to it the 6, makes 16, Then I fay, Take 8 from 16, rests 8, to set under the Line.

Laft-

Lastly, Because I borrowed 10, to add to 6, I pay it again at the 4, saying 1 that I borrowed, and 4, makes 5, take 5 from the 5 above, rests 0, to set below the Line, which 0, doth not add to the number at all, but fills up a place.

So that 4754 l. being paid of the Sum of 5643 l. there remains yet unpaid jult 889 l. as

you fee in the Margin

IV. Suppose 5643 l. be owing to a Merchant (as in the last Question) whereof the Creditor has paid 4754l. 12 s. 8 d. How much is unpaid?

Note that because the Mony paid is odd, that is, hath shillings and pence, besides pounds, I set Cyphers in the place of Shillings and Pence, and the Sum will stand thus,

Before you proceed to substract this Sum, you may do well to be perfect in the very Second Question in Arithmetick at the beginning.

But to substract this Sum, I do thus,

Saying, Take 8 from 0, that I cannot do, but I borrow the inclosed [12] and say, Take 8 d. from 12 d. rests 4 d. to set under the Line.

0

| [10]                      | [20]  | [12]<br>d. |
|---------------------------|-------|------------|
| Lent 5643 -<br>Paid 4754- |       | oo<br>o8   |
| Unpaid 0888-              | -07 - | -04        |

Next, The 12 I borrowed, at pence, I pay as one at the shilling, Saying I that I borrowed. and 125. makes 13, Take 13 s. from 00, I cannot, therefore I borrow the inclosed (20) and

fay, take 1; from 20, rests 7 s.

red. SO.

of

in

41.

ld,

ls,

bn

Next, One that I borrowed at shillings, and 4 of the pounds, make five, Take 5 from 3, I cannot, Therefore I borrow the inclosed (10) and added to the 3, makes 13. Then take 5 from 13, rests 8, to be set under the Line, as above, finishing as the last Example, and there remains unpaid 888 1. 7 s. and 4 d. for Proof- add the Sum paid, and that unpaid together; and if it make the Sum lent, it's right, otherwisc not.

V. If a Man owed to another 100 l. 2 Sa 8 d. and bath paid of it 36 l. 12 s. 9 d. What remains unpaid?

| Set the Sum thus (10) | (20) | (12) |
|-----------------------|------|------|
| 1.                    | 57   | d.   |
| Lent 100              | -02  | 08   |
| Paid 036-             | 12   | 9    |

Note, That you should be very exact, in fetting the Figures under each other even; and that the Cypher o is on the place of hundrds, next the 36 l. which fills up the places even with the 100 l. as doth the Cyphers, by the 25. 8 d. and the 9 d. above, tho' a Cypher next the Left

Left hand, makes a Number never the bigger, yet a Cydher in the middle of any Number is of service; and those next the Right hand in any Number in vulgar Arithmetick; for the Number 2030 is read, Two Thousand and Thirty, because there is a Cypher in the place of Hundreds, and a Cypher in the place of Units, or ones, which you may perceive by this,

The present Year of our Lord is 1698.

The last Number above is 2030.

Now most little Boys, that comes to write, will readily read those four Figures 1698. the Date of the Year.

The first Figure 1, being One Thousand, then the Fisture 2 under it, must needs be two Thousand, then the 9 over the Figure 3, is Ninety, or nine Tens, then the Figure 3 under it, must needs be three tens, 30 thirty.

Now for the true Substract, this 5th, Example.

| [10]       | [20] | [12] |
|------------|------|------|
| 1.         | 5.   | d.   |
| Lent 100   | 02   | 08   |
| Paid 036   | 12   | 09   |
| Unpaid 063 | 09   | 11   |

First, I say, take 9 d. from the 8 d. above it, that I cannot do, therefore I borrow the inclosed [12] and add to it the 8 d. makes 20 d. then, I say, take 9 d. from 20 d. rests 11 d. which I set between the Lines.

two 3, is un-

5th,

bor-

8 d. 20 d.

Next, Because I borrowed the inclosed [12] at pence place, I carry it as one, to the place of hillings, faying I that I borrowed, and 125. makes 13 s. take 13 s. from the 2 s. above it, I cannot, therefore I borrow the inclosed [20] and add it to the 2, makes 22, then take the 13 s. from 22 s. rests 9 s. which I set between the Lines, as above you may fee,

Next, One that I borrowed at the shillings, I carry to the place of pounds, say, I that I borrowed and 6 is 7, Take 7 from o I cannot, therefore I borrow the inclosed [ 10 ] and fay, take 7 from 10, rests 3, to be set be. tween the Lines.

Next, One that I borrowed, and 3, makes 4, take 4 from o, I cannot, therefore I borrow the [10] as I did before, and fay, take 4 from 10, rests 6, which 6 I set between the Lines also.

Lastly, one that I borrowed, in the middle. of the pounds, I carry to the o, next the left hand, and fay I that I carry and o is but I, therefore I take that I from the I above, rests o to fet between the Lines.

So that there is unpaid 63 l. 9 s. 11 d. of the 100 1. 2 s. 8 d. which you may prove by adding the fum paid, and that unpaid together.

Note, That the Examples above, I take to be fufficient for any studious young Man, to understand the Rule of Substraction: And if I had written ten times as many more Examples, it would do no good to those that delight not to study at spare hours; so that it may be said, That Serviceable and Profitable LearnLearning, cannot be bought with Silver or Gold, without Study.

Laftly, Let none that loves Virtue in themfelves, ever doubt of attaining such Learning as they have need of: And if you are to substract 3 s. 5 d. from 18, set it thus,

18 o SAnd there refts
3 5 14 s. 7 d.

MUL-

M

# arning MULTIPLICATION.

Multiplication Table, that follows, you must get by Heart, Which you may easily do, by often Reading it over, with very little Study.

| 1  | 2      | 3 | 4  | 5  | 6  | 7  | 8  | 9  |
|----|--------|---|----|----|----|----|----|----|
| 2  | 4      | 6 | 8  | 10 | 12 | 14 | 16 | 18 |
|    | 3      | 9 | 12 | 15 | 18 | 21 | 24 | 27 |
|    |        | 4 | 16 | 20 | 24 | 28 | 32 | 36 |
|    | i yati |   | 5  | 20 | 30 | 35 | 40 | 45 |
| 1. |        |   |    | 6  | 36 | 42 | 48 | 54 |
|    |        |   |    | 1  | 7  | 49 | 56 | 63 |
|    |        |   |    |    |    | 3  |    | _  |
|    |        |   |    |    | -  |    | 9  | -  |

#### How to read the Table before-mentioned.

First, Begin at the top, at the Figures, 1 and 2, faying 2 times 2 is four, which a stands in the square, under the overmost 2, Next 2 times 3 is 6, &c. to 9.

secondly, say 3 times 3 is 9, 3 times 4 is 12, Sc. Next, 4 times 4 is 16, Sc. Laftly

the last Line is 9 times 9, is 81.

I. What is the Number of 3 times 654.

Answer, If you set the Number 654, three times down on Paper, one over another, the total will be 1962.

But a much more readier, such Questions are done by this Rule of Multiplication, be

ing fet down thus,

#### 654 Multiplicand, 3 Multiplier.

Now to know how much 3 times 654 is Be, gin thus, saying 3 times 4 is 12, the Figure 2, of the 12, I set below the Line, and beat the 10, of the 12, in mind, as 1: Next, 3 times 5 is 15, and the 1 I bore in mind, makes 16, so I set 6 below the Line, and bear one in mind; lastly, three times 6 is eighteen, and the 1 ten I bore in mind, is nineteen, so I set down the 9, and because I have one in mind for the ten of the nineteen, I set down one; so the Product or Number is just 1962, as follows,

654 Multiplicand 3Multiplier.

1962 Product.

Note.

Note, That you are to keep in Memory, the Names that are given to the Figures, As the greatest Number, being uppermost, is called the *Multiplicand*; That under it, that you multiply by, is called the *Multipleer*, and the Figures that arise, by working up the Sum, is called the *Product*, as you may see above.

II, If in one Year there are 365 days, How many Hours be there in a Year.

Days in one Year 365. Hours in a Day and Night 24.

The Sum or Question being thus set in order, I multiply the Figure 4 singly, into the 365 (as it is taught in the last Example) Thus,

Saying, 4 times 5 is 20, that being two tens to bear in mind and fet dowo a Cypher under the Line, and fay 4 times 6 is 24, and the two I bore in mind, makes 26, the 6, of the 26, I fet also below the Line, and bear two in mind for the 20. Next, 4 times 3 is 12, and the two I bore in mind is 14, which I fet below the Line, as you may see in the Margin above.

Having multiplyed the 365, by the Figure 4, I will proceed to multiply it by the Figure 2, of the 24, the Multiplier, after the same manner as I did the Figure 4.

Say-

med.

hich

nost 2, nes 4 is Lastly

three er, the

eftions en, be

is Be-Figure d bear lext, 3 makes ar one

ghteen, for one in down

Note

Saying, 2 times 5 is 10, therefore I fet a

Cypher under the 2, 365

because I multiply by 2, 24

and bear 1 in mind, 1460

Next, 2 times 6 730
is 12, and the 1 I bore in mind is 13, the 3
of the 13 I fet under the 4, and bear 1 in
mind; Laftly I fay 2 times 3 is 6, and one
that I bore in mind, makes 7, which 7 I fet
under the 1, and I have done multiplying, as
you may fee in the Margin above.

Prote, That the Sum above, is not finished yet, until I add those two Numbers together, viz. the 1463, and 730. just as they

stand, Thus

1460 730

8760 Hours in a Year.

III. If there be 8760 Hours in one Year, as in the last Example, the Question is, How many Minutes in 8760 Hours.

Set it down exactly thus,

Hours in one Year 8760 Minutes in one Hour 60

Note, That you are to observe, to set the 6 of the 60, just under the last Figure of the Multiplicand, next the right hand, and the Cypher o by it self, the same ought to be observed, if the Multiplier had been 600, or 6000, or 10, 100, or 1000, &c.

Now

Now for the resolving of this Question, begin thus, The Cypher of I set under the Line Next 6 times 0, is 0, which of I set under the Line Line, under the 6. Next, 6 times 6 is 36. The old 6 (of the 36) I set under the Line, and bear three in mind for the 30, saying, 6 times 7 is 42, with the 3 I bore in mind, makes 45, the old 5, I set between the Lines, and bear four tens in mind.

Lastly, 6 times 8 is 48, with the 4 I bore in mind, makes 52, the odd 2 I set under the Line, and the 5, of the 52 (having no further to carry it) I set it also under the Line, and the Sum stands thus:

Hours in one Year 8760
Minutes in one Hour 60
Minutes in a Year 525600

That is 525 thousand, fix hundred.

IV. If there are 525600 Minutes in a Year, How many Minutes old may a young Man be, that is 23 Years of Age.

This Question set down thus 525600

Saying 3 times o is o, I fet the o under the 3.

Next, 3 times o is o, and fet that o under the
2. Next 3 times 6 is 18, I fet the odd 8 under the Line (and bear 1 in mind.) Next 3 times 5 is 15, and the 1 I bore in mind, makes 16, the odd 6 I fet under the Line, and bear one in mind, and fay three times two is fix, and the one I bore in mind, makes feven,

P which

which I set under the Line. Next, I say 3 times 5 is 15, which 15, I set under the Line, and the Ligure 3 of the Multiplier is done with, and the Sum is near half done, and stands thus,

525600 23

Next, for the Multiplying the Figure 2, of the Multiplier, into the Multiplicand.

Say, 2 times o is o ( which o, I fet just under

the Figure 2, as you may fee below.

Next, 2 times o is 0, which o I fet under the Figure 8. Next 2 times 6 is 12 (the 2 of the 12 I fet under the 6) and bear 1 in mind.

Next, 2 times 5 is 10, and the 1 I bore in mind, makes 11, the odd 1 I fet under the 7, and bear 1 in mind. Next, 2 times 2 is 4, and the 1 ten I kept in mind, makes 5, to be fet under the 5. Lastly, 2 times 5 is 10, and set it down, as you may see in the Margin.

Now I have done Multiplying, and the two Lines that came thereof, added together, make 12088800. So that the Young Man of the Age of 23 Years, may be faid, to be Minutes old, Millions, 88 Thousand, 8 Hundred.

V. Suppose a piace of Land be 236 Poles in length, and 182 Poles in breadth, How many Square Pole is therein?

Note, That a Pole in length, is 16 foot, and an half; and a Pole of Land is a square piece of Ground, 16 foot and an half both ways. See the V. Ex. in Division.

This may be Multiplied after the same manner as the last Example was done, beginning at the Figure 2 of the breadth, Saying 2 times 6 is 12, setting the 2 (of the 12) under the overmost Line, keeping 1 in mind. Next, 2 times 3 is 6, and the 1 Ikept in mind makes 7, &c.

| Length<br>Breadth | 236<br>182         |
|-------------------|--------------------|
|                   | 472<br>1888<br>236 |
| Poles in all.     | 42952              |
|                   | - 0                |

as above. Lastly, adding up the three rows of Figures between the Lines and the square Poles are 42952, as In the Margin.

VI. To Multiply any Number by 10. 100. 1000, &c. # 20. 200, &c. Set it down as follows,

Here you see I set the Cyphers besides the other Figures of the Multiplicand, and Multiply thus,

45300

First, The two Cyphers of the 100, I set below the Line. Next, I say t times 3 is 3, which

two make Age old,

Sup-

I fer below the Line, &c. So that 100 times 453 is just 45300.

VII. How many Yards is a Mile in Length.

Note, That 40 Poles is one Furlong, and Furlongs a Mile: Or 220 Yards is one Furlong, then 8 times 220, is 1760 Yards. The Answer

Thus,

220

Yards

1760

Secondly, A Mile being 1760 Yards in length, multiply the 1760 Yards be 3, ( the Feet in one Yard ) gives 5280 Feet.

Thirdly, A Mile being 5280 Feet, How many Inches? Multiply them by 12 (the Inches

in a Foot) and it gives 63360 Inches.

Lastly, If a Mile be 63360 Inches. How many Barly-corns will reach a Mile (counting, 3 Barly-corns in length, an Inch) thus,

Inches in a Mile 63360 Barly-corns in an Inch 3

Barly-corns in a Mile 190080

Note, That if you would know how ma.

ny Barly-corns will reach from London to Nork,

If 150 Miles afunder, Multiply the 190080 by

150, and the Product is the Answer.

by

The Answer is 46886 shillings, which you may reduce into pounds, by the II. E. in Reduction.

sh: 46886, Answ.

How to prove Multiplication by a Cross.

First, Add the Figures 3349 the Multiplicand, casting the Nines away thus, faying 3 and 3 is 6, and 4 is 10 (the 9 of the 10 I cast away) and fet the 1 on one fide the Cross.

Next, the I and 4 in the Multiplier, is but 5, which I fet on the other fide the Crofs,

Next, I multiply the 1 by 5, and it is but 5, which 5 fet above the Cross,

Note, That if there remains 5, to fer under the Crofs, when you have cast the Nines out of the Product, the Sum is right multiplied. otherwise not: Note also, that if the Figures on each fide the Crofs, being multiplied, had been 56, you may instead of casting away the Nines out of 56, add them, faying, 5 and 6 is II, I cast the 9 away, rest 2, to set on the top of the Cross.

Laftly, I cast the 9 s. out of the Product, faying 4 and 6 is 10, cast the 9 away, rests 1, then 1 and 8 is 9, cast it away. Lastly 8 and 6 is 14, out of which, I cast the 9, rests 5, to set under

the Cross.

Another way of proving Multiplication.

Divide the Product by the Multiplicand, or Multiplier, and the Quotient will be one of them.

This you cannot do, before you have learned

the next Rule, viz. Division.

## DIVISION:

Boys, do often very readily learn Cafling an Account, as they call it; and when they are come as far as this very useful Rule of Division, make a stop, concluding it's too hard to be learn'd without a Tutor. I say, let none be discouraged, but observe well the Directions that follows; for,

In Division (as in Multiplication) there are three Terms to be kept in Memory (that is to fay) Dividend, the Divisor, and the Quatient, which will plainer appear by the Question that

follows,

I. Example. Let 5761. be divided among 4 Men; the two Numbers are thus placed,

Dividend 576 (Quotient Divisor 4

The Number 576 is called the Dividend, the Figure 4 under it (which is to divide by) is called the Devisor. And those Figures that shall be in the Crooked Line, are called the Quotient.

For.

4 ab

th

For,

Division, one Sum, or Number doth part, By another truly, by Rule and Art.

Now, Young Man, if thou hast a Desire to know how to Divide the aforementioned 576 l. among 4 Men, take Pen, Ink and Paper, and set the Sum thus,

576

And work it with thy Pen, according to the

Reading which fellows,

as in the Margin.

Saying, how often can I have 4 in the 5 above, but one time; therefore, I fet the Figure 1 in the crooked Line, called the Quotient, and fay, 1 times 4 is 4, take 4 from 5, rests 1, to be set over the 5, and I cancel the 4 and the 5, with a dash of the Pen, and the Devisor 4 is once wrote, #

Next, I remove the Devisor 4, and set it under the Figure 7, then say, how oft can I have 4 in the 17 above, I can have 4 times; therefore I set 4 in the crooked Line, and say 4 times 4 is 16, take 16 from the 17.

4 is 16, take 16 from the 17, above, rests i to be set over the 7, and cancel the 17, so there remains 16 uncancelled, as in the Margin.

Next, I remove the Divisor 7, and set it under the figure 5, saying, How many times 7, can I have in 5, no times, therefore I set 0, in the Quotient, and the said 56, uncancelled, remains still.

Lastly, I remove the divisor 7 to the last, that is under 6, and say, How oft can
I have 7 in 56? just 8 times,
therefore I set 8 in the Quotient, and say 8 times
7, or 7 times 8, which is all one, is 56, take 56,
from 56 rests o. Thus the Number 32956, is
divided into 7 parts, 1 part being 4708.

II. Divid 87960 l. among 20 Men.

87960

You fee, I fet the Figure 2 to Multiply by, and the o at the end, in filling up the place of Vnites, but to divide it, I do thus, faying, How oft can I have 2 in 8, I find 4 times, fo I fet 4 in the Quotient, and fay 4 times 2 is 8, 100 (4998) take 8 from 8, rest o; then I remove the Divisor 2 and fet it under the 7, 60 as of the Sums before.

The same is to be observed, when you divide 10, 100, &c. or 30, 40, 200, &c. And for Practice, take these 2 Sums ready done up.

1223 74272 66866 12345 66866 42734 6789

P 5

Hi. Let 20736 l. be divided among 12 Men

I fet the Sum thus, 20736

Saying, How oft can I have I in the Figure 2; that stands over it, I take but I (the reason there-of you make known hereaster) therefore I set

x8 20736 (1 I in the Quotient, and fay once in the Quotient and one in the Divisor is but 2, take 1 from 2 rests 1, to be set over the 2, and I Cancel the 2, and the 1 below the 2.

Next, I multiply the one again in the Quotient, into the 2 of the Divisor, Saying once 2 is 2, take 2 from the 10 above rests 8, to be set over 0, and cancel the to, and the 2 below, so is the divisor once wrought, as in the Margin above

How oft can I have I in 2, two times, and had fet the Figure 2, in the Quotient, (to be multiplied into 12, the divisor severally) thus saying 2 times I is 2, take 2 from 2 rests c, then must I have cancelled the first figure 2 in the Sum, and the I under it, next 2 in the Quotient, and the 2 in the divisor multiplied makes 4, take 4 from 0 above I could not, therefore I begun the Sum as at first.

Young-Man, be never the more discouraged: for the Directions being large, it will be the more refie if thou writes the figures in the Sum, as thou reads, and be sure to be perfect in the working of one Divisor before thou proceeds to the next, that when thou hast overcome thir Rule, the following will be both pleasant and profitable

Next, I remove the Divisor 12 to the second place settin 2 male r the 7, and I under 2 say-

IV. If the Kings Revenue come to 250000 l. by the Year, how much comes it to by the Week.

Divide by 25 the Weeks in one Year.

S:t the Sum thus, 25,0000 (

First, I say how many times 5 can I have in 25, but 4 times, (for the reason above) so I set 4 in the Quotient, and Multiply the 4, in the Divisor 52 severally, as 4 times 5 is 20, take 20 from

42 25000 (4 52 25, rests 5, so I Cancel the 2 that stands for 20, and the 5 remains. Next, 4 times 2 is 8, take 8 from the 0 above it I cannot, therefore I borrow 10, as in Substraction, and

suppose 10 in the place of the 0, then I say, take from 10 rests 2, to be set over the 0; and because I borrowed 10, at the place of 0, I pay it against the next Figure, towards the right hand, as in Substraction, saying, I that I borrowed from 5, rests 4, which 4 I set over the 5, and Cancel the 5, and the Divisor 52; so that there remains uncancelled of the Dividend 42000. as above.

Next, I remove the Divisor \$2, setting the \$ under the 2, and the 2 under the next Cypher, saying, how oft can I have 5 in the 42 above, I can have 8 times, so I set 8 in the Quotient, saying 8 times 5 is 40, take 40 from 42, rests 2,

424 25000(48 522 and I Cancel the 4. Next, 8 times 2 is 16, take 16 from 20, rests 4, which 4. I set over the 0, of the 20, and Cancel the 29, and there remains uncancelled of the Dividend just 400, as above.

Next,

end

ext,

So that if the Kings Revenue for one Year comes to 250000 l. it is by the Week 4807 l. the Remainder 36, is so much of a pound, or 20 s. as it wants of 52, or if 20 s. was divided into 52 parts, it is 36 proportionably.

V. In 42952 Square Poles, or Pearches of Land, How many Aeres, Rods, and Poles?

See the fifth Example in Multiplication, now because there are 16 Foot and a half in a Square Pole of Land both ways, and that a 160 such Poles makes an Acre, the Poles must be divided by 160, and also because there is a 0 in the Divisor, on the right hand, fer down the Sum

Thus 42952 16 0

First, Saying, How oft can I have 1 in the Figure 4 above it? I must have but 2 times, so I set 2 in the Quotient, which 2 is to be Multiplied into the 16, saying 2 times 1 is 2, take 2 from 4 rests 2 to be set over the 4, and I Cancel

1 20 42952 26 0 the 4, and the one under it, and fay, 2 times 6 is 12, I take 2 of the 12, from 2 above the 6, rests 0, and the 1 belonging to the 12, from the 2 above, rests 1, and the Divisor 16, I remove, as 1

by

is

32

4:

R

R

of

E

th

th

fe

under 6, and the 6 under the 9.

Next. I lay, How oft can I have I in the 10, above 6 times, (but above 9, I can never take

being the bigest Figures) so I set 6 in the Quotient, and say, 6 times I is 6, take 6 from the 10 above rests 4, to be set over the 0 (of the 10) and Cancel the 10; Then say 6 times 6 is 36, I take the 6 of the 36 out of 9 rests 3, and Cancel the 9; then the

3, of the 36, I take from 4, and Set I over it, and there remains uncanceled of the Dividend 1352, as above.

Mext, I remove the Divisor 16, (as I under 6, and the 6 under 5, and it sills up the last place) Saying how oft can I have 1, in the 13, above, I must have 8 times, therefore I set 8, in the

1 Acres
273 (7
4275(2 (268
11)

Quotient, and fay 8 times 1, is 8, take 8 from the 13, refts 5, to be fet over the 13, and cancel the 13. Next, 8 times 6, is 48, take 48, from 55, refts 7, to be fet over the 5. next the right hand, and the Answer is 268 Acres, and the

remainder 72, are Poles, which are to be divided

by 40, (the Poles in a Rood) thus-

Note, That the Quotient is I Rood, and the remainder 32, are Poles, therefore 42952 Poles of Land being Reduced, are 268 Acres, I

Rood, and 32 Poles; But to Reduce any number of Acres, Roods and Poles, into Poles, See IX, Ex. in Reduction, and the 5th of Multiplication.

VI. A Penny idly Spent, might buy a Yard square of Land, that is 9 square Feet, after the rate of 20 Pound the Acre.

Example, In an Acre of Land are 43560 fquare Feet; and in 201. are 4800 Pence, which divide thus.

Saying, How oft can I have 4, in 43, (I can but have 9 times as aforesaid) so I set 9 in the Quotient to be multiplied

times as aforesaid) so I set 9 in 4, 5 (60 9 Fo. the Quotient to be multiplied nto the Divisor severally, Saying 9 times 4, is 36 (which

7(3

36 as in Substraction I take from the 43,) take 6 from 3 I cannot, but borrow 10, and add to the 3, makes 13, then 6 from 13, rests 7, which I set over the 3, and cancel the 3: Next, for the figure 3, of the 36, and the 1, I borrowed makes 4, therefore I take the 4 from 4, and cancel it.

Lastly 9 times 8, is 72, take 72 from 75, rests 3, which I set over the 5, and the remainder is, 365. which are divided from the other figures

by Lines.

1

n

I

0

So that a penny buys somewhat more than 9 Foot; Thus proved by Vulgar Fractions, therefore draw a line, and set the remainder 360, on the top of the line, and call it Numerator, and set the Divisor 4800, under the lines and call it Lenominator,

Thus,  $\frac{360}{4800}$  fo that if a

fe

to

bi

fr

fe

bo

fro

7,

de

90

COI

to

by

Foot was divided into 4800 parts the, the 360,

are so many parts of that Number.

Therefore multiply the Numerator 360, by 144 (the square flat Inches in a Foot of Land or Board) the product is \$1840, which divide by 4800 the denominator, and the Quotient will be almost 13, square Inches, more than the said 9, Foot for a penny.

VII. If 7306242 l. are to be equally levied upon 9034 Parishes, how much must each Parish. pay.

Divide the Pounds, by the Parishes, and the Quotient shews the Pounds each Parish is to contribute.

The Sum fet thus 7306242 (

First, How oft can I have 9, in 73, I set 8, in the Quotient which 8, is to be multiplied into the divisor 9034. severally. Thus, saying 8 times 9, is 72, take 72, from 73, rests 1, to be fer over the 3, and I cancel the 73, Next 8 times 3 is 24, I take the 4, (of the 24) from 6 rest 2, which 2 I set over the 6, and cancel the 6; Next the 2 (of the 24) I take from 10, rests 8, which 8 I set

over the 10, and cancel the 10, Next, I say 8 times 4 is.
32, I take the 2 (of the 32) from 2 rests 0, to be fet over it; Then the 3 (of the 30).
I take from 2, but that I cannot do, Therefore I borrow

10, and add to the 2 makes 12, Then I fay take 3 from 12, rests 9, to be set over the 2, and cancel

cel the 2, Lastly the one that I borrowed at the 2, I must pay at 8, saying 1 from 8 rests 7: which I set over the 8, and there remains of the dividend uncancelled 79042, as above.

Next, I am to remove the divisor one place fur-

ther And I say How oft can I have 9, in the figure above, that is 7, I say no times, therefore I set o. in the Quotient, and cancel all the Divisor, and remove it to the last place.

60,

2)

r

)

79 x82**0** 73,662,42 (80 993,44 993

Saying, How oft can I have 9 in the 79 above, I fay 8 times, therefore I fet 8 the (last figure in the Quotient) faying 8 times 9 is 72, take 72,

the Quotient) faying 8 ti from 79 rests 5, which 5, I set over the 9, and cancel the 79; Next, 8 times 3 is 24, (the 4 of the 24) I take from the 4 above the 3, rests 0, then the 2 (of the 24) to take from 0, I cannot, but borrow 10, saying 2from 10, rests 8 which 8 I set above the 0, and the 1 I borrowed there I take from 5 rests 4.

(4 8(7 798(7 18200(0) 7306242 8081. 903444 9033 90

Lastly 8 times 4 is 32 (the 2 of the 32) trake from the last 2 rests 0, to be set over it. Next, for the 3 (of the 32) I am to take out of the 0. over the 4, but I cannot, therefore borrow 10. saying 3 from 10. rests 7, Next, 1 that I borrowed for the 7, I take out of the 8. rest 7 also, and the remainder is 4770 !.

Now, if 73062421. are to be equal levied upon 9034 Parishes (as above) then each Parish is to contribute 808 l. but yet there remains the 47701 to be divided, which you may reduce into pence by the 1 Ex. in Reduction, and the product of

pence.

pence divide also by 9034 the Parishes, and the Quotient shews the number of pence more to be added to each Parish.

### The Proof of Division.

Division is best proved by Multiplication, for if you Multiply the Quotient by the Divisor, the Product and remainder (if any) will be equal to the Dividend.

Example.

Dividend 37889 A (92723 Quotient 44444

Dividend 370894 Product

Note, That I set the Divisor 4, under the Quotient, and said, 4 times 3 is 12, and the remainder 2, makes 14, &c.

To prove this Division Sum by a Cross.

First, Cast away the Nines (as is taught in the proof of Multiplication) out of the Dividend, and set the remainder (which in this Ex. is 4) over the Cross.

Secondly, Cast away the Nines out of the Divifor, and it is but 4, to be set at the side of the

Cross.

Thirdly, Cast away the Nines out of the Quotient, and the remainder is 5, to set on the o-

ther side of the Cross.

Lastly, I multiply the figures on each side the Cross together, as 4 times 5 is 20, to which I

d the add the remainder 2 makes 22; and fay 2 and 2 to be is 4, which 4 I fet under the Cross, being the fame figure that is over the Cross, shews that the Sum is rightly divided.

Profes. That the Young-Man may be the more perfect in this useful Rule of Division, for his encouragement, I shall give him the following Sums for Practice, setting Le for the Quotient and R. for the remainder.

Far

IV.

Si

Reduction fuch Change of things doth make, That their true Value, they do not for fake; Take which thou wilt, the Quantity remains, In Quality they only Change their Strains.

Reduction is wrought by the foregoing Rules; for any greater Number or Name, is turned to a leffer by Multiplycation.

For if you Multiply Pounds in Money by 20, the Product is Shillings; Or Shillings by 12, the Product is Pence; Or Pence by 4, the Product

is Farthings.

Any lesser Number, or Name is turned into a greater by Division, for if you divide any Number of Farthings by 4, the Quotient shews the Pence, Or Pence divided by 12, shews Shillings in the Quotient; And Shillings divided by 20, gives in the Quotient Pounds in Money, &c.

| I. In 896 l. How many,<br>Shilling, Pence and Far-<br>things. | II. In 860160 Farthings,<br>Hoso many Pence, Shil-<br>lings and Pounds. |

III. How many Shillings. First, According to Pence & Farthings, is in the Rule before, I am to Multiply the 163 1. 1. S. d. by 20, then I was to fet 163 - 13 - 8 the Cypher o under the Line, but instead of Shillings -- 3273 that I fet down 3 of the 13 s. Next, 2 times 3 iles: is 6, and the I belong-6554 toa ing to the 13, makes 7, 3273 &c. And Multiplying y 20, Pence -- 39284 the Shillings by 12, I , she add the 8 d. oduct Farthi. - 157136 into a IV. In 798 1. How many Nobles, Markes, Crowns, Vum-Shillings, Pence and Farthings. s the 1. llings 798 Nobles in 20 s. y 20, Nobles in all 2394 The Nobles being hings, 2394, I divide them by 2394 1197 Marks Shil- 2, because 2 Nobles is a Marke, or 13.5. 4 d. 798 O P. Crowns in 20 s. Crowns in all 3192 Shillings in all 15960 12 Shi. 31920 15960 Pence 191520

The Weights and Measures ought to be by Magna-Charta, the same all over England, that is, according to the Kings Standard kept in the Exchequer by the Clerk (or Comptroller) of of the Market.

The Weights now used throughout all England are of two sorts, the one called, Troy-Weight, and the other Avoir-du-pois; The first containing 12 Ounces, and the other 16 in the Pound, But then the Ounce Avoir-du-pois is lighter than the Ounce Troy by almost a 12th part; For, whereas in Troy-Weight, the Ounce consists of 480 Grains, the Ounce Avoir-du-pois containeth but 438.

By the Troy-Weights, are Weighed Pearls, Precious Stones, Gold, Silver, Bread, all manner of Corn and Grain; and this Weight the

Apothecaries do or ought to use \*

\* Saith the Author of the Newflate of England.

By Avoir-du-pois are
Weighed all Grocery Ware,
Flesh, Butter, Cheese, Iron,
Hemp, Flax, Tallow, Wax
Lead, Steel and all things

whereof comes waste, In consideration whereof 112 Pound Avoir-du-pois goes to a Hundred Weight, and proportionably 56 Pound to half a Hundred, and 28 to a quarter, or Tod. A Stone amongst the London Butchers makes 8 Pounds of this Weight, but in the Country, tis for the most part 14.

In Troy-Weight, 20 Grains makes a Scruplethus marked 9, 3 Scruples a Dram 5. 8 Drams an Ounce 5. an 12 Ounces a Pound 15.

In Avsir-du-pois-Weight, 16 Drams make an Ounce, 16 Ounces a Pound, 28 Pound a Quar-

rer.

du-

who

No

a qu

trica

or I

40 F

Mile

Eng/

5280

Staru

ter, 4 Quarters a Hundred, and 20 Hundred a Tun.

In Troy-Weight, 24 Grains make a Penyweight Sterling, 20 Peny-weights an Ounce, and 12 Ounces a Pound. And when Wheat is at 5 Shillings the Bushel, the Peny Wheaten-Loaf is then by the Statute to weigh 11 Ounces Troy, and three-half-peny white Loves to weigh as much; But the Houshold peny Loaf is to weigh 14 Troy-Ounces, and two Thirds; See VI. Ex. in Addition,

As for the Weight, called Venice-Ounce used here, as in other Countries by Silk-men, there is no Standard of it, nor is it allowed by Law, This Ounce being but 13 peny weights and 12 Grains it falls out that 12 Ounces Venice is but 8 Ounces 4 peny Troy, and 9 Ounces Avoirdu-pois.

# Applicative Measures, or Things measured outwardly.

OF this fort there is first, 3 Barly Corns in length, an Inch, or Fingers breadth, 4 whereof make a Handful, and 12 Inches a Foot, Now 3 Foot makes a Yard, and one Yard and a quarter an Ell. Five Foot makes a Geometrical Pace, 6 a Fadom, 5 Yards and a half, or 16 Foot and a half a Perch, Pole or Rod. 40 Perches in length a Furlong, 8 Furlong or 320 Perches) an English Mile, and 3 English Miles a French League.

But this observe by the way; that by a statute under the Reign of Henry VII. an English Mile ought to be 1760 Yards; or 1280 Foot, that is 280 Foot more than the I-

talian

hat the of

ng-

first the is is 2th ance

earls,

are

Vare, Iron, Wax hings herendred half Tod.

kes 8 intry, cruple. Drams

Quarter, talian Mile. So that an English Mile, is Furlongs 8, Chains of 4 Perches long, 80; Paces 1056. Ells 1408, Links of the Chain 8000. Inches 63360, or Barly Corns 190080. Now an Acre of Land in England confists of 40 Perches in length, and 4 in breadth; a Yard-Land, commonly of 30 Acres; and an Hide of Land of 100 Acres.

Note, That in a square Acre are, Roods 4; square Chains 10, square Perches 160, square Paces 17424; square Yards of 9 Foot 4840, square Feet 43560, square Links 100000.

square Inches 6272640.

In a square Mile, are Acres 640, Chains 6400, Perches 102400, Paces 1115135, Square Links 640000000, or Square Inches 4014189600.

### Of Receptive Measure, that is things Measured inwardly.

First, For Liquid-Measure, or things that are wet; as a Pint, which is subdivided into lecer parts, as half a pint, a quartern, or quarter of a pint. Now 2 pints make a quart, 2 quarts a pottle, 2 pottles a Gallon, 8 Gallons a Firkin of Ale, and 9 a Firkin of Beer. Two Firkins of either fort make a Kilderkin, and 2 Kilderkins a Barrel. But still the Difference in the Number for Gallons as to Beer and Ale ought to be minded and allowed; For as a Kilderkin of Beer contains 18 Gallons, and one a Barrel of Beer being double a of Ale 16; Kilderkin, contains 36 Gallons, and one of Alebut 32. Now a Barrel and a half of Beer (being 54 Gallons) make a Hogshead, 2 Hogsheads a Pipe or Butt, and 2 Pipes a Tun.

Note,

or

a I

512

526

Note, That a Barrel of Butter, or Soap is the same with a Barrel of Ale. As for Wine-Measures, they fall so much short of those of Ale, and Beer, that 4 Gallons of these make 5 Gallons of Wine-measure. Thus they hold proportion, as 4 to 5 of these Gallons, a Rundlet of Wine holds 18, half a Hogshead 31, and a half Tierce 42, a Hogshead 63, a Punchion 84, a Pipe or Butt 126, a Tun 252.

secondly, For dry things, fuch as Cornor Grain, there is first the Gallon, of a size between the Wine, and the Beer Gallon, 2 of these Gallons make a Peck, 4 Pecks a Bushel, 4 Bushels a Combor Curnock, 2 Curnocks 2 Quarter, 10 Quarter

a Last or Wey.

Note,

V. In 32 Acres, 3 Roods, and 27 Poles of Land, How many Poles?

P.

27

d. R.

32
32
360
40
1920
120
32
5120 Poles
120
27
Poles added.
5267 Poles in all.

Note, That here I Multiply 32 by 160, the Poles in an Acre, and the Product is 5120; and Multiply the Rods by 40, the Poles in a Rod, gives 120 Poles, so added to the other, with the 27 odd Poles, Makes 5267 Poles in all.

|                  | 222                      |
|                  | X                        |

The Note, That when Wheat is at 5.5. the Bufhel, the Peny Wheaten Loaf, is then by the Statute to weigh 11 Ounces Troy, and Three-half-peny white Loaves to weigh as much, but the Houshold Peny Loaf is to weigh 14 Troy Ounces, and two thirds: If the Peny Wheaten Loaf weighs 11 Ounces, when Wheat is Sold for 55. the Bushel, what must the the same Loaf weigh when Wheat is fold for 105. the Bushel.

#### The Rule.

Multiply 60, (the pence in 55.) by 11 Ounces; and that Product divide by 120 (the pence in 105.) the Quotient gives 5 Ounces, and 60 remain-

remaining, and because 60 (the remainder) is half the Divisor 120; therefore, the Answer is 50 unces and an half the Peny Wheaten Loaf is to weigh when Wheat is sold for 105. the Bushel. A Bushel of Meal weighs 56 pound Averdupois; and 68 Pound 1 Ounce 12 Drams Troy. A Gallon of Wheaten Meal weighs 7 Pound Averdupois, and so 8 Pound 6 Ounces 4 Drams Troy. An Ounce wanting in 36 by the Bakers, is the Forsieture of the Pillory.

A Miller, if he carry and recary his Grift, is allowed 4 pound or pints in the Bushel, both for Toll, and wast, but if it be brought to him and carried back by the owner, he ought to take but a pound out of every Bushel, the waste in Grind

ing about 1 lb. in the Bushel.

In 8796 Lasts, How many Quarters, Bushels and Pecks; Multiply the Lasts by 10, the Product is the Quarters, because 10 Quarter is a Last, The Quarters Multipli'd by 8, brings them into Bushels, and the Bushels by 4 brings them into Pecks. So that if you mind the several denominations, or parts, you may reduce all fort of Weights or Measures backwards and forwards, by Multiplication and Division only, for if I give many Examples at large it will too much swell the Book. which I chiefly intend for the poorer fort of People.

# The Use of this Table for the Assize of BREAD

Bakers Inhabiting Corporate Towns (in regard that they pay Scot and Lor) are allowed 6 Shillings in every Quarter of the middle prized Wheat, for their charge in Baking.

And Country, or Forreign Bakers only 4 Shil-

lings.

8

0

4

he

For Note, That the on the top of the Table flands for Pound Weight, Ou. for Ounce, and Dw. for Fenny Weight,

### Example:

When the middle price of Wheat is 30 Shillings the Quarter, for Assize of Town Bakers you are to find in the foregoing Table the Assize of

Bread Answering 36 Shillings.

But for the Assize of Foreign Bakers, that of 34 Skillings; and therefore (in that case) the Peny White Loaf put to sale by Town Bakers, ought to weigh nine Ounces, eight peny weight but that uttered by Foreign Bakers, nine ounces nineteen peny weights, as appears by the Table, See Wingate's Abridgment of all the Statutes, Printed Anne 1689.

Note, That Liquors, Jewels, Amber, Gold and Silver are weighed by Troy weight, as well as Bread, and Meal.

A Table directing how to Buy and Sell by the 100,

### The Use of this Table.

If you buy any thing by the Hundred, accounting 112 Pounds to the Hundred, and would know by the Pound what the Hundred is valued at.

#### Example.

If you buy Goods at 4 Pence 3 Farthings the Pound. Look in the Table for 4 d. 3 q. in the first Column, and against it in the second Column you find 2 l. - 4 s. - 4 d. and so much at that Rate 112 Pand comes to.

### Example 2,

If t C. weight, that is 112 Pound, cost 4 Pound 1 Shilling 8 Pence, to know how much it is by the Pound, look 41.—15.—8 d. in the fourth Column of the Table, and right against in the Column next the left hand you may find 8 d.—3 Farthings, and so much at that rate it comes to by the Pound.

Again, If you buy one Hundred weight of Goods for 4 Pound 1 Shilling 8 Pence, and retail it at 10 Pence the Pound, it comes to at that rate, 4!.—13 s.—4 d. take 4!.—15.—8 d. from it, and you will find your felf by the Remainder 11 s.—8 d. gainer, &c. See the V. Example in Addition, and the V. Example in the Golden Rule.

The Weight and Value of the most fual For reign Coins, by our Standard.

All Questions in this Rule of Three confist of 3 Numbers, Whereof 2 are always of 1 Kind, or Ddnomination. As in this Example.

If I give 10s. for 5 Yards, what shall I give for 15.
Yards at the same Rate?

Now two of these are of the same kind, (that is) the Number 5 and 15, which are both Yards, which place thus. The Doubtful Number, concerning which the Question is asked, must always be in the third place.

Now in this Question the 15 Yards is the doubtful Number, the price of which, the Question requires, place it therefore in the third place.

Then feek out the other Number of the same kind, or Denomination, which must be Yards also, which in this Question is 5, set this in the first place, and then the other Number (that is 105) will consequently claim the second place, and the Answer to the Question will always be of the same Denomination with it, (that is) Shillings.

Now the Question stated according to the foregoing Rules, stands thus.

I. If 5 Tards cost to s. what will 15 Yards cost?

15

188

10 s. Answer. Dividend 150

Multiply the Second Number by the Third, Product Divide by th First to catch the Bird.

Nore, That the three Numbers are, 5-10-15 Proof of the last Question.

Q6

If What shall I pay for 5 Yard, when 15 Yards is Sold for 30 Shillings?

If 15 Yards cost 30 s. what will 5 Yards cost?

180 18x (10s. Answer. Dividend 150

III. If I Bushel of Rye cost 3 5. 6d. what will a Last, or 10 Quarters cost, after that rate?

First, Reduce the 3s. 6d. into Pence, that is 41d. and the 10 Quarters into Bushels, that is 80, and set the Question thus,

If I Bushel cost 42 d. what will 80 Bu. cost?

80

1360 Pence the Answer.

The first Number (or Place being 1) will neither Multiply no Divide, then bring the 3360 d. into Shillings by 12.

Thus 3380 (2803. 229 (141. Answer)

XX

Proof of this Example.

If 80 Bushels cost 280 s. what will 3 B. cost?

840 Dividend.

80 a to Shillings for 3 Bushel; Only you may Abreviate the Remainder and Divisorto know the parts of a Shilling. ds is

1?

Laft.

at is. at is

oft?

nei-50 d.

wer.

ft?

may. ifor,

hus.

40the half of 40 is 20, Then as 20 is Thus. 80 the half of 80 is 40. half of 40; thats half a Shilling,

So that 3 Bushel cost 10s. 6d.

IV. If a Chaldren of Coals (that is 36 Bushel) cost 22 S. what will one Bufbel coft.

Reduce the 221. into pence, by Ex. I, in Reduction makes 264 d. which divide by 36. thus,

Nowthe remainder 12, being the third part of the Divisor 36; thews the parts of a peny, thats 1 d. So that a Chaldren of 22 s, a Bushel will cost 7 d. a third part of a penny.

(1 8(2. 28 A17 d.

V. If 112. 15. of Tobacco cost. 400 d. what will 1 15. coft.

Divide the 400 d, by the 112 Pound weight; and the Quotient gives 3 d. the Pound; and the remainder will be 64, which is somewhat a bove half the Divisor 1112, shews, that the Tize Fraction is somewhat more than half a Penny, to be added to the 3 d. the Pound above.

VI. If I paid 432 1. for 525 Quarters of Mault, what is the price of one Quarter after that rate.

Which being stated, stands thus,

If 525. coft, 432. what will 1. coft? Note, That in this Question, you cannot Multiply the Second Number by the third, because

the third Number (or place) is but one.

Therefore to perform this Question with ease, Reduce 432 1. into Farthings by the first Ex. in ReReduction makes 414720 Farthings to be dividend, which divide by 525 the Quarters of Malt and the Quotient; the Answer is 789 Farthings, the remainder after the Division is ended, are but the parts of a Farthing.

Lastly the 789 Farthings, being reduced are 16s. — 5d. — 19 Therefore; if 525 Quarters of Malt (or Todds of Wool, or other goods) be fold for 432 l. one Quarter will cost 16s. —

5 d. - 19. after that rate.

VII. If a Grecer bought 5½ C. weight of Nutmeggr, which cost him 1631.—135.—8d. How may he sell 1 Pound weight, without gain or loss?

Reduce the Money into Pence, makes 39284d., for dividend, and the 52 C. weight into pound weight by the 12, Ex. in Reduction, makes 644. Pound weight for Divisor; Then divide the 39284 by 644. and the Quotient gives 61 d. the price of one Pound.

Note, That what Sum of Money, you defire to gain, add it to the price, and worke as above to know what the price of I Pound, will be; So will you know what you get by every fingle

Pound.

VIII. How many Yards of Cloath shall I receive for 2<sup>t</sup>l.-- 10 s.-- 1 d.-- 2 q. when 3 Yards and one half is Sold for 21.-- 14 s. -- 3 d.

bers in the Question hath several Denominations (as 21. 145. 3d. is several, because not Pounds, or Shillings only) Reduce it into the least Denomination (as the 3 Yards and a half into quarters of Yards, or Nailes, 4 Nailes being a quarter of a Yard) and then proceed to work, according to the Rule.

The Question being Reduced, stands thus? Farthings. Quarters. Farthings. 2604 - buy 14 - what 20646 buy. 82584 20646 289044 2. 2860 2890AA / III Quarters of Yards. 260444 2606 20 3(3 | Yards. Quarters. \* X X ( 27 - 3. Answer.

Of Barter, or Exchange of Goods.

If a Tradesman, Exchange Salt at 20 d. the Bushel, for Sugar at 15 d. the Pound, how many Bushels of Salt will be equal in value unto 112 Pound of Sugar.

If I Pound of Sugar cost 15d. what 112Pound

560 112 1680 An. Pence

If 22d, buy one Bushel of Salt, what 1680 d.buy? 1580 ( 84 Bushel, An.

17 Note, If 28 Quarters of Mault cost 30%. 101. 6d. tell me what will 84 Quarters come to at Ta, that rate.

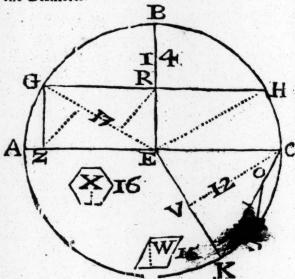

To do which in brief thus, Reduce the 301. 101. 6d into Pence, which Multiply by 84 Quarters, and the Product will be 615384. which divide by 23, the Quotient gives 21978 Pence, the Aniwer, or, \$11. 111. 6d.

# Of Measuring.

### The Explanation of the Circle A. B. C.K.

is called the Circumference, and the Line A E.C. that cutreth the Circle in two parts, is called the Diameter.

b

I. Example, Having the number of Inches of the Circumference, How many Inches is the Diameter? Or thus, How much is the Diameter of a Circle, whose Circumference is 44?

Say, 25 22, is to 7, so 44 to 14, Therefore Multiply 44 by 7, the Product is 308, which divide

Or Measuring of Flat Things. divide by the first number 22, the Quotient is 301. 14 Inches the Diameter. Answer. 7 84 384. Done also by Gunters Line. Extend from 22 to 7 downwards, that extent will reach the same way, from 44 to 14, the Diameter. II. How much is the Circumference of a Circle, whafe Diameter is 14. Multiply 22 by 14, and the Product divide by 7, the Quotient gives 44 the Circumference. A General Rule called Crofs Multiplycanion. III. Let the length of any Wall, Flooring, Paving Scc. be 9 Foot 3 Inches one way, and 7 Foot 6 Inches the other, How many Superficial Feet is contained in the face of the Wall, &c. First, Upon the Length and Breath, on each fide a Cross, as in the Margin, with a line drawn under them. Secondly, Multiply Feet by Feet, Saying 7 times 9 is 63 Foot, which Het under the Line, in the place of Feet. Fret In. Thirdly, I Multiply as the Cross directs, faying, 6 times 9 is 54, Inches, which divide ( always by 12) on waste paper in this man-6 16 0 63 4 Foot, the Remainder is 6 6 Inches, which 4 Foot 1 12 6 Inches, I place under 0 the Feet and Inches. Feet 69 Fourthly,

in

Fourthly; I Multiply cross again; Saying, 3. times 7, is 21, which being small, it need not be divided by 12, as the other, for it is I Foot, 9 Inches, to be set under the other, as above.

Lastly, I Multiply the Inches by themselves, as 3 times 6 is 18, which 18 is but one Inch and half (for what is called an Inch here, is 12 Inches long, and one Inch wide) which being set under the other, and cast up, makes in all, 69 Foot 4

Inches, and half an Inch.

Note, That the Fraction 2 is half of any thing, 4 one quarter, and \(\frac{1}{4}\) is three quarters of any thing; And observe, That whereas the Divisor in this Rule. is always 12, which makes it the more easie; The Remainder (if any) after every Division is ended, may be placed over the Divisor 12, with a Line between, as suppose the Remainder is 6, it may be set thus \(\frac{1}{2}\), and because 6 is half of 12, it is equal to \(\frac{1}{2}\); Or suppose the Remainder is 10, place it thus, \(\frac{1}{12}\) which is almost an Inch, because 10 is almost 12.

Note also, If you Multiply 21 Foot 6 Inches, by 15 Foot 3 Inches, the Sum will be 327. Or, 63 Foot Multiplied by 5 Inches, gives 26 Foot

and 3 Inches,

#### IV. Of Decimal Measuring.

Ruler is, you take the Dimensions with, whether Yard, Ell, Pole, Foot, &c. for (either this Work or Cunters Line) it ought to be divided into 10 equal parts, and each 10 into 10 makes

100 \* for more exactness,

Gunters Chain then you must cut off four Fingers from the Product next the the Right Hand;

But this Example, Let the Foot be only divided into 10 parts, yet the Reader may chose which way he likes best.

V. Let G R E N represent a Board or Table.

Multiply the length by the breadth, by Ex. III.

If it represent a peice of Land, measured by a Pole of Ash of 16 Foot and a half, divided into 10 parts by Notches, done by Ex. IV. gives the square Poles, which Product divide by 160 (the Poles in an Acre) the Quotient shews the Acres.

VI. Let the Circle ABCK, represent a Round Table, or the like:

Multiply the Diameter AEC in its felf, and that Product by 11. and this last product, divide by 14, the Quotient gives the Content.

VH. Let half the Circle, as ABCE, represent half a Round Table.

Multiply the Line AEC, (or Diameter) in it's felf, and that Product by 22, the last product divide by 14, the Quotient gives the Area, or Content.

VIII. Let AGBE, or quarter of the Circle,, reprefent the quarter of a Round Table.

Multiply the Inches of the Line A E, or B E, in it felf, and that Product by 11, and the last

Pro-

Product divide by 14, the Quotient gives the Content.

IX. Let the Triangle E C K, represent a piece of Land, or the Gable end of a Houle.

Multiply the Line E K, by half the Line VC.

the product gives the Content.

Note, That I Chouse the Line E. K. because the Line VC, falls iquare wife upon it, from the opposit corner, according to the Line R. 37, in the Triangle G E R. And observe that a Close of Ground 5,6,7 or more Corners should be measured into Triangles, and the Contents added.

X. Let the Figure in the Circle of Six equal sides represent the end of a piece of Timber of that Shape.

Multiply the Girt or Circumference in Inches by half the Deameter, taken from the middle of one of the fides to the Center.

XI. Let the Figure in the Circle marked W, represent a Quarry of Glass, or the shape of a piece of Timber. Multiply the dotted Line therein by one of the fides, gives the Content.

XII. How to measure a Sector, or Portion of a Circle. (being less or more than a Quadrant) as the Sector E

C S K V. in the Circle above.

First, I draw, the Right Line C K, and with the Compasses divide it into 4 equal parts, then let one Foot of the Compasses at the point K. and let of one part in the Arch-line, and fet down S. and draw the Line SO; which Line SO; shall be equal to half the Arch-line KSC. Lastly, Multiply the Line E K. by the Line \$ O. the Ptoduct gives the Area.

XIII. How to measure the Sigment KSCO, in the Sector above.

By the last Example is found the whole content of the Sector; Therefore Substract the Triangle in B ECK, (by the IX. Ex.) therefrom, and the Remainder, is the Content of the Segment. XIV.

With

With easie and Necessary Rules for the Meafuring of Superficials and Solids, as Board Timber Stone, &c. by which he may be able, before he begins, wisely to compute the Charges, like the wise Builder, that his Enemies wish, called the Spanish Curse, may not fall upon him, by ruining himself by undertaking to Build, that which he is not able to Finish; a Fault in too many.

In the next place, let me give my honeit Builder, (who is more for Necessary Convenience, then Gaudy Buildings) this General Advice, who has little or no knowledge in the following Rules to chuse out of the Neighbourhood some Building, whether a House, or Bay, or what he intends to Build, to be as a pattern to his Work-Men, who (if honest) will tell him very near the Price such a work will cost, who will do his work best by the Day; but forecast that your work (if not too large) may be Finished (on the outside) before Harvest, to prevent the Mischief that may be, by Early Frosts.

But Men of small Estates, had better hire then Build Houses there being so many already Built by Rich-Men, who would do honestly. Not to Rack Poor-Men by too great Rents, nor oblige their Tenants to UPHOLD, &c. Since Clay-Walls, Thatching and Glazing, is enough for a Tenant with his Rent and other Charges to the

Church, the Poor, High-ways, &c.

Note, Reader, I do earnestly recommend to all Builders, and Work-Men Imployed in Building to Learn to Multiply Feet and Inches together, as is shewed in the III. Ex. before; and shall also give the honest Country Builder, some hints of the Work-Mens work in Building, in Brief.

To measure the side of a House, or Roof is done by Ex. III, before, as suppose the Product of one side be 326 Foot, that is 3 Squares, and 26 Foot.

A Gabel end, is measured as the Triangle E.

C. K. in the Circle before, as Ex. IX.

Mote, That into the Square of Partitioning they nukon Door-frams; And that Windows Rooffed in the Roof, are not fingly measured, but go into the plain Square; And it is accounted amongst Work-Men to take up no more Timber, than if there were no fuch Rooffed little Windows; Nor do they deduct for Skye-lights, and holes for Chimney Shafts.

XVI. Board is measured by Ex. 3; some Multiply the length in Inches by the breadth, and divide the Product by 144 (the Inches in a flat Foot) the Quotient gives the Feet by the Line.

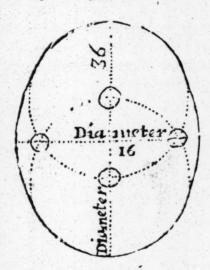

A Board 9 Inches broad, and 15 Foot long, Extend from 12 (called the center) to 9 downwards, that extend the same way will reach from 15, to 11 Foot, Answer.

A Board or Table 36 Inches wide and to Foot long; Extend from 12 (the center) to 36 upwards, that extend will reach the same way from 10, to 30,

Foot. Answer.

From 1 to 2, 3, &c.) was because the Table was above 10 Inches wide and when a Board is wider at one end then the other measure the breadth in the middle; Or the breadth of both ends added together, take half that Sum for the breadth.

XVII. To measure an Owal Table, as suppose the length be 36 Inches, and the breadth 16.

Extend the Compasses on the Line from 16, to 36, the mid way of that Extent is the mean Dimeater, having the Diameter, measure it by the 6th Example.

XX. To measure a Round Timber Stick.

Multiply the Girt in Inches (taken by a Line) by the Diameter, and that Product by the length in Inches, the Product gives the Solid Inches quant contained there; To reduce it into Feet, divide the Product by 1723. (the Square Inches in a Foot of Timber) the Quotient shews the Feet.

By the Line.

To find the true Square of a Round Timber Tree.

Suppose the Girt (taken in the middle) be 62 lnches, extend from 1, to 62, downwards, that extent the same way from 28, will reach to 17½. Inches the Square.

ATree 17 Inches and half square, and 13 Foot long.

Extend from 12 (the center) to 17, and half a
R

large Division the Square upwards, that extent twice the same way will reach from 13, to 28

Foot. An wer,

Sappy Oak-Timber, Gire it with a Line in the middle, and fold the Line, by quartering it, and measure the quarter into Inches, and call that the Square in Inches, and then measure it by the Carpenters plain Rule or Gunters line, which is all one, in this matter, which measure the a Stick 40 Foot, when there is 50 Foot in it, which they call an allowance for the Sap in Oak.

XXI. To Measure Timber that is Squar'd by the Ax.

Multiply the breadth, by the thickness in Inches and that Product by the length in Inches, and the last Product divide by 1728, as before

By the Line.

A Piece of Timber 24 Inches square, and 8 Foot long.
Extend from 12 (the center) to 24 upwards
that extent twice the same way, will reach from
8, to 22 Foot

Note, That some Carpenters add the breadth and thickness together in Inches, and call has thereof the Square of that piece of Timber, but if it be wider then it's thick, they measure it is more than is in it.

Ru

Carpenters Work.

36 3

But to find the true Square is by placing one Foot of the Compasses upon the Line, for the breadth, and the other Foot for the thickness, the mid way of that Extent is the true Square in Inches.

To measure Timber, whose Shape at the ends are like the Triangle E. C. O. K. in the Circle before.

Meafure the end in Inches, by Ex. IX. and that Sum multiply by the length in Inches, which divide by 1728. as above; And if Timber at the ends be like the Figure X. in the Circle above, observe the Xth Ex. or like the Figure W. of 4 equal sides, in the Circle above, observe the XI. Example.

### II. Of Brick-layers Work.

Bricklayers measure their Walls commonly by the Rod of 16 Foot and half (as Land) the Rod containing 272, Square Feet upon the

Superficies of the Wall.

Their Materials or Brick, made of a Reddish Earth, which ought to be digged before Winter and not made till the Spring, to be well seasoned with Frost, the Moulds (according to the Statute, ought to be within side, in length 9 Inches in breadth 4½ Inches, and in thickness 2¼; a Cart Load of Brick is accounted 500, and of Tiles 1000.

It's faid, that a Square Yard of well wrought Clay will make 7 or 800 Bricks, and that out of the Owners Clay, a Workman for 6 or 7 s. the 1000. will make them without any further charge

to the owner.

But if you buy Brick or Tyle; Chuse such as are of a bright Red Colour, and that will ring when knockt, but the Blackish Glazed Bricks are best for Chimney stafts.

breadth all hal er, bu re it fo XXII. To Measure Brick-Walls.

Suppose a Wall to be in length 120 foot, and 13 foot 3 inches high, the Product done by 3d Example, will be 1590 foot. Which to reduce into Rods, is by dividing it by 272 (omitting the quarter of a foot, as not regarded by Workmen,) the Quotient gives 5 Rods, 3 quarter and 42 foot.

W Note, That 136 foot is half a Rod, 68 a quar-

ter, and 204 foot, 3 quarters of a Rod.

Or extend from 272, to 13 and a quarter of the great Division on the Line downwards, that extent will reach the same way, from 120, to 5

Rods, and about 48 parts, the Answer.

Having measured the face of the Wall, or House, on the outside thereof, then measure the end thereof on the inside, and make deduction for Doors and Windows. Note, But if the Wall be either thicker or thinner then a Brick and half, it must be reduced into Standard measure, (that is) one Brick and shalf thick. The Rule.

Multiply the number of feet measured on the face of the Wall, by the number of half Bricks the Wall is in thickness; one third part of that Product gives the Number of feet contained in the Wall, which reduce into Rods, by dividing

it by 272, as above. By the Line.

How many Rods of Brickwork is there in 4085 foot. Extend from 272, to I downwards, that extent the same way from 4085, to about

15 Rods, Answer, Or thus,

If a Wall be 9 Rods on the outlide, and 4 half Bricks thick, How many Rods of 1 Brick and a half is there in the Wall. As 3 is to 5, to 9 to 15, Answer.

Extend from 3 downwards to 5, that extent will reach the same way from 9 to 15 Rod,

Answer.

A Table shewing the number of Bricks, or very near, that a Wall-may take up of 16½ foot long of any thickness, and to any height, not exceeding 20 foot high. The Use, A Wall of under pining a

A Wall of under pining a Rod in Length, and 1 foot high.

Look in the top of the Table for 1 foot in the first Column, and against it is 176, shews that so many Bricks will do it, at 1 Brick length thick; and 264 at one Brick and a half thick, as the Table sheweth. At 3 Bricks thick, double the number 264, and so of the rest.

Note, That all Joysis and Summers that are to ly in Brickwalls, ought to have their ends run over with Pitch, to preserve them from Lime.

As to the measuring of Chimneys, I need not write of, for they comonly are done by the great; And,

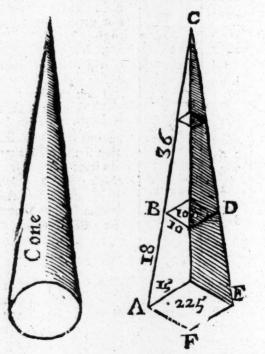

R 3

Note, That if the infide of a Chimney Shaft does as it were lean Northwards, it carries off the Smoak the better: And that all Chimneys, tho' of Stone, or Brick, should be well mortared on their infides with Clay tempered with Horse-Dung; for Sparks has got through the Cracks of a Brick Chimney, and fet the House on fire.

Where the Foundation of Brick Walls are to be built, should be firm and dry; but if any Spring, drive Elm Stakes there, with a two

handed Beetle.

XXIII. To measure a Cone, or Round Spire Steeple.

Multiply:

f

tho' ed on lorfe-

Shaft

re to

e on

ple.

iply

Multiply the fuperficial Inch at the bottom thereof, (measured by Ex. VI.) which having found, multiply them into one third of the length in Inches, gives the solid Inches, which divide by 1728, the Quotent gives the Feet.

XXIV. To measure the other Pyramid, or Square Spire See eple.

Multiply the Line or Side A. F. (that is, one fide in its felf) gives the superficial Inches at the bottom; then multiply that Summ or Product into one third part of the Length (as the Cone) gives the Content in square Inches.

By the Line.

Extend from 1 to 225 the flat Inches at the Base (or bottom of the Pyramid A. E. F.) upwards, that Extent the same way will reach from 18 (one third part of the Length) to 4050 the Content in Cubical Inches.

XXV. To measure the Segment, or Frustrum, (so called) of the Pyramid, or lower end, A.B.D.E.F. the other end, B. C. D. being cut off.

The easiest way is thus: Suppose the whole Pyramid or Cone to contain (as before) 4050 Inches, then measure the top part, B. G. D. singly, which suppose to be 1200 Inches; substract this from 4050, and the Remainder is 2850 Inches, the Content of the Frustrum, A. B. D. E. F.

# III. Of Tyling.

TYling is measured by the Square of 10 Foot, as the Carpenters Work.

The Charge of a new Square of Tyling.

I

Y

I

A Workman will find all Materials (in some Places) for 25 s. the Square; or repair old Tyling with new Lath, Mortar, and new Tyles, where Need is, for about 12s. the Square.

It's faid, that a straight-grain'd round piece of Oak Timber, 10 Inches square, may be render'd into 400 Laths; and that a Workman will rend 1000 for 3s.

Five Foot Lath is 5 Score to the 100, and Four Foot Lath 120 to the 100.

A Piece of Timber (it's faid) of 6 1 Inchesbroad, and 3 2 Inches thick, cuts 8 Eaves-Laths.

When the Mortar is worn much out of your old Tyling, point it with Lime and Hair, to prevent the Wind blowing them off, or the Snow driving under the Tyling, and there it lodgeth on the Cieling under the Tyles (if Cieled) and when it thaws may do much Damage to the Cieling and some Goods in the House.

# IV. Of Plaistering.

P Laistering or Cieling is measured by the Yard Square, of 3 Foot, which is 9 Foot.

The Length and Breadth being multiplied together by the 3d. Ex. does the Work. For Gabelends, fee Ex. IX.

Note, That if you are about to measure the Plaistering of most of the Rooms in a House,

by the general Rule, do thus:

First, upon a Sheet of Paper draw 4 Columns, as, (1.) The Name of the Wall, lying East, or Wist, &c. or Gabel-end. (2.) The Length in Feet and Inches. (3.) The Breadth in Feet and Inches. And the last Column, for the Content in Yards, Feet, and Inches, done from the General Rule, Example III.

Having finished every Room, you may (if you will) prove your Work by Guiter's Line,

thus:

#### XXVI. A Wall cieled 5 Foot wide and 7 Foot long.

Extend from 9 always (the Feet in a Yard) to 5 upwards, that Extent the same way from 7 will reach to 4 Yards. Answer.

Note also, In another Place of the Sheet of Paper make 4 Columns more, for the several Deductions of Windows, Doors, Chimneys, and Hearths, and the like.

To refuce the feveral Products of Feet, divide them by 9, and the Quosient gives the Yards to be placed in the faid last Column.

Note, That Bricks between Studs keeps not out driving Rain so well as Plaistering without Doors.

#### The Charge of Gieling Six Yards.

| - CD: D                          |      | a.  |
|----------------------------------|------|-----|
| For 100 of Five Foot Laths -     | 02-  | -00 |
| For 500 Repairation-Nails        | 00-  | -10 |
| For 2 Bushels of Lime and Sand-  | -10- | -06 |
| For 3 Pecks of Hair              | 00-  | -00 |
| Workmanship, at 2 1 d. the Yard- |      |     |

The Plaisferers in Bedfordsbire will find Materials and Workmanship for 12 d. the Yard without Doors, and 10d. the Yard within Doors; but if there's a considerable Quantity of Work to be done, they will do it at 10 d. the Yard; or 2 d. the Yard, the Owner finding Materials.

Note, That Hart-lath is best to be used both within and without Doors, tho' some are for Sap-lath in the House, but there's nothing saved at long-run by using Sap-lath.

# V. Paving with Brick.

THirty two covers a Yard. A Workman will find Lime and Sand, and lay them at 8 d. the Yard. Some Beople lay them with Sand only, and serve pretty well in a dirty Room.

t

t

P

n

# VI. Of Pitching.

Pitching is also measured by the Yard:
The Charge of pitching eight Yards,
wiz. A great Cart load of Pibbles worth 4 s.
and a Cart load of Gravil 2 s. Workmanship at
2 d. half penny the Yard, but there will want
more Gravil if the Ground be not firm.

### VII. Of Joiners Work.

Joiners Work is measured by the Yard, as the Plaisterers, only where there is a Cornice (in a Room wainscotted) or swelling Pannels, and Moldings, they take the Depth of the Room with a Line, denting it into the Hollows, and then measure the Line in Feet and Inches for the heighth of the Room; and then measure round the Room with a Four foot Lath, (as Plaisterers do for the more Expedition) and multiply the length and breadth, as in the General Rule, Ex. III. and the Product divide by 9, and the Quotient shews the Yards (as of Plaisterers Work before) deducting for Doors, Windows, Chimney-pieces, &c.

In measuring Window-Shutters (in a Room) being all of one heighth, they measure the heighth of one, and call that the breadth; and for the length, they measure the breadth of them a I together, which are to be multiplied together, viz. one length and breadth by the said General Rule, (which is more exact than by Gunter's Line.) Now suppose the Product is

246 foot, 6 inches.

-09

-03

Mate-

with-

ors; Vork

; 01

both

e for

fa-

will

8 d.

on-

The Joiner being paid for one fide of the Shutters, for whole Work, so called, and for R6 plaining

plaining the other fide the Shutters, is called half Work, to be paid at half Price of the other.

Therefore the said Product for the best side of the Shutters being 246 foot, 6 inches, to which add half thereof, for the said half Work makes 369 foot, 9 inches, to be reduced into Yards, by dividing it by 9, as before.

The same way of Measure they observe for Wainscot Doors, and Cupboard Doors, where

they are plained on both fides.

Lastly, If the Cheeks or Jaums of Three Windows wainscotted be in length in the whole 63 foot, and the breadth 5 inches, done by the General Rule, Ex. III. make 26 foot 3 inches.

# VIII. Of Glasiers Work.

The glazing of new Windows is measured by the foot. Plain Glazing 6d. the foot, new Leading 3 d. Repairing 2 d. a foot, a sin-

gle Quarry fixing 1 d.

A Quarry of ordinary Glass' (like the Figure marked W, in the Circle before) is 6 inches from corner to corner one way, and 4 inches the other, containing 12 inches in all, and therefore 12 Quarries make a foot.

fixed in the Lead, with Linfeed Oil, to keep

out Rain.

If you have feveral Pains of Glass, in one Room, all of one heighth, lay a String along the Glass of the Window, and take the breadth of all of them together into one Summ, which call the length, and the heighth of one Pane the freadth, and work by the General Rule, not dedicting for Ovals, and half Rounds, or Crocket Walled as in Some Work, for they are all negatived.

measured, as if they were square, because of the loss of Glass, and the trouble in fitting them.

Every foot of new Sheet Lead weighs, it's

said, 8 or 9 16. but the old about 6 or 7 16.

A yard square of new Sheet Lead is worth.

13, 14, or 15 s. and a square of 10 foot, 7 or 8, in Money, besides Soder, at 9 d. or 10 d. the lb.

The Exchange of old Sheet Lead for new, is, in

fome Places, 3 s. the hundred weight.

ken to finish a Building, &c. and leave the same Work without just Cause, two Justices may commit the Offender to Prison, without Bail, for a Month, and to forfeit Five Pound. See 5 El. 4.

# IX. Of Painters Work,

THeir Work is measured as the Joiner's Work,

by the yard.

Painting Wainscot with Oil Colour, thrice done over, 10 d: the yard, if Linseed Oil is not too dear, and 6d. the Light for large new Window Frames.

ber, both within and without Doors, preserves it from the Worm and Weather, so as it be done over with a Brush in dry Weather, once every Seven Years, without being ground with Colours, as the Glovers grind their Colours for Gloves.

But for fuch as may fee it needful to use Coleurs, their Names are as follow.

Whites are Ceruse, Plake White, and White Lead.

it

W

te

S

with the following: Boil half a pound of Glew in a quart of Water until the Glew is disfolved, always stirring it; then mix a han Iful of Wheat Flower with cold Water, and put it to the rest, and boil it well; when it's dry, and scraps, (if need be) colour it, if you will, with the Size warm, and some Colouring.

To colour a Sign-Post: Grind Spanish Brown and Red Lead thinly with Linseed Oil, and brush it over thinly, when it's dry, use White Lead twice, (some basely use Whiten) and if it be not white enough, do it over again. Observe the same for Window-Frames, if Oil alone

pleafe you nor.

Cleanse your Pencils and Brushes (before they are too dry) with hot Water and Soap; and if they are hard and dry, boil them in the same. Keep your Oil Colours in Bladders tied close; and those in Pots, put them in Water till you need them.

Loy a Lanthorn-Horn on a printed Flower, and with Ink draw the Stroaks on the Horn, when it's dry, breathe on the Lines, and press it

hard on Paper.

Priming Dial Boards, is the brushing them over with Linseed Oil thinly ground with Spanish Brown, done over 3 or 4 times (drying between) thicker and thicker of the Colour.

oil for Dials: Boil Red Lead and Linfeed Oil till it's as thick as a Syrup almost; when it's cold, and well fettl'd, pour the cleanest into a Bladder for use, and is called the Fat Oil.

The Gold Size for Dials: Mix fine ground Yellow Oaker with the Fat Oil, fo that when a Figure is made with it, it may be of that thick-

ness as to settle its self smooth.

To mark out a Dial upon a Wall: Fix the Dial drawn upon Paper against the Wall with Nails, and you may mark out the Hour-lines to what length

Glew lved, heat rest, i, (if

IOS,

d fo

make

o p.

Acre,

A-

I shall be very brief in these things, because I have more largely done it in the Fourth Edition of this Book, to which I refer thee; yet shall give the Use of the Chain.

How to measure Land by Gunter's Chain.

Note, That this Chain is 4 Poles in length, or 22 yards, 66 foot, 792 inches; it is divided into 100 links, at every 10 links is a brass Ring for the more ready counting it in measuring, fo that it's no matter which end goes foremost, and he that draws it should carry in his Hand io small Sticks to stick in the Earth at every Chain's length, and he that follows the Chain to gather up the Sticks.

Example.

Length 9 Breadth 6

4750

Suppose the length of a Piece of Ground be 9 Chains, 50 Links, the breadth 6 Chains, 25 Links, how many Acres, Roods, and Poles ?

Multiply the length by

the breadth, as whole Numbers, and from the Product 593750, I cut off five Figures next the right hand, and the remainder on the left hand are Acres, as you may fee in the Margin.

1900 5700 Acres 5 1 93750

Rood 3 1 75000 Pole 30 1 00000

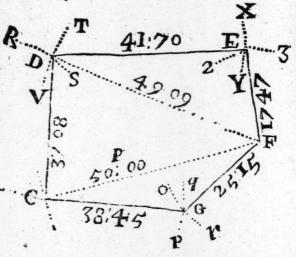

Secondly, The remaining Figures, 9375, fo cut off from the 5 Acres, I multiply by 4, (the Roods in one Acre) from which Product I also cut off 5 Figures, or Places, and the remainder is 3 Roods.

Laftly,

fhall

No e, That if in any length or breadth taken by the Chain, the links are under 10, add a Cypher to the left hand thereof, before you begin to multiply: And whereas there were nothing but Cyphers cut off from the 30 Pole before, but if they had been Figures, as 34762, they would want of a Pole so much as that Summ wants of 100000. So that the Answer is, 5 A. 3 R. 30 P.

To take the Plot of a Close or Field on Paper by the Chain or Perch, (but the Perch must first be divided into 100 parts, as I mentioned before,

Let

they

mm 5 A.

on

erch

men-

Let

Let the Figure C. D. E, F. G. represent a Close or Field to be plotted on Paper.

First, I measure with the Chain, (or Pole, divided into 100 parts) from F to C, (the dotted Line within the Close) which contains 50 Poles.

Then I measure the fide C. G. 38 Pole, 45 parts, and the fide F, G, 25 pole, 15 parts, which done,

I open the Compasses upon the Scale of equal parts, to 5 parts of the great divisions, to significe 50 poles, and that extent I set on Paper, placing F. at one point, and C. at the other, and draw the dotted Line, if you will.

Next, I take from the same Scale, or Line of equal parts, 50 poles, 45 parts, setting one foot at the beginning of the Scale, and extend the other to 3 of the greater divisions, and 8 small parts, and almost kalf a part surther with that extent, set one foot in C, and with the other I draw the Arch pole q.

Then again, take the diftance 25 pole, 15 parts, from the same Scaie, and with that distance set one foot in F. and draw the Arch O. R. cutting the sormer Arch in the point G. then draw the Line C. G. and F. G. So is the Triangle C. F. G. described on Paper.

By this Rule you may finish your Plot, obferving that it must all be dided into Triangles by Example 12th.remembringthat for every chain or pole you must take off the Scale, one of the great Divisions, (as from 4 to 5 is division) one and for every to links, or one tenth part of your pole, take one of the small divisions: with the Compasses you may make a line of equal parts, according to the bignels you

the bignels you desire your Plot; or having drawn a Plot, may by this Rule make it bigger or lesser.

### Of Gaging . Vellels.

THE Art of Gaging is little different from the Measuring of Timber, (before directed) as in a foot of Timber is 1728 cubical or square inches, and as often as 1728 inches are found in a piece of Timber, be it round or square, so many foot of Timber is contained in the piece.

So in the Art of Gaging, the Gallon for Ale and Beer is agreed on, to be 282 cubical inches, and the Wine Gallon 231, and the

Callon of Dry Measure 272.

Therefore to often as 282 square inches is contained in any Vessel round or square, so many Gallons of Ale or Beer the said Vessel will hold. The same is to be observed in Wine and Dry Measure, Sc.

Note, That every cubical foot may contain 6 Gallons and almost a pint of Ale or Beer.

Of Wine, 7 Gallons, 2 Quarts, and almost a Pint.

And a cubical foot of Dry Measure may contain 6 Gallons, and a little above half a Gallon.

For 141 inches is in 2 Quarts of Ale or Beer,  $70\frac{1}{2}$  one Quart,  $35\frac{1}{4}$  inches in a Pint.

See Reduction of Liquid Measure.

Plot,

Though you may gage Vessels by the Rule in Timber-measure, notwithstanding take a tew Examples in as easie a manner as I can.

See Receptive Measure in Reduction.

Example 1. Suppose there is a square Tun to be measured, ( somewhat like the Figure of the Square Foot of Timber in Exam. 3.) in length 105 Inches, in breadth 76, and depth 46 Inches, how many square Inches is therein, as also how many Gallons or Barrels ?

Multiply the Dimensions one into another, as is shewed in the 1st. Example in square Timber-measure, and the last Product gives 367080 inches in the Tun: Which divide by 282, or multiply by this number 35461, as in this Example.

> · Cube inches in the Tun 367080 The Given Number 35461

Prove this Summ, and fuch-like by the Cross.

367080 2202480 1468320 1835400 1101240

Tu

G. 1301/7023880

And from the Product cut off 7 Figures (always) or places, to the right hand, (which are the parts of a Gallon) and those to the left hand are Gallons, as in this Example is 1301 Gallons.

Note, That the parts of a Gallon is not confiderable, if there happen to be a Cypher next the Gallons: But in that above is the Figure 7, which is the 7 tenth parts of a Gallon; that is, if a Gallon was divided into 10 parts, this is 7 parts thereof; or if the Figure 5 had been

in the place of the 7, it had been half a Gallon, because 5 is the half of 10; or if the 70 next the Gallons had been 75, it had been three quarters of a Gallon, because 75 is three quarters of 100, &c.

re 7,

this

been

Laftly, Divide 1301 Gallons, so cut off, by 36, (the Gallons in a Barrel of Beer, or by 32 the Gallons in a Barrel of Ale) and the Quotient gives 36 Barrels of Beer, and 5 Gallons remaining, and near three quarters of a Gallon.

Example 2. How to Gage a round Tun, Tub, or Furnace.

First, If your Tun, or the like, be of one bigness or breadth, both at top and bottom, find the Cube Inches therein contained, as is shewed in round Timber-measure, and reduce it into Gallons, as before.

But if it be narrower at the top than at the bottom, or the contrary, take the breadth or diameter of the Tun, a little above the middle of it, that is, next the widest end.

Or find the mean Diameter thus:

The Diameter at the Bung or top of the Tun,

The Diameter at the Head or Bottom of the Tun,

3 Inches difference,

The two thirds of the difference is 2 Inches, which added to 23, the leffer Diameter makes 25 the mean Diameter.

Therefore suppose the mean Diameter of a Tun, Tub, Furnace, or half a swelling Cask,

or the like, to be 81 Inches, and the length 48;

how many Gallons is therein?

The Cube Inches contained therein, you may find by the Rule in round Timber-measure, as thus :

The mean Diameter is 813 Inches. Length of the Veffel 485

Multiply 81 by 81, and that Product by 11. (always) and the last Product divide by 14, (always) the Quotient gives the Content at one Inch deep of the Liquor (if any.) 2dly, Multiply the faid Quotient by 48, (the length of the Veffel) and the Product gives the folid Inches in the same, which reduce into Gallons. and the Gallons into Barrels, gives 24 Barrels, and about 13 Gallons.

Example 3. Suppose the mean Diameter of a Cask is I4 Inches, and the Length 72 Inches, bow many Gallons are therein?

Extend the Compasses on Gunter's Line, from 19, 95, to 14 the Diameter, that extent twice.

downwards, from 72, the length, will reach to fornewhat above 39 Gallons of Ale.

But if it was a Wine Vessel, exrend from 17, 15, (always) to 14 the Diameter, that ex-

tent twice downwards from 72, the length in Inches will reach to 48 Gallons.

Example 4. Suppose a Cask containing 60 Gallons, the Bung Diameter 28 Inches, and the Liquor drawn off 7 Inches; Then the wet Inches of the Diameter must be 21 Inches; The question is, How many Gallons remains in the Cask?

Divide 7 the dry Inches of the Bung Diameter by 28, the whole Diameter, adding two Cyphers.

Thus 788 (26 Quotient. 288

Next, Seek the Quotient 25 in the Table, and against it you may find, 1955, which number I multiply by the whole content 60 Gallons, thus

Against 25, the Number is 1955

Gallons — 1117300

From the Product, I cut off four Figures (always) fo that the empty part of the Cask is 14 Gallons, and the Fraction 7300 makes about 3 quarters of a Gallon, because 7300 wants about a quarter of 10000.

Lastly, The whole 60 Gallons, the part empty 113 Gallons, Then the Liquor remaining in the Barrel must be 48 Gallons, and a quarter of a Gollon, the Aniwes; Or thus,

Divide the wet Inches 21 by the whole Diameter 28, adding 2 Cyphers, as before,

Thus 2x08 (75 Quotient.

The

F

th

be

Ear

Fig Ad

Ran

Wor Ear The Quotient 75 feek in the Table, and against it is the Number 8045, which Multiply by 60.

Thus 8045
60
Gallons 4812700

The Liquor 48 Gallons, the Answer, only the Fraction 2700, being about, or somewhat more than a quarter of a Gallon, because 2700 is about a quarter of 10000.

Remainder or Fraction, and that be about half the Divisor, I take the next bigger Number: Or if it be less than half the Divisor, I take the same number which is in the Quotient,

## XXIX. Of the Globe of the Farth.

B'Ehold a Figure thereof, which follows, That the Young Man (my Reader) may not be altogether Ignorant of the Scituation of the Earth, on which we poor Mortals dwell; This Figure may give fo much Learning, as to cause Admiration in the Hearts of all Men (except Rantere, that is Athiests) to consider, how wonderfully God hath Fram'd the Globe of the Earth and Water.

The

Of the Globe of the Earth. 390

this Circle, marked Water, Earth, doth reprefent the Globe of the Earth, yet it's supposed to be two thirds Water or Sea, and one third Earth, like unto a round Ball, or Globe, held up alone by God's Hand, Job 26. 7. because on every fide it is furrounded with Stars, and failed about by Men in Ships, and that every earthly thing (on which side soever it is) presseth towards the Centre thereof, that is, towards the very middle thereof.

For further Proof, that Man cannot fee any Foundation the Globe of the Earth hath, let us ascend into the Sky : As to the North Pole Star, at N. in the Circle above, which suppose to be a fixed Star in the Firmament; and at S. on the other fide the Globe, is the South Pole Star; from

th

vec its

froi

tha

fide

dle

whe

Earl

feen

then

Moo

to fo

in th

one of these Stars to the other is a Line imagined to pass through the very Centre of the Globe of the Earth, which supposed Line is called the Axletree of the World, because round it, and also round the Earth, the Sun circleth once every 4 Hours.

The edge of the Beams, as I may fay, runneth along the Globe of the Earth and Water, if the Air is clear, 15 Miles in a Minute, that is, 900 Miles in an Hour, and 21600 Miles every

24 Hours.

hin

Further proved, thus: The Arch-line, in the Circle last past, noted N. W. is divided into 90 parts, called degrees, or one quarter of the Globe, a degree being accounted 60 miles upon the Earth; therefore I multiply 90, the quarter of the World, by 60, the Product is 5400 miles of one quarter of the Globe, which multiplied by 4, gives 21600 miles, that the Beams of the

Sun circleth round the Earth in 2+ hours.

That the Globe of the Earth is as a Ball in the Air, fix'd by God's Almighty Power, is proved by the Eclipse of the Moon, a dark Body of its felf, having no Light but what it receives from the Sun; so that that fide of the Moon that is next the Sun is all light, and the other. fide dark, (as when in the Night we hold a Candle to a Ball, half the Ball looks dark;) fo that when the Sun is on one fide the Globe of the Earth, and the Moon on the other, the Centre of the Earth between them, then the Earth in some measure hinders the Sun's Light coming to the Moon, part of the Body of the Moon feeming dark to our fight, tho' the Moon be then in the Full, as to us in England; tho' the Moon may be faid to be in the Full at all times, to some Places of the Globe. (But more of this in the 7 Arts before.

star, to be

from

one

Note, That between the Letter N, and the Line E. W. in the Circle above, is written Tropick of Cancer, the half of it is a dotted Line, yet it is as much a Circle as the Circle, E. N. W.S. Every Circle of the Sphere are supposed to be divided into 360 parts, called Degrees. Now this imaginary Circle, called the Tropick of Cancer, being the outward Bounds of the Sun, next the North Pole, which the Sun circleth in on the 11th. Day of June, yearly, making our Days at the longest

Observe the same of the middle Circle, called the Equator, or Equinostial Line, which as it were cutteth the Globe of the Earth in the middle, which the Sun circlesh in on the 11th. of March, and the 11th. of September, yearly, at both which times the Sun, that makes the Day, makes our

Days and Nights equal.

And when the Sun cometh to the other Circle, called, by Scholars, the Tropick of Capricorn, it makes our Days at the shortest, which is on

Th

To

Ir

Lon

Lor

Inc

A 1 Mor

Poo

Eta

Nak

the 11th. Day of December.

Now because it hath pleased God, the wonsderful Creator of Heaven and Earth, to so order it, that the Bounds of the Sun shall be from the Tropick of Cancer to the Tropick of Capricorn, to enliven the most fruitful parts of the Earth; for if God (for the Sins of People) should withhold its Heat from the Earth but one Year, most Creatures therein would perish; no Grain would ripen, &c. who would but fear to sin against such a good God, who causeth his sun to shine on the Good and on the bad, because of which his servants seek the Good of all.

Now those Parts of the Globe, next the North and South Pole, where the Land is, have in some Place wild Beasts that have Dens in the Earth to keep them warm; it's too cold for Man to inhabit in, one Year, tho' there be half a Year called.

called Day, the Sun being feen some part thereof circling round the edge of the Land, as I may say, and when the Sun is out of their sight, it still gives some Light to make up that half Year Day; the other half Year, called Night, wants not altogether the Light of the Moon and Stars.

Note further, That those Three Imaginary Circles, with others between them, Astronomers call the 12 Circles, or 12 Signs of the Zodiack, giving Names to them, as Aries, Taurus, &c. The Distance between the said two Tropicks are reckoned 47 Degrees, every Degree under them on the Earth being 60 Miles; so multiply 47 by 60, gives 2820 Miles of Earth that the Sun circleth just over the heads of some of the Inhabitants, twice in the Year, that in some Places they have two Harvests in one Year; but we in England have not the Sun at any time come just over our heads, for we dwell towards the cold North Pole, somewhat near the Letter R. in the Circle before,

The Sun runs round our Globe, and in its Days
Cheers every Creature with its pleasant Rays:
So Truth's more glorious Sun shall beam its Light
To all the World, before Eternal Night.
When Gage's Travels in the Western Land
I read, and mind the Spaniards proud Command;
Love to the poor lost Indians makes me cry,
Lord, when shall Truth top this base Tyranny?
Indian, lift up thine Head, thy Day-Star shines,
A People comes, not for thy Silver Mines;
More precious Treasures draws their Love to thee;
Poor Man! thou hast a Soul as well as we;
Eternal Blist! for that's their Aim, don't forn,
Naked Men shall the Naked Truth adorn.

More, That the People which the Author means, in the Verses aforesaid, were those true Christians that are come, and coming to perswade

the Naked Indians to choose Which Fra. Xathe Divine Grace, or \* Influvice, the Jesuite, ence of God's Holy Spirit. rold she Indians was (in themselves) with the the Divine Law, Divine Precepts of Christ Ieand was before any fus, in Holy Scriptures, Law was made by for their Rule of Faith and the Antients, that Life. shewed them they Ib nld not Kill, Steal, &c.

Such true Christians are not for destroying the Bodies of poor naked Indians, as was the cruel Spaniards, who first found out their Dwellings, and, for the Love of their Gold and Silver Mines, put to death above 6 Millions of the Indians, roasting some, plucking out Eyes, cut-

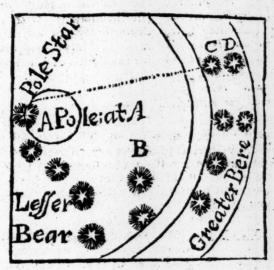

ting off Arms, &c. as Histories relate.

That part of the World being found out in the Days of Queen Elizabeth, which for its largeness is called one Quarter of the World, or America, a Sea between it and England is about 4000 Miles, the Land lying partly Westward from us in England, and therefore is also called the W.st-Indies; for when the Sun sets to us in England, it's said, that then 'tis about mid-day to them in America. But to return,

XXX. To know the Latitude or Altitude of the North Pole Star above your Dwelling.

IN short, thus: The Sun riseth Eastwards to us in England, and setteth Westwards; at 12 a Clock mid-day the Sun is full South, if at that time you turn your Back upon the Sun, you will face

face the North fide of your Dwelling. Thus knowing the North fide of your House, go out in a Star-light Evening, and see if you can espy 6 or 7 bright Stars somewhat at certain Distances like those 6 Stars, in the Figure following, called there the Creater Bear, but because of their

constant certain Distance one from another, were anciently called Charles Wain; but chiefly you are to take notice of the two Stars thereof, noted G. D. called the Tail or hinder part of the Wain, because those two Stars always answer to a right Line, to the North Pole Star, which in this Figure is a dotted Line, and in that posture circleth round the North Star every 24 Hours.

But the Pole of the World is supposed to be where the Capital Letter A. standeth, and the North Star goeth round it also in 24 Hours. See

the Figure above.

at

CO

Having learned to know the North Star; to know the Latitude of your Dwelling, hold up a Quadrant, (a Figure of one see in Dialing,) and through the Sights thereof, or along the strait edge, spy the North Star, the Plummet hanging at Liberty, the Thread will rest at 51 degrees, 32 minutes, if you are in London; see England before, for the Latitude of the Ghief

Note, That the Degrees are numbered from the Equinoctial Circle, as from W. toward N. in

the Figure of the Globe before.

Towns in England, drawn in a Table.

And when we say such a Province, or Tract of Land lieth from 30 to 40 degrees North latitude, it lieth on the North side of the Tropick of Canter, as you may see in the Kigure of the World before, as the sigured Arch there, which is but 10 degrees from the North to the South part of that Province, or 620 miles; but are to seek the longitude, without some knowledge therein.

#### XXXI. Somewhat of the Longitude of Dladet.

The Longitude of a City, or other Place, is the Distance thereof; from the Isle of St. Michael, one of the Isles of the Azores, beyond Poringal, from which Isle the longitude of Places upon the Earth are numbred, in the Equinodial Line, towards the East; the said Isle of St. Michael's North latitude being 39 degrees, as my Author saith.

Geographers having chosen the said Isle to divide the Last part of the World from the West, because the Seamans Compass (a Figure whereof follows) when it cometh under this Meridian line, thawn through or over this Isle, hath not (as Seamen observe) any Variation at all, but pointeth directly North, without Variation: But

whereas :.

whereas in other Places, or lesser Meridians, East or West, it pointeth not directly North, but more or less to the North-East, or the North-West, this is called the Variation, or North-westing, or the North-easting of the Seaman's Compass.

Note, That this Meridian drawn through the faid Isle, is only an imaginary Circle, as those before-mentioned, as the Circle E. N. W. S. Example XXIX. cutting through, or rounding

both Poles.

I

There are Meridians for every Town, which lie East and West from each other, yet several Towns may lie in the same Meridian that lie North and South from each other; for when we see the Sun at mid-day, we say the Sun is come into our Meridian.

For when two Cities lie both under the Equinoctial Line, or very near it, it is but multiplying their Distance in degrees (in the Equinoctial) by 60, gives their distance in miles.

If two Cities propounded (faith P. Wing) do differ only in latitude, and lie both of them on one fide of the Equinoctial Line, you must substract the lesser latitude from the greater, and

the Residue is the distance required.

But if the two Cities or Places propounded lie the one on the North side the Equinoctial, and the other on the South side, then you are to add the two Latitudes together, and the Summ will give their distance in degrees and minutes, which reduce into miles, allowing so miles to adegree.

But Ishall not enlarge upon these things, having not room enough; and besides, the Longitude and Latitude of Places upon the Earth are best known by the Artistial Terrestrial Globe, which are to be had at easie Rates in London.

Geographers, according to all the Relations of Travellers, agree, (faith the Author of the Monthly Moreury, ) That never any Vessel approach'd the Artick Pole much nearer than the Fourfcore and fixteenth degree, by reason of the perpetual Ice in those Parts. There remain then to the fouricore and tenth degree, four degrees Impracticable, which make Fourfcore good Leagues of Prance, and Four hundred and four of ley Circumference, which, at another time. there being in that Part but thefe four degrees of Ice, afforded us in the Summer-time fuch pleasing and pure Breezes; but this not being every Year alike, we are now fensible of the sharpness of the Cold and Fogs which this unusual Ice sends among us. Certain it is, that the Ice dilates it felf more or less, according to the Heat which the Sun leaves behind him, during his fix Months Residence among us.

The Winter in 1692 was so very sharp, that the Sea was frozen over to the 55th. degree; and all the Baltick Sea, our Neighbour, within 200 leagues, was frozen over. So that the Sun in his usual course repussing the Equator, and ceasing to illuminate our Pole, could not thaw the Ice farther than the 70th. degree, through the Opposition of those Foggs which the Thaw of those 15 degrees of new Ice brought to his Beams, and to some Southerly Winds, which were at first repuls'd, which was the Reason that our Europe was in so much Disorder, and that her

Harvests wanted their usual Maturity.

It may be asked why the Sun does not give an equal Heat every Year; but we must observe, that when the Sun comes to the Tropick of Cancer, and when he begins to retrograde, when the Ice of 70 and 80 degrees are not melted, we shall hardly meet with 15 days that are truly hot; to the Equinox, of Sepsember. The Reason is,

becaule.

because we are not above 200, 300, and 400 leagues distant from that Ice, and there are 560 of our 50th degree to the Tropick: So that the neighbourhood of that Wind easily repels the South Wind, and hinders the Sun from warming our Horizon, as it was wont to do.

Our only Succour is, that frequent Storms may happen between the Tropicks, in the Months of July and August, which may afford us Winds sufficient to melt that unusual Ice, and hedge it in again within the 80th. degree, before the Sun is gone into the other Hemisphere, and that our Countries may reassume their former Vi-

gour.

It may be ask'd also, why the North-East and North-West Winds, and their Compounds, tho' parallel in distance from the North, are felt with so much difference. The North-East Wind coming from the frozen Sea of Tarrary, and passing through the long Continent of Tarrary, Poland, and Germany, to France, are often more

sharp and pure than the North.

The North-West, though it blow from the 70th degree of Frozen Greenland, parallel to the North-East, the Vapours of the Sea through which it patles to us, render it more soft, and less cutting to us, which is the Reason of so much melted Snow among us. England, the Coasts of Holland, and Britayne, clarine it a little by the thick part which they receive from it before it comes into France.

t

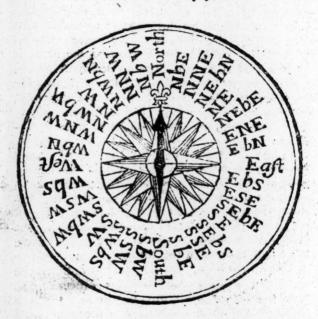

a

h.

th

XXXII. The Thirty two Winds, or the Seamans Compass.

First, to describe part of the Figure thereof, the black Needle in the Centre points with its great end to the Flower-de-luce. Such a little Circle as incloseth the Needle, is often set in Paper Maps, the Flower-de-luce shewing the North-side of the Map.

Secondly, The Letters N. by E. on the right hand the Fower-de-luce, is read North by East, the next after it North North East, and so round the Circle, which Seamen have by heart, but more especially the Pilot who guides the Ship by it, and sometimes is help'd by the Sight of the North Star on this side the Equinoctial Line; and the

the South Pole Star is a help when he fails on the

South fide the Globe.

Thirdly, the Compass is fix'd in a Pastboard Box, in the Centre is set up a hollow Pin of Laten, a little hole being in the middle of the Needle to set on the Pin, that the Needle may be as upon a Balance, the great end of the Needle being rubb'd with a Loadstone will turn Northwards at all times, the said Box hanging (as it were on an Axis-tree, or 2 Pins) in another Box, between two Hoops of Brass or Laten, that howsoever the outermost Box is tossed in the Ship, yet the inner Box hangs level with the Horizon.

It is placed in the middle of the Pape, upon a right Line, imagined to pass by the Main-mast, through the Centre of the Ship, and putteth the Pilot in his way, knowing which way the Landbeareth which the Ship is sailing towards.

Lastly, The Line of North and South found out by the Needle, a Line crossing this at right Angles sheweth East and West, and so they are

called the 4 Cardinal Winds.

Cross again each of these Lines, and they

make 8 whole Winds, as they call them.

Another Division of these maketh 8 more, which they call Half Winds; a third maketh 16, which they call Quarter Winds; so they are

32 in all.

re it,

nd

Every one of these Winds is otherwise termed a several Point of the Compass, and the whole Line consisting of two Winds, as the Line of North and South, or that of East and West, is called a Roumb, the Winds and Roumbs thus assigned by an equal Division of a great Circle into 32 Parts.

# Of Plain Triangles.

IF two Ships set sail at one time, the one sails directly East 74 Leagues (as from C. towards A. by the Figure of the Tower that sollows) the other sails directly North, 62 Leagues, (as from C. to B. near the said Tower) I would know how many Leagues these two Ships are asunder.

74 multiplied by 74 is 5476 62 multiplied by 72 is 3844

Added, are 9320

9379 (97, the square Root. Distance almost 97 Leagues.

To know the Square Root of any Number.

The square Root of any Numer is found by extending the Compasses on Guater's Line from one upon the Line, to that Number, the mid-way of that Extent is the Root, or Number desired; for 12 is the Root of 144, because 12 times 12 is 144.

As suppose a Captain bith \$476 Soldiers, how to place them square, viz. How many to set in front and flank.

Extend the Compages from one upon the Line

Line to 5476 downwards, the mid-way of that Extent is 74 Soldiers both for front and flank.

More, That I said before, that 12 is the square Root of 144, then 12 is the Cubick Root of 1728.

1-

s,

Thus proved:

Extend from 1728 to 1. two thirds of that Extent will reach from 1728 downwards to 12 the Cubick Root.

If 12 be the Cubick Root, what is the Number?

Extend from 1 to 12 upwards, that Extent thrice the same way from 12, will reach to 1728 the Cube Number.

Now for the Triangle, A. B. C. by

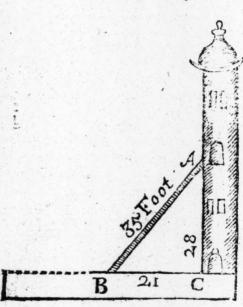

Suppose the Line A. B. the Ladder, to be 35 Foot long; B. C. the distance from the foot of the Ladder to the bottom of the Tower at the point C. be 21 Foot.

The Question is. How many Foot is it from the bottom of the Tower at C. to the top of the Ladder at A. the Answer will be 28 foot.

Base, the Line C. A. the Perpendicular, and the Line A. B. or Ladder, is called the Hypothenusal.

A. B. the Hypothenusal 35 Foot:

175 105 Product 1225

B. C. the Base 21 Foot. Multiplied together - 21 Foot.

Round Trancher, and having drawn a Quadrant by this pattran, you may Paste it in, with that Paste mentioned in the Painters work before.

### How to take the height of a Tree, or Steeple by the Quadrunt.

Hold up the Quadrant, and spy through the sights, or along the edge D. G. the top of the Tree, stepping backwards, or forwards, till the Plummet hangs at liberty, just against 45 degrees, that is, the very middle of the Quadrant; Then is the height of the Tree equal to the distance of the Root thoreof, to your standing place, to which add somewhat more than the height of the Quadrant, as you hold it, is above the Earth, or your place of standing.

By the Quadrant, you may try, whether a Wall be upright or no, by holding the edge G.

B. to the Wall.

And try the top of a Post, for a Post Dial, to know whether it be a true Level, by laying a Ruler on the Post and holding the edge of the

Quadrant A. B. under the Ruler.

And to level Grass Plots in Gardens, drive into the Earth divers little Stakes, and lay a 10 Foot Fir Rule from head to head of the Stakes, and apply the Quadrant under the Ruler, in di-

vers places.

And also to try whether water may run through a Pipe of Lead laid in the Earth from a Spring to a House at distance, drive a stake into the Spring, and another in the place whether the Water should come, both of the same height, and spie through the sights of the Quadrant from the top of one stake to the other, and Experience will Resolve you.

How to take a long Distance that you cannot measure to by reason of Water, &c.

1

U

O

Firft, Observethe Figure, and let C. be your standing place, and let E be afar off. ofe di-flance from G. you

would know. Then walk right forward from your standing at C, towards E. any numof yards or Perches; as suppole 50 to A, where fet a Staff.

Then move in a Tá Perpendicular Line to C. E. from A. to. B. making a right Angle at A. any

distance.

Suppose 66, and fet up another Staff

Then come back co again to C, and remove in a Perpendicular line to C. E. till you fee the mark fet up at B. and the point E in a right lines and fet up another Staff at that place at D. getting the exact

th H distance thereof from C, which suppose 76; then Substract A, B, 66 from the Measured distance C, D, 76, and not the Remainder, which is 10, then say by the Rule of Three.

As 10 is to 50, fo 66 to 330.

330lo

330 0 (330 Perches from A to E, Answer

Or, as to to 50, fo 76 to 38010.

How to draw a Dial, upon a Stone or Wooden Ball or Globe, thats fixt on a Gate-Post or any other place.

First, Hold the Quadrant close to the side of the Ball or Globe of Stone (in a Star light Evening) the Plummet hanging at liberty, spy thro' the sights thereof the North Poll-star, as is directed in Ex XXX. the Thread thereof cutting the degrees of your Latitude; Then make a spok on the Ball, next to, or that point towards the said North Star,

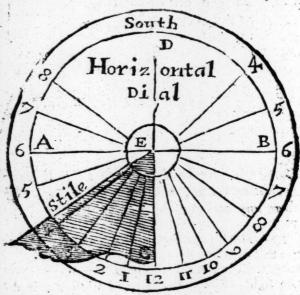

secondly, Draw a Circle directly round the very middle of the Ball, or two Circles to place Figures for the Hours. So that every fide of the Circle be of equal distance from the said spot.

Lastly, Having a Post Dial or other Dial near the place, or a Watch, marke both edges that the Sun makes on each side the Ball for every Hour, Se.

Note, That by this Rule you may draw a Sun

Dial upon a round Pillar.

An easie way to make a Post Dial, and is called an Horizontal Dial, because it faceth the Skie over our Heads, or hes level to the Horizon.

First, with a Ruler and the point of the Compasses draw a Line on Paper (at any length) as the Line A. B. in this Dial, then cross it, with another Line, as the Line G. E. and South on the top, as in this Dial, which Line E. G. is the 12 a Clock Line, and the Line, A. B. the 6 a Clock Line.

Next, Open the Compasses, and set one soot at the beginning of the Degrees or Arch edge of the Quadrant (before discribed) and extend the other soot to 60 degrees, with that extent set one soot in the Center of the Dial by E. that is, just where the first Lines crossed each other, and draw the half Circle A.G.B. Next

h

th

Next having the 12 a Clock line E. G. Now to know what distance I shall set off from for 1 a Clock and 11 a Clock, which is all one.

I look in the little Table in the Margin, and in the second D. M. Hours. Column I find against 1 hour and II in the first Column II 11. 55. 1. 11. 24. 26 2. 10. degrees, 55 Minutes which I 38. 13.3. take of the edge of the Qua-53. 44.4. drant, thus I fet one foot of the Compasses (as before). at the begining of the Divisions (under B.) and the other foot to 11 degrees, and almost a fmall part, the Compasses so opened, I set one Foot in the Circle at the bottom of the 12. a Clock Line, and with the other Foot marke in the Circle, both towards A. and B. and from those two markes, I draw-lines with the point of the Compasses to the Center E. for 1. and 11 a Clock Lines, which Lines you may after black with Ink.

Next, To marke the Hours for 2, and 10. a Clock. Look in the Table, for 2 and 10 hours, and you will find 24 degrees, 26 Minutes, which fet of the degrees of the Quadrant as the other, from the 12. a Clock Line both ways in the Circle.

Observe the same for 3. and 9 a Clock: And 4. and 8 a Clock, and 5 and 7 a Clock And for the Hours of 5 and 7. and 4 and 8 above the Six a Clock line, set off the distances below, see the Dial; before

Lastly, for the height of the Stile, as suppose 52 degrees, see Ex. XXX, take it of the edge of the Quadrant, as the other above with the Compasses, and with that extent set one

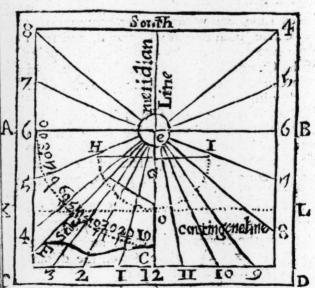

1 3

foot

foot at the bottom of the 12 a Clock Line, as you did before, and extend the other foot in the Circle and make a mark, and draw a line from thence to E. the Center for the edge as you may fee in the Dial is shaded with short lines, but the stile is to stand upright in the 12 a Clock Line.

ther in Dialing, Read with understanding Ex. XXX. last past, to know the North Pole Star, But for the Latitude of the Chief Towns in England, you may see in a Table before, see Somewhar of England.

How to draw an Horizontal Dial more Artificially.

First, Draw the Square or outside of the Dial wherein the Figures for the Hours are to Se-

Secondly, Draw the line C. O. E. for the 12 a Clock line, called also the Meridian line. Thirdly, Cross the said 12 a clock line for the 6a clock line, which in this Dial is the line A B.

Next, Open the Compasses and set one foot in the Center at E. that is, where the two sirst lines cross each other, and with the other foot draw the Arch C, A. which in the Dial above is Figured within, with 10, 20, 30, &c.

Next, With the Compasses divide the Quarter of the circle into 3 parts, and then each part into 3 makes 9 parts; or go as you may see in the Dial before. Then begin to number in the circle the Latitude of the Pole, as to 52 degrees, and from thence draw the stile, which is the line F. E. in the Dial before.

Next, Draw the Dotted line K. L. squaring the 12 a clock line, at a convenient distance from the line of 6 a clock, parallel thereto, which line is called the line of Contingence.

Next, Set one foot of the Compasses in the point O. that is, where line of Contingens cuteth the 12 a clock line, and take with the other foot the nearest distance to the line F. E. of the line of the Stile, and with that extent, one foot resting in O. extend the other foot towards E. in the 12 a clock line, and draw the half Equator, or half a circle, which in the Dial before is marked H. I. O.

Next, With the Compasses, divide the half circle into 12 equal parts, laying a Ruler upon G. the center of the half circle, that is in the middle of the line H. I. and every several mark made in the half circle drawing lines through those marks at length, and where those lines shall touch the line of conting ence, there make marks.

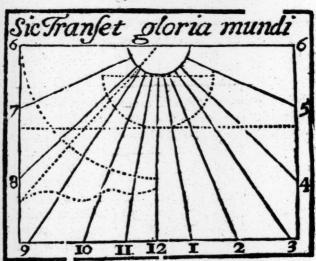

T 4

Lastly,

416 The Art of Dialing.

Lastly, I ay the Ruler from the center E, on the Dial, to each mark made in the contingent line, and from whence draw the lines at length for the hour lines. Note, For the hour lines above the 6 a clock line, extend the 7 a clock line through the centre, and it will be for 7 at night, &c. The line F E. being the edge of the stile to shade the hour lines, must be set upright on the 12 a clock line.

To make a South Erest Dial.

The making of this Dial differs very little from the former, as you may see by this Figure, only the Stile of this Dial is to be the height of the other part of the Quadrant, as 30 d. the other being 52, or made according to the Latitude of your Habitation, and the Stile of this South Dial, the outward edge is a dotted Line between the Hours of 8 and 9.

Note

tle

E,

n-nc

he

he

ill

ng

3,

Note, That the Dial above serves for a Walt facing the South; but if you turn the same Dial upside down, it will serve for the North side of the Wall, if the Line marked 7 be marked 5, and the Line 8 with 4, the Line 5 with 7, and the Line 4 with 8. All the other Hour-lines in this North Dial are useless, because the Sun in England shines on a North Wall, the longest Day, only before 6 in the Morning, and after 6 at Night.

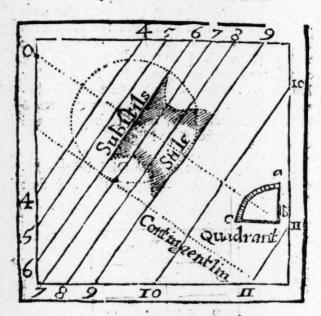

Or you may make a South Dial by this little Table, as is directed, of the first Post

|    | 52   | Deg    | rees. |  |  |
|----|------|--------|-------|--|--|
| D. | М.   | Hours. |       |  |  |
| 9  | 22   | 1      | 11    |  |  |
| 19 | 33 1 | 2      | 10    |  |  |
| 31 | 36   | 3      | . 9   |  |  |
| 46 | 48   | 4      | . 8   |  |  |
| 66 | 26   | 5      | . 7   |  |  |

T

1 ( San 10 , 11 )

To make an Erest direct East Dial.

First on Paper draw a Quadrant like unto the Quadrant a. c. b. in this Dial, but of the Bigness of the Quadrant A. C. E, and figure it as that in the last mentioned Post Dial; let the side thereof, a. b. be upright, the Arch beholding the South, dividing the Arch into 90 parts, (as is taught) beginning to number the Elevation of the Pole at A. towards C. 52 Degrees, or according to the Latitude of your Dwelling; then lay a Ruler on the Centre of the Quadrant at B. and to 52 Degrees, and draw a Line with the point of the Compasses, so long as your Paper will give leave, which is the Line O, B, in this Dial.

Next.

r

f

V

ITA

Next, Draw a Circle in the Line O. B. fquare wife to the same (a Rule for it that follows) for the 6 a Clock Line, to place the Stile on.

Next, on the out-fide of the Circle draw a contingent Line squarewise also to the 6 a Clock line; then divide the half Circle next the contingent line into 22 equal parts; then place a Ruler upon the Centre of the Circle, and to each mark severally made in the half Circle, and draw lines, where the lines last drawn cutteth the line of Contingence, there make marks.

Then from the marks made in the contingent line, draw lines parallel to the 6 a Clock line, as the Figure of the Dial before fleweth,

Fix the Stile upon the 6 a Clock line perpendicular to the Plan, whose height is to be half the breadth of the Circle, the outward edge parallel to the Hour lines which may be

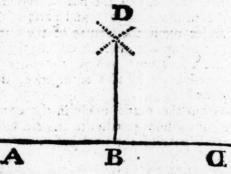

made of Brass, Laren, or Wier.

Note, Whereas this Dial ferveth only to face the East, but if you desire to make a West Dial, it is but taking your East Dial already drawn upon Paper, and lay the face thereof to a Glass Window, and draw the fame lines on the back of the Paper Dial, fo will you have an East Dial on one side, and a West Dial on the other, having first set Figures against the Hour lines, that is, instead of 11, 10, 9, 8, 7, 6, 5, 4, in the East Dial, you must ses against the same lines on the West Dial, 1, 2, 3, 4, 5, 6, 7, 8, Sc. Allo nore, That you are to place no lines in these Dials, befides the Hour lines, and that if you have a Glass Window facing either the East or West. YOU

420 The Art of Dialing.

you may paste the face of one of them to the Glass, fixing a Wier thro' the Lead for the Stile.

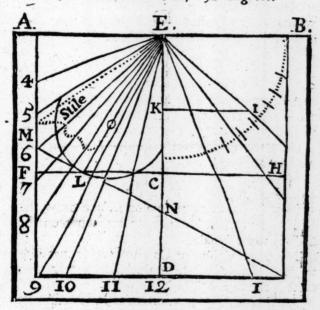

How to make two Lines cross each other, exactly square, which may prove a Carpenter's square Ruler, or to erect a perpendicular Line upon another.

First, let A. B. C. be the given line, which divided into two equal parts with the Compasses, as at B. then open the Compasses at any distance, and set one foor at the end of the line at C. and draw a short Arch, as under D. then with that Extent, setting one foot at A. cross the Arch under D. Lastly, lay the Ruler upon the Centre, or just where these two Arches cross each other, and the middle of the given line at B. and draw a line to B. or further.

Parallel lines, or lines of equal distance, is only by setting the Compasses twice upon a line, and drawing dark Arches, as a Guide to draw another line, as this Figure sheweth; for fuch lines can never meet, of what length fo-

How to make a South Erest Declining Dial, in the Latitude of 52 Deg. 14 Min. Declination of the Plane or Wall, 52 Degrees.

First draw the line called an Horizontal line, marked A. B. in this Dial.

Next draw the line E. D. for 12 a Clock line, squarewife, to the line A. B. as before directed.

Next draw the line F. H. parallel to the line A. B. at what distance you will, next, upon the Centre E. draw the Quadrant, or quarter of a Circle, as E. B. C. in the Dial above.

Next divide the quarter of the Circle into

90 parts, or degrees, as before is taught, and number in it from C. towards B. the Complement of the Pole's Elevation, 37 Deg. 46 Min. where make a mark, from which mark in the Arch draw a line to the Centre E. which line is extended to H. in this Dial.

Again, account in the faid Arch from C. towards B. the Declination of the Wall 52 Deg. and from thence draw the line I. E. as in the

Dial above.

Next fet one foot of the Compasses in the point C. and extend the other to the point H. that is, where the line E. H. cutteth the line F. H. the foot resting in C. extend the other foot to the nearest distance of the line E. I. where make a mark, and draw the line I. K. parallel to the line C. H.

Next take the just length of the line I. Kand place one foot in C. and turn the other towards F, and mark the point L, and draw the line L. E. for the Substile, or line whereon the Stile is to be fixed.

Naxt, draw line of Contingence squarewise to the Substile, in the point L. which in this

Dial is the line M. L. N.

Next take the distance between the Centre E. and the point K, and place that Extent in the line of Contingence, from the point L. to M. and diawathe line M. E. for the Stile, which in this Dial is a dotted line.

Next take the nearest distance between the point L, and the line of the Stile, one foot remaining in L turn the other towards E, and make the Centre O in the Substilar line, upon which describe the Equinoctial Circle, or so much as may serve next the Hour lines.

Next

Next lay a Ruler upon the Centre O, and N, that is, just where the line M. N. cutteth the line E. C. D. being thus laid, make a mark by the side of the Ruler, where the Ruler cutteth the half circle, for there you are to begin to divide the circle into 24 equal parts, notwithstanding those are only in use which are next the contingent line.

Lastly, Lay a Ruler upon the centre O. and upon the several marks or divisions made in the Equator or half circle; and where the edge of the Ruler shall then touch the line of contingence, make marks or points therein; from which points made in the contingent line draw lines to the centre of the Dial at E. which are the Hour-lines, the rest of the lines put out.

Place the meridian line, E. D. perpendicularly against the Wall, the centre E. upward; let the stile or line M. E. hang directly squarewise over the substilar line, or line L. E. making an angle equal to M. E. L. as you may see in the Dial.

Note, That if you are to make a Dial that is to decline, your own Observation will soon tell you whether it declines to the East or to the West, it being for a declining South Wall; but if you fix it on the North side the same Wall, it will serve for a North declining Dial, turning the centre E. downwards, putting out some of the Hour lines.

Note also, that if you are to make a Dial that is to decline as far as 60 deg. draw it on a boarded Floor, and cut off so much of the Dial next the centre as may answer the bigness you delign it.

Characters

## Chrafters, or Short Hand.

THE Letter c. is a downright stroak, only it is a little turn'd on the top, towards the right hand; and the d. is as much turn'd towards the left hand; w. is a downright stroak also, but longer than the b. and turns up at the bottom like the Letter r.

Lastly, The Letters c. r. q. v. x. y. z. refem-

ble common writing.

All that would learn this curious Art,
Must, in the first place, get by heare
The twenty four Letters in the first row,
So with much ease all the rest may soon know.

The easiest way to learn to write Characters, and understand them, is,

First, Take 6 Sheets of Paper, and make a Quarto stitch'd Book of it, as a Copy-Book for

Writing-Schools.

secondly, Rule it quite through, as for writing Copies; then at the left end of the first line set a. with the Character for it; on the next line b. with the Character; next one of the double Consonants, Ge, and the Words in order, and gather the Characters for Words out of the second Table, setting the Signification to each word, as the Figures direct; until you have set them all-down.

Lastly, Begin at the first Line to fill it with the Character of a's, next Line, b's, &c. Thus the writing them over will imprint them

in the Memory, to learn with ease.

The Explanation of the first Table of Characters.

n

al

b

b

Ъ

b

b

b

C

F

N the top of the Table, under the Figure 1. are the Marks or Characters for the 24 Letters of the Alphabet, which ought to be often writ over, the only way to have them in Memory.

Secondly, Under the Figure 2. are the donble Letters or Confonants, each are to be written

without taking off the Pen.

Thirdh, Under the Figure 3. in the faid Table of Characters, are the places of Vowels, as s. e. i. o. u. without which no word can be written at length.

Example.

The first Letter that begins that part under the Figure 3. is the Capital Letter B the Character 1. having a.e. i. o. u. against it; the Vowel a is set on the top, the Vowel e. on one side the top, the Vowel i. against the middle, the Vowel o. against the bottom, and just underneath the Letter 1 is the Vowel u.

So that when you write the Letter i with a dot over it thus i, the dot or period being in the place of a. it must be read Ba or i: but a dot on the fide stands for 1. Bi or By, or you may when another Letter follows the Vowels place, and under the B. against the Figure 3 is nat (=) first the Character N. then the Character T. is fet in the place of a. and below that is the Characters Nut, thus 1 . N. fet first, and T. is fet in the place of U. being under the N. Again, in the same lesson of the word (Sion) for S I fet down the Character S. then in the place of i. I fee down the double Letters on ; the last word in this letter is go, for which is the Character go and a dot in the place of o. Having learned these three lessons perfectly, the fourth will be easie, for they are all made up of Letters, except three, that is the Chara-Eters for ture, mount, tent. Note.

Note, That the first letter of a word ought to be somewhat bigger than those that follow; and note that u. always follows q. in all words, therefore need never be written after q.

Neither is true spelling minded in this Art, only the sound of the word, as for Author write Ather, and abbreviate all the words you can, as

, hele following words show.

ecution.

186 Expectation Expect 187 Extraordinary.

188 Zerubbabel.

189. Expounded.

190 Omnipotent, Omnifence.

Note, That the way to be perfect in the Charafters, is the often writing them over in a Book ferting the Character to each word, as in the Table before, according as the Figures direct, to each word, as before directed.

Note alfo, You may invent divers other marks (when you have learned the above) for long words or Sentences usual in the Scripture, as Go. Governer, G. for God ; M. S. Manuscript, Q. queftion, A. answer, M. Majesty Dr. Doctor, Mr. Mafter, Mrs. Miftrefs, or Dame; And for Pratice Write every day one of Daniels reading Pfalme in a Book, fetting (1) (2) (3) (4) 6. as the begining of every verfe.

do best.
